# Handicapped hampered by snow

By ALISON GOLIGHTLY University Daily Reporter

Several Texas Tech University handicapped students were unable to attend classes Monday and Tuesday because of sidewalks and wheelchair ramps covered by ice and snow.

Although Tech maintenance personnel Monday morning were issued a list of snow clearance priorities, many campus buildings still are inaccessible to handicapped students, Assistant to the Dean of Students Trudy Putteet said.

Putteet said she gave the list of snow clearance priorities to Associate Vice President of Administrative Services Fred Wehmeyer.

Putteet compiled the list after surveying handicapped students to see which buildings are used most often by handicapped students on different class

Putteet said she still was receiving complaints Tuesday afternoon from students who were unable to get to their classes or get out of the dorms because of paths blocked by accumulated ice and

"A path about a foot wide was cleared at the Business Administration Building but there was no way a wheel chair could get through," said senior accounting ma-

jor Brad Herbert, who is handicapped. "It took me 45 minutes to get from the Math Building to the Biology Building today," sophomore business administration major Wess Harley said.

A Knapp Hall resident was unable to attend classes Monday and Tuesday because sidewalks around her dorm had not been cleared.

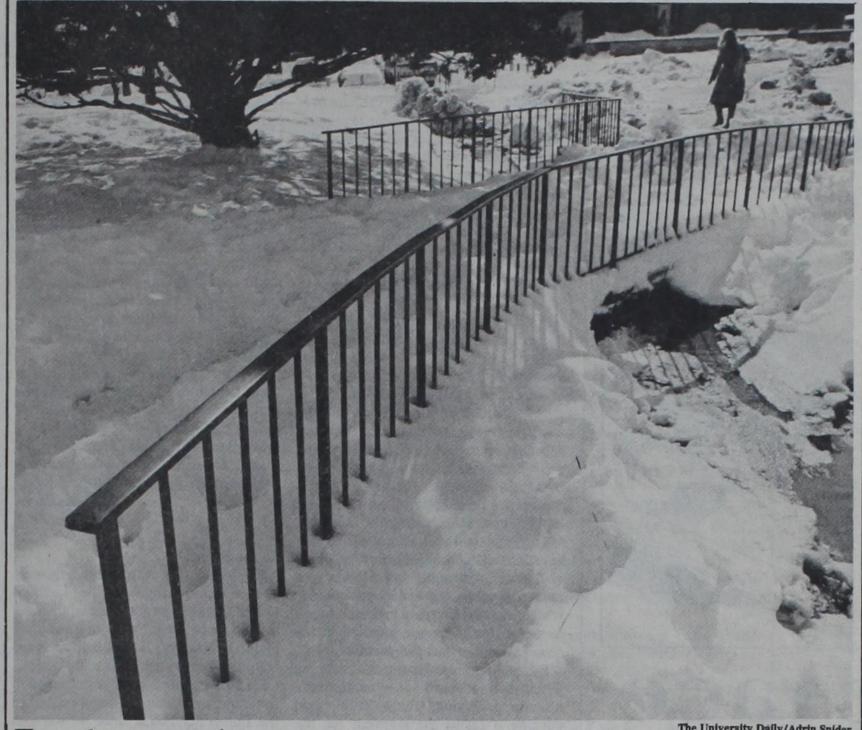

Ramps to the Biology Buildingand the English building still were covered with ice Tuesday, Harley said.

Another problem is that curbs were covered by the ice and snow that was cleared from sidewalks and streets, Harley said.

Areas around the BA, English and biology buildings were included in the priority list issued to maintenance personnel.

Putteet said several residents of Sneed Hall shoveled snow Monday to clear a path to the Bledsoe, Gordon, Sneed cafeteria.

Putteet said any students or student organizations who want to help clear the walkways should contact her.

# Reagan speech

# President says nation on mend

By The Associated Press

WASHINGTON — President Reagan asked Congress Tuesday night to freeze overall federal spending about 5 percent above current levels, and to approve a standby tax increase to curb spiraling deficits he called "a clear and present danger" to America.

His spending limits would apply to the total federal budget - sparing defense. The 5 percent increase is designed to take account of inflation.

In his State of the Union address, Reagan proposed an outright freeze on most domestic spending programs, with no inflation allowance. He said federal pay and retirement benefits, both military and civilian, should be frozen for one year, and cost of living increases in Social Security, veterans benefits and the like should be delayed for six months.

Reagan said he would adjust his defense budget to save about \$55 billion during the next five years. But a senior administration official, speaking on the condition that his name not be used, said the proposed freeze would leave room for an increase of about 14 percent in the defense budget next year.

Advising Congress that his budget will 
The so-called spending freeze for fiscal

in federal spending ... Taken as a whole,

the budget I am proposing for the next fiscal year will increase no more than the rate of inflation - in other words, the federal government will hold the line on real spending."

"America is on the mend" Reagan declared.

To deal with the highest unemployment rate in more than 40 years, Reagan proposed a six-month extension of unemployment compensation for those who have exhausted their benefits, tax credits for employers who hire the longterm unemployed, additional job training funds, and a below-minimum wage for teen-agers hired for summer jobs.

He asked for a 1 percent surcharge on taxable incomes and an excise tax on domestic and imported oil.

Faced with a deficit now estimated at more than \$200 billion for the current fiscal year, the president's "standby tax" would raise between \$40 billion and \$50 billion a year from fiscal 1986 through 1988 if needed to curb the flow of red ink.

The 1 percent surcharge would apply both to individuals and corporations. The excise tax on oil, about \$5 per barrel, would add 12 cents to the cost of each gallon of gasoline, according to a fact sheet distributed to reporters.

propose the spending freeze, Reagan 1984 would apply to programs with automatic yearly cost-of-living raises, "I know this is strong medicine, but so such as Social Security, other pension far we have only cut the rate of increase and disability programs and food

# Tossed snowballs damage passing autos

By KELLY KNOX University Daily Reporter

Several automobiles were damaged extensively last Friday on the Texas Tech University campus by persons that threw hard-packed snowballs.

Tech police received 11 complaints about the snowballs, including complaints by three individuals who said their windshields were broken by persons they identified as snowballthrowing Tech students.

Most of the automobile damage occurred at three different areas on campus. Those areas include the intersection of 18th Street and Flint Avenue between the Hulen-Clement dormitory and the Wig-

gins Complex, the intersection of 15th Street and Akron Avenue near the Tech Bookstore and the intersection of Akron Avenue and Broadway Street near Memorial Circle.

One of the victims, Joe Putman, said his vehicle was hit Friday by snowballs at all three locations. Putman was providing volunteer transportation to United Blood Services at the time his auto was damaged.

Putman said his front windshield was "busted all to pieces" by the snowballs and he estimated the damage to be about

The number of persons at each intersection ranged from 75 to 200, he said. A group of Lubbock citizens has set up an account at Security National Bank to collect donations to replace Putman's windshield.

Putman reported the incident to the Tech Police, who he said offered no But Tech Police Chief Bill Daniels said

the only thing officers could do about the incidents was to call the dorm supervisors.

"The dorm supervisors know the kids better," Daniels said.

"When you get 150 kids out there throwing snowballs, I don't think anyone can identify the one guy (who threw the damaging snowball)," he said.

"If we sent an officer out there, the kids would just throw snowballs at him,

# Income drop may affect funding

By ROBIN FRED University Daily Reporter

The nationwide recession hit Texas hard in the last quarter of 1982 and a drop in projected state income may have an adverse effect on funding state universities, Texas Tech University Public Affairs Director Bill Parsley said Tuesday.

Parsley said the original appropriations bill submitted in December to the state legislature by the Legislative Budget Board (LBB) is favorable to Tech, but he warned the bill has a long way to go before being approved.

"The LBB bill is a good bill, but it calls for about \$500 million more than the amount the state comptroller has said will be available from state funds," Parsley said.

The LBB appropriations bill covers funding for the more than 30 state-funded universities in Texas.

The current version of the bill proposes an \$84.5 million budget for Tech during fiscal year 1984 and a \$79.8 million

budget for fiscal year 1985.

the Tech Health Sciences Center (TTUHSC) are proposed at \$57.2 million and \$45.4 million, respectively.

Those budget figures include money for operations and major repair and rehabilitation projects. The 1984 budget includes funds for major construction projects on the main campus and at the teaching hospital.

LBB recommendations cover repair and construction projects by special appropriations from the Legislature.

Major construction recommended by the LBB for Tech includes a \$14.7 million project to complete a portion of empty floor space in the Health Sciences Center and various renovation projects on the main campus.

Operational and maintenance costs are funded by a formula based on the total number of semester hour credits granted, enrollment figures and size (in square feet) of campus facilities, Parsley said.

Approximately 85 percent of the Tech's entire budget is formula-funded. The remainder of state funds in the

appropriation from the Legislature, is extremely important to Tech, he said.

"We have to have the formula-funded money, but without the non-formula funded appropriations we could not function," Parsley said.

Assistant Director of Public Affairs Mike Sanders told Tech regents two weeks ago some special repair projects at the university may be in danger of not being funded because of an unexpected decline in state revenues.

Parsley said the drop in available funds means that if the state does not receive more money in the near future, some of the appropriations in the LBB bill will have to be cut.

"I think most of us here at Tech are pleased," Parsley said. "The LBB recommendations, generally speaking, are excellent. They recognize Tech as a growing major university.

"We feel the LBB has been very conscientious in its efforts to provide money to allow Tech to continue its educational programs and its construction and renovation programs," he said.

legislative revisions in the bill) is going to be that good we cannot tell until the Legislature approves the bill," he said.

Tech President Lauro Cavazos sometime in March will present the LBB recommendations to the Senate Finance Committee and the House's higher education committee, Parsley said.

From the higher education committee, the bill will be passed on to the House finance committee.

When the bill has cleared all committee work, the House and Senate will vote on both revised versions of the bill.

After each house approves its version of the bill, a conference committee of five senators and five representatives from the House will work out differences in the two versions of the bill and take the final version back to their respective houses for approval.

Gov. Mark White then will sign or veto the bill.

Parsley said the appropriations bill usually is the last bill approved by the Legislature during the session.

### Budgets for the next two fiscal years at "Whether the final result (after budget, money that must be granted by Demos respond to Union address

By The Associated Press

WASHINGTON — Democratic Party leaders, saying their time has come to "put up or shut up," responded to President Reagan's State of the Union address Tuesday with a program of ideas - some basic, some new — "to stop the economy catastrophe."

In a slickly produced, 28-minute televireform, lower interest rates and cutting Delaware said of the proposals

"reckless defense spending" and the federal deficit are the keys to stopping

The party's leadership detailed a fivepoint plan for economic growth without rekindling inflation. Emphasizing education, new technology, "rebuilding America" and a strong defense coupled with a nuclear arms freeze, the from sliding backwards toward Democrats called for cooperative effort to "make this nation greater."

"Some of them are very basic, tried sion show, the Democrats said tax and true," Sen. Joseph Biden of

presented. "And some of them are new ideas. But all of them fall within a very postive and hopeful Democratic view."

The Democratic response, which cost the party \$120,000 to produce, was being aired by all three commercial television networks just after Reagan's nationally televised speech to the joint session of Congress Tuesday night.

With a combination of comments from Democrats in Congress and party leaders: "man-in-the street" film clips; and computerized graphics, the Democrats sought to erase the image that Reagan and the Republicans are the only ones with ideas for the future. "I don't think this country needs

another political speech tonight,"

Washington lawyer Harry McPherson said in introducing the show. "Our polls indicate people think that we don't have alternatives," said Rep.

Tony Coelho, the Californian who heads the party's congressional campaign committee. "We are determined to state alternatives that the Democrats have now and have had."

# LETTERS TO THE EDITOR

To the editor:

How is it that a project such as the Crosbyton Solar Power Project has to be dismantled for lack of funds; yet, our less-than-glorious athletic programs manage to command a well-padded budget? Is football the solution to the energy crisis?

At this very moment the Crosbyton Project is being disassembled and the equipment put into storage. This experiment had proven its value in the search for an alternate energy source. First funded by government sources, the project had depended on Tech for 15 months before funding was cut off, causing the demise of the project.

Now let's take a close look at the athletic department. Money is poured into a program with less than desirable results whose participants receive generous scholarships as well as preferential treatment. For example, courses are designed with the athlete in mind. Music "Fun Machine," M AP 1221 and 1222, (A truly marketable skill), is one example while a certain economics section caters almost exclusively to athletes. And how many of you are tired of waiting in line to get your books? Rejoice, salvation is at hand Just join the athletic program. You turn in your schedule card after registration and your books are picked up for you by bookstore employees.

Athletics have their place, and some athletes are superior students. However, the present state of affairs displays a questionable ordering of priorities. Much To the editor: of the money invested in athletics goes no further than the end of the season, whereas money invested in projects such as Crosbyton is money invested in the future. Which is more important?

By supporting projects such as Crosbyton instead of questionable athletic programs, Texas Tech could become a leader in research for the have left?

> **Robert Sandner** LeAnn Binford Mark Cook

To the editor:

A special thanks should be given to the many volunteers that helped in the recent snowfall received in Lubbock. Many people put forth an extra effort, donating their time and vehicles to help transport medical personnel, blood donors and other people in need. The television and radio stations of Lubbock also did a good job keeping the public informed, as to school closings and requesting of transportation volunteers.

Monday night Channel 28 interviewed a man who helped in the volunteer effort. While transporting passengers to their residence and en route to taking several Tech students to donate blood, Joe Putman's vehicle was bombarded with ice and snowballs, by a large group of Tech students at the corner of 18th Street and Flint Avenue. As a result, the windshield was knocked inside the truck, endangering both the driver and his passengers. This is no reward for anyone

volunteering their time for others. This incident sheds a bad light on Texas Tech,

### LETTERS POLICY

not just the students involved. Something should be done to correct the wrong that has occurred. Perhaps to replace the windshield and a special apology is the least that Mr. Putman deserves.

All interested students should send or take donations to Security National Bank, Lubbock, in care of Volunteers for Lubbock. Money received will go toward the replacement of Mr. Putman's windshield. All extra funds will reimburse volunteers for fuel used in their efforts.

Nick Olenik Jr. Hayden Mitchell

We would like to express our most sincere appreciation to the Lubbock Police Department for their willingness to help us out of a frustrating situation and to indicate the lack of help received from the Texas Tech University police.

000

On Friday, when our car got stuck in the snow, we attempted to get help from the University Police since we were on future. After all, is not the future all we the Tech campus. We explained to the officer that our car was stuck in front of Wall Hall and asked him to please inform the authorities that we would move it to a commuter lot the next morning. He said we had to move the vehicle then, and he refused even to send help. Refusing to show any degree of concern, he hung up.

We both were surprised and scared surprised at the lack of concern exhibited by the officer on duty and scared of the prospect of getting stuck again and having to cross the campus in the dark. According to page 19 in the Texas Tech University catalog, the University Police are responsible for campus parking problems as well as the security of the campus community. The officer on duty met neither of his obligations.

Given the service we received from the Tech?) Tech officer, we turned to the city police. Even though Tech is out of the city police department's ordinance, city officers came and pushed our car to the commuter lot and ensured our safe return to has taken care of that himself.

Again, we thank them.

Lisa Kay Nunn

Editor's note: A copy of the following letter also was sent to the Lubbock Avalanche-Journal by the writer.

To the editor:

Let's add one more name to the long list of "cheap shot artists." That of Dirk West. Incidentally, the "DIRK" is defined in Webster's dictionary as being a kind of dagger. How appropriate. Et tu

I only can hope my reply wll be granted the same journalistic license given to Dirk. Otherwise, strict A-J guidelines (Obviously ignored for Dirk's sake) will: limit my reply to 250 words, force standards of good taste and prohibit attacking another person.

Dirk's guest column on Jan. 16 (Lubbock Avalanche-Journal) criticizing Tech's football program was brutal and totally unnecessary. I'm a Tech-ex and certainly can understand some of Dirk's frustrations. I also understand the place and need for constructive criticism from time to time. However, I've yet to understand what good purpose possibly could come from the A-J printing Dirk's destructive article at this critical time -(three weeks before national signing day of prep football recruits and on a weekend when Coach Moore had some 30 of these potentials in town).

I offer a few observations of my own:

 If one insists on pointing a finger, blame for the turbulent '70s lies with THAT decade's administration, not the present.

 If Dirk really wants Tech to do well, he could do more than sit back and throw stones at the current coaches.

• If it were not for the fact most people in Lubbock had, heretofore, thought Dirk was a "good ol' boy" himself, he probably would never have been elected

• It would appear to this writer, the A-J's only purpose in printing the article was to allow Dirk a platform to vent bitterness. This nurtured, cancerous attitude toward the Tech administration has been building ever since his "good ol" boy" and buddy, Bobby Layne, was politely turned down for the head coaching job. WHEW Talk about sour

 So "Good Ol' Bobby Layne" has such a great reputation; all these friends in big places just waiting for Bobby's request to help Tech. What's the holdup? Just because he's not the coach doesn't mean he can't help.

(Dirk ... Shame on you Are you so naive to believe SMU alums, Don Meredith and Doak Walker, or Alabama alum Joe Namath would forsake their own alma mater to help Bobby with

Finally, Dirk apologetically ended his article, saying it was his fervent hope that Jerry Moore and his staff make him

look like an idiot this fall. Dirk already The next time Dirk picks up his We are grateful to the city police for vitriolic pen for cartooning or jourcaring and for their assistance. We nalistic purposes, perhaps he'll

# NEWS BRIEFS

Widespread use of heart unsure

SALT LAKE CITY (AP) — Barney Clark's progress has been too uneven to justify widespread use of permanent artificial hearts, and his doctors have no idea when he will be able to leave the hospital, physicians said Tuesday.

"He's made good progress up through the first 30 or 40 days, and made undulating progress since then," Dr. Chase Peterson said Tuesday of Clark, 62, who was in his 55th day with the Jarvik-7 heart implanted Dec. 2.

Peterson, in a scheduled news briefing on Clark's condition, said his doctors have mixed views about the success of the historic implant. Peterson was asked if he believed the surgery had been clinically successful.

"Not yet. At the moment, he has not made enough progress to justify this kind of procedure in multiple patients," said Peterson, University of Utah vice president for health sciences. He said that doctors did not know when Clark would be strong enough to go home.

### Chemical explosion kills four

LEHI, Utah (AP) - A fiery explosion demolished a building at an Ireco Chemical Co. plant southwest of Lehi Tuesday, killing four people, authorities said.

Ralph Coomes, a dispatcher for the Utah County sheriff's office, said the four unidentified people were working inside the building at the time of the 11:50 a.m. explosion, and all were killed.

Authorities had not determined the cause of the blast.

### Two teens attempt suicide

EVANSVILLE, Ind. (AP) — Two teen-agers apparently tried to commit suicide early Tuesday because their parents would not let them date each other. Evansville

Kevin Fleming, 19, of Newburgh, was listed in critical condition in the surgical intensive care unit of St. Mary's Medical Center, and Lisa Reed, 14, of Chandler was in fair condition, spokeswoman Barbara Doss said.

The pair shot themselves with a .22-caliber rifle at 4:30 a.m. and "laid down to die together," Evansville Police Cpl. Larry Qualls said.

Qualls said the gunshot wounds were not critical, and after about 90 minutes the couple called Fleming's parents

# Appointments pass first senate vote

By The Associated Press

AUSTIN - Two major appointments by former Republican Gov. Bill Clements passed their first test Tuesday although two Democratic senators showed dissatisfaction with one by not voting.

The appointment of Lufkin lawyer John Stover to the Texas Water Commission was approved 7-0. The appointment of James Conner, a petroleum engineer from Marshall, to the Texas Board of Human Resources was approved 5-0.

Sens. Chet Brooks of Pasadena and Lloyd Doggett of Austin voted "present" on Conner's appointment.

Stover and Conner still must be confirmed by the 31-member Senate. Confirmation requires approval by two-thirds of those present.

The first votes on appointments by the Senate Nominations Subcommittee this session came after chairman Ed Howard retained full authority to waive the appearances of nominees.

Doggett challenged Howard's power with an amendment that would have required a nominee to appear at a public hearing if any senator requested in writing that the nominee appear. The amendment failed 4-3.

"I just don't want a rule that says I have to do it (grant a hearing)," said Howard, D-

Doggett asked Stover how he felt about a possible restriction against waste discharges in lakes such as Austin and Travis that are the only sources of the city of Austin's drinking water supply, and Stover replied, "It's not only a good idea (to prohibit discharges), it's a very popular idea."

Brooks asked Conner, who has been on the background before then."

Board of Human Resources since February 1982, how the board could provide "essential (welfare) services during a time of declining

"The best we can do is to ensure equity, and I'm not sure we do that, but we try," Conner

Brooks, chairman of the Committee on Health and Human Resources, said, "Sadly, it seems to me the board has failed miserably" in providing "alternative, less-expensive" welfare care.

Conner said foster care payments are "ridiculously low," but utility payments for low-income people are too high. In the 1982 fiscal year, \$37.1 million was spent on the home energy assistance program, and Conner said perhaps the program was designed for the Northeast. "I don't think it's appropriate for Texas," he said.

Conner said he questions whether monthly payments for Aid to Families with Dependent Children — \$34.51 per recipient — are enough to raise a child, but said the total spent on AFDC - approximately \$140 million a year -'is an awful lot of money. Why can't it be more

Later, Doggett said Conner "didn't seem all that sensitive on social services issues." He said he had not decided whether to vote against Conner's confirmation.

Brooks also said he had not made up his mind how to vote on Conner's appointment. "There's a real question about his sensitivity and knowledge of the programs," Brooks said.

He said he expected a Senate vote Thursday, and said, "I'll try to get some real good

air during the day, you will see islands (235 of them) ... some rocky and weather worn, others lush and green, and edged with sandy beaches. You'll be visiting these islands during your holiday. Ferries make regular runs to many of them. Islands like Lantau, where you can visit a monastery in the hills, or swim from its beautiful beaches; Cheung Chau, with its fishing community, huddled around a bay that bustles with junks and sampans. Or perhaps you'll take one of the water tours, where you'll be wined and dined as you cruise through the islands by moonlight ... As your aircraft nears Kai Tak Airport, you'll see the New Territories to the north ... Miles of countryside, patchworked with rice fields and neat terraced farms. The scene is as old as China itself and you'll come across many areas that haven't changed for a dynasty. Hong Kong's hotels rank among the finest ... luxurlous, air conditioned, and with service you didn't think existed anymore. Many with views of the harbor that will take your breath away. Think of the time you'll spend wandering through fascinating streets; of the department stores and shops where you can buy things from all over the world at duty-free prices; the fine restaurants. As your aircraft touches down in Kowloon, you'll step Into a holiday unlike any you've ever had.

One of life's great adventures

# The family fridge: it's what's up front that counts

©1982 N.Y. Times News Service

NEW YORK — By looking at other people's refrigerators, you'll put messages that are important." Judy Waldinger can spot a troubled marriage, a home in need of a top-to-bottom cleaning, a family that pays the bills on time and a household in which the residents are stuggling with their self- busband and wife. Ed Walker, a third-year medical student at image and self-esteem.

Waldinger, a housewife in Westbury, N.Y., pays no attention gras or ground chuck. In fact, she never opens the door.

What counts is what's on the door — the enamel billboad that is, in many suburban homes, a communications center and art gallery. With memos and magnets to hold whatever in place, refrigerator doors can be transformed into a microcosm of a scribbles her notes to "Bear" and he salutes her as "Cat." household. The doors can look as if they belong in the Louvre or on the set of "Sesame Street" or are a kind of a public post-office | short and informational, but just the fact that they're there box where anyone can read anyone else's messages.

on point or another in the life cycle of any house," said Suzanne Keller, a sociology professor at Princeton University. "People put things there that show love, feeling and caring. It's a nur-fundamental part of the family-activity cycle. The refrigerator turant symbol, whether it nurtures the psyche or the soul or the in Ilene Buam's kitchen in Westbury N.Y., is a showcase for body."

bably reflects what you would like to be. That is why many league playoff dates, the baby sitter's calendar. refrigerator doors exhort the mind to nurture the body a little less. Waldinger, who goes to the Weight Watchers sessions, has depend on it so we can plan our Saturdays to be at soccer games. a small magnet that says "Think Thin."

But other people are unconcerned that any resemblance bet- things hang up there with Mommy's stuff." ween a regrigerator's exterior and its interior will trigger a lapse in dietary disipline. Keller, for example, posted a academic hall of fame for her 9-year-old daughter, Dora Ann. photograph in Gourmet magazine.

"Well, you don't have to eat food to enjoy it," she said. "It's poorer."

the esthetics — pleasure, laughter, the projection of yourself.

Refrigerator messages take on special importance in embellishments continue the theme of making you feel good." households where they are the only communications between the University of Washington in Seattle, often is assigned to overnight hospital duty. That means he may go two or three to whether what is in her friends' refrigerators is pate di foie days without seeing his wife, Stephanie Read, a graduate student in social work.

> Walker and Read keep in touch via the refrigerator and compensate for what he says is the brevity and relative formality of there was no chance that the art on her refrigerator ever would which will be here long after I'm gone." their communiques by using their nicknames for each other. She reach the floor. She painted the art on the refrigerator.

"It's the forum for communication," he said. "Our notes are means there's emotion in them, too. Sometimes we put up the chose that one. It just happened to be the right shape for the Grouch and their pals parade across refrigerator after "The refrigerator is a central place where everyone will go at mail if there's something we want to make sure we both see, but refrigerator." no bills — they're too threatening."

In homes with children, what is on the refrigerator becomes a schedules - her children's soccer practice dates, school menus, If you are what you eat, what you put on your refrigerator pro- two sets of church school schedules, car-pool lists, her bowling said. with impersonating an officer might scare off now that we've got to be careful. The mood impostors who have posed as El Paso here makes anyone jumpy who claims to be a patrolmen to con motorists into paying phony cop." traffic fines on the spot, police said Tuesday.

But the arrest of Manuel Vasquez Hernandez Jr., 34, being held in El Paso County Jail in lieu of \$10,000 bail, could be a false alarm, Lt. Eddie Agan said.

"We're not sure this is one of our bogus cops," he said. "This guy was driving a green and white car - the others drove vehicles that looked like ours."

A motorist whom Hernandez had stopped Tuesday morning also became suspicious because the phony officer wore no uniform and lacked identification. After the motorist called police, Hernandez was tracked to his home, where officers charged him with posing as an officer — a third-degree felony, Sgt. Douglas Gray said.

Eight times since Dec. 23, motorists have been stopped by men posing as El Paso police who charged them with traffic violations that could be paid off on the spot. Motorists have been duped out of \$778, police say.

"We hope this puts a stop to this," Gray said. "But we don't know if we have the right one yet."

Police, weary of the phony cops plaguing the West Texas city of 450,000, declined Tuesday to say the worst was over.

"In my gut, I just think this wasn't a bogus policeman - just someone who drank too much and hollered that he was a cop," Agan EL PASO — The arrest of a man charged said. "Our guys are so jumpy about bogus cops

> Police suspect at least two other men also have taken part as bogus cops, some of whom might have been former employees of the El Paso department, Agan said.

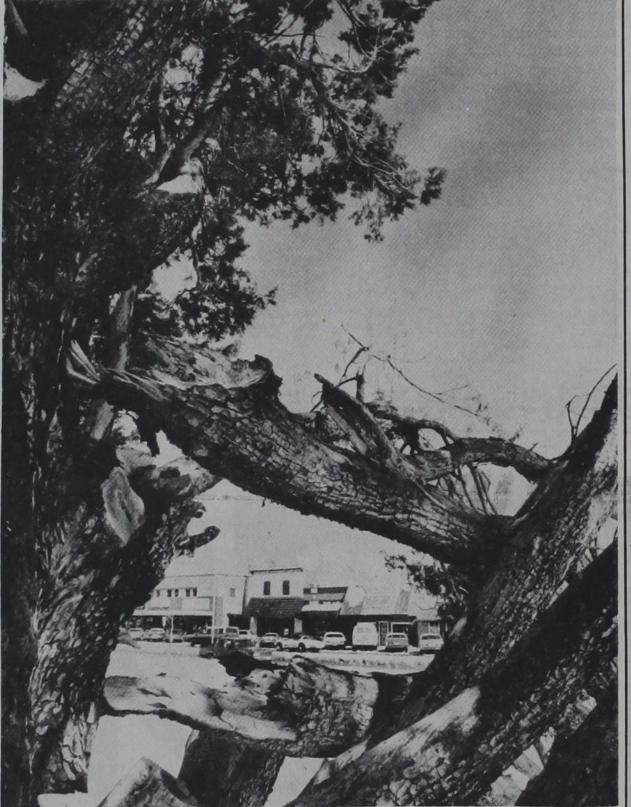

But the arrest of Hernandez finally may stop

the phony policemen's con games. "He tried to pawn himself off as a police of-

ficer. Now he's in jail," Gray said. Police credit El Paso drivers with becoming increasingly more alert after reports surfaced that men posing as police and driving vehicles with flashing red lights were pulling over motorists and charging them with traffic violations.

In one incident, a Juarez man lost his car keys, passport and \$600 when he was stopped on Interstate 10 by a man posing as a

In another incident, a man urinating outside an El Paso bar had \$153 in cash and Mexican pesos taken when a counterfeit officer stopped him and supposedly searched his wallet for identification. Eddie Pallares said he did not discover the theft until he returned to the bar. By that time, the phony patrolman had fled.

# Fractured family theme returns on television film

By The Associated Press

NEW YORK — Running Out is not a film about jogging. But tonight's CBS movie does capitalize on another craze - television's fascination with fractured families, in particular, stories having a parent run away for a decade or so and then drop by to say hello.

That same subject was covered quite well last month in CBS' Memories Never Die with Lindsay Wagner as the mother who left her family for psychiatric treatment and then the de-pressurized security of a mental hospital.

"When something works, TV can get very imitative," says Steve Mills, who heads CBS' TV movie department.

The missing mother routine returns tonight in Running Out. The wrinkle here is that Elisabeth St. Claire, played by Deborah Raffin got married at 15, had a baby at 16 and contracted a case of "Mommie Departest" four months later.

As we learn from Elisabeth, this strain of "reluctance responsibility" is not uncommon in teen-agers, burdened with harsh reality when they should be dreaming of sweet 16's, especially when they're married to young husbands who may not be running out but are running around.

abandoned Paul Corsini, played by Tony Bill, tervening 121/2 years, she found culture, erase.

sophistication and some guilt over her trans-Atlantic double-cross.

Although she hasn't made any contact since defecting, Elisabeth is intent on re-establishing relations when she returns to New York for a short business trip. She's serving as an interpreter for a French businessman.

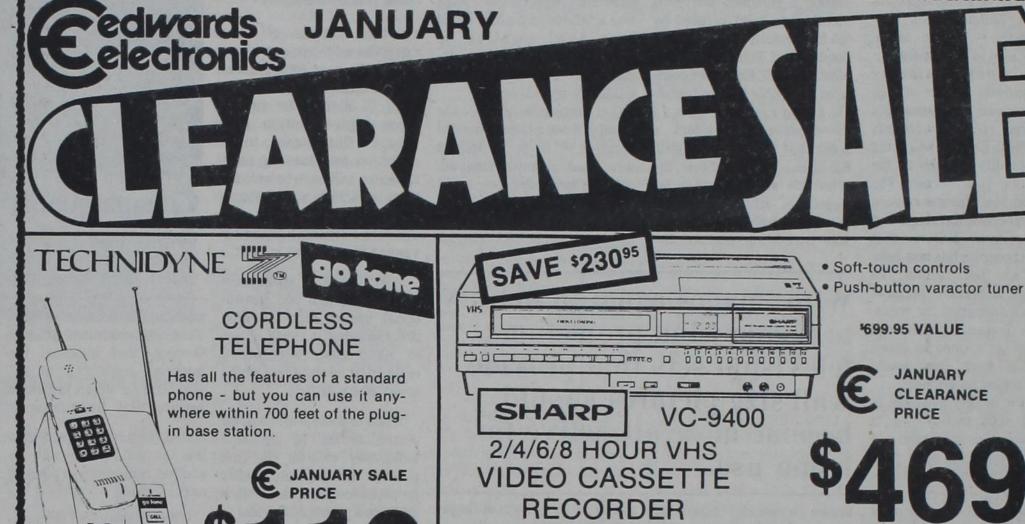

Meanwhile, her daughter, who isn't much younger than Lizzie was when she got married, has turned out fine. Jenny's father is caring, if not indulgent. He's already taught Jenny to drive. Among her legal pursuits, Jenny is quite good at the violin and is practicing for her first public recital.

Running Out deals with the untapped and unknown emotions that surface when Elisabeth visits the happy home now occupied by Paul, Jenny and, occasionally, Paul's girlfriend, Shelly, played by Toni Kalem, the actress who beat up Goldie Hawn in Private

Right away, there's Paul's anger and Jenny's curiosity, which all too quickly ripens into love for the mother she's never known. And there's remorse and regret from Elisabeth.

"I wanted to be a mother to you, but I didn't know how," she says during a motherdaughter jaunt through New York City.

This is one of the movie's many nice little Elisabeth - she was known as Lizzie then - moments that, alas, doesn't add up to the "Great Moments" the CBS slogan promises. and their daughter, Jenny, played by Ari The script is full of contrivances and an in-Meyers. # Evolutionary leap in video equipment seen for '80s

©1983 N.Y. Times **News Service** 

NEW YORK — With electronics getting smarter and friendlier every day, whether in the guise of personal computers or bionic organs, the friendly old television set has stayed essentially unchanged in this country since the advent of color broadcasting in the 1950s. But the technological lull may end during the decade of the '80s.

The change will be not so much a matter of program content - a social problem beyond technological considerations - as an evolutionary leap in equipment.

The most dramatic developments in the offing, foreshadowed by somewhat improved reception already available in Europe, will bring movie-quality images to the home television screen. The technological changes remain in the experimental stage. But most experts believe that enough progress has now been made so that, within the decade, television pictures will be transmitted for reception in homes, schools and business as refined as those projected from commercial 35-millimeter movie film.

And the facility will exist to project such pictures - in large size, clearly focused and with what the industry calls "high definition" - onto an ordinary living-room or classroom wall. For the most unlike a movie, television stands in the way of highpart, television engineers created the image in a series definition broadcasting. have learned how to make the of thin horizontal slices using dustry has not been able to agree on general technical new technology requires a much more informationmove deftly - in competition poration (or NHK, Japan's cycles per second - wide. ween 54 megahertz and 60

megahertz. Within this space, all the information necessary for producing a color picture with sound must be electronically encoded.

But because a highdefinition signal carries so much more picture information, it requires a channel about five times wider than this standard. And because broadcasting slots are a valuable worldwide commodity, anything that uses so much space is hotly contested.

Cable systems offering more than 100 regular channels in the near future would have no difficulty setting aside 10 or 15 of these for two or three high-definition programs. But direct highdefinition broadcasting from satellites will have to wait until at least 1984, when geosynchronous satellites with sufficient capacity (such as the Advanced Westar) are in orbit.

Most industry spokesmen believe business and institutional use of high-definition programming is much closer at hand than widespread residential acceptance, which could take a decade.

There is some hope, too, for access to the 12 gigahertz high-definition usage within band that will be the first piece of the spectrum opened for broadcast services since 1952 (and probably the last in gigahertz — 12 billion cycles per second — is in a range called "superhigh" frequency, above even the radar frequencies used in microwave ovens (2.45 gigahertz). In fact, last November the Federal Communications Commission accepted a proposal from CBS that part of this band be used for high-definition television, but national standards must still be developed.

The Senate recently ratified a treaty, drawn up by

at left, limit the sharpness of today's television immembers of the International Telecommunications Union in Geneva, that allocates frequencies from 12.3 to 12.7 gigahertz for direct broadcast

this slot will have to wait for another conference in Geneva next summer.

service. But the matter of

With images equal in quality this century). Twelve to 35-millimeter film, projection television sets that provide wall-size pictures should become much more attractive for home use. They are not new - black and white units were available more than 30 years ago. But they were hefty as refrigerators and much uglier. Moreover, they could not compete with the rising quality and falling cost of regular sets.

> The whole problem of projection television is to bring lots of electronics and optics

into a living-room-size space without making the package look like The Incredible Hulk in the corner. Until 1973, when the Advent corp. introduced its first "Videobeam" model, the task had proved to difficult for consumer markets.

A regular color television receiver has a picture tube painted with red, green and simultaneously to create a superimposed, full-color image. But the Videobeam innovation was to use three separate picture tubes — one for each primary color - each containing optical mirrors (similar to a telescope's) for projection.

Videobeam's introductory price of \$2,500 and its relatively compact size — the monitor unit, about as big as two orange crates, cast a sevenfoot diagonal image on a reflective screen - were attractive to taverns and motels and even to a few trendy souls below the rock-star income level. But the Videobeam's projection tubes required complicated alignment of

struction. A series of marketing mistakes combined with expensive production to create a deluge of red ink for Advent, which caused the departure of Videobeam inventor Henry Kloss.

Henry Kloss has a reputation in the home entertainment business as something of a wizard. In fact, a good case blue phosphors. Three can be made that the mass separate beams of electrons market hi-fi industry sprang excite these phosphors from his brow in the form of products from Acoustic Research (AR), KLH and Advent. About a year after being forced out of Advent, he surfaced from his home basement laboratory in Cambridge, Mass., with a new projection tube dubbed the 'Novatron."

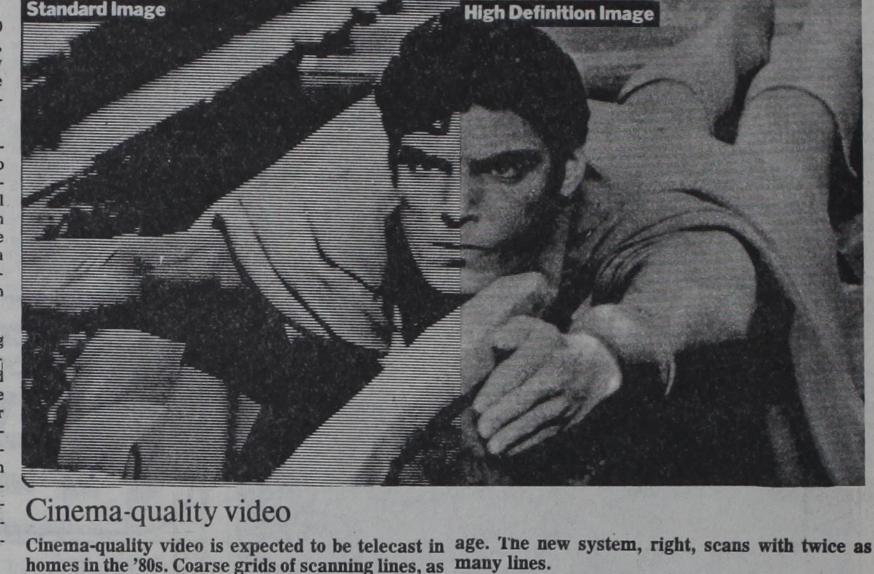

The Novatron solved its forerunner's alignment problems by placing the projection mirror at the back of the tube and using the tube's glass envelope to connect it to the faceplate. An electron beam fires through the mirror at the back and hits a phosphor patch on the faceplate. The light image from this collision is then refleted by the mirror through the faceplate to the

Novabeam Model One is about five times brighter than commercial movie screens.

Elegance in engineering tends to set standards. By now the Novatron architecture has been imitated in dozens of ways. Projection televisions differ in image size (some will project onto a flat wall in subdued light with no screen), console bulk, and basic layout of projector in relation to

The major stumbling block for manafacturers is still retail price. At \$3,000, good projection sets are far beyond the budget of most viewers. There is the technical impediment, too, of image quality being no better tham image source. With most American households still receiving television signals through rabbit ears or roof antennas from local transmitters, all the glitches so annoying in a regular telvision picture become giant flaws on a big screen. This is precisely how cable-fed - or eventually satellite-broadcast

 high-definition programming may unlock the next treasure chest in home

# With images equal in quality to 35mm film, projection television sets that provide wall-size pictures should become more attractive for

Opponents usually spend several days getting psyched up when the Arkansas Razorbacks come a hog-callin.' Knowing full well Eddie Sutton's Hogs bring a tenacious defense and solid outside shooting, opposing coaches usually put their gray matter into overtime when trying to figure out the secret to unlocking any upsets. Usually.

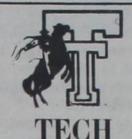

But because Mother Nature turned Lubbock into the snow capital of West Texas, coach Gerald Myers only has one day to turn his Texas Tech University basketball team's attention toward the Porkers. One day to get his Raiders prepared for the 11th-ranked team in the nation. Solving America's recession is an easier task. But then, Ronald Reagan never had to go oneon-one with Darrell Walker.

"Playing Arkansas with just one day to prepare is not any time at all," Myers said Tuesday. "We have to go light during practice so we don't wear ourselves out. We'll have to have short, snappy practices. You just want to be sure you don't expend a lot of energy during practice."

The Raiders are coming off a 54-50 overtime victory against the Rice Owls Monday night in a game that was rescheduled because of Satur- Monday night." day's fog and snow. The win upped Tech's SWC record to most of the second half as Rice Saturday night. We had 2-3 and the season slate to 5-13 Virginia and Tulane, and but left the Raiders with Auburn, which lost to somewhat of a shaky start to a week that includes games with Baylor Saturday and Texas Last week's Second Ten was A&M Monday, not to mention

> "It was important to us to win Monday night, without

Radio: KEND-AM, KRLB-FM, KTXT-FM

### **TEAM NOTES**

TECH - Playing its toughest opponent during a four-game week that includes games at Baylor Saturday and Texas A&M ... Coach Gerald Myers has had only one day to prepare for the Razorbacks after playing the rescheduled Rice game Monday ... The Raiders had to come back twice in the closing minutes of the game to defeat the Owls 54-50 in overtime ... Myers is 11-14 in games against the Hogs . But Tech leads the overall series 31-24 and is 20-5 in games played at Lubbock Yet the Razorbacks have won 11 of the last 12 meetings, with a 79-74 upset win in Lubbock the only blemish ... Freshmen guard Tony Benford had 16 points in the Rice game to lead all scorers ... Bubba Jennings is still leading the team in scoring with a 14.8 clip.

ARKANSAS - The Hogs rebounded from their only loss of the season to beat the Texas Longhorns 83-64 Monday night in Fayetteville ... Arkansas is 15-1 on the season and ranked 11th in the latest polls after falling from the no. 4 spot . Guards Darrell Walker and Alvin Robertson lead the team. The duo was the subject of a recent Sports Illustrated story ... Coach Eddie Sutton has lost to Tech only four times in eight seasons at Arkansas ... Ricky Norton and Carey Kelly were suspended before the season but were reinstated right before conference play . 6-11 Joe Kleine, a transfer from Notre Dame, is shaping into a fine center, averaging 12.1 points and 7.1 rebounds a game ... Wednesday's game will be televised back to Arkansas.

any question," Myers said. "We have three games left against good teams. But we have to play better than we did

opened up a lead of nine points pointed to that time and things with 10 minutes left. But Tech went downhill from there. But slowly whittled away, eventually tying the game before coming back to win in overtime behind a five-foot looping shot by Bubba Jennings. It wasn't the best game Myers has seen all season, but it's a win, a rare occurrence this have just one true experienced

"We didn't play particularly well until the last 10 minutes including the overtime," Myers said. "Up until that point, we were a little flat. I The Raiders were behind for think we were ready to play

> But can a team that just barely beat the last-place Owls have any possible chance to beat the 15-1 Razorbacks? Can the Raiders, who guard in Jennings, be able to

I really can't say for sure why

stay on the same court with one of the best guard tandems in the country in Walker and skymate Alvin Robertson?

It's hard to tell. Arkansas rebounded from its only loss of the season, a 75-60 shellacking to Houston, to beat Texas 83-64 Monday night up in the Ozarks. Most everybody else would be pleased with a 19-point victory, but Sutton wasn't too impressed by his team's performance.

"We didn't play very well against Houston, and we didn't play well against Texas," Sutton said Tuesday. "Even before Houston beat us. we weren't playing very well. It's a long season, and you have your ups and downs. Right now, we are on a downer."

Things were very deceiving when the Top 20 polls came out last week and Arkansas was ranked fourth. Although the Hogs were undefeated at that point (their record now is 15-1), many people still were skeptical of the Razorbacks, especially since their ranking put them ahead of such teams as Virginia and Georgetown.

"When we were fourth in the country, everybody up here knew we weren't the fourth best team in the country," Sutton said. "We were only there because we hadn't lost yet."

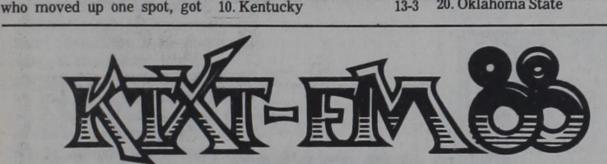

"Those polls early in the year are all based on records," Myers said. "They become more realistic once conference play starts. But they deserved it as much as anybody."

At least Walker and Robert son deserved it. Walker, the 6-4 senior who has done quite a bit of maturing since arriving on the Fayetteville campus, is leading the team in scoring with an 18.8 average. He had 28 points in the win over Texas. Robertson, a 6-3 junior,

# SPORTS BRIEFS

### Another recruit selects Tech

Todd Phelps, a 6-3, 240-pound lineman from Fort Worth Haltom, said Tuesday he will sign to play football for Texas Tech University.

Phelps is the second player to commit verbally to Tech during the 1983 recruiting season. Monday blue-chip linebackerrunning back Ricky Boysaw of Monahans indicated he will sign with the Raiders.

The national signing date for high school prospects is Feb.

Phelps was named to Texas Football's Top 90, The Fort Worth Star-Telegram's Top 100, The Houston Post's Hunted 100 and The Houston Chronicle's Top 60. He played both guard and defensive tackle for Haltom.

Tech reportedly is in contention for the signature of Brad Hastings, a 6-4, 230-pound blue-chip linebacker from Arlington Bowie. Hastings also is considering playing for the University of Arkansas, the University of Nebraska and Texas A&M University.

# Tracksters place at WT

Seven Texas Tech University track team members earned first and second places Tuesday in the West Texas State University Invitational in Canyon.

Nate Frier, a transfer athlete from Garden City, Kan., Junior College, captured first place in the 60-yard dash with a time of 6.20. He also won the 300-yard dash in 32.73.

Freshman Jerome Holland, last year's Class 5A state hurdles champion, set a meet record in the 60-yard intermediate hurdles with a time of 7.01. Tony Gamble, a freshman from Odessa Ector, won the 880-yard run with a 1:58.4 clocking.

Tech athletes who earned second places were: Red Cloud, mile run, 4:31.4, and two-mile run, 9:44.91; Leonard Harrison, 60-yard dash, 6.26; Thomas Selmon, long jump, 22' 7"; and King Simmons, 60-yard high hurdles, 7.33.

No team points were kept. Fourteen Tech athletes participated in the indoor meet.

# Basketball promotion planned

A special promotion for Texas Tech University students will be featured tonight at the Raiders' basketball game with the University of Arkansas.

Pizza Hut of Lubbock has donated 5,000 red and black thumbshakers that will be passed out at the student entrance on the west side of the Municipal Coliseum. Included in the shakers will be coupons for discount pizzas at Pizza Hut.

Tipoff for Tech's game with the Razorbacks is scheduled for 7:30 p.m.

Riggins key to Redskins' attack

By The Associated Press LOS ANGELES - Stop John to do some play-action passing Riggins and you stop the or maybe straight drop-back

Washington Redskins. It would seem to be that simple. Not necessarily.

"If Riggins isn't stopped, if he goes unchecked, if they can run the ball down our throats, right defensive end and a member of the Dolphins' Monday.

But A.J. Duhe, their roving linebacker, pointed out: "It's not all that easy. They've got Joe Theismann, who's one of the better passers in the game right now."

stop Riggins on first down because we feel that the best thing we're doing as a unit is playing pass-rush and pass coverage," Duhe said.

"So if we can get in there the same division with the and hold Riggins to no gain or Giants and Eagles and they Riggins' statistics," Jacoby ing it 100 percent and so are crack," Betters interjected.

maybe two or three yards on first-and-10, that'll put them in a situation where they'll have passing - and that'll give us the opportunity to do what we do best."

Miami's 3-4 defense has been able to rein in the running games of the New England if they can do that, they'll Patriots, San Diego Chargers win," Doug Betters, Miami's and New York Jets in the playoffs.

Meanwhile, Riggins, a "Killer B's" unit, said 235-pound fullback, has been the driving force in Washington's playoff victories over Detroit, Minnesota and Dallas en route to Super Bowl "The last three weeks we've

"Our biggest objective is to fronts," said Joe Jacoby, the Redskins' left tackle and a Washington's offensive line. "It'll take a couple of days for us to get ready, but we're in

both use 3-4s. We see it from played teams with four-man each of them twice a year."

Miami

**Dolphins** 

(10-2)

"They're not a huge defensive line, but they're not member of the Hogs, small, either," said Washington guard Russ Grimm. "They come off the ball well. It'll be a challenge."

"We take a lot of pride in

said. Riggins rushed for 553 yards during the regular have "a big, strong offensive season, then amassed 444 in the three playoff games.

Redskins

(11-1)

years old and that he doesn't have that many years left," said Grimm. "He said to us, strength, a lot of momentum." 'Let's go out in style.' He's giv-

"He's been running over people all year and the experts say he's a guy who picks up momentum as he goes," Betters said. "We know we (the line) can't let him get to our secondary or he'll start punishing those guys. We've got to control the line of scrimmage. We've got to get to Riggins before he can build his acceleration 'cause he likes to sit back there and look a little bit and take two or three steps and pick his hole and blow through there."

Duhe, whose three interceptions keyed the Dolphins' 14-0 victory over the Jets for the American Conference championship, said the Redskins line that just knocks people off the ball. If they give Riggins a "Riggo realizes that he's 33 crack, he'll fall forward for that extra four or five yards because he runs with a lot of

"We can't even give him a

"We've played against some great running backs, but most of them are quick, thrashing types. Riggins, he looks and when he sees where he wants to go he's just a basic straighton power runner who'll go right over you as soon as go around you. He's a different type of runner than we're used

Betters acknowledged that the offensive line and the twotight-end offense have been pivotal in Washington's success, and he expects no surprises in that department.

"The run is the first responsibility for the defense," he said. "We've got to shut that down. Then we've got to contain Theismann, force him into situations where we can dictate to him what we want to do, not be put in second-and-3 or third-and-2 situations, where they're going to have the upper hand. We've got to win on first down, hold them to less than three yards."

# Former football player begins jail term

SUPER BOWL XVII

By The Associated Press

MIAMI - Former pro football player Don Reese, who detailed his cocaine use in a national sports magazine story last summer, began serving a minimum six-month prison term Tuesday for violating his 1977 drug probation.

Reese surrendered to bailiffs in the Dade County Courthouse and was taken to the Lake Butler Reception and Medical Center in North Florida, where all state inmates are processed. He may be transferred to another facility later.

Reese faces an indeterminate sentence of six months to five

years, with the Florida Department of Corrections determining how much time he acutally serves.

Dade Circuit Judge Judge Ellen Gable also ordered Reese to enroll in a prison drug program.

Reese, who played for Miami, New Orleans and San Diego in the National Football League, revealed his cocaine use in a Sports Illustrated story last June, just five weeks before his 1977 probation term was to end.

Reese and fellow Miami Dolphins lineman Randy Crowder originally were convicted of selling a kilo of cocaine to an undercover officer. Both served one year in the Dade County Stockade and then were placed on five years' probation.

The Sports Illustrated story detailed Reese's use of cocaine in jail and after his return to the NFL with New Orleans and San Diego. The article alleged widespread cocaine abuse in

It also triggered an investigation by Miami authorities, who subsequently charged Reese with violating his probation. He was sentenced in October, but was permitted to remain free and live with his wife and two sons.

"I'm doing all right," said Reese, who was allowed to talk with reporters when he arrived at the courthouse.

Rockets' GM

fines Hayes

By The Associated Press ORCHARD PARK, N.Y. -Chuck Knox, head coach of the Buffalo Bills, resigned Tuesday, the National Football League team announced. Knox handed his resignation to club owner Ralph Wilson in Detroit after the two could not agree on an extension to his contract, which was to run through next season. Knox was relieved of all contract obligations, team spokesman Dave Senko said. "I appreciate very much the support of Ralph Wilson and the opportunity to coach the Bills these last five years," Knox said in a prepared statement.

> "Chuck Knox did a remarkable job of building the Bills and we wish him success in the future," Wilson said.

# Handling the Hogs

# UA boss maintains successful program

By JOHN KELLEY University Daily Sports Writer

It's early in the Southwest Conference post-season tournament championship game last season, and the University of Arkansas basketball team is a bit sluggish. The Houston Cougars are playing step for step with the Razorbacks. The Hogs are falling short of the fans - and more importantly, the coaches' expectations.

Suddenly an Arkansas player drives the lane and draws a whistle for charging. Arkansas coach Eddie Sutton fires out of his chair, he can't believe the call. Sutton dances in disbelief for a moment and then begins berating the official in the same manner a kid gets reprimanded for trampling mud on a new carpet.

The ref can take no more, he slaps a technical foul on Sutton, sending the Arkansas fans into a mild riot. Then, almost as if on cue, the Hogs begin to regroup. Things begin to click. Arkansas eventually pulls away, winning by 15.

"I don't get that many technical fouls; I think I got three all last year," Sutton said. "Usually when I get one it's by design - maybe to get the team pumped up or make a point with an official who's made a couple of bad calls. You have to have control on the bench, so when you get one it needs to be for a purpose."

Such is the way of Eddie Sutton. Things in the Hills are done by design, to make a point and for a purpose, at least as far as Sutton and Arkansas basketball is

### Sutton

concerned.

When Sutton took the reins of the Hog program in 1975, he was saddled with a team that had only one winning season in the previous 10 years. The Hogs had no real tradition, and they played in Barnhill Arena, which practically was a 5,000-seat barn on a hill.

the place to be. The Hogs went 17-9 and finished second in the year. Fans began to emerge, and tradition followed.

have averaged 23 wins a year, they have won or shared five of the last six SWC titles and have played in six straight NCAA tournaments.

not the main reason for Arkan- athletic department and tion and loyal fans.

our system. We believe in around the state." team play. We recruit young men who are dedicated to ton has accomplished as much there.

guys that are hard to guard. Every head coach needs good players and good help."

Earlier in the year, though, Sutton had problems with two players. They weren't showing the type of dedication needed to perform for the Hogs. Sutton exercised some of his disciplinary powers, fall semester.

"It is most important in our home. society to live by rules," Sutton said of the situation. 'Somebody has to be in control, and if the others disobey, they need to be punished."

Arkansas teams, of course, have been trademarked by Myers, who also is known as a curs in Texas.' disciplinarian. Both prefer Sutton moved in and turned slow, patterned offenses and begins. If Sutton's teams Barnhill Arena into a Hog are fond of aggressive didn't win on the floor, all the Heaven. He made Arkansas defense. The comparison is hoopla would be insignificant.

conference in Sutton's first same things," Sutton saif. said. "A coach can only do so Since then the Razorbacks same. We come from the same thorough breds. When Gerald Myers."

working hard and winning. off the court as on for the I've had some good players — Arkansas program. Renovating Barnhill and getting the fan support were the first steps. Now he has become an ambassador of basketball for the state.

And the fans respond like few others around the country. Every game played at Barnhill during the last six years has sold out before the season suspending the players for the started, and the Hogs have a 24-game winning streak at

"The people of our state have done a great deal to insure our success," Sutton saif. "Our fans have made Razorback basketball the phenomenon it is today. We have an unusual situation discipline, which has led many because we are the only game to compare Sutton with Texas in town. We don't have the Tech University coach Gerald separation of loyalty that oc-

Still coaching is where it all "Coaching will always be

"We both believe in the most vital aspect," Sutton "Our philosophies are similar, much with the talent he has. and we handle players the You have to have some school of thought. No one in coaching's not the most imour league coaches better than portant, I'll get out of the business."

"He's a great coach," Some might suggest Sutton Myers said of his counterpart. has created the perfect Despite facts that support "He asked for a total commit- coaching job. He has good the contrary, Sutton says he's ment in basketball from the players, a program with tradi-

Professor and Classroom

### Stroke mechanics class offered

The Aquatic Center will offer a stroke mechanics class beginning at 6 p.m. Feb. 3. Instruction will cover efficiency in breathing, kicking, pulling and coordination for the American crawl, back crawl, butterfly and breast stroke. Registration continues through Feb. 2. Telephone 742-3896 to register.

### Early bird lap swim begins

Lap swimming for early birds will be 7-8 a.m. Mondays, Wednesdays and Fridays continuing today at the Aquatic Handball, table tennis, racquetball Center. An area will be reserved for this purpose. The program runs on a trial basis, and attendance will be reviewed Feb. 25 to determine continuance.

### Bowling deadline extended

The league bowling entry deadline has been extended to 5 p.m. today in the Rec Sports Office. Bowlers must meet at 3:30 p.m. Friday at Brunswick Bowl for a registration meeting before bowling begins at 4 p.m.

### **Equipment swap slated**

The Outdoor Shop will sponsor an equipment swap from 6-10:30 p.m. in 201 Student Rec Center as part of the third annual Rec Sports All-Nighter Jan. 28.

The swap will be an opportunity for students, faculty and staff to buy, sell and trade used outdoor equipment such as skis, backpacks, tents and sleeping bags. To register equipment for sale or trade, telephone Ted Riggs at 742-2949 or come by the Outdoor Shop, 206 Student Recreation Center.

Entries for handball doubles, men's and women's table tennis doubles and men's, women's and co-rec racquetball will be accepted until 5 p.m. Thursday in the Rec Sports Office. Students schedule tournaments during their free time throughout the semester.

### Ski trip spaces available

A few spaces are still available for the cross-country ski trip Feb. 11-13 to Sipapu, N.M. Cost is \$75 and includes transportation, equipment, rentals, lodging and instruction. Telephone 742-2949 for more information.

### Weight training session rescheduled

The recreational weight training introductory session has been rescheduled for 8 p.m. Thursday in the Rec Center classroom.

# P.F.T. registration begins

Registration for Rec Sports' Physically Fit Techsans program will be at 7 p.m. Thursday in the Rec Center classroom. Students may also register from 8 a.m.-5 p.m. in the Rec

The program is designed to encourage Tech students to exercise regularly and practice healthful living habits. Participants predict the number of points they will attain through various cardiovascular exercises, such as jogging, swimming, aerobic dance and cycling. Those who reach their goal receive a t-shirt. There is a \$4 t-shirt fee. Awards are also given for any department that has at least four members on the PFT board and 75 percent attain their goal

### Rec Sports classes registration

Registration continues for several Rec Sports classes. They are intermediate racquetball, tennis, squash, juggling, judo and karate. All classes are free and open to students, faculty and staff. Telephone 742-3352 to register or come by the Rec Sports Office.

# Fitness testing resumes

Rec Sports will resume fitness testing from 8-9:30 p.m. Thursday and from 2-4 p.m. Friday in the Rec Center lower level multipurpose room. Testing includes percent body fat, cardiovascular step test, flexibility test, grip strength test and blood pressure.

### Make-up schedules available

Make-up schedules for intramural basketball games cancelled Sunday are available in the Rec Sports Office. League schedules for intramural basketball and indoor soccer
