Adelphi, Wranglers, Sneed Hall Win Top Places In 'Varieties of 1952'

Adelphi, Wranglers, and Sneed Hall presented the winning acts in "Musical Varieties of 1952," talent show presented Wednesday night in the Rec Hall for the benefit of the World Student Service Fund.

Judges were Mrs. Marjorie M. Neely, dean of women, and Lou Stamatakos, supervisor of Sneed Hall.

\$302

A total of 604 spectators paid \$302 to see the show. All proceeds go to the WSSF, which aids students in foreign countries.

Musicians Attend Band Clinic Here

Approximately 600 high school and junior high school-band students are on campus today and tomorrow participating in the 10th West Texas Band Clinic, sponsored by the Tech department of music and the Lubbock public schools.

D. O. Wiley, director of Tech Band, states that the purpose of the sessions is to provide bandsmen and their directors with "a break from the football season to the concert season."

J. W. King, director of the Big Spring High School band, conducted bands from Class B, C, and CC schools this morning in the band room of the Music Building, Clyde H. Rowe, director of the Lamesa High School group, conducted a session of Class A bands at J. T. Hutchinson Junior High. Class AA bands met in Lubbock High School, under the direction of Fred R. Smith, Brownfield High School, Paul M. Branom, Lubbock High School, and R. C. Davidson, Plainview High School, conducted a meeting of Class AAA and AAAA bands in the choral room of the Music Building.

All sessions were held from 10 a.m. to noon and will be repeated tomorrow morning.

The Tech Band performed for

Planetarium Being Built In Museum Storeroom

By BILL STUCKER
Toreador Staff Writer
Seeing stars?

By the last of January or the first of February you will be able to view the celestial universe from any point in the world.

Sounds impossible, but with installation of the Spitz Planetarium in its temporary home in the storeroom behind the Museum you will be able to do just that.

The planetarium being installed is the Console Type Spitz Planetarium Model A-1 and is the finest small unit ever produced. It has been accepted as the standard astronomical training device of the United States Navy and the United States Air Force.

In appearance, the unit can be described as an excellent prop for a television production involving men from Mars and interplanetary espionage.

Equipment Very Complex

More realistically, it is a highly polished console cabinet with a

complex panel of dials and switches. It has upright arms and booms which support equipment such as a star projector, sun and moon planet projector, twilight projector, astronomical projector, and geocentric earth projector. There are still more instruments which can be added.

Other Organizations

Other organizations presenting acts were: DFD, Kappa Kappa Psi and Tau Beta Sigma, Kemas, Kso Shari, Las Chaparritas, Las Viarachas, Major-Minor Club, Mu Phi Epsilon, Newman Club, Sans Souci, Silver Key, "The Three Feathers," and Wesley Foundation.

Master of ceremonies was Odis Eehols. Incidental music was provided by Bill Hess at the piano. Chairman of the Student Council's WSSF show committee was Elizabeth McCain. Other committee members were: Benny Bruckner, Bill Burton, and Charlie Orven.

DORM GRADES

Mid-semester averages of students in men's dorms show Drane highest with 1.25; then Bledsoe, 1.22; Doak, 1.21; Sneed, 1.19; Gordon, 1.18, according to Jim Decker, senior supervisor.

Home Management Christmas Tea Will Be Held Sunday Afternoon

The annual Home Management House Christmas tea will be held from 4 to 6 p.m. Sunday. More than 230 guests have been invited.

Hostesses will be: Mary Lou Crump, Nancy Crosby and Ellen Massengill. A bronze angel made by Miss Massengill will form the table centerpiece.

The visitors this afternoon, under the direction of Dr. Wiley. The group will sponsor a dance for student musicians tonight in the Music Building. Visiting directors will be honored at a smoker at 7 p.m. in the Lubbock Hotel, sponsored by Adair Music Company.

Industrial Engineers Apply for Permission To Organize Chapter of National Honorary

Application has been made to the student organizations committee for the approval to organize a chapter of Alpha Pi Mu, national honor society for industrial engineering students, according to H. J. McKenzie, instructor in industrial engineering.

A petition by students eligible for membership in the proposed chapter and interested faculty members was submitted to the committee Nov. 17.

Similar Applications

A similar application has been sent to the Supreme Executive Council of Alpha Pi Mu, asking permission to organize a chapter of the society at Tech. According to Mr. McKenzie, some of the approaches have been chosen for the yet unauthorized club in order to meet requirements for national approval by Alpha Pi Mu. But further organization is pending action by the student organizations committee, he added.

Should the local committee approve the application, a one-year probation period will follow, at the end of which the club will stand as a recognized student organization.

Curricula Accepted

Notice has been received that Tech's industrial engineering curricula has been accepted by Alpha Pi Mu. Further approval must include recognition by the 11 chapters of the national society.

Alpha Pi Mu was founded at Georgia Institute of Technology Jan. 25, 1949. It was chartered for national operation in March that year. Despite its extreme youth, Alpha Pi Mu has become an associate member of the Association of Honor College Societies, an organization which requires a society be at least ten years old before regular membership is granted.

Job Interviews Are Scheduled

Interviews for job openings are scheduled for Monday, Wednesday, and Thursday, according to Mrs. Jean Jenkins, director of the Placement Service.

The Stanolind Oil and Gas Company of Tulsa, Okla., will interview majors in accounting, marketing, finance, economics, management, petroleum and mechanical engineering, physics, and chemistry, Monday.

The Texas Employers Insurance Association will interview majors in chemical, civil, electrical and mechanical engineering, Wednesday.

Hughes Aircraft of Culver City, Calif., will interview majors in physics, electrical and mechanical engineering, Wednesday.

The Stanolind Oil and Gas Company has scheduled a second interview for petroleum geology majors on Dec. 18. Students who are employed will start as junior geologists and will have an opportunity for geological exploration work.

Mrs. Jenkins suggests that students interested in the above jobs check with the Placement Service at their earliest convenience to make arrangements for interviews or obtain data concerning the job openings.

Tech Rifle Team To Meet WTSC Here on Saturday

Tech's rifle team will fire its first shoulder-to-shoulder rifle match with students from West Texas State College at 2:30 Saturday on the Tech firing range.

Medals will be awarded to cadets ranking first, second and third on the basis of their overall scores.

The ten Tech students competing are: Charles Burford, Fort Worth senior; Randy McKenzie, Fort Worth freshman; Billy R. Franklin, Bonham freshman; Neal Huffaker, Waco junior; Harold Simon, San Antonio junior; Don Renner, Lubbock junior; Doyle Stamps, Childress freshman; Robert L. Warren, Texarkana senior; Ralph Willingham, Rotan sophomore; Rufus Burleson, Dallas senior.

Maj. Dayton Caple will be in charge of the firing range.

This will be the team's second match of the year. Tech lost its first paper match with the Missouri School of Mines at Rolla by 50 points.

'De-Emphasis' To Be Topic Of KTTCC Radio Program

"Should there be a de-emphasis of college athletics?" This topic will be discussed at 7:30 p.m. Tuesday on "Tech Talks It Over," a KTTCC program patterned after ABC's "Town Meeting of the Air."

Speakers for Tuesday's program are: Dr. J. W. Jackson, government professor; Dr. J. W. Davis, head of the government department and chairman of the Athletic Council; E. J. Tarbox, arts and sciences sophomore; and Glen Rainer, business administration sophomore. Moderator will be Dr. P. M. Larson, head of the speech department.

To Receive M.S. Degree

Miss Charlotte Rich, home economics graduate of Tech, will receive an M.S. in foods and nutrition from Ohio State University on Dec. 19.

Approximate cost of the planetarium and accessories is \$3,350. It is being financed through the West Texas Museum Association. Dr. W. C. Holden, director of the Museum, states that he expects the admission charge to the planetarium shows to pay for it in two or three years.

Museum Addition Planned

Present location will limit the audience to 60 adults or 75 children, and programs to be presented will vary in length from 20 minutes to one hour depending on the age audience. Future plans include longer and more varied presentations, a permanent home 40 feet in diameter and a seating capacity of 180 persons all to be housed in a new \$75,000 addition to the Museum.

Dr. R. S. Underwood, professor of mathematics will help get the planetarium assembled and the program under way. He will also train members of the Museum staff to lecture and demonstrate the planetarium.

Fire Inspection Made of Entire College Campus

The fire prevention and safety committee of Texas Tech has just completed an inspection of all campus buildings, according to J. M. Penick, associate professor of industrial engineering and chairman of the committee.

Working with members of the Lubbock fire department, members of the committee visited Tech buildings, checking fire escapes, clearance in halls, and possible approaches in case fire should occur. The group also looked for faulty wiring and other fire hazards.

Members of Committee

Members of the fire prevention and safety committee are: Miss Katherine Evans, associate professor of education; W. L. Bradshaw, professor of architecture and allied arts; L. E. Parsons, head of textile engineering department; P. F. Gott, assistant professor of physics; W. L. Jenkins, assistant professor of industrial engineering; and George Long, executive, superintendent of buildings.

Members of the Lubbock fire department who participated in the inspection tour were: W. E. Twitty, fire marshal; Arthur Dameron, drill master; and Glenn Smith, fire chief. Mr. Penick expressed appreciation for the Lubbock fire department in the interest and help shown during the 8-day prevention and safety campaign.

"Outstanding"

Although probably little known on the campus, the fire prevention and safety committee has received national recognition. A recent issue of Safety Exchange, official publication of the National Safety Council, contained an article which credited Texas Tech as being outstanding in fire prevention and safety efforts.

According to Mr. Penick, much of the work in the recently completed fire program was done by Mr. Long, who accompanied the inspecting party on every phase of the tour.

Students To Attend APO Convention

Six Tech students will attend the national convention of Alpha Phi Omega in Columbus, Ohio, Dec. 28-30. APO is an honorary Boy Scout organization.

Bob Dickenson, Stamford junior, and Don Harris, Levelland junior, are official delegates to the meeting. Other members attending from Tech will be Bob Bentz, Dallas senior; Ben Street, Dallas senior; and Bill Ashburn, San Angelo junior. Jim Prichard, Pampa freshman and an APO pledge, will be initiated at the convention.

One Department Owns, Operates Creamery Enterprise and Building

The Creamery, west of the Agriculture Building, is owned and maintained by a department in the Division of Agriculture. The Creamery building is being paid for by the dairy manufacture department. In addition to paying off bonds totaling \$400 to \$600 every month, the department owns \$50,000 to \$60,000 worth of machinery.

Funds for the building and equipment have been raised entirely through town sales of milk products. The Creamery also sells milk to campus dormitories, but there is no profit in this as it is sold at less than the wholesale price, says Milton Peoples, Creamery superintendent.

Sales to Dorms and City
About 2,000 gallons of milk are sold to the dorms per week, while about 200 gallons of milk are sold to Lubbock residents. Approximately 80 gallons of ice cream are sold weekly. Other items sold are: coffee cream, whipping cream, cottage cheese, and both homogenized and pasteurized milk.

The Creamery is run by three full-time employees, and 18 students working part-time. Mr. Peoples and his assistant, Bob Hicks, are graduate students. The other man is hired as a route seller for the town district. Since the department provides instruction and experience for dairy manufacturing majors, these students have priority on the 18 jobs, but students from all divisions are hired.

Wisconsin Milk Necessary
In the outer office of Dr. J. J. Willingham, head of the dairy manufactures department, ice cream sandwiches and ice cream by the pint and quart are sold. All proceeds go to the Creamery. During the long session milk is shipped in from Wisconsin to supplement the supply for the dorms. Mr. Peoples explains that there would be such a surplus of milk during the summer session that it would be unsatisfactory to increase the campus dairy herd.

Raw milk is supplied for the Creamery by the animal husbandry department's dairy. They pay the dairy \$7.50 per hundred

weight of milk. The Creamery owns two trucks for delivery routes, and plans to buy another truck in the near future. This will provide two trucks for dormitory delivery, and the new truck will be used for the town route. The next item the Creamery expects to buy will be a new homogenizer, Mr. Peoples, a 199 Tech graduate, says.

The Creamery is under supervision of the State Health Department.

Children To Give Holiday Program

"The Christmas Candle", a Christmas play directed by Frances Gibbs, arts and sciences senior from Lubbock, will be presented by children from the Vanda Avenue Presbyterian Mission at Westminster House, 2414 13th St., at 6:30 p.m. Sunday, according to the Rev. William F. Rogan, student director.

Westminster Student Fellowship will meet at the student center at 6 for supper and after church at 8:30 to sing carols at hospitals and homes of shut-ins.

Women's Medical Service Work Will Be Discussed Here Today

Capt. Fuchsia L. Johnson of the Women's Medical Service Corps will speak at 11 a.m. today in H-105.

Her subject will be opportunities for army dietitians and occupational therapists. All students are invited to attend.

ASME TO ELECT

Election of next year's officers for Tech chapter of the American Society of Mechanical Engineers will take place at 7:30 Monday. The meeting will be held in Room 1 of the East Engineering Building.

Contest Is Open For Dance Bands

Calling all college dance bands—Metronome magazine is sponsoring the first nation-wide college dance band contest.

Any college dance band wishing to enter the contest must submit an entry blank. These blanks may be obtained at the Toreador office. Competing bands must have at least seven and no more than 20 musicians. Graduate as well as undergraduate students are eligible to be members of the competing groups.

The bands will submit 78 RPM recordings of at least two different selections. No more than four selections may be used. All recordings must be in the offices of Metronome no later than March 15, 1953.

Judges of the entries will be Bandleaders Ray Anthony, Stan Kenton, and Billy May; Allan Livingston, Capital recording executive; and Metronome Editors George Simon and Barry Ulanov. The winning band will be recorded on Capitol records.

Press Club To Hear Tech Teacher, Writer Thursday

A meeting of Press Club has been called by Charlie Maple, president, for 7 p.m. Thursday in J208. Tom W. Bridges, English instructor and staff member of the Lubbock Avalanche-Journal, will talk on some phase of writing.

This will be an open meeting.

Speech Department Plans Next Show, 'The Cradle Song'

"The Cradle Song", to be presented Jan. 12-17 in the Speech Auditorium, has been selected for the speech department's second play production of the semester says Ronald Schulz, director.

Mr. Schulz says the play, by Gregorio and Maria Martinez Sierra, has achieved great popularity with college and little theatre groups. It was written in 1911 and has become a minor modern classic.

Members of the cast and their roles are: Anita Pope, Priores; Nancy McKissack, Vicareess; Huda Hassen, Mistress of Novices; Lavoy Berry, Sister Joanna of the Cross; Daisy Holly, Sister Marcella; Anne Gray, Sister Maria Jesus; Kay Jones, Sister Sagrario; LaRue Gilmore, Sister Inez; and Jacqueline Baker, Sister Turner.

Other nun roles will be filled by Laverne Batie, Lola Petolicas, and Daulma Noles. Sara Dickinson is assistant director and Faye Marsh is stage manager.

Needy To Receive Gifts from HE Club

Christmas for a needy family highlighted the Home Economics Club meeting at 7 p.m. Tuesday. Each year the club collects gifts of food, clothing, toys and money for a local family. The one chosen this year is that of James Boney, who is in Korea. It includes Mrs. Boney, Charles, 9; Kenneth, 6; Johnny, 4; Linda, 2 and Beverly, 10 months.

LUCKIES TASTE BETTER!

They're made better to taste cleaner, fresher, smoother!

Ask yourself this question: Why do I smoke? You know, yourself, you smoke for enjoyment. And you get enjoyment only from the taste of a cigarette.

Luckies taste better—cleaner, fresher, smoother! Why? Because Luckies are made better to taste better. And, what's more, Luckies are made of fine tobacco. L.S./M.F.T.—Lucky Strike Means Fine Tobacco.

So, for the thing you want most in a cigarette... for better taste—cleaner, fresher, smoother taste... Be Happy—Go Lucky!

Memo

—to talented students in the speech department: Applications are now being accepted for the directorship of the 1953 Varsity Show.

As a result of your training, you are probably better qualified than any other students for the job. You may apply by letter to the Student Council.

With Our Compliments

Drawing tools for an Indonesian engineering student or TB treatments for a Japanese undergraduate were provided by Techsans Wednesday night.

Such are the uses that will be made of the money taken in by "Musical Varieties of 1952," the annual talent show benefitting the World Student Service Fund.

It was a notable evening: good crowd, good entertainment, good purpose.

Seen Through The Sand

BY ANN BRYAN

Toreador Associate Editor

We read with approval the Tech Board of Director's decision to allow Negroes to participate in intercollegiate athletics here as members of opposing teams, and their authorization of the use of Jones Stadium for a Negro all-star game.

While it is a rather feeble and very belated step toward greater democratic operation of our school, it is at least a step. We are at last beginning to break away from the bigoted, intolerant, and binding Jim Crow laws to which the majority of Texas institutions and individuals conform.

That we have still father to go is exemplified by eleven courageous Texas schools which have allowed Negroes to enroll in them. One hundred and thirty two negroes are enrolled this year in the schools, only one of which is state-supported—the University of Texas.

There are 51 Negroes in the University. This relatively high enrollment followed the US Supreme Court decision which said that Negroes must be admitted if they cannot find equal education

facilities in Negro institutions.

The other ten schools, however, admitted colored students voluntarily. They are: St. Edward's University, Austin, which has 12 Negroes; St. Mary's University, San Antonio, 14; Southwestern Baptist Theological Seminary, Fort Worth, four; Amarillo College, Amarillo, 18; Brite College of the Bible (part of Texas Christian University), Fort Worth, three; Howard County Junior College, Big Spring, six; Musical Arts Academy, Amarillo, two; Wayland College, Plainview, 18; Del Mar College, Corpus Christi, nine; and Southern Methodist University, Dallas, five.

Three other schools which at present do not have Negroes enrolled have indicated that they would admit qualified colored students. They are: Lutheran Concordia College, Austin; De Mazzone Scholasticate, San Antonio; and Southwestern Medical School, Dallas (branch of the University of Texas).

These figures are taken from a survey quoted in the Dallas Morning News of Dec. 7. The News also states that 43 other schools answering the survey haven't admitted Negroes, giving state law or school policy as reasons. While the Tech Board has taken

Under the Breezeway

by Shirley Johnson, Toreador editor

In the spring of 1950, the Tech Chamber of Commerce appropriated money to build a softball diamond.

Later, officials said there was not enough in the fund to complete the project, once started. The remainder of the needed finances was underwritten, so work could begin on the field.

Now, near the end of the fall semester of 1952, we still have no softball diamond. Many questions have been raised as to why not, so we shall try to answer some of them now.

"Surely there is enough room on Tech campus for a softball diamond to be placed; space is not the reason, is it?"

In a way, yes. Although the campus seems wide open now, the future plans of the college for buildings have it fairly full of structures. Officials know the college will definitely have a new gymnasium sometime; they must place it at such-and-such a spot. So on down the line of other new improvements: new dorms, new roads, improved grounds, etc.

Until it has been clearly determined just where these new buildings and such will be, the diamond cannot be begun. It would be senseless to complete the field, only to tear it up within a year or so to begin a new road.

"The lightpoles have been welded and are now lying behind the power plant; therefore, steel for lighting facilities cannot be the reason."

The poles are completed, and they are resting behind the power plant. Until the definite location for the field is determined, however, there is no point in moving them. Steel is not the delaying factor, now.

"Does the project need more money?" No, funds are available.

"Is there anything we students can do to speed up work on the field?" Nothing right now, so far as we know.

"Has the project been abandoned completely?" Decidedly not.

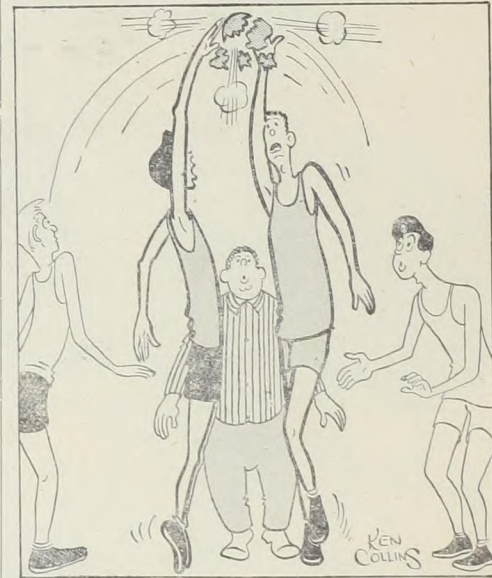

Running Count:

There are six more days until we are out for Christmas holidays . . . 10 more shopping days . . . 12 more days until Christmas . . . 18 more days until 1953 is officially here. Classes resume Jan. 5; there are 15 holidays this Christmas for Tech students.

We congratulate:

The WSSF show committee on a much bigger and better production than last year.

The Hardin-Simmons band, for being good enough to fly to Europe during the Christmas holidays to play for the American troops. A skeleton group will make the trip, at the expense of the USO.

KEN COLLINS

one progressive step, the Tech faculty has just taken a backwards leap. With the approval of the faculty and at the recommendation of the Faculty Advisory Committee, the Council of Deans has passed new absence regulations. The regulations were stated in the Tech Times, faculty and staff news letter, as follows:

"When the total number of absences of a student in any course reaches the equivalent of one week of classes, laboratories, or other meetings, his instructor shall report him as delinquent to his dean.

"A student whose total number of absences during any semester reaches the equivalent of two weeks of classes, laboratories, or other meetings in any one course for which he is registered, he may be dropped from that course with the grade of WF

(withdrawal, failing) upon the recommendation of the instructor and with the approval of his dean."

These rulings will go into effect next fall and will convince students then entering Tech for the first time, if they are freshmen, that college is going to be very much like high school. It is our understanding that college life should be a period of preparation for adult life in a supposedly mature world.

If we are treated as adolescents and made to believe, by rulings such as these, that we do not have the ability to judge and decide for ourselves whether or not going to class is necessary, how can we be expected to make mature decisions on other important issues?

Why not use a system of no absence regulations and when a student fails to meet the

BACKTALK

Editor of The Toreador, What will we do with the Rec Hall?

Why should it be different from other campus buildings?

Let's landscape it beautifully, plate it with gold leaf, place sharp spikes in dangerous places, and display it in some prominent place. Thus, we could have another million-dollar building to boast of.

However, it, like another building on the campus with a million-dollar dress, would not stand close inspection with the dress removed. But both would be alike in the fact that the million dollars was spent largely for padding the exterior to catch the eyes of visitors.

When the dress is removed, then what?

Well, in both cases we would find the greater part of the million dollars gone. Why should the Rec Hall be different?

Let's put a minimum amount of the cost aside, let's display it where visitors will marvel at the magnificent structure. If we are lucky, they won't look beneath the dress. They'll never realize the internal faults present, nor that the equipment being used is becoming obsolete. Besides, there is enough equipment for half the students, in some cases, so stop worrying about the other half.

What will we do with the Rec Hall?

Let's burn it, use the coals for a weiner roast to celebrate the start of an era of building not for looks but practicability, and thus, prevent it from becoming another recipient for a million-dollar dress.

Name Withheld By Request

Shortest Day of Any Year Approaching, Editor Says

From an editor's column of the Daily Texan, University of Texas:

" . . . Look how we have advanced. Blockbusters weren't enough; so we invented the A-Bomb. Now that's obsolete with this new H-Bomb. Wait till we finally get that old Z-Bomb. What a day that's going to be—momentarily."

scholastic requirements of the college, suspend him from school for a semester or more? It is our belief that, under such a system, students will soon realize the importance of attending class and will attend voluntarily. If a student is capable of learning and making good grades without attending class, why should he be forced to attend?

Signal Corps To Play Em

After more than two months of planning, preparation and cooperation with Civil Defense and other officials, Tech's ROTC band will be used in the performance of the national anthem resulting from the attack on natural disasters.

The Civil Defense Association and the Red Cross have accepted an offer from the Tech ROTC band to play at the Lubbock Christmas Cross representative, I believe the Tech unit will be given the most arduous.

"We certainly expect to be in the event of a disaster," says . . . They are being organized and I don't know how long we could get away from here."

Air-to-Ground Method Besides 11 radios that are into immediate use, the ROTC unit recently tested a portable communications system. The system was owned and operated by Paul Westerfield, a major from the Texas A&M, and the chief MARS—Military Radio System—building XR as a result of the test, the end of a prep work in the air if necessary being themselves a wide and greater observation point.

The cadets who hold radio licenses, and who would be playing major roles in the event of a disaster, are: Lieutenants Calvin Finley, Sterling Rodgers, Tech ROTC; Tech signal corps cadet, D. W. Massengale, major and plans officer, ROTC regiment; W. B. Gale, cadet captain of the ROTC company; Herman E. Engstrom, chemical engineer, major from Cameron; James and John Kehley, electrical engineering majors from Brownwood; Eugene Tullis, electrical engineering major; Jack Burge, electrical engineering sophomore; Charles Hibbits, sophomore major from Camp W. B. Kilwell, freshman engineer.

Dr. Dennis To Galveston

Dr. Joe Dennis, head of the department, will go to Galveston to participate in the dedication of the Eyrone M. Hendrix Seminar Room. This is a room named in honor of Dr. Hendrix, who was professor of biological chemistry at the University of Texas at Austin.

Signal Corps ROTC Unit To Play Emergency Role

After more than two months of planning, preparation and confering with Civil Defense and Red Cross officials, Tech's ROTC signal corps will be used in emergency situations resulting from possible enemy attacks or natural disaster.

The Civil Defense agency and the Red Cross have accepted aid from the Tech unit.

Mrs. J. H. Stiles, Lubbock Red Cross representative, indicates that the Tech unit will be called upon if the need arises.

"We certainly expect to use them in the event of a disaster," she says. "They are definitely organized and I don't know of any group we could get hold of any quicker."

student from Weslaco.

The project is sponsored by Maj. Victor Penuel, senior signal corps instructor; M/Sgt. Harold Purvine, chief operator of the MARS station; and M/Sgt. A. E. Hill, signal corps instructor.

Preparations for placing the signal corps unit at the disposal of these emergency organizations began during the early part of October. The signal corps, under the auspices of Tech's Saddle Tramps, was given the job of protecting the Homecoming bonfire from out-of-town visitors intent upon a presetting spree.

As a result of close cooperation between the two organizations, Techsians had their bonfire on schedule and not before, and a smoothly-operating signal corps had a renewed confidence in its ability to deliver the goods.

Air-To-Ground Methods

Besides 11 radios that can be put into immediate use, the highly-mobile unit recently tested air-to-ground communications via a Cessna airplane owned and piloted by Paul Westerfield, junior business ad major from Grover, and the chief MARS—Military Affiliate Radio System—radio set in building XS. As a result of this test, the cadets are prepared to take to the air if necessary, allowing themselves a wider range and greater observation power.

The cadets who hold amateur radio licenses, and who are expected to play major roles in the event of a disaster, are: Second lieutenants Calvin Finley and Sterling Rodgers, Tech students who hold signal corps commissions; D. W. Massengale, cadet-major and plans officer for the ROTC regiment; W. B. Massengale, cadet captain of the signal corps company; Herman Hoffman, sophomore chemical engineering major from Cameron; James Taylor and John Kehley, freshman electrical engineering students from Brownwood; Eugene Rodgers, Tulia electrical engineering sophomore; Jack Burge, Lubbock electrical engineering sophomore; Charles Hibbitts, sophomore geology major from Camp Wood; L. S. Kidwell, freshman engineering

Riflemen To Fire Against WTSC

Tech rifle team members will hold a shooting match with West Texas State College on the Tech rifle range at 2:30 p.m. Saturday.

Medals will be awarded to the high-scoring marksmen. A gold medal will be presented for high score, a silver medal for second, and a bronze medal for third, says Sgt. Donald P. Wilsey, instructor of air science and tactics.

Tech Steers Gain In Feeding Test

A three-lot feeding experiment on Tech farms ended its first 28-day period Monday. Twenty-nine steers were fed varying levels of solvent cottonseed meal, and the average gain per day was noted, says W. L. Stangel, dean of agriculture.

Lot 1 received two pounds of cottonseed per head per day. These steers averaged 890.8 pounds, with an average daily gain of 2.64 pounds.

Lot 2 received three pounds of cottonseed and weighed an average of 876.1 pounds. Their average gain per day was 2.85 pounds.

Lot 3 was given three pounds of cottonseed per head per day and the steers averaged 974.1 pounds with an average daily gain of 3.17 pounds.

"This experiment was conducted on a controlled basis, with each steer receiving the same total amount of concentrates," says Dean Stangel. "The lack of cottonseed meal in Lots 1 and 2 was made up by feeding equal amounts of milo chop in excess of the normal amount allowed. In addition to cottonseed meal and milo chop, each steer received one pound of alfalfa hay per day and sorghum silage according to appetite."

Parrish, Preston Return From A&M

Jess Parrish, Recreation Hall director, and Max Preston, arts and sciences junior, attended a joint staff and student meeting of Regions 13 and 14 of the National Association of College Unions Saturday and Sunday.

Fourteen member colleges, from Texas, Oklahoma, Arkansas and Mississippi sent representatives to the meeting at College Station.

Problems of finance and direction of student unions were discussed at length in the meeting workshops, according to Mr. Parrish.

During the two-day meeting, representatives stayed at the Texas A&M Memorial Student Center. Meetings of the association were held in the same building.

Dr. Craig Reveals Metal Photo Tests

Dr. William Craig, professor of chemistry, spoke to the Levelland Rotary Club Tuesday on "Spectrographic Analysis." Dr. Craig has devoted much time to the study of this type of work, which deals with analyzing the contents of alloys.

After an alloy is heated, each type of metal turns a certain color. Then photographs are taken to determine the per cent of each metal. This method is used in testing the structure of buildings, ships, and other objects.

Women's Dancing Classes To Be Moved to Rec Hall

Several classes in women's education will be moved from the Gymnasium to the old Recreation Hall upon completion of the Student Union Building, says Dr. R. W. Kirellis, head of the physical education and recreation department.

Classes in tap dancing, social dancing, and square dancing will be moved to the Rec Hall. This arrangement will make those classes more accessible to students, and the reduced load on the Gym will leave it open for basketball and other sports, Dr. Kirellis said.

VISITS PAN-TECH

W. L. Stangel, dean of agriculture, visited Pan-Tech farms near Amarillo Tuesday and Wednesday to assist in judging 144 bulls. Texas Tech is cooperating in the project with the Texas Agricultural Experiment Station and the U. S. Department of Agriculture. John H. Jones represented A&M.

ROTC Engineers Have New Teacher

Sergeant Donald Kennedy has arrived at Tech to begin his tour of duty as junior instructor for the ROTC corps of engineers.

Sgt. Kennedy recently served 16 months in Korea. His overseas duty includes more than a year in Europe and three years as a member of the occupation forces in

Japan. The sergeant is married and has three children.

He will relieve Sgt. James Ellis, who has completed his two-year tour of duty at Tech.

Raiders Tulsa

The Red Raiders boys' team won column 1 in Tech Gym with a 54 win over the Mustang Oilers.

Tech was too fast for us as they broke away the first quarter, never let Jim Reed, Virgil Jones, Rex Hill led the Raiders.

Bill Kleine and Gene Smith 22 and 18 points, try to lead the weak pack.

The Raiders led 34-0 time, and the three couldn't get back in the lead. The Raiders sank on most of their shots, however, they were prepared with 45 per cent shooting. The Techs were more times than the Oilers hit 24 of 37 charity to Mustang hit 16 of 30.

Tonight the Raiders with Tulsa's Golden Hawks, Tulsa. The Hurricane is favorite, and it is believed its best team in over 3 years.

Tomorrow night the will invade Stillwater to Oklahoma A&M, first team in the nation, as Look Magazine. The A has been putting out good teams for years, and a favorite over the Raiders.

Tulsa is coached by the and will be depend stars Warren Shackelford, Dick Nunnely. The is coached by Henry Iba, Tulsa's coach.

Following these two Oklahoma, the Raiders come to get ready for invasion of North Carolina and Miami the following

HE SAYS THIS SHORT STORY WILL BE THE BEST YET!

Raider Hustle Smothers Oilers; Tulsa Hosts Techsans Tonight

The Red Raiders bounced back into the win column Tuesday night in Tech Gym with a hustling 64-54 win over the Midland Phillips '66" Oilers.

Tech was too fast for the Oilers, as they broke away late in the first quarter, never to be headed. Jim Reed, Virgil Johnson, and Rex Hitt led the Raiders to victory.

Bill Kleine and Gerald Tucker sank 22 and 18 points, respectively, to lead the weak Oiler attack.

The Raiders led 34-28 at half-time, and the tired Oilers just couldn't get back in the game.

The Raiders sank only 29 per cent of their shots, however, compared with 45 per cent for Midland. But the Techsans shot 25 more times than the Oilers. Tech hit 24 of 37 charity tosses while Midland hit 16 of 30.

Tonight the Raiders will tangle with Tulsa's Golden Hurricane in Tulsa. The Hurricane is a 12 point favorite, and it is believed to have its best team in over 12 years.

Tomorrow night the Techsans will invade Stillwater for a try at Oklahoma A&M, fifth ranking team in the nation, according to Look Magazine. The Aggies have been putting out good basketball teams for years, and are 10 point favorites over the Raiders.

Tulsa is coached by Clarence Iba and will be depending on two stars, Warren Shackelford and Dick Nunely. The Aggies are coached by Henry Iba, brother of Tulsa's coach.

Following these two contests in Oklahoma, the Raiders will return home to get ready for their invasion of North Carolina State and Miami the following weekend.

FOOTBALL CHAMPS—Los Cams are all-college intramural football champions by virtue of their 8-0 win over BSU last week. Front row—left to right—James Eagan, Ronnie Smith, Ray Marsh, Bob Belew, Jack Dyer, Donald Cotton. Row 2—Glen Whitmore, Bob Henely, Paul Woods, James Stevenson, Jim Conine, David Behrends, Kenneth Birdsong, Jim Daniels, David Collier. Row 3—Bob Slaughter, Harold Wells, Henry Taylor, Don Olsen, Rob Harington, Jim Wyatts, Crozier Gowen, Donnie Ellis, Don Franks, John Meyer, Joe Allan.

BSU, Rangers, Dukes Lead Independent Race

Three teams were still tied for the lead in the independent league of the intramural basketball race after two weeks of action. BSU, Rangers, and Dukes sported 2-0 records to lead the pack.

In the game played Tuesday night, DSF defeated Luby's Chowboys, 40-32. Williams led the victors with 17 points while Lindsey tallied 10 for the losers.

BSU won over Wesley Wildcats 35-24, in Wednesday night's open-

er. Bryant meshed 14 for BSU while D. House scored 15 for Wesley. Dukes rolled past the Wesley Whirlwinds, 55-25, in another Wednesday contest, Brinson scored 19 points for the Dukes while Brannan and Bennett tallied 5 each for the Whirlwinds. Rangers trampled the Steers in the finals, 40-20. Munkes led the victors with 13 points while Parks scored 6 for the Steers.

Tuesday's schedule will find

Rangers vs. BSU at 7; Steers vs. Dukes at 8, and Boomerangs vs. Wesley Wildcats at 9. The Ranger, BSU contest will knock one from the three-way tie for first.

Wednesday's action will take place in the dorm league. At 7, Gordon Hall plays Doak Owls while Gordon Tigers meet Bledsoe at 8. In the nightcap at 9, Sneed Trotters tangle with Doak Hornets.

SPORTALK

By BOB LOVELACE

With the end of the football season, everyone is turning their attention to basketball. The Raiders have won 2 of 3 previous contests, but their strength is still unknown.

The Tech hoopers will get two full tests this weekend, as they invade Tulsa tonight and Oklahoma A & M tomorrow night. With the loss of three starters, the Raiders do not appear to have much this year. But several freshmen and transfers are coming along, and the season could at least be a success. However, don't count on them winning either of the two games this weekend. We'll wait until after the Tulsa and Aggie tilts to make any predictions about the future...

We noticed that Paul Nolen, 6 foot 10 Tech center, was on Sport Magazine's honorable mention. Besides the first two teams named, only eleven were named on the honorable mention list from the entire nation...

Congratulations to the Board of Directors for finally giving the okay for letting negro athletes play for Tech opponents when they come to Lubbock...

Pete Cawthon, Tech's head coach in the '30s, will return to Lubbock January 15 as speaker for the South Plains Officials and Coaches Association Banquet...

Tech placed only three men on the all-Border Team selected by the conference coaches. They were: Bobby Cavazos at offensive half; Ray Howard, defensive tackle; and Jim Turner, defensive half. Congratulations to these three for making the squad...

...But only Time will Tell

Only time will tell about a budding author! And only time will tell about a cigarette! Take your time...

Test CAMELS for 30 days for Mildness and Flavor

• CAMELS are America's most popular cigarette. To find out why, test them as your steady smoke. Smoke only Camels for thirty days. See how rich and flavorful they are — pack after pack! See how mild CAMELS are — week after week!

CAMEL LEADS ALL OTHER BRANDS by billions of cigarettes per year!

There must be a reason why!

R. J. Reynolds Tobacco Co., Winston-Salem, N. C.

On the Record

By TED HARRISON

Today, kiddies, we're going to talk about a relative newcomer to the list of jazz piano artists. Not really a newcomer, because he's been around quite a few years, but because I think many of the people, especially in this area, are unfamiliar with him. Who? Dave Brubeck. Very little has been said or heard about Brubeck, but he is on the top today. The very top.

It all started many years ago. When but a child, Brubeck's mother, an organ virtuoso, taught him the rudiments of the piano. Since that time, Dave has come a long way to becoming the top in the jazz field. True to the life of most young musicians of today, Dave went through high school playing with various bands, spent some time in the Army with bands, came back and attended Mills College in California, where he studied with one of America's leading contemporary composers, Darius Milhaud.

Under Milhaud, Dave learned much about the Contrapuntal Harmony of the earlier composers. Here was established his style. Using the older European harmonies linked with modern jazz rhythm, Brubeck was able to turn out music the likes of which was never heard before, music which earned him the title of "Small Band of the Year", and DOWN-BEAT picked his "Moon", "Squeeze Me", and "Too Marvelous" as "Records of the Year" (1951).

Brubeck usually plays with bass and drums but he also has a very modern sounding octette composed of bari, alto, tenor, trumpet, trombone, and rhythm. It's very fine also.

This all leads to one thing. Brubeck is wonderful and tremendous, he's the very end. First chance you get, be sure to dig it. You'll also like "Perfidia", "Laura", "Fall in love", "September", "Indiana", and "April". A new album by Shearing featuring the title tune, "I Hear Music", "Moon", and other favorites. Martiere's "Summer Love", and some new Peterson sides.

Faculty Members' Article Published

Dr. H. C. Hartsell and Ted E. Edwards, assistant professors of education, have written an article, "Feature Films And Discussion-strips," which appears in the December issue of Educational Screen magazine.

A picture of a class of freshman students was in the magazine.

Educational Screen is the national publication of the National Education Association.

Being a research study, material from feature films furnished by Films Inc. and Encyclopedia Britannica Films was used in the work. The purpose of the research was to find a means of stimulating discussion as a classroom technique.

Class To Design Catalogue Cover

A new design for the 1953-54 Tech catalogue cover is being developed by business administration's advertising layout class, says James E. Dykes, assistant professor of marketing.

Each student in the course is planning and laying out his own cover design, which will be submitted to the publication committee for judging next week.

**If you are interested . . .
... in a career in petroleum**

Plan to see representatives of Stanolind Oil and Gas Company, who will be on the Texas Tech campus Monday, December 15.

J. G. Crosskill, division clerk, will interview men majoring in marketing, finance, economics, sales and accounting, for positions in Stanolind's clerical department.

E. J. Montgomery, division accountant, will interview men majoring in accounting, for jobs in Stanolind's division accounting office in Fort Worth.

J. B. Clark, research section supervisor, will interview advance degree students and seniors majoring in petroleum, chemical and mechanical engineering, physics, and physical and organic chemistry, for positions in Stanolind's production research department. Early training in Stanolind's research department can qualify men for important operational positions in the future.

Stanolind is one of the five leading producers of crude oil, natural gas and natural gas liquids in the U. S. The company has operations in 13 states, with division offices located in Fort Worth, Houston, Oklahoma City, Casper, and Calgary, Alberta, Canada, providing excellent opportunities for capable, qualified applicants. You should investigate Stanolind before making any job decision.

For an appointment to see either of the above representatives, contact Mrs. Jean A. Jenkins, Director of College Placement.
