saying the city has improperly sought redress in a higher court election is part of the at-large election system that Woodward absence, as here, of any request whatever to the district court system in which only whites would be elected to the city coun-

The city's brief argues that the city has met all the provisions Attorney Dan Benson, representing Lubbock minorities in the of FRAP Rule 8, which dictates the standards to be observed in

Benson said on Tuesday the city has failed to meet four stay from the district court that has original jurisdiction over criteria necessary for taking a request for a stay to the 5th Cir-

FRAP Rule 8 gives appellants the option of petitioning the election system was invalid under the 15th Amendment of the higher appeals court for an injunction only if it can be proven "that application to the district court for the relief sought is not

The city claims to have satisfied that requirement because it could expect no relief from the trial court since "it is unlikely that the trial court would now delay implementation of the election plan he devised and previously mandated."

But Benson said the city has no legitimate recourse to the apths after Woodward's ruling before attempting to obtain a stay. Further, Benson said, the city improperly presumed that the

court to see whether or not it would grant a stay. "One cannot simply infer a probable refusal on the part of the Benson said the act of registering candidates for an at-large district court, in the absence of an actual refusal and in the for a stay," the respondents' brief reads.

> The second guideline of FRAP Rule 8 requires appellants to prove that they would suffer "irreparable harm" if the injunction is not granted.

> "Candidates for all six positions (on the city council) would be exposed to the ordeal and expense of campaigning for a position created by a judgment which is not yet final and which could be reversed," the city's brief reads.

> Attorneys for the city argue that a stay is necessary to ensure that the April election is run under an at-large system, thus

In his decision, Woodward instructed the city to abandon the practicable, or that the district court has denied an application," "preventing irreparable harm to those already in office and those seeking office."

Benson said the inconvenience to council members and prospective council members in no way qualifies as the "irreparable harm" described in the appeals guidelines.

Addressing the third requirement of Rule 8 — that appellants must prove harm to interested parties if the injunction is not granted - the city's brief reads, "failure to grant the stay would actually appear to present more potential harm to minority candidates than to continue the present system."

Benson also discounted that claim. "A stay would harm the plaintiffs because it would continue the segregated election cil," he said.

Benson said the city has failed to meet the final criterion, that is, it has not proven that denial of an injunction would do "harm to the public interest."

Blacks and Hispanics account for more than 26 percent of Lubbock's population, Benson said, and that significant portion of the public would be done a disservice if the injunction were

Officials discuss Devro purchase

By ROBIN RYNN CHAVEZ University Daily Reporter

Skepticism over funding alternatives for the Devro building dominated a special meeting Wednesday of Texas Tech administrators, Tech regents and members of the Coordinating Board, Texas College and University System.

The meeting was for clarification and discussion purposes only. No decisions were made.

The Devro facility, a 110,000-squarefoot building that sits on 102 acres of land, has been appraised at between \$2 million and \$7 million, depending on usage. It has been offered to Tech by a subsidiary of Johnson and Johnson Corp. for \$600,000, about \$2.58 per square foot.

The only condition of the purchase is that Tech make a good faith effort to use the facility for research. If, after two years, the facility has not become selfsupporting and successful, Tech would have the option of selling the property. The proceeds from any sale would be put into scholarships and grants for Tech

Johnson and Johnson has given Tech a March 1 deadline for closing the deal on the facility in order to coincide with the end of their fiscal year.

Tech administrators presented their proposal to purchase the property for a science/engineering research facility to the Coordinating Board in late January. The board agreed to conduct a special meeting Feb. 27 to vote on the purchase.

"We took the decision to mean the board was positively considering the proposal," said Tech President Lauro Cavazos. "However, the board said it had three basic questions on the terms of the purchase. Today's meeting was to answer those questions and attempt to address any doubts about the purchase of the facility."

Following a summarized repeat of the Devro presentation presented to the board in January, Eugene Payne, Tech vice president for finance and administration, attempted to take apart the reasons the board gave for its misgivings on the project.

The Coordinating Board objections

• The Devro building is not in the Tech

master plan. • Tech is overbuilt (the university has too much space for the number of

• The administration should look for a better funding mechanism.

Payne began his presentation by admitting that the board is correct in its first objection. The Devro building is not in Tech's master plan. But a 1967 legislative action approved space for a research park, similar in function and facility to the proposed use of the Devro building. In addition, he said, the 1980 master plan provided for a rehabilitation of the Engineering Research Building and an addition to that building at an ap-

proximate cost of \$4 million. Payne said a \$6.2 million engineering research rehabilitation and addition is included in the legislative request for 1984. With the acquisition of the Devro building, the rehabilitation of the Engineering Research Building still would be needed. But, he said the

research addition would be largely taken care of, especially if the Textile Research Center were moved to the new

There was little discussion on Payne's comments from Coordinating Board members attending the meeting.

Payne next presented figures to disprove the question of Tech being overbuilt. The Coordinating Board has said Tech's 114.9 square feet per student is sufficient.

But Payne said that if Tech's modest 1.2 percent recent growth pattern continues during the next five years, the number of square feet per student will be 111.1. That would leave Tech with a space deficit of 63,000 square feet. He said he was not implying that Tech was in desperate need of a lot of new space, but simply that it is not overbuilt.

Payne said square footage of the University of Houston, the University of Texas at Arlington and North Texas State University is recommended by the board at 114 per student. None of those universities has both an agricultural and engineering school as Tech does.

He said if the 2,165,000 square feet the agriculture program adds to Tech's inventory were not counted, the number of square feet per student would be only 111. Therefore, he said, without the agricultural college, Tech already would be (in the fall of 1983) at a deficit of 116,000 square feet, not considering growth needs.

Payne emphasized that there are no plans to do away with the College of

Board members seemed to have no problem accepting that information.

It was on the question of funding the purchase, however, that problems arose. Administrators are proposing to fund the purchase of the facility with building use fees - or general use fees - that are paid by all Tech students. Payne told the board that after considering all available funding mechanisms, utilization of building use fees was determined most

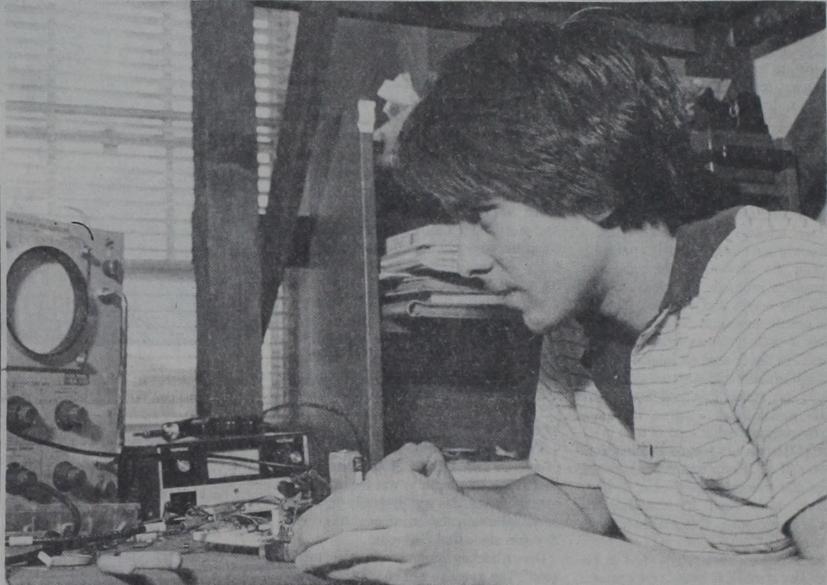

Payne said there is not enough unrestricted money in the Tech Foundation to cover the balance of the purchase. A loan also was considered possible, he said, but not desirable because of high interest rates. He said taxes on such a loan would be \$25,000 per year, and the interest would be \$80,000 per year.

If a loan was taken out by the Tech Foundation to purchase the property, the school would have to rent the building from them and the interest on the principle then would be paid with state funds anyway, Payne said. He said the building use fee is available and

appropriate. Coordinating Board member John Clymer said he did not know if it would be appropriate to use funds generated by all students to the benefit of a few, and he asked if funds could be used from the ad

valorem tax. Payne said he did not know if it was possible to use money from the ad valorem tax to fund the project.

Clymer said, regardless of whether the ad valorem tax was feasible to use, the Tech administration should come up with a different funding mechanism before the meeting with the entire board.

Oral tests sought for foreign profs

By DAMON PEARCE University Daily Reporter

Teachers who speak English as a language other than their primary language will be the subject of a Texas Tech Student Senate resolution to be presented at the Senate meeting tonight.

The resolution, sponsored by Sen. Allison Bennett, recom- but the student. mends that an oral test be implemented in addition to a written English test as a prerequisite for employment at Tech.

"As a senator I think that it is my responsibility to listen to the

the most," Bennett said. "Often, the topic of the class is hard enough, and when you can't understand the teacher, it is even worse."

According to John Darling, vice president for academic affairs, an oral test program already is in effect.

When the university hires a foreign-born graduate teaching assistant, he or she is required to pass an English exam designed for those who use English as a second language, Darling said.

After passing the English exam, the applicant is required to participate in an English training program, directed by Rosslyn Smith, an assistant professor of classical and romance languages at Tech.

"If they do not pass the training program and are not approved by Smith, then we do not hire them," Darling said.

Darling said full-time instructors are not subjected to the same program before employment but are closely examined for "hands-off" operation. English proficiency and performance.

"The easiest argument in the world when a student is not doing well in a class is that he does not understand the instructor. "Often students try to use this as an excuse for poor perforcomplaints and gripes of the students, and this is one that I hear mance," Darling said. "It is an easy way to justify a poor grade blaming a foreign instructor."

Another resolution recommends the revision of residence halls visitation hours.

In other action, Senate members will consider a bill to move funds be cut off to KTXT because of its the spring general election up two weeks from the week after religious programming. spring break to the week before.

According to the regulations of the Senate, the election is to be funds be cut off to the Tech High Riders conducted the second week of March. This year the set date con- because that group is referred to in its flicts with spring break.

The Senate will meet at 8 p.m. today in the University Center Senate Room.

Lawyer says resolution is 'censorship'

By DAMON PEARCE University Daily Reporter

Texas Tech general counsel Marilyn Phelan said Wednesday that a Student Senate resolution recommending that funds be discontinued to KTXT-FM radio would constitute censorship and would be unconstitutional.

"We do not tell the campus newspaper what to print, and likewise we would not tell the radio station what to play," Phelan said. "That is the university's position, but this is a student resolution."

Phelan cited a recent Supreme Court case in which a religious group was denied the right to use a university building. The group appealed and won the case in the high court.

"We do not prevent religious groups from being established or meeting or using university facilities," Phelan said.

Phelan said that in her opinion, the playing of the program "Powerline" would not constitute the establishment or endorsement of a religion and therefore would not violate the separation of church and state.

"It's my understanding that the program is just music, and we don't tell them what kind of music to play, in any way," Phelan said.

"If we did tell them what they could or could not play, that would be censorship, and we do not do that."

Phelan said that although the radio station is funded mostly by university funds, the university runs a strictly

"We do not interfere in either the cam-Many times, Darling said, the problem is not the instructor pus radio station or the campus

newspaper in any way, including their funding," Phelan said. The controversy started when the resolution was introduced to the Senate

Authorities say fire alarms worked

By KEVIN SMITH

University Daily Reporter

The fire alarm that was reported as failing to operate correctly during the fire at Coleman Hall last Thursday did function properly, according to Texas Tech authorities and a spokesman of the architectural firm that was partially responsible for the installation of the alarm system.

Tom Davis of Mills-Davis Architects said the individual who designed and installed the alarm system was concerned about reports in the local media that the alarm had inherent faults that had caused it to fail.

Davis said the alarm performed properly and that its efficiency had been

documented several times. He said the alarm ceased operation because of human error.

James Burkhalter, director of the housing office, confirmed that the alarm did operate and said it stopped because a circuit breaker failed.

Davis also said the price of the recently installed system that was reported in the local media was grossly inflated. Most local media, including The University Daily, reported that the system had cost in the area of a half million dollars, with some reports even higher.

"Some of the media reports were way high," Davis said. "The system in fact cost around \$100,000. That's not an exact figure, but it's 99 percent right. It certainly wasn't up there in the millions of

Tech Fire Marshal Charles Whittler is conducting further investigation on the incident and said he would not make any definite statements until his investigation was completed. He did say, however, that the alarm operated as it was supposed to and probably was stopped early because of a wire that shorted

Davis said his company is not overly concerned with misleading reports about the alarm system. He said the firm is aware of the facts and knows that the Tech housing office received the correct

What we were concerned about was the individual who installed the system

dollars that some people were saying it who was getting a black eye from the press for something that wasn't his fault," he said.

Davis said he is confident about the efficiency of the equipment installed in Coleman. He said a system similar to that of Coleman's will be installed in the Stangel-Murdough complex this

He said the Coleman alarm is the first large, comprehensive fire alarm system to be installed at Tech. He said there are no inherent faults in the system's design.

There still has been no dollar estimate of the damage caused by the fire. Burkhalter said most of the damage was confined to the basement and the electrical and mechanical equipment that is

White House defections repeat election year ritual

WASHINGTON — At the beginning of the fourth year of any administration, strange things happen here, particularly to Republicans. They begin to long for home, which in the Reagan Cabinet and White House staff usually means California.

For a while, they don't seem to mind the old Washington fog, but after a couple of years of embassy dinners, White House dinners, accusative congressmen, squabbling bureaucrats and cheeky columnists, it gets a little cold here and they begin to wonder how to escape.

The assistant attorney general and head of the antitrust division of the Justice Department, William F. Baxter,

went back to Stanford Law School recently, saying he was "burned out."

Two key presidential assistants, David S. Gergen, director of White House communications, and Kenneth Duberstein. the administration's chief lobbyist in Congress, have resigned, and so has J. Lynn Helms, the administrator of the Federal Aviation Administration. Perhaps the most serious loss to the president and to Secretary of State Shultz will be the retirement in May of Larry Eagleburger, the undersecretary of state for political affairs. He has played a moderating role at State ever since the days of Henry Kissinger and has been trying to get out for a long time. Shultz persuaded him to stick it out until the spring. Ambassador Jeane Kirkpatrick is not very happy with her job at the United Nations or even with her cushy

Washington suburbs.

Then there's the question of Martin Feldstein, the chairman of the Council of Economic Advisers, who insists on saying what he believes, which is a reckless thing to do in this administration.

Compared with most recent administrations, the Reagan team has held together fairly well. They ran into a few awkward problems with Secretary of State Haig, Secretary of the Interior James Watt and Richard Allen at the National Security Council, but they haven't had too many dropouts, which may be a good or a bad thing, depending on your political judgment.

One reason why Reagan has had so few embarrassing resignations is that so many of his top appointees have been old California buddies.

Presidents Kennedy, Johnson, Nixon

and would like to come home to the and Carter had a few home folks around porary suite at the Watergate. for understandable reasons, but it's hard to remember a time when the secretaries of State, Defense, Interior, Justice and the top advisers and keepers of the door at the White House all were personal friends of the president from a single state in the Union.

> This is not the sort of thing, however, that is likely to last, regardless of the outcome of the presidential election. These people like Reagan, but they love Califor-

> Republicans regard service in Washington as a sometime thing: a "Who's Who." Unlike the Democrats, who think of politics here as a life career and buy houses and move their furniture and kids into them, the Republicans tend to rent furnished houses or take a tem-

So with the new year, we are likely to see the departures of more and more prominent officials, and on the whole, this won't be minded in a city that loves

The only trouble is that the best, like Eagleburger at State and Frank Carlucci at Defense, head for home, if they can remember where home is, while the worst tend to stick around.

At the beginning of every new year, and particularly every presidential elec-As a general proposition, the tion year, people here wonder about the problem of continuity - particularly how to rescue the foreign policy of the United diversion, even a duty, and a good line in States from the capriciousness of

> Every new admininstration seems to come in here with the view that its predecessors have staggered and blundered into trouble and that the new

boys have a new way to bring peace and sanity to the world. This has been true of both parties since the last world war.

But as things usually turn out, neither party can get away from the fundamental problems before the nation, and the importance of continuity at the highest levels of the State and Defense Departments. In Eagleburger and Carlucci, there were two such men who might have served as permanent undersecretaries of State and Defense and helped to provide continuity despite the change and turmoil of presidential elections.

But Eagleburger wants to be able to educate his children, and Carlucci also had the need to consider the welfare of his family. So reluctantly they go away, and we are left with the inevitable changes and accidents of party politics.

LETTERS TO THE EDITOR

embassy quarters in the Waldorf-Astoria

Rock Profile

To the editor:

I would like to respond to Daniell's letter concerning the advertising and content of the show "Rock Profile."

The show was exactly what we said it was, "A Closeup Look at Rock Music its Sounds, Lyrics, and Messages..." To be sure people would not be "deceived," we stated at the beginning of each program that we were Christians and,

Daniell stated that the entire show was a condemnation of rock music as "only Satan's medium," demonstrating that he did not listen very closely. We clearly stated that everyone involved in the production of the program happens to love rock music. That's why this show focused on rock. Most of the same points, however, could be made about country music as well.

This program was simply a focus on the content of a lot of rock music today. Granted, we did not cover all of it, but how long can we make one program?

What else concerns me is that Daniell's comments were either the product of poor listening or deliberate distortions. On the section concerning occult messages in music, again we clearly stated that our primary concern was not with the subliminals or backmasking but with the obvious, blatant, out-front variety which is beyond the scope of "misinterpretation."

Concerning Jimi Hendrix's statements, they were entirely accurate. The accusation that they were manipulated in form or content is groundless.

Concerning homosexuality, while certain groups do advertise being gay, we never said because homosexual groups like certain music, that the music is promoting homosexuality.

By the way, Daniell stated we overlooked the most common theme in music - "love." If you're referring to "One Night Stands," "Feels So Good It's Gotta Be Right," and "Making It All the Way," etc., we did ... we just happened to put it under the topic of "Immorality." Joe Crews

To the editor:

As I look through Mr. Daniell's opinion, printed on Feb. 14th, I can only see confusion. I, too, attended the rock seminar, but did not feel duped as Mr. Daniell did.

The leaflets that were handed out advertised the following: "A close-up look at rock music, its sounds, lyrics and messages using computer assisted projectors and four-track DBX sound." The rock show followed all its advertisement said it would. Also, right in the center of the leaflet was written: "A PROFILE." In Webster's Dictionary a definition of the word profile is: "A set of data often in graphic form portraying the significant features of something." What are the therefore, our viewpoint would be as > significant features of much of rock today? Sex, drugs, the occult and violence, to name a few. The rock seminar used the dictionary definition to present its facts. Now why was I not duped? Because I had no presuppositions about the show. I realize that a profile is a look at something from a particular angle. I see no trickery involved - just a misconception on Mr. Daniell's part.

As for the show itself, the musicians themselves promote the ideas of sex, drugs, the occult and violence. The artists openly proclaim these ideas and beliefs in their lyrics as well as in interviews. I've never seen an interview with a Christian artist that does the same. The article also stated that love is a major theme in rock music. I agree. The question is, however, what kind of love is it? Most of that love is geared to the sexual aspects of it. If one would listen to the lyrics and messages in most of today's music he or she would find what those artists are promoting. It is not God, that's for sure.

The show expressed God's view on the messages in much of today's rock music. The purpose for this being, as it says in the Book of Acts, "to open their eyes so that they may turn from darkness to light and from the dominion of Satan to God." The show made it known that there are two sides to music and that these sides are at a spiritual level, as Mr. Jimi Hendrix was quoted. We were given the option to decide which side we wished to follow. You can follow the world or God. Luke Josephs

Olympic Hockey

To the editor:

I'm writing in response to the Olympic hockey article in The University Daily of February 10. The writer of the article called the U.S. hockey team "the diaper line." I wonder how many people realize that most of the Olympic players will be playing in the National Hockey League

Pat LaFontaine, age 18, part of that "diaper line," will be playing for the New York Islanders next season. LaFontaine must have some talent since, if you recall, the Islanders have won four straight Stanley Cups. The 18-year-old was also New York's first draft choice.

Meet Ed Olczyk. Ed wears Huggies, all right. Ed is also considered by many NHL scouts a 17-year-old who has the maturity of a 25-year-old player. If the Olympic team coach Lou Vairo didn't have confidence in Olczyk, why would Vairo have chosen him for the team?

About the statement made by the writer that hockey is the only sport that means anything, who can forget Eric Heiden, who won five gold medals in speed skating at Lake Placid in 1980? And what about Tai Babilonia and Randy Gardner, who had to withdraw from the pairs figure skating in those same

Yes, I agree that the 1980 Olympic team was a true miracle, but how many people know the last time the United States won the gold medal in hockey before 1980? Go back to 1960 when the U.S. had players such as Bill and Roger Christian, who played key roles in defeating the Russians.

people in the United States have expected the 1984 team to win the gold. As history shows, this was probably quite an unrealistic expectation, since it has been 20 years since that 1960 team.

Does a hockey team have to be old to be good? The average age of the 1980 team was only 21. The average age of the 1984 team is only one year younger. The difference between the two teams is that the 1980 team was bigger and more physical,

States would like to play in the Olympics,

Ever since that miracle in 1980, most

while the 1984 team is faster and has bet-

Maybe the United States will never have a great amateur hockey team like the Soviet Union or Czechoslovakia, but do those countries have professional hockey like that in the United States? The priorities of the players are different. In the United States and Canada, most of the young players want to play in the NHL, whereas in the Soviet Union the young players want to play in the Olympics. Sure, a young player in the United but if it's not an Olympic year, why shouldn't he turn professional? What gain does the promising young amateur get from playing on the USA National

Team, besides another shot at the Olym-

Two more points I'd like to make. How many people know about the series between the United States and the Soviet Union hockey teams that started December 9, 1983? The USA beat the Soviet Union in a six-game series 3-2-1. And how many people remember at what age Wayne Gretzky first broke into hockey playing for Edmonton of the World Hockey Association? Well, he was the same age as Ed Olczyk and Al Iafrate of the "diaper line." Yes, "the great one" was only 17.

Brett Morgan

KTXT, Etc.

To the editor:

This letter is written regarding the article appearing in the UD on February 13, of the possibility of a new Student Senate resolution being introduced condemning KTXT for not appearing at a meeting on February 9 held by the Student Senate. References will be made to the resolution introduced on Feb. 2 concerning the funding of KTXT and the High Riders.

The repeated usage of the word

RRATIONAL? WHY, I FEEL GREAT!

"condemn" by the author has the tendency to lead the reader to believe that KTXT has performed some drastic measure (such as shooting down a Korean airliner). All they did was miss a meeting. For the author of the resolution to attempt to put KTXT at the same level as that of the Soviet Union by condemning them serves no purpose except to lead us to the conclusion that we should hardly be able to take their condemnation of the Soviet Union seriously.

The Lebanon Dilemma

His reason for condemning KTXT? Simply because he felt they were not upholding their obligation to the students by not attending this meeting. Wrong! The obligation that KTXT has is to provide a learning environment for the student body. They do this through providing "hands-on" experience in running a radio station and as such, should not have to worry about their programming as long as it is not offensive to the standards set by society (and I don't think that religion is offensive, being that human sacrifices are no longer allowed). Their programming is well-rounded and should stay the way it is.

For the Student Senate to require that KTXT has to provide justification that

LIKE GIVING BACK MY

CIGARETTES BEFORE

I BREAK SOME OR ALL

OF THE CHILD ABUSE

they are upholding obligations to students is a little ridiculous. The Student Senate is an organization that does not, as far as I know, have the power of coercion. So, as long as the Student Fees Advisory Board does not pay heed to their resolutions (which are simply a matter of their collective opinions), they cannot require KTXT to provide justification of

To KTXT and the High Riders: Have no fear, and keep up your support of student activities across campus!

BRIEFS

75-year-old Ethel Merman dies

NEW YORK (AP) - Ethel Merman, who parlayed her brassy, booming voice into a half-century of Broadway stardom, belting out such classics as "There's No Business Like Show Business" and "I Got Rhythm," was found dead at her home Wednesday. She was 75.

Miss Merman died of natural causes in her home, said Dr. Elliot Gross, the city's medical examiner.

He said Miss Merman's body would be cremated at the Frank Campbell Funeral Home. A spokeswoman there said no information would be released about the singer's death or possible memorial services because her son, Robert Levitt, "wants it strictly private."

SMU again rejects gay group

DALLAS (AP) - A gay student group at Southern Methodist University has vo ed to win official recognition at the campus even though the Student Senate voted for the third time Tuesday not to accept the homosexual organization.

"I think we have to try again," said Miriam Blake, the cochairman of the Gay and Lesbian Student Support Organization. "We need this group. We need to be recognized. We won't go away. Sooner or later, they'll realize it."

In a move that backs the senate's vote, University President L. Donald Shields said he would overturn the group's recognition even if the senate had approved it.

Nurse convicted of killing baby

GEORGETOWN (AP) - The family of a slain 15-monthold girl rejoiced at the conviction of her killer Wednesday but expressed sorrow that justice took so long and that a string of earlier suspicious infant deaths was not investigated sooner.

The parents, grandmother and great-grandmother of Chelsea McClellan, who endured the 41/2 painful weeks of the trial of Genene Jones, embraced each other and cried when the jury convicted the vocational nurse of killing the girl in September 1982 with an injection of a powerful and hard-to-

The girl's grandmother, Robin Alexander, said the verdict left her satisfied that Chelsea "did not die in vain."

Jones is charged in Bexar County with one count of injury to a child. An investigation is continuing into a string of unexplained deaths at the intensive care unit of Medical Center Hospital in San Antonio.

Druse militia moves into south Beirut

By The Associated Press

BEIRUT, Lebanon - Druse and Shiite militias swept the hills south of Beirut on Wednesday after routing the crumbling Lebanese army for the second time in nine days. Druse leader Walid Jumblatt said President Amin Gemayel should resign to be tried for "crimes."

A Druse offensive that drove the army from positions south of the capital left the U.S.

port, almost surrounded by Moslem fighters.

The Marines maintained access to the Mediterranean via a narrow strip, crossing the coastal highway, to a boat landing zone dubbed the "green beach." Spokesman Maj. Dennis Brooks said there was no fighting around the base.

The Druse fighters and Amal, the largest Shiite militia, joined along the coastal highway and made

States support proposals for amendment to balance budget

By The Associated Press

posals for a constitutional amendment to balance the federal budget have lain dormant in Congress for over a year, but in the face of deficits year. nearing \$200 billion, activity is increasing on the state level to force the government's hand.

Balanced-budget proponents say they are within striking distance: 32 state legislatures now have formally petitioned Congress to convene a constitutional convention to draft an amendment to require a balanced U.S. budget except in times of war heavy pressure from the or other national emergency.

the 34 states needed under Ar- Missouri Legislature in May

ticle V of the Constitution. Proponents now are beating WASHINGTON - Pro- the bushes in at least four states - New York, Kentucky, Vermont and California - in hopes of coming up with the additional two states this

> They claim momentum is on their side. "We're only two states away and the impetus is greater now than ever because people are so concerned with high deficits," said David Keating of the National Taxpayer's Union.

"We've always thought Congress would not pass a balanced budget resolution without states," added Keating. He That's just two away from said the decision by the

to join the ranks after it repeatedly rejected such proposals gave the "dramatic turnabout" proponents needed to get their effort back on

If two more states follow suit, Congress would be bound to call the first such constitutional convention in the nation's history.

The Founding Fathers provided two routes for amending the Constitution. Congress, by two-thirds votes in each chamber, can propose such an amendment, as has been done followed for each of the current 26 amendments. A constitutional convention also can be called upon the petition of two-thirds of the state legislatures.

School board split on reforms

By The Associated Press

while he is in power.

DALLAS - State Board of Education members disagree over whether to alter the accelerated timetable under which Texas schools will adopt broad curriculum reforms that may put thousands of schoolteachers out of work.

In its preliminary vote Saturday, the board agreed to put the course requirements and standards into effect this fall instead of phasing in the changes over three years.

Dallas School Superintendent Linus Wright estimates that up to 5,000 teachers statewide will have to be retrained or lose their jobs under the new timetable.

\$19.95

Many teachers of electives such as art and music must be recertified in basic subject areas because the curriculum changes will require more math, reading and science.

Virginia Currey of Arlington said she and others on the board agree that some exceptions will have to be made to the timetable before the board takes a final vote.

But another board member, Will Davis of Austin, said the shorter timetable is necessary because local school officials need to be "prodded" into action.

Davis, who made the motion to adopt the reforms this fall, said the three-year plan would cause unnecessary delays.

"Until last Saturday, we had a casual and easy implementation schedule that most school officials were tickled with," Davis told The Dallas Morning News. "It was too easy."

Currey said some board members tried to point out the potential problems during Saturday's meeting, but chairman Joe Kelly Butler refused to recognize them before the vote.

She said she voted for the package knowing the board "can still work out all the bugs" before the March vote.

Yvonne Karz, associate commissioner for general education, said the commissoner's office is preparing a recommendation to stretch out the timetable.

But when it comes to careers—you have to think potential not only place.

You might even think that urban valleys on darker shores offer you the only chance to achieve, to win, to create and invent, to do something important. You might think that pleasure has to be sacrificed to success. But you're wrong.

INMOS was established 5 years ago with the objective of becoming a world leader in VLSI. We have succeeded in introducing the world's fastest 64K Dynamic RAM and we are the market leaders in fast 16K Static RAMs and we are setting the industry standards withour 64K EEPROM. These products are currently being sold around the world with great success.

At INMOS, innovation is the name of the game. Consider the transputer—a programmable

component capable of executing 10 million instructions per second. The transputer will quickly establish itself as an industry leader in the 32 bit microprocessor families and will propel INMOS into the microcomputer marketplace. We offer an environment where it's possible to follow ideas to different—and important—conclusions.

All that and Colorado too.

If you have a BS/MS or PhD in Engineering, Physics or Marketing, contact the Placement Office and make an appointment to meet with us when we visit the campus.

If you're interested in intellectual freedom-with a view -let's talk. If you're not able to meet with us, send your resume to Susan Eames, INMOS Corporation, Dept. CN 4, P O Box 16000, Colorado Springs, Colorado 80935. An equal opportunity employer.

CAMPUS BRIEFS

Sociology professor to lecture

Marietta Morrissey, Texas Tech associate professor of sociology, will speak on "The Cross Cultural Study of Female Headed Households" from 3:30 p.m. to 5 p.m. Friday in 129 Holden Hall.

Faculty and interested graduate and undergraduate students are invited to attend. This is the fourth in a series of presentations of Tech's Fourth Annual Faculty Research Spring Symposium. The symposium is sponsored by Tech's Center for Applied International Development Studies.

Noted criminal lawyer to speak

Sir Lionel Luckhoo, a noted criminal lawyer from Guyana, will speak at 10 a.m. Feb. 23 in the Law School Courtroom

and at 2 p.m. in the University Center Senate Room. Luckhoo is listed in the "Guinness Book of World Records" as the most successful criminal lawyer (235 murder trials, 235 aguittals). He represented Jim Jones and the People's Temple prior to the mass suicide-murder at Jonestown. The presentation is sponsored by the Christian Legal Society.

Freshman applications available

Applications for Freshman Council are available in the Student Association Office on the second floor of the Univer-

The deadline for application is 5 p.m. Friday.

UD correction

The deadline for entry fees and forms for the Miss Texas Tech Pageant is noon on Feb. 24. The University Daily incorrectly reported that the deadline is this Friday. Applications and fees must be brought to business office 103 in the Journalism Building.

Evita' triumphs over technical difficulties

By KRISTI FROEHLICH University Daily Lifestyles Writer

With a mix of slides, song, samba and a few sound problems, the national touring company production of the Broadway hit musical Evita quenched Lubbock's thirst for quality entertainment.

The opening night performance at Lubbock Municipal Auditorium Tuesday got off to a shaky start with some feedback problems and speakers turned up so loud that what the actors were singing was not discernable. But the problems were quickly overcome and the audience was treated to a tempestuous story about the life of Eva Peron, the second wife of Argentine dictator Juan Peron.

bination of live performances action.

the bedroom.

in Evita. Everything was rendition of the song, "Buenos sung. This helped keep an Aires," was invigorating. ongoing pace, but some of the audience may not have been used to this style. It was an effective vehicle for the musical. Unfortunately, it sometimes was hard to hear what was being said.

Scenery for the production did not clutter the stage. It was kept to a bare minimum and didn't detract at all. The costumes also were simple. The simplicity of both was a The character was a dissi-The musical used an because the audience's atten- ple of what Peron was doing ed stronger than the first, in unusual, yet interesting, com- tion could be focused on the that they weren't seeing. GAME NOTES

TECH vs. HOUSTON - Raiders will be trying to snap Houston's 35-game Southwest Conference win streak ... The last time Tech won in Houston was 1976 by a score of 80-69 ... The Coogs enter the contest as the No.4-ranked team in the nation ... Last time the teams met, Houston was ranked third ... Cougars won the last game 88-66 Jan. 12 before a standing-room-only crowd in the Coliseum ... The defeat was the only loss the Raiders have suffered at home all season ... Houston leads the series 13-10 ... The Coogs have won five straight and 13 of the past 16 .. Houston's Michael Young has scored 18, 26 and 21 points in his past three games against Tech ... Akeem Olajuwon had 18 points, 25 rebounds and 10 blocked shots in the first meeting this season ... Houston is 21-3 overall and 11-0 in the conference . The Cougars have won at least 20 games during each of the past four seasons ... Olajuwon, the nation's leading rebounder, has moved into ninth place on the alltime SWC rebounding list ... The 7-0 center also has 388 career blocked shots ... Young is 10th on the SWC all-time scoring chart ... The 6-7 forward needs 11 points to move into ninth place.

Tech women travel to Houston

The Texas Tech women's basketball team travels to Hofheinz Pavilion today for a 4 p.m. matchup with Houston.

The Raiders, 8-3 in Southwest Conference play, are battling Arkansas (9-3) and Baylor (7-3) for a second place bye in the first round of the conference tournament.

"Every time we step on the court now it's critical," Tech coach Marsha Sharp said. "You can't really pick out any of these teams left on our Sharp schedule and say that this one is more important than that second spot." another, because any loss is going to hurt our chances for play, is coming off a 103-72 loss

to Texas, the No. 1 team in the situation where we get into a tributed 17. Sherry Douse led nation. The Cougars' recordsetting 48 turnovers negated an impressive 59 percent field goal performance.

Houston's Nell Haskins scored a career high 27 points in the Texas game and is leading the conference in field goal percentage, hitting 59.1 percent of her attempts. Haskins is just one of four Cougar players (also Monica Lamb, Sonya Watkins and Toni Money) shooting over 50 percent.

'When we play Houston, we Houston, 5-6 in conference don't want to run," Sharp

because that's when they're the best."

The Raiders have beaten the Cougars in their past three meetings. Four of the past five decided by four points or less. Tech defeated the Coogs 64-61 Jan. 14.

The Raiders went ahead 12-2 in the first five minutes of that game, but they were outscored 29-16 in the final 15 minutes of the first half.

Carolyn Thompson led all scorers with 24 points, and said. "We cannot get in the Kellye Richardson con- with four seconds remaining.

run-and-gun battle with them, Houston scorers with 13

Tech led 51-40 with 5:30 left in the contest. Houston came back, however, with the help games in the series were of the Raiders' ineffective free throw shooting.

> Houston had a chance to go ahead with nine seconds left, but Tech reserve Lori Gerber stopped a Houston player attempting a routine layup.

Richardson sealed the victory, sinking two free throws

West German women ahead in medal race

By The Associated Press

SARAJEVO, Yugoslavia --If the Winter Olympics had a Most Valuable Player Award, it would be a close contest between two long-stemmed women who are collecting medals in clusters.

Karin Enke, 22, a Dresden technical student who shifted to speed skating because she was too tall and awkward for figure skating, won her fourth medal Wednesday, finishing second to East German teammate Andrea Schoene in the 3,000 meter race on Zetra's

OPEN LATE

Being a Marine Corps Officer can open the door to opportunities you may have thought were beyond your reach. It helped Marine Officer Charles Bolden become a NASA astronaut. And if you're willing to make the commitment, it could help you also. You can get started while you're in college with our undergraduate officer commissioning program. You could take advantage of getting:

■ \$100 a month while in school

■ Freshmen and Sophomores train during two six-week summer sessions each paying more than \$1100

■ Juniors train in one ten-week summer session and earn more than \$1900

- Free civilian flying lessons
- A starting salary of more than \$17,000

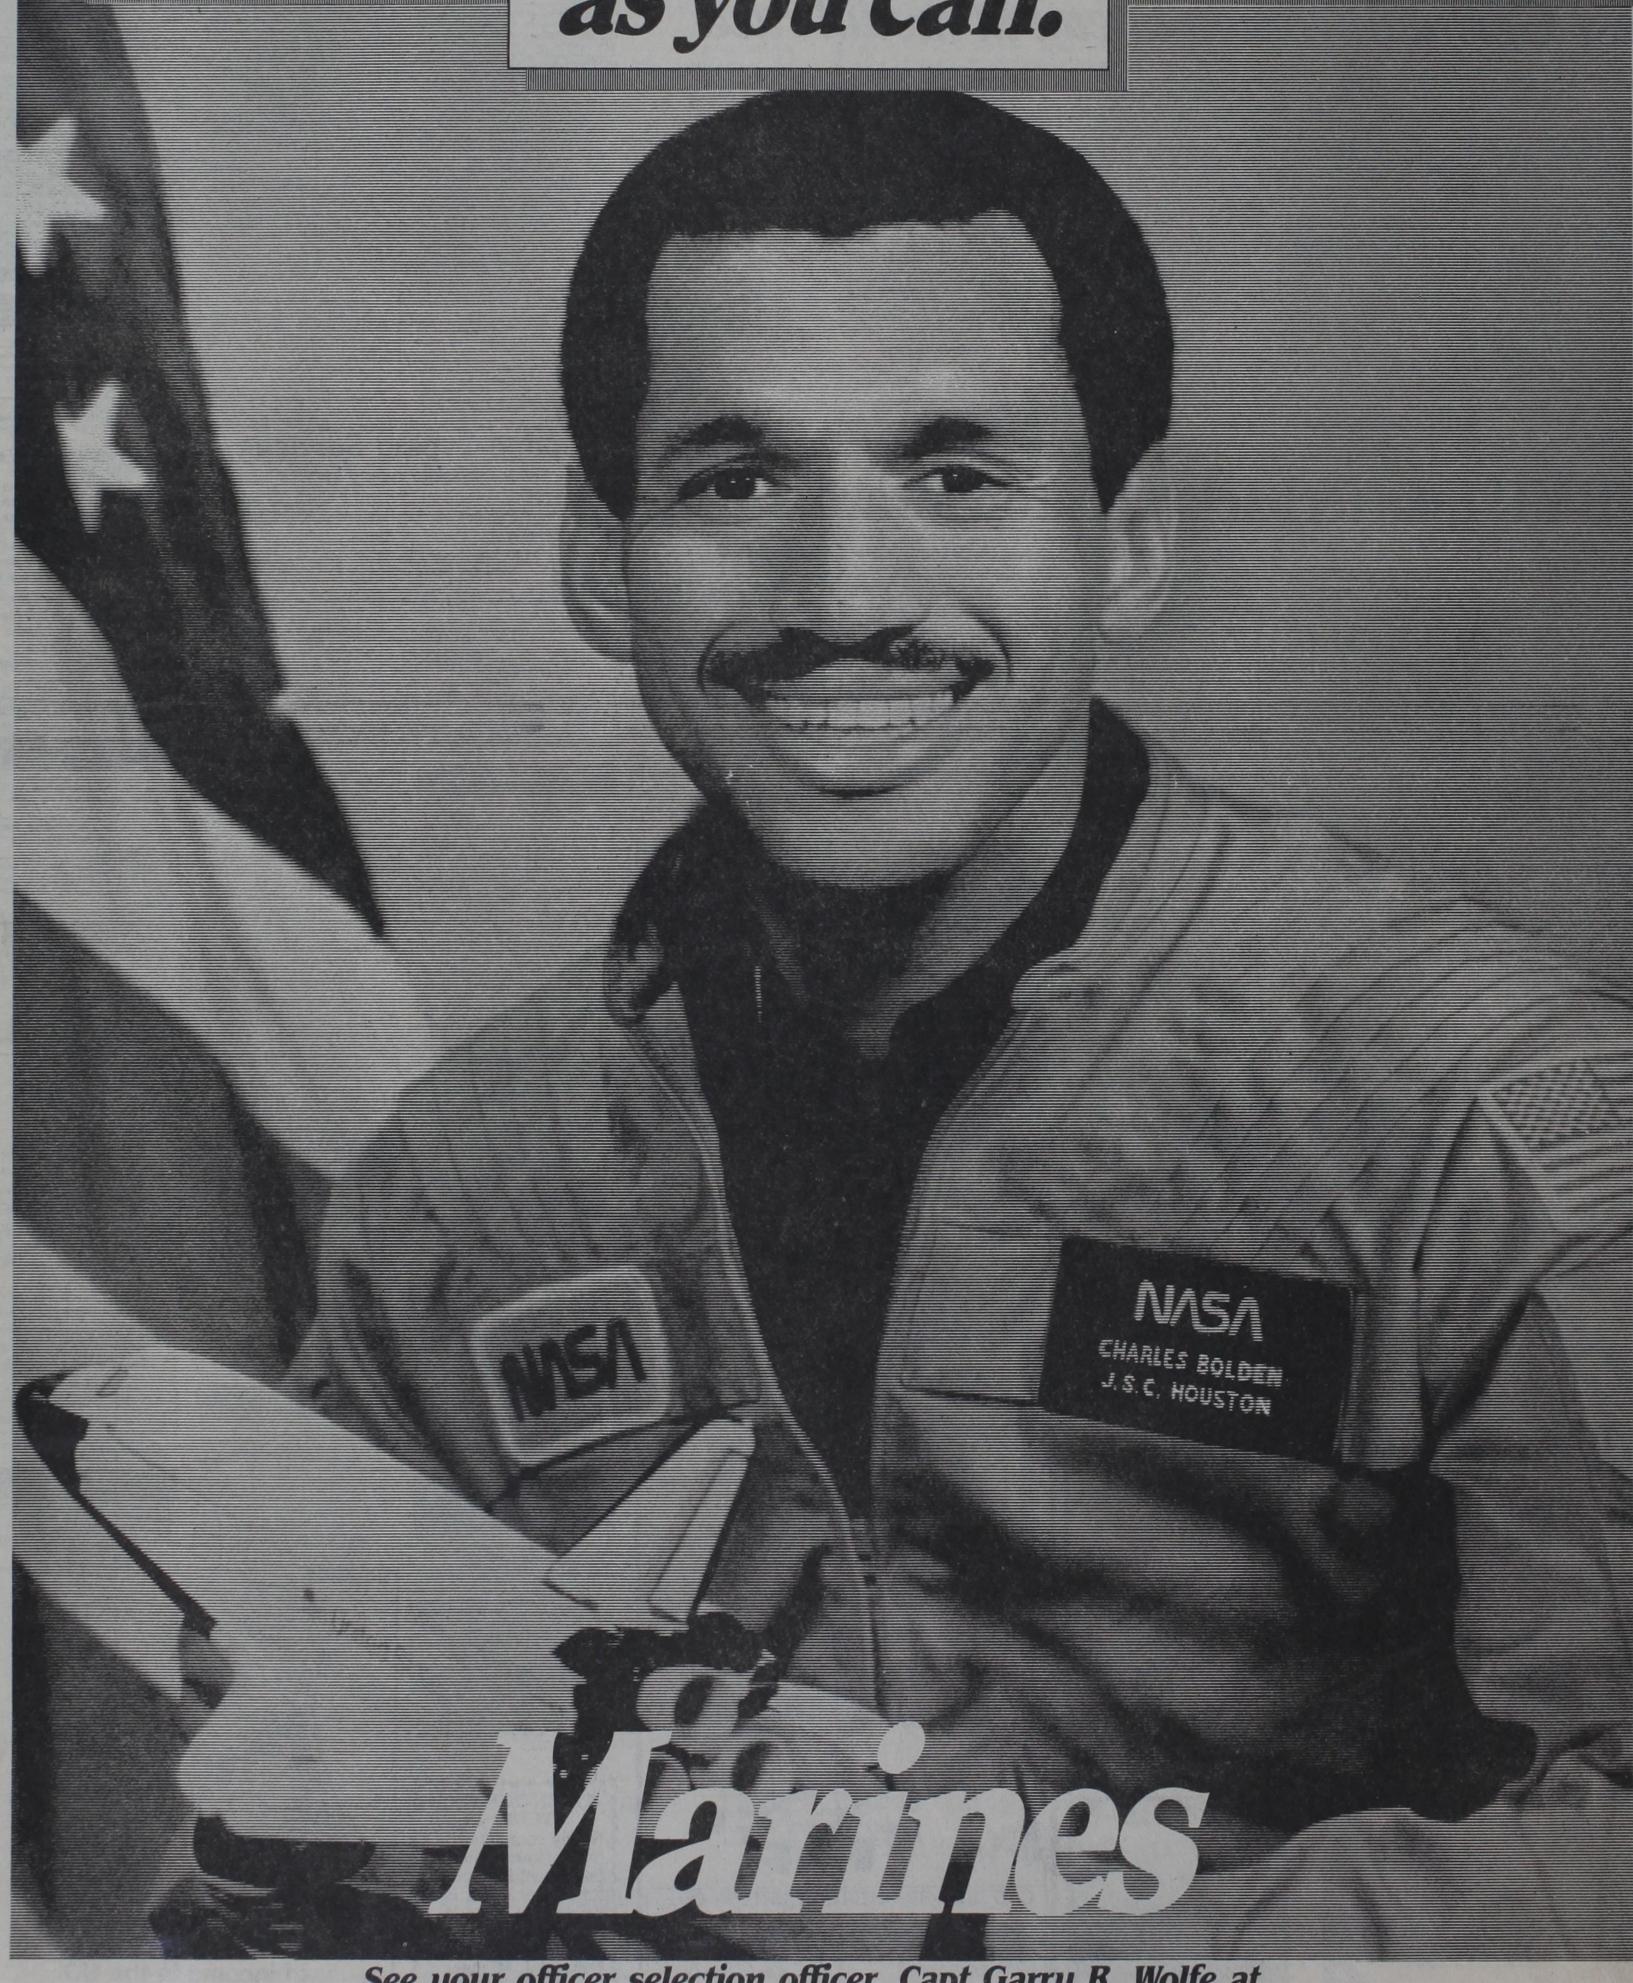

Immediately upon graduation you could become a Marine Officer. It's your choice. Maybe you're the kind of man we're looking for.

We want you to go as far as you can.

Maybe you can be one of us

The Few. The Proud. The Marines.

See your officer selection officer, Capt Garry R. Wolfe at the Student Union or call 806-797-5464 collect
