Vol. XXVIII

Texas Technological College, Lubbock, Friday, October 3, 1952

No. 4

## Classes To Elect Their New Heads

Class officers will be elected following the all-school convocation to be held in Tech Gymnasium from 10 to 12 a.m. Wednesday. Dr. E. N. Jones, new president, will be introduced to the students and will address the assembly.

The Tech chorus will sing Tschakowski's "How Blessed Are They" under direction of Dr. Gene Hemmle. Several numbers will be played by the band. Dr. Arthur W. Young, sponsor of the Student Religion Council, will give the invocation.

Following the address by President Jones, Harold Brannon, Student council president, will explain where the classes will go to elect class officers. Freshmen will remain in the Gym, sophomores will go to the Aggie auditorium, juniors will meet in the Chemistry building, Room 101, and seniors will hold their election in the Engineering auditorium.

School leaders who will be sitting on the platform directly behind the speakers' stand include all Student council members; all deans; M. L. Pennington, vice-president and comptroller; J. Roy Wells, assistant to the president; W. P. Clement, registrar; W. T. Gaston, business manager of the college; Col. Ollen Turner, professor of air science and tactics; and Lt. Col. Humphrey Green, professor of military science and tactics.

This will be the first schools assembly, and the first introduction to the school of Tech's new president and new school leaders.

### NOTICE

Students who will be interested in going to the official out-of-town game in Denton Nov. 8 by chartered bus are urged to clip the coupon on page 5. Fill out and turn it in to the Student Council office, Ad161.

## Applications for Deferments Set

Students eligible to take the College Qualification test on Dec. 4, 1952, or April 23, 1953, should apply at once to the nearest Selective Service local board for an application, according to J. E. Terral, director of test administration.

Following instructions in the bulletin, the student should fill out his application and mail it immediately, Mr. Terral says. Applications for the Dec. 4 test must be postmarked no later than midnight, Nov. 1.

Results of the test will be reported to the student's Selective Service local board of jurisdiction for use in considering his deferment as a student.

## Traffic Court Summons 50 To Appear For First Session

Summons have been sent for 50 student traffic violators to appear before the Tech Traffic court, says Roy Grimes, chief justice. Court will convene at 6:45 p.m. Tuesday in Ad219.

The group includes first, second and third offenders who made the violations last spring. Grimes pointed out that traffic violation records are carried from year to year, and not destroyed at the end of each session.

### Summons to be Sent

Summons will be sent to this year's offenders next week. The campus policeman has already issued 586 tickets since school started. This is an average of more than 34 violations per day. More than 100 were issued at the Ad-building parking lot Monday morning.

The court, whose justices are appointed from the student body, has the power to summon traffic violators before them. Students who receive their first ticket are warned and told what the court can do about repeated offenders.

### Warned Again

Students who receive tickets a second time are again warned of the course that the court can take with repeaters.

(See TRAFFIC COURT, page 8)

## Shakespearean Play Cast by Speech Group

### Rosemary Sprague Earns \$100 Award

Rosemary Sprague, Lubbock sophomore, has been awarded the \$100 Alpha Lambda Delta scholarship, says Gwen Williams, historian.

Alpha Lambda Delta, freshman women's honor society, gives the award to the sophomore girl with the highest grade-point average for her freshman year.

First meeting of the society will be at 5 p.m. Tuesday in the seminar room on the second floor of the Chemistry building. Miss Martye Poindexter, head of the applied arts department, will talk briefly about applied arts hobbies. Plans for doughnut and brownie sales have been approved by the Student council and will be discussed at the meeting. The annual Alpha Lambda Delta tea for freshmen women will also be discussed.

Officers for the club are Margaret Lee, president; Mary Ann Gidney, vice-president; Louise Davis, secretary; Donna Upton, treasurer; Anne Anderson, AWS representative; Mary Frances Forkner, junior advisor; Ellen Massengill, senior advisor.

### Pep Rally for Convocation Approved by Pres. Jones

Four cheerleaders, president of Saddle Tramps and editor of *The Toreador* met with Dr. E. N. Jones, Tech president, to discuss possibilities of having a brief pep rally during the convocation Wednesday.

Pending approval by the Student council, which is in charge of the convocation, Dr. Jones agreed to the suggestion.

Those attending the meeting were Peggy Karnes and Ann Lee Turner, girl cheerleaders; Don Andress and Dick Shockley, boy cheerleaders; Bill Bales, Saddle Tramps president; Shirley Johnson, editor of *The Toreador*.

Tentative cast for "Comedy of Errors" by William Shakespeare, to be presented Nov. 10-15 in the Speech building studio theatre, has been announced by Ronald Schulz, director of drama.

### Leading Roles

Harriet Henderson, Lubbock sophomore, and Beverly Ross, Pampa junior, have been double-cast in the lead role of Luciana. The two will alternate in the role each time the play is presented. Warren Forsythe, senior from Lynnwood, Calif., a veteran Tech thespian, and Leonard Gaston, Lubbock sophomore, will portray the male leads of Antipholus of Syracuse and Antipholus of Ephesus.

### Other Castings

Other members of the cast include Eleanor Lincoln, junior, Levelland; Jeannine Stearns, junior, Monahans; Jerry Raun, senior, Harlingen; Jarold Comer, freshman, Pampa; Danny Dearen, freshman, Pampa; David Larson, sophomore, Lubbock; Jack McCabe, senior, Lubbock; Hardy McNew, sophomore, Lamesa; Jim Speer, sophomore, Olton; Dale Karpe, freshman, O'Donnell; Ronald Still, freshman, Pampa; Jim Freeman, junior, Hamlin; Roberta McGinnis, graduate, Lubbock; Anita Pope, senior, Lubbock.

"Comedy of Errors," which is generally thought to be Shakespeare's earliest comedy, will be the fifth Shakespearean production presented by Tech students. Previous plays include "Twelfth Night," "Romeo and Juliet," "Taming of the Shrew" and "As you Like It."

### Annual Tour

Each year the Shakespearean production is taken on a tour of various South Plains towns. A similar tour is being planned this year for Nov. 17-24. The schedule of towns to be visited is still indefinite. Plans now provide for a stylized Elizabethan set which can be conveniently moved from town to town, Mr. Shultz says.

## Scholarships Set In Engineering

Applications for scholarships in the Division of Engineering may be made until Wednesday in the office of Dean Dysart E. Holcomb.

The Southwestern Public Service company scholarships in electrical and mechanical engineering with a value of \$750 each are offered to any student in those fields.

The Standard Oil Company of Texas scholarships is open to senior engineering students regardless of major. The value of this scholarship is \$500.

Magnolia Petroleum company offers a scholarship of \$750 to any senior student majoring in petroleum engineering.

D. D. Harrington Freshman Engineering scholarships with a value of \$750 each are available to two freshman engineering students regardless of major.

One award, available for senior students majoring in mechanical engineering, has a value of \$500 and is given by Hughes Tool company.

## Tech Students To Study Atom Cousins; Radioactive Isotope Program Planned

To the average Tech science student, such words as radioactive, neutron, and isotope will become something familiar.

The reason for this sudden acquaintance with cousins of the atom is that Texas Tech will soon take its place among other colleges and universities in the use of atomic energy for the purpose of scientific study.

### Foot in Door

Tech began putting its foot in the door last summer when Dr. Herman Glaser, associate professor of physics, attended a month's program at the Oak Ridge Institute of Nuclear Studies. There the young physicist gained experience in working with radioactive isotopes.

He explains that one of the primary peacetime uses of atomic energy is the application of certain radioactive elements or isotopes as "tracers".

An isotope is one of an element's

various forms. Each of about 100 known elements may have several different forms, which differ primarily in atomic weight. Artificially radioactive isotopes may be prepared by bombarding appropriate targets with neutrons. The radioisotope will then emit certain radiations by which one can characterize the isotope.

### Trace Isotope

By detecting these radiations with Geiger counters or other appropriate instruments, a scientist can trace the course of an isotope through any system—such as that of the human body or a growing plant.

Scientists are using the system successfully in the fields of chemistry, medicine, engineering, physics and agriculture.

Plans for a radioactive isotope program at Tech have not yet been completed, but are expected to include many of the scientific departments on the campus.

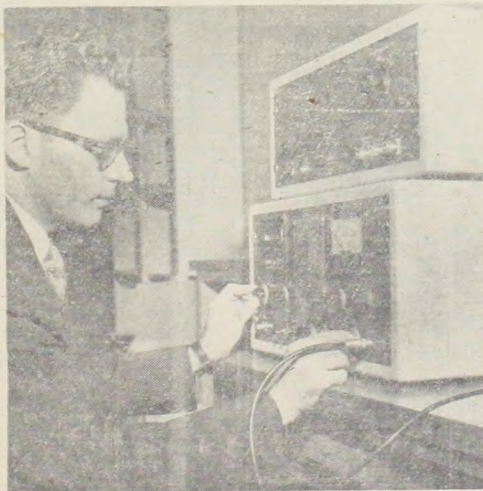

## No-Date Dance Saturday At Rec

A new idea for Saturday night Rec hall dances will be initiated Saturday with hopes that more students will attend.

There is a "no date" dance and only stags, both male and female, are to be admitted to the dance.

As are all Rec hall programs, the dance is free and is open to all students. Jess Parrish, Rec hall director, states that students must arrive stag but no checking will be made as to how they leave.

Dance time will be 8:30 to 11:30 p.m., with Burl Hubbard's Varsitians furnishing the music.

Dr. Herman Glaser, associate professor of physics, is shown above.

# New Home Management Baby Gets Care and Entertainment

A dainty, blue-eyed blonde with fair complexion has moved into the Home Management house, with seemingly no feeling of jealousy on the part of the seven other girls.

Although she is a regular occupant of the house, she is treated more like a queen. Besides requiring amusement, she must have her food only at certain times of the day and night. She is fed every three hours during the day, at 10 p.m. and 2 a.m. during the night. The girls don't seem to mind feeding, bathing, and amusing her; in fact, there have been no complaints.

Sharon Ann Killgore, 7 pound, 12-ounce daughter of Mr. and Mrs. Mark Killgore from Roscoe and Sweetwater, is Tech's smallest resident. Sharon, whose father is a second-semester sophomore Arts and Sciences student and whose mother is secretary of the dorms, is only a month old and is on the campus as the Home Management house baby.

### Chief Mother

Miss Lola Marie Drew, advisor in the house and associate professor of home management, is the chief "mother" for Sharon. She is assisted by all senior home economics majors: Jan Edwards, Juanelle Talbott, Jo Alice Stout, Claudine Goen, Sandra Ainsworth and Mrs. Elizabeth Hansen.

A baby has been cared for in the house for 15 or 20 years as part of student training. Applications from parents are received with preference given to Tech students.

Sharon receives a visit from her parents every day, goes on weekend trips with them from Saturday noon until Monday and visits them on all holidays.

### Expenses Paid

While she is in the house all her expenses are taken care of, including room, furnishings, equipment, clothing, food, and medical care. The girls rotate duties in caring for Sharon, but she never feels as though she is with strangers as she sees each of them every day. The jobs of baby director and associate director are also rotated.

"Sharon gets all the attention she could possibly want with love provided," Miss Drew says. "Taking care of a new baby teaches the students to tend to a baby according to his physical, mental, and emotional needs."

MOTHER AND CHILD?—not exactly, but Juanelle Talbott tries to give Sharon Killgore, Home Management house's baby, the care the child's own mother would. (Keith McMillin photo).

# Placement Office Requests Forms

Candidates for 1952 degrees, including January, May and August classes, are requested to turn personal information forms in to the Placement office by Oct. 15, says Jean Jenkins, Placement office director.

Filing the form, together with two glossy print photographs, is a requirement for graduation. The director says that the photographs may be turned in later when they are available from the photographer.

Students wishing printed data sheets must file their request and pay the \$6.50 fee by the Oct. 15 deadline. Copies of the personal information form may be obtained from the offices of the deans of the divisions concerned, or from the placement office.

# Modern Dance Club Invites New Members to Meeting

Modern Dance club will meet at 7 p.m. Monday, Oct. 6, in the Gym, stated Nancy Herrington, newly elected president.

Those wishing to join the club should bring clothes to work out in. No dues are assessed and no experience is required for membership. Officers will be elected to supplement those elected at the last meeting. Miss Herrington, Lubbock senior, has been elected president and Jeanette Hill, Lubbock senior, first vice-president.

# Alpha Phi Omega To Hold Smoker

Alpha Phi Omega, national service fraternity of former Boy Scouts of America, will have a smoker at 7:30 p.m. Tuesday in the Green room, says Bob Bentz, president.

Dr. E. N. Jones, Tech president, will speak stressing facts about the fraternity's past record of achievements. Refreshments will be served during a "get-acquainted" session. All former Boy and Cub Scouts are invited.

The fraternity bases its ideals upon the Boy Scout oath and laws. By this, it is meant that APO performs its services for the community, school, student body and faculty. APO gives a Christmas party for Milam's orphan home each year as its highlight project. It also performs various campus services as guiding campus tours, helping in registration and building concrete benches for campus bus stops.

# Boyett Asks Clubs To Enter Parade

Organizations which did not receive letters from the Homecoming committee and which are interested in entering a float in the parade are asked to contact Brian Boyett, committee chairman.

Entries in the parade must be submitted by next Friday. After that date, a meeting will be held for representatives of clubs entering floats to make plans and draw for positions.

Las Vivarachas, women's social club, took first place among 38 entries last year with its float, "Orchids to the Eeexes."

American Institute of Mechanical Engineers was awarded a plaque for the most descriptive float, "Oil for the Wheels of Industry."

Comic honors went to Future Farmers of America for "Life in the Student Union Building, 1963."

# Photographers Will Cover South Plains Fair Friday

Members of Rollin Herald's beginning photography class will go to the Panhandle-South Plains fair Friday, Tech day, to take pictures.

The pictures will be developed later in the photography lab.

# Plans for Merger Adopted by Clubs

Merger of Pre-law and International Relations clubs was approved at a joint meeting of the organizations at 7:30 p.m. Tuesday.

All students interested in pre-law or international relations are invited to attend meetings, which will be held at 7:30 p.m. each Tuesday in Ad323.

On a steering committee appointed to handle club business until permanent officers can be elected are M. D. Stevens, Martha Lou Hubbard, Don Hancock and Max Preston.

Also present at the first meeting were Sam Findley, Glen Wells, Charlie Bowen, Bob Dickenson, Jim Spears, Margaret Lee and Dr. J. William Davis, sponsor.

# Spanish Honorary Club Hears Report at Meeting

Sigma Delta Pi, national honorary Spanish fraternity, met at the home of Evelyn Sue Burks, 2623 thirteenth street, Tuesday evening, said Joanne Schovaggs, reporter.

Members of the class that studied in Mexico City this past summer gave the club a resume of their experiences.

"Your Downtown Campus Shop"

Firkusny R Hemmie R

For the first time of Tech artist course are return engagements scheduled by popular students. Rudolf Firkusny, who appeared in the fall series Nov. 14.

The courses continue Dallas Symphony of 7 Jascha Heifetz, violinist, completes the Jan. 14.

A Festival of Songs by Fred Waring's orchestra first in the spring series. 18. Lara Hogard, vocal group club. Mr. Waring appear on the program.

Eleanor Steber, opera soprano, completed her series of appearances March 9.

All regularly-enrolled students have been issued books and are admitted each course by use of a card. Dr. Gene H. of the music department.

Dr. Hemmie is chairman of the fall artists course. Other faculty members: N. White, assistant English, and Dr. P. L. son, head of the department.

Students on the campus: Joyce Carhel, Hardy Joe Hastings.

SICK LIST The infirmary sick list included: Moe Sweetwater; Aletha Lubbock; Mrs. Shirly Lubbock.

Pre-Med Society Plans, Opens Meetings

Alpha Epsilon Delta pre-med society, planning for this semester and plans for receiving party meeting Monday.

Qualifications for in AED are: 2-point average science courses, 49 hours with a 17 over-all average pre-med major. Interested should see Herbert Bentley.

AED meets at 7:30 p.m. on Monday and fourth Tuesday in room G, Chemistry building.

Other officers of the Coy Orr, vice-president; Bentley, secretary; B. reporter.

Keys Induct Ten Members

Silver Key, men's society, initiated ten new members in ceremonies held at 4 p.m. in the Caprock hall.

They were Kay B. Curry, Earl Deitering, Willy Williams, Ben Dick Cobb, John Pittman, Bales and Reg. Martin.

Curry was named president and Dick McGuire best reporter.

## Firkusny Returns to Artist Course; Hemmle Reveals Program for Year

For the first time in the history of Tech artist course, an immediate return engagement has been scheduled by popular demand of students. Rudolf Firkusny pianist, who appeared last year, begins the fall series Nov. 14.

The courses continue with the Dallas Symphony orchestra, Jan. 7. Jascha Heifetz, world famous violinist, completes the fall group, Jan. 14.

"A Festival of Song," presented by Fred Waring's organization, is first in the spring semester, Feb. 18. Lara Hoggard will direct the glee club. Mr. Waring will not appear on the program.

Eleanor Steber, Metropolitan opera soprano, concludes this year's series of artist courses March 9.

All regularly-enrolled Tech students have been issued activity books and are admitted free to each course by use of the ticket, reminds Dr. Gene Hemmle, head of the music department.

Dr. Hemmle is chairman of the fall artists course committee. Other faculty members are Harold N. White, assistant professor of English, and Dr. P. Merville Larson, head of the speech department.

Students on the committee are Joyce Carthel, Hardy Clemons and Joe Hastings.

### SICK LIST

The infirmary sick list Thursday included: Mozelle Neepser, Sweetwater; Aletha McCasland, Lubbock; Mrs. Shirley Walker, Lubbock.

### Pre-Med Society Makes Plans, Opens Membership

Alpha Epsilon Delta, honorary pre-med society, planned programs for this semester and announced plans for receiving pledges at a meeting Monday.

Qualifications for membership in AED are: 2-point average in all science courses, 49 hours completed with a 1.7 over-all average, and a pre-med major. Interested persons should see Herbert Brannan, president.

AED meets at 7:30 p.m. the second and fourth Tuesdays of each month in room G, Chemistry building.

Other officers of the society are: Coy Orr, vice-president; Becky Bentley, secretary; Betty Sayle, reporter.

### Keys Induct Ten Members; Curry, McGuire Honored

Silver Key, men's social club, initiated ten new members in ceremonies held at 4 p.m. Sunday in the Caprock hotel.

They were Kay Baird, John Curry, Earl Deitering, Jack Hon, Willy Williams, Benny Shavor, Dick Cobb, John Pittman, Jerry Bailes and Reg Martin.

Curry was named best pledge and Dick McGuire best member, according to Clyde Walter, club reporter.

## Der Liederkrantz To Meet Tuesday

Members of Der Liederkrantz, German club, will hold their first meeting at 7:15 p.m. Tuesday in Room 17 of the Administration building. Anyone interested in German is invited to attend the meeting. Membership in "Der Liederkrantz" is not limited to students with a major in German.

Program for the first meeting will consist of group singing of songs produced in the 1952 Liederkrantz Melodien. Refreshments will be served after the program, says Theodore Alexander, sponsor.

Der Liederkrantz officers for this year are: J. B. Jones, senior pre-med major of Levelland, president; Mack Noble, pre-med major, Odessa, vice-president; Mrs. Margaret Smiley McMillin, senior arts and sciences student, Lubbock, secretary and treasurer; B. J. Kellum, sophomore student, Lubbock, reporter.

Liederkrantz Melodien will be produced by the club again in 1953. Members of the script committee for the production will be Kellum, chairman, Jones, Noble, Mrs. McMillin and Evelyn King. Miss King is a junior arts and sciences student from Levelland.

## Two Choral Groups Plan 'The Messiah'

The Tech choir, directed by Dr. Gene Hemmle, head of the music department, and the festival chorus, directed by Ira Schantz, instructor of music, are preparing the oratorio, "The Messiah," by George Frederick Handel, to be given with the Lubbock Symphony orchestra Dec. 1-2.

Spring semester work for the festival chorus, says Mr. Schantz, includes the Mozart "Requiem," two Bach Cantatas (Nos. 78 and 106), the "Testament of Freedom" by Randall Thompson, and "Dirge for Two Veterans" by Earl McDonald. The latter two compositions are for all-male and all-female voices respectively.

Music department enrollment is heavier than last semester in all courses, according to Dr. Hemmle. The festival chorus now numbering 105 voices increased from 70. The Tech choir with 60 members increased from 40. The band enrollment of 114 shows a gain over the last year's 100.

Other enrollment figures are: music education classes, 134; music literature, 69; music theory 79; class applied music, 108 and in all classes of private voice, piano and string, 100.

For the first time, class lessons in voice and piano for beginners and intermediates are offered without additional fees. Non-music majors interested in studying piano, voice, string or wind instruments may do so in small groups of four students to a section, Dr. Hemmle says. The additional fee on small groups is \$15 a semester for one hour a week.

The things taught in schools and colleges are not an education, but the means of education. —Emerson

## Year's Program Set by HE Club

Home Ec Club council discussed a homecoming tea for exes, the sale of mums during Homecoming, and approved the year's program at the first meeting of the semester Tuesday night. A Mexican dinner preceded the business session at the home of Nancy Crosby, president.

The Home Economics club program for this semester will continue with initiation of new members on Oct. 14. The Aggie-HE Roundup will be held at McKenzie park on Oct. 24. A homecoming coffee, welcoming exes, is planned for Nov. 1. A birthday program and the Borden award are set for Nov. 11, and a program on International Relations on Nov. 25.

A Christmas party highlights the Dec. 9 program. On Jan. 13, "Seniors tell their story".

Next semester, two programs are set for February, "Crafts for Homemakers", Feb. 17, and "Cheer with the Engineer", Feb. 24. On the agenda for March is a program designed to acquaint members with Phi Upsilon Omicron, honorary home economics society, and the club banquet in the Caprock hotel ballroom on March 24. Two more programs will finish out the year: an open house preview and nomination of officers on Apr. 14 and a farewell party for seniors, May 12.

Members of the council for this year are: Iretta Mace, Mona Powell, Nancy Crosby, Carol Jean Sandlin, Novella Crump, Shirley Waterstreet, Barbara Hext, La Nell Enochs, Mollie Jordan, Henri Vaughn, Miss Ellen Wright, sponsor, and Dean Margaret W. Weeks.

### To Speak to New Home Club

Miss Martye Poindexter, head of the applied arts department, will address members of the Home demonstration club in New Home on Wednesday.

## Connie Wray Hopping, Miss Texas, Named 'National Macaroni Queen'

Connie Wray Hopping—senior in home economics, band sweetheart in 1950, Miss Lubbock, Miss Texas, and visitor to the Texas university campus—has been selected as "National Macaroni Queen," to be crowned in San Antonio Oct. 15.

Miss Hopping will wear a crown made of macaroni similar to those worn by past "Macaroni" queens, including actress Joan Evans. The Skinner Manufacturing company will pay her expenses to San Antonio, where she will be a guest of the National Macaroni Manufacturers association.

Crowning of the queen is held annually in conjunction with a benefit dinner, the proceeds of which go to the building fund of Boysville, a home for boys. The

### SC Princess . . .

The Tech coed who reigns as a Sun Princess in El Paso New-Year's Day will not actually be a representative of the student body. She will be the emissary of the Student council.

That governing group agreed last Monday night to select the Sun Princess from Tech as she was last year—by vote of the council, instead of by campus-wide election as was formerly the custom.

Reasons heard in the meeting: (1) the princess must have personality and qualities other than mere physical beauty; (2) the matter really doesn't concern the entire student body, anyway.

If those reasons are acceptable, it is good to know that councilmen are astute judges of personality who would not be swayed by crass anatomy; it is regrettable that ordinary Techsians cannot be depended upon to exercise such judgement.

### Light for Sight . . .

Thanks are due the administrators who provided new lights for the third floor of the Library.

The action sharply increases the value of the Library to studying students. As a protection to priceless eyesight and as a real aid in making study hours profitable, the new lighting is a sign of progress.

### To The Voter . . .

Wednesday each student will be given the opportunity to vote for class officers following the traditional convocation.

Past years indicate that candidates are approved on the spur of the moment; that anyone with a friend to nominate him and a few pre-planned votes can count on election.

The usual complaint after class elections is "I don't even know who they are," meaning the winners. To avoid that situation, try placing in nomination someone you do know—assuming that the people you know are worthy types.

Holding a class office has become a method of making an obscure student well-known. A better method would be to name a proven winner, a student whose work and social life have already indicated the kind of class officer he will be.

## Seen Through The Sand

BY ANN BRYAN

Toreador Associate Editor

If you've never been to a Student council meeting you should remedy that situation soon. There you can see the small student elected group that sets campus policies and starts the ball rolling on Tech activities.

Had you been there Monday night you would have heard details on plans for this semester and plans for investigating possible future activities. You would have witnessed a rather confused but well-meaning first meeting of a powerful group that, to put it tritely, is working for a better campus.

Absent from the meeting were members Sammy Dunn and Pete Morris. Latecomers were Buddy Barron and Joe Hastings.

"I have often wondered what the initials G. O. P. really stand for. Now I think I know—"Grouchy Old Pessimists!" Quoted from a speech made by Governor Adlai Stevenson at Springfield, Mass.

We wonder if anyone has ever asked the governor the symbolism of the Democratic donkey.

A little item for posterity, whoever that happens to include—copies of The Toreador, dating from Volume I, Number I, have been preserved on microfilm. Pictures of the issues, first published in 1925, were taken during the summer and are now being processed. They should be back in the library for use within several

weeks says R. C. Janeway, librarian.

The set of papers in the library is missing a few issues and there is probably not a complete set in existence, says Mr. Janeway.

The library is also obtaining the Dallas Morning News and the New York Times on microfilm. The news film is now complete through 1901.

Copies of papers now on microfilm, however, will not be used to start the homecoming bonfire. The film is something like an insurance policy in case any copies are destroyed or damaged.

We hear there is a desperate need for car washing facilities on the campus. The Student council is investigating the possibility of installing a hose near the West hall parking lot for rent to owners of dusty cars.

Perhaps, when business is slack, West Hall residents could rent the hose to water their pot plants.

Apologies to Miss Helen Lindell. She is not the rapist, as printed on page 8 of Tuesday's paper. She is a therapist.

In the line of apologies THE TOREADOR takes a back seat to Rinehart Editions who publish paperback editions of the works of great authors. Seen glued on the flysheet of the "Selected Prose and Poetry" of Edgar Allan Poe is a short apology to spelling

## Under the Breezeway

by Shirley Johnson, Toreador Editor

After listening to the charges and counter-charges thrown by the presidential and vice-presidential nominees recently, we wondered just what all the fuss was about. Certain contributions had not been accounted for, but we could not see just why that should cause so much trouble.

Since then, however, it is our understanding that Nixon has accounted for his, and Stevenson is working on his explanation.

In the Sept. 28 issue of "This Week" magazine, we found an article entitled "Democracy in Danger!" which clearly brings out the cause for worry about unidentified campaign funds.

The article states that "Before canvassing boards finally count the votes after sundown on Nov. 4, a grand total of more than \$150,000,000 probably will have been spent to sway the people's decision in scores of political contests . . . a generation ago, the Wickersham commission warned that 'in the main the funds which make successful political campaigns come from the owners and habitues of vice, gambling and bootlegging resorts.'"

These sinister contributions are made available to politicians because the men behind them are interested in gaining some control over office-holders. With a successful candidate in line for office, the underworld can then insist upon special favors to repay their financial backing.

"Except in the rare instance when a blood tie or close personal relationship exists, the charitable element is lacking. It commonly is a business deal, pure and simple."

Even honest nominees can find themselves committed to men they've never known or met. This is because they "are committed without consultation to back-hall deals by men who must keep the campaign coffers filled. After the votes have been counted, the victorious candidate abruptly discovers that he does not enter office

Poe's middle name Allen for Allan on the cover of the book.

Remember that if you have a gripe about anything that goes on at Tech there are two things you can do about it. Write a letter to THE TOREADOR or attend a Student council meeting and tell them about it.

as free and untethered as he had imagined."

The author again mentions the possible consequences of illegal campaign funds when he states ". . . men with shady tax returns become interested in who will be President, because the occupant of the White House will name the Secretary of the Treasury, who in turn will pick the next Collector of Internal Revenue. And these same men may hope to have the frontier sheriff in their debt, too, for the sheriff can wink at state laws barring slot machines and prostitutes in construction camps and mining towns."

With men in office who are bound to return favors for those who contributed to their campaign, we cannot have the honest, clean government desired. If steps are not taken to correct the situation, we may wake up sometime to discover an even larger mess in Washington.

What can be done? The author of the article has several ideas to aid in correcting the situation.

The author has a very strong statement which we like very much, and would like to quote here.

"The compulsion to win in politics is mighty, and money often makes the difference between victory and defeat . . . in most instances the old adage of politics that 'the side which spends the most wins' has proven true."

### —But Nobody Complains About Will and Soapsuds!

Certainly they should discourage students walking across the campus grass. That's the official attitude, anyway.

Certainly, cars cannot be driven across the rolling level lawns of the Tech campus. That's only logical, and we must be logical at all costs.

However, they overlooked one thing. We've looked, but we haven't found any rule or regulation to correct the situation we noted the other day: a cowboy galloping his horse across the circle.

Someone should inform our legislature in Austin about the glaring mistake of omitting such a ruling. They might pass an amendment to the constitution.

### BACKTALK

Dear Editor,

I want to thank you for printing excerpts from the Handbook of the Men's halls under your "File 13" column in the issue of September 30, 1952.

I believe the Handbook gives a good outline of the program and problems of the Men's halls of residence. (Of course I should believe so; I wrote it!) I realize, however, that in the publication of such a book it is very easy for the writer to climb out on a limb. In the excerpts quoted under "File 13" I don't believe I have. Nevertheless, I am highly interested in the reactions of the men in our halls (and others who are interested) to these excerpts and the Handbook in general.

The Toreador this year is "Tops" in my opinion. I am looking forward to reading it throughout the school year.

Very sincerely yours,  
Robert J. Decker  
Senior Supervisor

Dear Editors,

Although I am only a part-time Tech student I am an avid Toreador reader and feel it is a credit to Tech. However, the editorial "Abstract in Yellow" in the September 26 issue did not strike me as being up to par.

The yellow "abstractions" were planned and executed by supposed expert officials for the public good, Tech students included, and if you say, they are merely weird artistic designs don't you think it might be a bit more intelligent to have the matter taken up with the proper authorities than merely to indulge in what strikes me as rather childish criticism?

Although I am sure the public of Lubbock is most interested in the artistic leanings of Tech students, it can hardly be expected to appreciate such an immature attitude.

Why not do something constructive about the situation. To quote a rather cliché slogan, "The life you save may be your own."

Very truly yours,  
Wanda Wildnauer

# State Fair Features Tech Band, Exhibits

The Texas Tech band has received another invitation to perform while in Dallas this weekend for the opening days of the State Fair of Texas.

The scarlet-and-black-clad group will take part in the pre-game activities of the Dallas Texas-San Francisco '49ers professional football game at 2 p.m. Sunday. The bandsmen will present a salute to the Marine Corps and will play during the first half of the game.

The concert scheduled for 1:30 p.m. Sunday has been advanced to 1 p.m. in order for the band to play at the game. The concert will be broadcast and portions televised from the state fair grounds.

**To Represent Georgia Tech**  
Seats have been reserved for the band in Section 26 of the Cotton Bowl Saturday night for the SMU-Georgia Tech football game. Tech's band was invited to represent the Georgia school by SMU and Georgia Tech.

The Matador band will take the field first at half-time in the Saturday night tilt as the guest band for the mid-game performance. The band will go onto the field in the formation of an old car playing "The Rambling" Wreck from Georgia Tech." Then they will form a big D for Dallas and give a salute to SMU.

Leoff Harris, ex-Techsan, will read a script during the half-time performance.

**Continuing Exhibit**  
Tech's exhibit for the fair has been completed, says Aubrey Shouse, director of public information, who will have charge of the exhibit from Oct. 11 to 19. Warren C. Hardin, assistant registrar, will take care of the show Sunday through Oct. 11. Dick Brooks, ex-student, will help out during the entire 16 days of the fair.

W. L. Stangel, dean of agriculture, will speak to a group of rural youth at the fair tonight. He is also general livestock superin-

tendent of the fair, a job he has held since the first post-war exposition in 1946. Dr. E. N. Jones, president, and Dean Stangel will be guests on the noon radio program of Murray Cox, Sunday.

**Fun and Thrills**  
Entertainment at the fair includes the Dean Martin - Jerry Lewis show, Ice Cycles of 1953 and the Aut Swenson Thrillcade, an automobile daredevil show.

Livestock will be shown throughout the fair. Twenty-seven breeds of beef and dairy cattle, horses, swine, sheep and Angora goats will be spotlighted in separate shows. Horse shows will be featured during the fair.

"The Story Book of Texas Agriculture" in the Agriculture Building will show the true story of Texas' two-billion-dollar agricultural empire. Lighting and sound effects will be used.

Also featured will be the thirty-sixth annual Southwestern Automotive show, an electric show, engineering show, circus and rides on the midway.

## La Ventana Staff Of 25 Is Chosen

Staff for *La Ventana* was completed and work on the 1953 edition was begun after a staff meeting Wednesday. Twenty-five students indicated interest in working on the year book at that time.

Staff members are Bert Good-year, editor; Ted Harrison, associate editor; Roy Grimes, business manager; Paul Kessinger, photographer; Keith McMillin, assistant photographer; Jimmy Clark, layout supervisor; Linnie Boyers, assistant layout supervisor; Martha Gillispie, copy supervisor; Adrienne Bridges assistant copy supervisor.

Section directors are Duane

## Rister To Direct Region Collection

Dr. Carl Coke Rister, Texas Tech's first distinguished professor, has been appointed director of the Southwest Collection by Dr. E. N. Jones, president.

Dr. Rister has had 32 years of experience in dealing with the mores and characteristics of the Southwest, which, he states, includes parts of Texas, Oklahoma, Kansas, New Mexico, and Arizona. "The Collection," Dr. Rister states, "will preserve the literary remains (books, documents, letters, pictures, diaries, newspapers, etc.), making possible a complete history of this country."

When the collection is complete it will historically cover the time from Coronado's explorations in this region (1540-1542) to the present time. Dr. Rister hopes that in 10 or 15 years the collection will have grown to a total worth of from \$150,000 to \$200,000, and he hopes that by then the group will have a building of its own.

"The Southwest Collection will do for West Texas what the Texas Collection at the University of Texas has done for East Texas," states Dr. Rister. It will portray the fusion of Anglo-American, Spanish-American, and Indian cultures found only in this area. Dr. Rister states that the unique trends in the exhibition itself tend to give the collection possibilities for extensive expansion.

"The collection has made great headway in the past six years," claims the new director, "and I see no reason why the Southwestern group won't surpass and exceed any other exhibit like it anywhere in the United States."

## Placement Office

Between February 1, 1952, and August 25, 1952, 289 superintendents have reported vacancies for teaching personnel as listed below. These requests have come from West Texas and numerous schools in other sections of the State. Requests have come, also, from New Mexico, Arizona, South Dakota, Kansas, California, Missouri, Oklahoma, and Colorado.

Field	Requests	Available
Agriculture	55	25
Art	19	8
Band	36	2
Coaching	62	10
Commercial	55	11
Counseling	5	3
Elementary	302	26
English	113	10
History	13	10
Home Economics	160	27
Journalism	7	1
Latin	1	0
Mathematics	85	6
Music	50	5

## Grunt and Groan Boys Seek Vim, Vigor And Vitality at Main Street Athletic Club

BY DUANE HOWELL  
Toreador Staff Writer

A pedestrian, casually strolling by 2403 Main, might be unduly alarmed to hear a heart rending groan seep through the portals of the building. In all probability, however, it is merely the belligerent grunt of a pugnacious Tech student wrestling with stubborn barbells or taking the brunt of a hard-thrown medicine ball.

A group of 12 health-conscious Techsians are working out at the Plains Athletic club under the tutelage of C. E. Deary, manager. From these intrepid students, some of whom hope to win fame in the combative science of "beak busting," may come a future champion in the fields of boxing, wrestling, judo, swimming, or possibly weight lifting.

These diligent Techsians include Royce Cawthorn, Bill Moran, John Hartin, Gale Orr, T. Wilkerson, Ray Thompson, Douglas Corby, Carl Hart, Gale Caldwell, Ross Fowler, Ronald Still and Everett Winston.

**Won National Boxing Fame**  
The Plains Athletic club has been the training site of such established Tech athletes as Ray Howard, Red Thompson and Bill Henderson. Howard and Thompson, among their other athletic feats, won renown on the Tech swimming team. Few Tech boxing fans will forget the memorable

Bill Henderson, who battered his way to pugilistic greatness on the South Plains a few years ago, Henderson, whose small frame housed a magnificent, fighting spirit, first won boxing fame as a Golden Glover, winning the state featherweight championship, then going on to the national finals at Chicago.

Swimming and boxing are the principal fields of athletic endeavor of the group now working out. Those training for swimming or boxing have to drill on their "own hook." Mr. Deary, a competent trainer of 30 years experience, offers no instruction in these fields. He has set up a conditioning program, however, designed to prepare a person to meet stiff competition in any field of athletics and to "build a sturdy body, making a strong foundation on which to build stronger mentality."

**Seekers After Vitality**

Several in the group have no desire for athletic greatness or prowess. They have a simple objective — to improve their all-around health, vitality, and physical appearance. Unlike those who, steeped in the languor of well-being, take health for granted, this venturesome assemblage has a driving determination to mold an average body into a vibrant, powerful physique. Loud gasps torn from sound chests in the Herculean struggle between flesh attest to the strong resolution of these physical culturists.

The two essentials—the will to improve and the proper guidance to make such improvement—are the prized possessions of the barbell enthusiasts.

## Dr. Jones Names 3 Representatives

Dr. E. N. Jones has named three former Texas Techsians to represent the college at inaugurations of college and university presidents in three states during October.

John O. West, Clinton, Miss., who received his master of arts degree from Tech in 1951, was appointed to attend the inauguration of Homer Ellis Finger, Jr., as sixth president of Millsaps college, Jackson, Miss., on Oct. 29-30.

William F. Gray, a former engineering teacher at Tech, now at the University of Alabama, has been named to represent the college at similar ceremonies for Dr. Charles Pinckney Hougarth, who will be inaugurated president of Mississippi State College for Women on Oct. 24, in Columbus, Miss.

R. W. Strain, who was awarded a bachelor of business administration degree with honors at Tech in 1948, will attend the inauguration ceremonies for Russell J. Humbert, who will become the fifteenth president of DePauw university, Greencastle, Ind., Oct. 18.

## Prof. Bullen To Go To Austin For Engineering Conference

C. V. Bullen, head of electrical engineering, will leave Monday for Austin to attend a meeting of the Power Distribution conference. This meeting is sponsored by the electrical engineering department of the University of Texas.

Mr. Bullen is to be chairman of the Monday afternoon session of the three-day meeting where prominent engineers will explain and discuss the latest developments in electrical engineering.

Mr. Bullen will leave Austin for New Orleans to attend the fall general meeting of the American Institute of Electrical Engineers, to be held Oct. 13-17 in the Jung hotel. This meeting will be attended by prominent engineers and instructors from colleges and universities all over the United States.

While in New Orleans he will confer with other members of the National committee of AIEE. This committee is made up of department heads from the leading engineering colleges and universities of the United States and Canada.

ALL RIGHT, SMEDLEY, GET IN THERE AND FIGHT!

# Brannan, Student President, Defines Purposes of Council

"I think that the Student council should be a reflection of the students instead of a governing body handing orders to them," says Harold Brannan, Student association president. "Student Council should only be a tool to express the student's needs and wishes to the administration."

Brannan, senior arts and sciences student from Dimmitt, is beginning his third year of student council work. Previously he has served as A&S representative and business manager for the council. He has definite ideas about student government and how it should be associated with the student body.

The council at Tech has grown steadily in campus prominence since it was originated, it will continue to grow as long as it carries the wishes of the student as its goal, according to Brannan.

"Today, more than ever before, the student body is represented on the various student-faculty committees. This representation is a result of Student association work," the president says. It is hoped that some day the student body will have even more representation on the committees.

Brannan is an active member in Phi Eta Sigma, freshman honor society; Alpha Chi, honorary scholastic society; Kemas, men's social club. He has been selected as a member of "Who's Who in American colleges and universities" and "Who's Who on the campus."

## 10 New Members Added To Faculty

J. Roy Wells, assistant to the president, has announced the addition of one full-time instructor and nine other new teachers to the Tech faculty.

The full-time instructor is Dr. Lawrence Edward Bowling of Columbus, Ohio, who will teach English. Dr. Bowling received his bachelor of arts degree from Berea college in 1938, his master's from Vanderbilt university in 1939, and his doctorate from the University of Iowa in 1946.

Other teachers appointed were: Mrs. Ann A. Madden, 2416 twenty second street, a graduate of East Texas State Teachers college in 1927, as part-time instructor in mathematics; Miss Dorothy McCoy, Plainview, who received degrees from Baylor university and the State University of Iowa, as part-time instructor in mathematics;

Kerby E. LaPrade, Dallas, a graduate of Tech in 1951, as teaching fellow in geology; Mrs. Lena Winston Waters, 3810 twenty-third street, a graduate of Baylor university, as part-time instructor in English; Miss Mary Francis Duran, 1602 Avenue X, a graduate of Florida State university in 1948, as biology teaching fellow;

James Alvis Ellis, 1821 twenty-sixth street, a Lubbock lawyer and Tech graduate of 1934, as part-time instructor in government; Horace E. Griffith, 3214 twenty-eighth street, a graduate of Tech in 1935 and Georgia university in 1939, another Lubbock lawyer, also as part-time instructor in government;

James A. Rushing, 3102 twentieth street, SMU graduate, as temporary instructor in English; Miss Helen J. Stafford, graduate of Hunter college and Texas university, as temporary instructor in biology.

### Tech Heifer Sells for \$600

The animal husbandry department Thursday announced the sale of an Aberdeen-Angus heifer for R. E. McGee of Amarillo for \$600.

## Freshmen to Get Sears Awards

Sears-Roebuck Foundation Freshman scholarships of \$150 each have been awarded to 12 freshmen in the Agriculture division, according to Ray L. Chappelle, head of agricultural education and acting chairman of the Texas Tech Scholarship and Awards committee.

The single sophomore scholarship supported by the same foundation has not yet been awarded this year. This award will be made to the agriculture student with the highest scholastic standing who received one of the freshman scholarships last year, says Prof. Chappelle.

Receiving the freshman scholarships this year are: Loyd Cain, Lubbock; Richard Clugston, El Paso; James Davidson, Quitaque; Joe Lightsey, Jonesboro; Glenn Lust, Dimmitt; Walter McDonald, Lubbock; Buddy McGehee, Lampasas; Minor Nelson, Winters; Rodney Young, Lubbock; Oakley Stevenson, Bovina; Monte Wise, Quitaque; Roy Wright, Vernon. One of these 12 will receive the sophomore award next year, Prof. Chappelle says.

## Ag Cattle Judges Are 12th in Iowa

Tech's dairy cattle judging team twelfth in the National Intercollegiate Dairy Cattle Judging contest held in connection with the National Dairy show at Waterloo, Iowa, Monday. Thirty-one teams from schools over the nation were entered in the contest.

Tech's best score was in judging Ayrshires, where the team placed eighth. Roy Miller placed eighth in judging Ayrshires for Tech's highest individual rating. Other team members are Charles Browning, Spencer Norwood, Carl Menzies, Roy L. Neeley, associate professor of animal husbandry, is coach.

High teams in the contest were Cornell, first; Maryland, second; Ohio, third, Kentucky, fourth.

This same Tech team won fifth in a field of eleven at a similar contest held in Memphis, Tenn., last week.

## KITC Officials To Attend Radio Meeting in Houston

Cody Barnett, station manager, and Odie Echols, program director of the campus radio station, KITC, left Thursday for Houston to represent the Tech station at the convention of the Southwestern Intercollegiate Broadcasters Association.

The convention will assemble Saturday. Tech representatives will meet with various committees to discuss methods of programming and engineering for college stations.

Echols said Thursday that a plan for use of tape-recorded programs would be discussed. The program director also stated that several new types of programs for KITC are being formed, including a discussion panel program produced by the advanced radio speech class. KITC, 750 kc, made its first broadcast for the fall semester Monday evening. Regular nightly broadcasts are to begin in the next few days.

## Organization Sponsors Discuss Duties At Meeting In AE Auditorium Yesterday

### Several Student Loans Available

Three varieties of loan funds are available for qualified, needy students, states James G. Allen, dean of student life. These three loan funds are called "Emergency loan funds," "Rotary loan funds," and "Foreign Students (Mrs. Harry Morris) loan funds," and are issued through Dean Allen's office.

The Emergency loan fund is for amounts up to \$75 loaned for short periods. Last year there was a total of \$5,829.30 loaned to 145 students. From that amount only \$3.25 interest was paid. One account was paid, however, that had been overdue since 1929. There is \$300 still due from the loans throughout the 25 years that this fund has been operating. The money for the fund is made up from the sale of "slime caps."

Another 25-year-old fund is the Rotary fund, primarily for juniors and seniors, for amounts up to \$250. A total of \$2,711.85 was loaned from this fund last year to 19 students. There was \$905 repaid on old loans during the year. This money is provided by the Rotary club.

The loan grants for foreign students totaled 18 for last year, and amounted to \$1,745.70. There is no interest due on this type of loan. The loan is named after Mrs. Harry Morris, who contributed the bulk of the funds.

There is a special Dean of Student Life fund for deserving persons who do not qualify for other loan funds. There have been accounts for \$126.60 last year. There is an overdue debt of \$25.

## College Officials To Attend Houston Engineering Meet

Texas Tech and six other colleges and universities will send representatives to a two-day conference in Houston, Monday and Tuesday, to explore the possibilities of a regional program in petroleum sciences.

Dean Dysart E. Holcomb, engineering division, and Prof. W. L. Ducker, head of the department of petroleum engineering, will represent Tech at the conference which is sponsored by the Southern Regional Education board.

Other colleges and universities to be represented are: Texas A&M, Oklahoma, Oklahoma A&M, Tulsa and Louisiana state.

The conference was called after colleges and universities expressed interest in joint action to strengthen their programs of research and graduate training in petroleum science.

God sends meat, and the Devil sends cooks.

—John Taylor

Sponsors of recognized student organizations met at 4 p.m. yesterday in the auditorium of the Agricultural Engineering building to discuss the duties of club sponsors.

Dean James G. Allen discussed the policy by the administration and the committee on student organizations on the function of the sponsor.

President E. N. Jones explained the off-campus activities blanks which were distributed to the members. The blank explained the requirements for eligibility in official off-campus activities, which are those that involve representing the college publicly or competitively and involve the missing of classes.

Students must have at least a 1.00 grade average overall and for the preceding semester. He must not be on either scholastic or disciplinary probation if he wishes to participate in these activities.

Dr. Jones discussed the possibility of insurance for students on out of town trips and said that insurance companies will come to the campus to write up this insurance if the sponsors desire it.

He also explained the method of checking eligibility requirements through divisional deans, when membership is restricted to students in one division, and through the registrar when membership is from two or more divisions.

Dean Allen discussed the possibility of holding luncheon meetings for the Board of Student Organizations, composed of the presidents of these clubs, and E. D. Walker, college auditor, explained the method of handling organization funds deposited with the college.

## Engineer Groups To Make Plans for Tech Homecoming

Prof. Tom Stenis, sponsor of American Institute of Electrical Engineers and American Institute of Radio Engineers, will speak on "Philosophy of Science" at 7 p.m. Monday when the two groups meet in the Engineering auditorium.

Class representatives will be elected and plans will be made for a Homecoming float. Committees will be appointed to discuss the Engineers show and the campus lighting at Homecoming, Prof. Stenis says.

Note to the Democratic party: Schoolhouses are the republican line of fortifications.

# C.O.P. Tigers Seek Revenge; Battle Red Raiders Tomorrow

The College of Pacific Tigers will be out to get revenge tomorrow night for the 25 to 14 beating they took at the hands of the Red Raiders in the Sun Bowl last year.

The Tigers and Raiders will clash at 8 p.m. (Pacific Coast time) in Stockton, California, home of the COP eleven. The game will only be the second ever played by the two teams as last year's history making victory by the Techsans was the first.

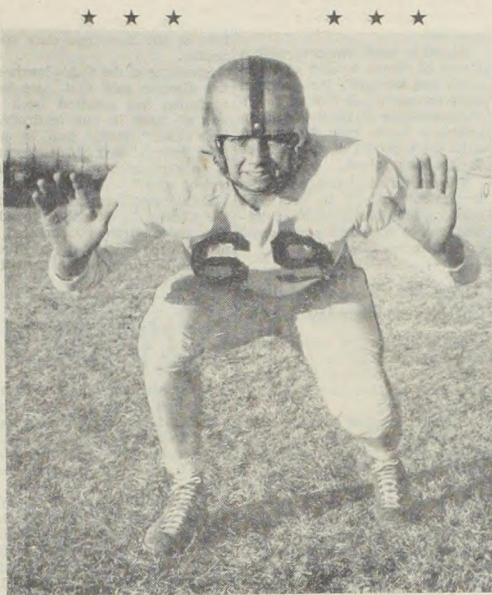

The Tigers will be the second in a somewhat long list of highly-rated opponents to face Tech this year. Raider hopes of pulling back into the win column weren't strengthened any by the Tiger's showing in their 34 to 7 win over Utah State last Saturday. The Tigers also played the mighty California Bears a respectable game the week before.

They will have a potent passing attack which cost them the decision in the Sun Bowl in January.

COP has twenty-one returning lettermen which gave Coach Ernie Jorje the nucleus of another big, fast team. The Tigers again have Tom McCormick in a starring half-back role. McCormick was one of five major college players to gain more than 1,000 yards last season.

Another star the Raiders will have to watch is quarterback Roy Otsson. He has completed 19 of 37 passes for 211 yards for a 51.4 percentage in the first two games and ranks 11th nationally in passing. Wes Mitchell of the Tigers has caught eight of Otsson's heaves for 83 yards.

The Tigers boast a line averaging about 215 pounds and have an experienced squad. They have seven two-year lettermen, 14 one-year lettermen, and 20 transfers eligible.

**ALL-CONFERENCE GUARD**—Ray Howard who made the all-conference team as a freshman last year is again proving his worth this year. He will be playing in tomorrow's game with College of Pacific.

COP runs the Chicago T with variations. They will depend a lot upon power of which they showed plenty in their first two outings.

The Raiders left by train Thursday morning on their longest trip of the season. They spent a lot of time this week working on

fundamentals as well as Tiger plays.

The Techsans will not be at full strength unless some of the injured players respond faster than expected. Included on the injured list are Alton Linne, Marland Ribble, Paul Erwin, Don Gray and Captain Buddy Barron.

## SPORTALK

By Bob Lovelace

As the Raiders tangle with College of Pacific tomorrow night, they will be facing one of the up and coming Pacific coast independents. The Tigers are tackling a tough schedule this season just as Tech is. They have already played the University, losing 34 to 13, and Utah State, winning 34 to 7. California got a good scare from the Tigers, having only a 13 to 7 lead at the end of the third quarter. The Tigers will tackle such powers as Oregon, Santa Clara, Marquette and San Jose State, who defeated Tech in the Raisin Bowl in January, 1950. The Tigers will also want to avenge the defeat suffered last January in the Sun Bowl. Tech came out with a 25 to 14 win in that one.

The Raiders had only three days of practice in Lubbock before leaving for Stockton. They worked long and hard, stressing fundamentals and work on Tiger plays.

Injuries may hurt Tech's chances in the game. Five players are on the doubtful list for the game.

The game will be no breather for Tech. But we expect the Raiders to show quite an improvement over their showing in Houston last week. College of Pacific will be seeking revenge, but we'll take the Raiders by a touchdown.

Incidentally, since most of the Tech boosters won't be able to make the trip, they will have to follow it on the radio. The game will probably start around 10 p.m.

in Lubbock, because Pacific coast time is two hours later.

Following the game tomorrow the Techsans will return home for three games in Jones stadium, Texas Western, Baylor and Houston will follow the COP game with the Saturday between the Baylor and Houston games an open date.

The Southwest conference is in for a rough weekend. In the most unpredictable conferences in the country, Texas Christian and Arkansas will tangle in Fort Worth in the first conference encounter of the year. This promises to be a bangup affair as it always is. Both teams lost last week and TCU hasn't been able to score yet. But they'll probably come bouncing home with a win in their first home game. The University of Texas entertains Notre Dame in Austin. Going by previous triumphs this season, this looks like a mighty successful year for the Longhorns. Notre Dame is always a tough customer, but Texas should come out on top. Rice, fresh from their victory over the Raiders, will play Lousiana State in Houston. LSU lost to Texas by several touchdowns two weeks ago, but with Rice it's a different story. LSU and Rice have been big rivals for years, but we believe the Owls will make it two in a row.

## Graduates and Faculty May Apply Now For Scholarships Under Fulbright Act

Graduate students and faculty members may apply now for study abroad under the Fulbright Act announced President E. N. Jones yesterday.

The program is administered for the government by the Institute of International Education in New York city. The five different types of study are post-doctoral research, university lecturing in Europe, teaching in American primary and secondary schools abroad, teaching in native national schools in foreign countries, and general study abroad.

The countries included under the act are Australia, Austria, Belgium and Luxembourg, Burma, Denmark, Egypt, France, Greece, India, Iran, Iraq, Italy, Japan, Netherlands, New Zealand, Norway, Pakistan, Philippines, Thailand, Turkey, Union of South Africa, and the United Kingdom.

**Qualifications**  
Prospective students must be American citizens, hold a college degree or its equivalent at the time award is to be taken up, and have a knowledge of the language of the country sufficient to

carry on the proposed study.

Applicants are selected on the basis of academic record, personal qualifications, value of the proposed study or research, and suitability for placement in an institution of higher learning abroad.

Applicants who have not had previous foreign residence or study in the country for which they are applying and veterans receive preference.

**Awards Cover Transportation**  
Awards cover transportation, expenses of a language refresher or orientation course abroad, tuition, books, and maintenance for one school year. They are made in the currencies of the participating countries and do not provide transportation or maintenance for dependents. Sums of the award, depending on the cost of living in each country, range from \$500 to \$1200 for one academic year.

Deferral from military service is not carried by the award and applicants should inform their local draft boards and, if required, obtain permission to leave the country.

The act, designed by Senator Fulbright of Arkansas, uses the money obtained from sale of surplus war materials abroad to underwrite expenses of exchange students. More complete information concerning the program may be obtained in the president's office.

Applications for the 1953-54 school year may be obtained up until October 15.

## Management Majors Urged To Attend Monday Meeting

Tech Management association will hold its first meeting 7:30 p.m. Monday, Oct. 6 in Ad333, says Charlie Orren, president.

Election of officers is on the agenda. Afterward, plans of TMA activities will be made.

Any management major with nine hours in management is eligible to become a member of the association. Everyone interested is urged to attend.

## Evening Program Registration Closes

Registration in Tech's program of adult evening courses closed Saturday, Sept. 27. The program is under the direction of George Heather, dean of business administration.

Aimed at adult students, with a theme of "work toward advancement and success", the program offer courses in all five of Tech's undergraduate divisions. Credit in graduate fields may be earned with the approval of the dean of the graduate school.

The schedule includes one course in agriculture, 38 in arts and sciences, 16 in business administration, one in engineering and eight in home economics.

## Alpha Phi Omega Installs Officers in Thursday Rites

Alpha Phi Omega, national service fraternity, held a formal installation of officers last night, according to Don Harris, historian-reporter.

Officers installed in the candle-light ceremonies were Bob Bentz, president; Ted Harrison, first vice-president; Ben Street, second vice-president; Jerry Bowling, treasurer; Jimmy Nickell, corresponding secretary; Dave Larsen, recording secretary; Harris, historian-reporter; Charlie Maple, sergeant-at-arms; Bob Dickenson, parliamentarian; Jerry Raun, alumni secretary.

Lewis N. Jones, assistant dean of student life, and Bob Fredericks, Gordon hall supervisor, are sponsors of the organization.

## Traffic Court—

Third-time losers are likely to be turned over to the disciplinary committee, which may order the person's car banished from the campus. Extreme cases may cause the committee to order the student to send his car home. Last year four students sent their cars home because of repeated violations. If students do not cooperate with the court, the administration will carry out the action.

## Mr. Haley Explains New Tech Program

J. Evetts Haley, director of the recently-created Institute of Americanism at Tech, explained the purpose of the new institute to members of the Exchange club Wednesday.

Speaking at the club's luncheon, the director said that America's confusion has resulted from "a loss of faith in our institutions and ideals." Haley said in this first speech that "Americanism is an expression of the spiritual end of man."

Established from a grant from the Charles E. Maedgen foundation, the institute was created to promote the basic ideals of Americanism set forth in the Constitution.

## Rec Hall Positions Open To Students

A number of positions on Recreation hall committees have not been filled. Interested students are asked to see Jess Parrish, Rec hall director, as soon as possible so that plans for programs may be completed.

Members for the movie committee are needed immediately to begin selection of movies to be shown on the Rec hall program series.

New members of the square dance committee are: Howard De Spain, arts and sciences junior, Lubbock; Charles Anderson, arts and sciences junior, Lubbock; Don Rowell, arts and sciences junior, Odessa; Jocelyn Speer, business administration freshman, Amarillo; Patsy Seales, business administration junior, Lubbock; and Marjorie Seales, arts and sciences junior, Lubbock.

Charles Pipes, agriculture senior, Pampa, is a new member of the hospitality committee.

W. C. Cole, manager of the Tech Bookstore, will attend a meeting of the National Association of College stores in Dallas Nov. 30 to Dec. 2.

## Band Conventions To Be Held Here

Texas Tech will be host next summer to the joint national conventions of Kappa Kappa Psi, men's honorary band fraternity and Tau Beta Sigma, women's honorary band sorority.

The conventions are held every other year at different colleges and universities in the nation.

On Oct. 11, A. Frank Martin, grand executive secretary of Tau Beta Sigma, and Hugh McMiller, grand national president of Kappa Kappa Psi, will be on Tech campus to confer with the two organizations. Date of the convention has not been set.

## Southwest Speech Teams Compete Here Oct. 17-18

About 17 students interested in contest discussion will vie for positions on Tech's national discussion team at the speech tournament to be held here Oct. 17-18.

Four or five will be chosen to represent Tech nationally, says Dr. P. M. Larson, speech department head. The local discussion contest will be part of a speech tournament to be held here, at which colleges from Texas, Oklahoma and New Mexico will be represented.

The national discussion contest requires that each participating school prepare a 25-minute tape on the subject, "How can we most effectively combat the threat of Communism." Discussions recorded on the tapes will be judged for amount, quality and relevance of information, originality and accuracy of thought, organization, interest and delivery.

## Sportalk—

Baylor takes on Washington State in Waco. Not too much is known about the boys from the Pacific coast, but they'll make it a rough afternoon for the Bears. SMU tangles with Georgia Tech in the Cotton Bowl. Georgia Tech holds quite a high rating on the national grid polls, and it will be a sad sight as far as SMU supporters are concerned. The Texas Aggies will try to make it three in a row against Kentucky, and it should be a real battle. From where we're looking, the Aggies will take their first defeat of the year. It looks like a rough day for the SWC in their inter-sectional clashes, but it's one of the roughest schedules they've encountered in a long time.

In the Border conference, Hardin-Simmons meets Trinity from the Gulf Coast League in Abilene. After the track meet with Tulsa last week, we believe the Cowboys will win their first game this year. Texas Western takes on Hawaii in El Paso and shouldn't have any trouble. They had better take that one, because they play the Raiders next week and victories will be mighty scarce for the Miners that weekend. West Texas will take an easy victory from New Mexico A&M in Canyon. The Buffs bounced back from their defeat by Tech to beat McMurry last week. The University of Arizona goes to Salt Lake City to try the University of Utah. The game should be a toss-up and the first real test for the Wildcats.
