

State Home Economics Workshop Continues For 200 Delegates

"The Process of Becoming" is the theme of the Texas Home Economics College Clubs workshop at Texas Tech this weekend.

This year's conference features such speakers as the national president of American Home Economics Assn., Mrs. Florence W. Low, and Dr. Bernice Milburn Moore, consultant in the home and family life education division of the Texas Education Agency.

Dr. Moore, who also serves as assistant to the director of the Hogg Foundation for Mental Health, spoke yesterday morning to the more than 200 coeds here, representing some 18 college clubs.

She explained the meaning of this year's theme, "The Process of Becoming." She pointed out that in the process of becoming someone, students must seek to accept responsibility along with their individual preferences.

Dr. Moore, who recently returned from a conference with President Kennedy in Washington, D.C., added that the home economist of today must recognize personal values along with values of local and national cultures.

Today in the ballroom in the Student Union Building Mrs. Low will speak on the "Texas Home Economics Blueprint for Progress."

The workshops meet annually at the college the vice president attends.

Vice president this year is Nickie Woelfel, Tech senior from Bovina. Miss Woelfel is majoring in home economics education and clothing & textiles.

During the weekend, the representatives from the various Texas colleges will attend group meetings consisting of program discussions, publicity projects, membership campaigns and scrapbook making.

Besides attending conferences the coeds will hear lectures by state and national officers along with local speakers.

The workshop will elect next year's officers today and adjourn with an old and new officers' luncheon in the Anniversary Room of Tech Union.

In 2:30 p.m. Ceremony

Texas Tech Dedicates New Library Sunday

By MAX JENNINGS

Assistant Managing Editor

A cornerstone laying ceremony at 2 p.m. Sunday will symbolize official opening of Tech's giant new \$2,146,680 Library Bldg., climaxing two years of construction.

Several Tech officials, along with Congressman George Mahon, will participate in the ceremony, to take place at the south end of the east entry.

An open house, to come after the ceremony, will continue throughout the afternoon.

According to architects, engineers and designers, every effort has been made to make use of the library more efficient, more enjoyable and more productive.

"We tried to create a quiet atmosphere and a feeling of informality in certain areas . . . a pleasant, inviting area for study," said Nolan Barrick, supervising architect for the college.

3,000 Enter Daily

Figures on use of the new structure prove the designers successful. Librarian R. C. Janeway says there has been a tremendous increase in the use of the library with more than 3,000 students entering daily. Janeway said that last year in the old building, circulation of two-week books usually ran 300-400 a day at this time.

Now it is running from 600-700 a day. Janeway said that in peak periods of use, usually a few weeks before dead week, highest circulation for one day on two-week books usually reached somewhere around the 1,000 mark. This year he is expecting to reach that figure much sooner as book traffic increases.

There are two primary factors to this increase, Janeway said. One is the novelty of the new building itself, with lots of students just enjoying exploring and taking advantage of new facilities. The other is the in-

creasing emphasis on the part of instructors for the use of the library.

Janeway went on to also explain that increase in enrollment is not the primary factor in increased use of the library, since use is outstripping the increase in enrollment, although he said increases or decreases were never steady.

Surprisingly, Janeway said, a greater percentage of freshmen use the library than do sophomores, although the percentage begins to rise progressively on the junior, senior and graduate levels.

Every conceivable step has been taken to insure the comfort and pleasure of those using the library, according to Barrick. These are considerations of which the average person is unaware. For instance, painstaking efforts have been made to control the noise level.

Designed To Control Noise

According to Barrick, engineers did an enormous amount of work to isolate the mechanical equipment, including setting equipment on pads, and where possible, setting it on springs to absorb the noise and vibration.

Other devices the new plant features include the air filtering system, double filtering system and humidity control systems. An electrostatic filter device filters most of the pollen and dust out of the air drawn into the building, and creates an almost ideal storage space for the more than 530,000 volumes.

Janeway said this filtering system is considered desirable in any library since proper temperature and moisture control will lengthen wear of volumes. He said the filtering system is showing some beneficial side effects as well, since one employee, whose chief duties were dusting of library books, has been released because of the efficiency of the filtering system.

Lighting too has been emphasized in the design,

any and all queries will be answered," Dr. John R. Bradford, dean of engineering at Tech, told the TOREADOR.

The afternoon briefing will feature a panel of experts composed of Maj. Albert R. Hunter, Space Systems Division, U.S. Air Force; Lt. John Shook, project officer of Big Disk radar; Maj. Robert Rushworth, test pilot of the X-15 rocket; and Walter L. Moore, project officer, X-20 Dingo-Soar.

Students and faculty members are invited to participate in the question and answer session.

There is a possibility that Bob White, the American who piloted a rocket 58 miles high, will be present for the programs, according to Dr. Bradford.

Eleven speakers will take part in the morning ceremonies at the auditorium. In addition to individual speeches, color slides and an Air Force motion picture, "New Line of Sight," will also be shown.

In addition to the above-named members of the afternoon program panel, the morning activities will have the following speakers:

Lt. Gen. Howell M. Estes Jr., vice commander, Air Force Systems Command; Capt. Elbert C.

Parker, plans and program division; Donald Gregory, technical assistant to the director, Manned Spacecraft Center; Col. John P. Stapp, deputy chief scientist, Aerospace Medical Division; and Col. Russel M. Herrington Jr., Titan III system program office, Space Systems Division.

Hon. George H. Mahon, U.S. representative for the Lubbock district, will keynote the program. Mahon is chairman of the House sub-committee on military appropriations.

The Air Force Systems Command, with the headquarters at Andrews AFB, Md., was established in April 1961. It is responsible for research, development, testing and procurement of aerospace systems and for the management of the Air Force space program.

The command is composed of seven divisions centered throughout the United States. It embraces a nationwide network of management offices, technical and research facilities, tracking and control centers and the Atlantic Missile Range.

The command is staffed by 27,000 military and 37,000 civilian personnel and accounts for \$8 million, or 40 per cent of the total Air Force budget.

with most areas averaging 100 foot-candles intensity compared to the 10-15 foot-candles considered ample a few years ago.

Because of the extreme care devoted to control of the noise level, a special, quieter fluorescent light was developed especially for the library, Barrick said. He explained that the conventional light gives off a small hum, which, although insignificant in one respect, would create considerable noise in a single area illuminated by several dozen fixtures. Other libraries have since used the new fixtures.

Purposely Left Unfinished

Probably one of the greatest misunderstandings about the construction of the building is that it was designed with uncompleted areas to be finished as finances allowed.

Barrick said estimates were exceptionally accurate. He said it was originally planned to construct the building with framework for expansion, since this was considered a better policy than adding on to a fully completed structure.

This wisdom has already proven sound, since some students have already complained of crowded conditions. Additional furniture in the foyer garden area will alleviate study space problems somewhat.

"I would start expanding into it (the uncompleted portion) today if I could get it finished," Janeway said. "We have already found the building crowded."

Janeway said he made no increases in his staff when he moved into the new building although the same staff is able to accomplish a great deal more work in the same amount of time, with a resultant increase in reader service.

Perhaps Janeway's favorite words, "service concept," best describe this magnificent addition to the Texas Tech campus—a landmark for higher education.

Techsans Attend BSU Meeting

Forty-seven Tech students are attending the Texas Baptist Student Union Convention in San Antonio this weekend.

Theme for the convention, which began last night at the Trinity Baptist Church in San Antonio, is "God's Redemptive Love." Approximately 2,000 students are expected to attend.

Those attending from Tech are Pat Tonroy, Karen Kinard, Pat Holt, Kay Hawkins, Mary Kay Pearce, Debra Ferguson, Char-

lotte Taylor, Juddie Hopkins, Coretta Ward Watkins, Sherry Kinard, Suzanne Taylor, Pat Brazell, Lucia Alexander, Pam Stansell, Murriel Johnson, Diane Yarbrough, Harriet Moore, LaNell Short, Judy Teal, Anita Spikes, Jane Huffman, Sarah Cauley, Kathy Hinger, Carol Cox, Margaret Robinson and Twila Cagle.

Others are Pat James, Larry Jones, Butch Jackson, Nolan Clark, Billy Gayle Wilson, John Moeser, Ernie Batcheller, Tom

Detrixhe, James Currin, Bill Henry, Dwight Young, Jim Richardson, Danny Hood, Bill Golightly, Charlie Bradshaw, Dale Grusing, Gene Welch, George McClesky, Vinson Stamphill, Charlie Thaxton and Jerry Stelter.

Accompanying the group are Rev. and Mrs. S. L. Harris, BSU director, and Linda Kinard, assistant BSU director.

The Tech students will return to the Baptist Student Union late tomorrow night.

READY TO WASH—Camella Moore is only one of the members of Angel Flight ready to wash cars today beginning at 1:30 p.m. The Angel Flight carwash will be between the White Pig and the Gulf Service at 4th Street and College Avenue. —Staff Photo

HAPPINESS CAN'T BUY MONEY

Can education bring happiness?

This is a question that in recent years has caused much lively debate and several hundred stabbings among American college professors. Some contend that if a student's intellect is sufficiently aroused, happiness will automatically follow. Others say that to concentrate on the intellect and ignore the rest of the personality can only lead to misery.

I myself favor the second view, and I offer in evidence the well-known case of Agathe Fusco.

Agathe, a forestry major, never got anything less than a straight "A", was awarded her B.T. (Bachelor of Trees) in only two years, her M.S.B. (Master of Sap and Bark) in only three, and her D.B.C. (Doctor of Blight and Outworms) in only four.

Academic glory was hers. Her intellect was the envy of every intellect fan on campus. But was she happy? The answer, alas, was no. Agathe—she knew not why—was miserable, so miserable, in fact, that one day while walking across campus, she was suddenly so overcome with melancholy that she flung herself, weeping, upon the statue of the Founder.

By and by a liberal arts major named R. Twinkle Plenty came by with his yoyo. He noted Agathe's condition. "How come you're so unhappy, hey?" said R. Twinkle.

"Suppose you tell me, you dumb old liberal arts major," replied Agathe peevishly.

"Have you ever smoked a Marlboro cigarette?"

"All right, I will," said R. Twinkle. "You are unhappy for two reasons. First, because you have been so busy stuffing your intellect that you have gone and starved your psyche. I've got nothing against learning, mind you, but a person oughtn't to neglect the pleasant, gentle amenities of life—the fun things. Have you, for instance, ever been to a dance?"

Agathe shook her head. "Have you ever watched a sunset? Written a poem? Smoked a Marlboro Cigarette?"

Agathe shook her head. "Well, we'll fix that right now!" said R. Twinkle and gave her a Marlboro and struck a match.

She puffed, and then for the first time in twelve or fifteen years, she smiled. "Wow!" she cried. "Marlboros are a fun thing! What flavor! What filter! What pack or box! What a lot to like! From now on I will smoke Marlboros, and never have another unhappy day!"

"Hold!" said R. Twinkle. "Marlboros alone will not solve your problem—only half of it. Remember I said there were two things making you unhappy?"

"Oh, yeah," said Agathe. "What's the other one?"

"How long have you had that bear trap on your foot?" said R. Twinkle.

"I stepped on it during a field trip in my freshman year," said Agathe. "I keep meaning to have it taken off."

"Allow me," said R. Twinkle and removed it.

"Land sakes, what a relief!" said Agathe, now totally happy, and took R. Twinkle's hand and led him to a Marlboro vendor's and then to a justice of the peace.

Today Agathe is a perfectly fulfilled woman, both intellect-wise and personality-wise. She lives in a darling split-level house with R. Twinkle and their 17 children, and she still keeps busy in the forestry game. Only last month, in fact, she became Consultant on Sawdust to the American Butchers Guild, she was named an Honorary Sequoia by the park commissioner of Las Vegas, and she published a best-selling book called *I was a Slippery Elm for the FBI*.

©1962 Max Shulman

The makers of Marlboro are pleased that Agathe is finally out of the woods—and so will you be if your goal is smoking pleasure. Just try a Marlboro.

Tech Union Sponsors Game Listening Party

The Entertainment Committee of the Tech Union will sponsor a "game listening" party tonight in the Coronado Room of the Union.

Beginning at 8 p.m., the party will get underway with card games and refreshments. A scoreboard will be set up to keep a running score of the Tech-Baylor football game.

After the game is over, card tables will be taken down to make room for "The Sharps," a local combo.

"The Sharps have played for several of the jam sessions in the Union and have been quite popular," according to Kathy Thompson, Entertainment Committee member.

Admission will be free.

RAIDERS END UP PANTILES
SAN MARCOS (P) — Several hundred students took part in a party raid at Southwest Texas State College Thursday night but police broke the raid up before it really got started.

Ignored When You Talk?

A noted publisher in Chicago reports there is a simple technique of everyday conversation which can pay you real dividends in both social and business advancement and works like magic to give you added poise, self confidence and greater popularity.

According to this publisher, many people do not realize how much they could influence others simply by what they say and how they say it. Whether in business, at social functions, or even in casual conversations with new acquaintances, there are ways in which you can make a good impression every time you talk.

To acquaint the readers of this paper with the easy-to-follow rules for developing skill in everyday conversation, the publishers have printed full details of their interesting self-training method in a new book, "Adventures in Conversation," which will be mailed free to anyone who requests it. No obligation. Simply send your request to: Conversation Studies, 335 Diversey Parkway, Dept. 9397, Chicago-14, Ill. A postcard will do.

Injured Raiders Bid For Conference Win

By JIM RICHARDSON
Toreador Sports Editor

WACO — Arkansas' steam rolling Razorbacks and Texas' beefy Longhorns gather at Austin today at 7:30 p.m. for a real showdown, which may prove to be the Southwest Conference championship match.

Meanwhile, here at "Jerusalem on the Brazos," an injury-riddled Texas Tech group will do battle with the Baylor Bears, both trying for their first conference win of the current campaign.

Neither Tech nor Baylor has won a game this season, the Raiders in four tries and the Bears in three. But either, or both, could turn into a real party-pooper for any conference sister planning a special New Year's Eve celebration.

Baylor, generally considered at least a one-touchdown favorite tonight, will be facing the Raiders with a glint of revenge in its eye after taking a 19-17 beating last year from a Tech squad that was expected to do little but show up for the game. It was an H. L. Daniels' field goal in the last minute of play that sent the big Green home wearing a blushing pink.

Even in three defeats, Baylor has shown an offense that earned it the tag of conference dark-horse in many pre-season reviews.

The Bruins like to pass, and, as one Lubbock fan said, "If Tech keeps its eyes on the ground, the Baptists are likely to deal the forces of righteousness against them."

Against Arkansas last week, the Bears managed only 46 yards on the ground, but clicked for an awesome 224 yards by passing. Most of this air power is handled by quarterback Don Truell, who holds the conference lead in completions with 16.

Halfback Ronnie Goodwin and end James Ingram have provided adequate targets for Truell's air-lane shots. Goodwin is third in the SWC in pass receiving with 179 yards in 11 receptions. Team-mate Ingram stands sixth in the

league with 128 yards on nine catches.

Tech's David Parks is a nose above both, however, with 180 yards on 13 receptions.

Raider Coach J T King doesn't look for the Bears to forget their passing success.

"Not only is their pass offense one of the best in the conference, it is one of the best in the nation," said King. "And they have good speed to go with it."

Richard Mahan has drawn a starting berth at quarterback for Tech tonight. Doug Cannon will alternate with Mahan and Allen Schuler will be in reserve. Bill Worley and Coolidge Hunt will accompany Mahan in the back-field.

Larry Mullins Narrates Grid Film Monday

A movie of the Tech-Baylor football game will be shown in the upstairs ballroom of Tech Union at 7 p.m. Monday.

The movie is sponsored with the cooperation of the Ex-Students Assn., the athletic department and Tech Union. Larry Mullins, assistant freshman coach and a former varsity tackle for Tech will narrate the film.

BRIGADE SWEETHEART—Sondra Stargel, freshman from Memphis, Tex., was crowned Army ROTC Brigade Sweetheart Thursday at the freshman football game. Presenting her with a dozen red roses is Lee Pfleger, brigade commander. Miss Stargel, elected from 65 candidates, will accompany the brigade staff in all official ceremonies. Brigade XO Charles R. Fifer is protecting the new queen from the rain. She was nominated by the First Battalion. Runner-up was Becky Collins of Ennis, a freshman liberal arts major and Kappa Kappa Gamma pledge. Miss Stargel recently was named Miss Grain Sorghum of the nation.

New Fraternity Chartered Here

Epsilon Xi Chapter of Delta Phi Alpha, national honorary German students fraternity, has been chartered at Texas Tech.

Dr. John Dowling, foreign language head, accepted the charter in behalf of the school.

Installation of the new honorary fraternity will be at 3:30 p.m. today in the Coronado Lounge of the Union. A lecture in German will be presented by Dr. L. John Parker, foreign language department chairman at Arlington State College.

Tech's chapter will be the fifth in the state and one of 100 in the United States.

The fraternity's purpose is "to recognize excellence in the study of German and to provide an incentive of high scholarship." Qualifications include enrollment in the sixth course of German, with a 3.25 in the last six hours. An overall grade point average of 2.75 is required.

Tech chapter officers are William F. Clark, Slaton, president; Jeffrey Lane Greene, Amarillo, vice president; and Carol Ann Minor, Amarillo, secretary-treasurer.

Reservations Begin For Tech Village

By **BILL HEARD**
Toreador Copy Editor

Tech students have reserved 100 of the 200 apartments available at Tech Village, Inc., to date. This privately-owned housing project is available only for married couples at the college.

The project, begun in September, is slated for completion of its first 32-unit building sometime in December. The other six structures will follow in completion, with the entire project to be finished in June 1963.

Foundations are laid for all sev-

en buildings. The plumbing and electrical work is progressing steadily, according to progress reports.

David Grinnell, co-owner and publicity man for the project, invites any couples interested in the apartments to visit the site of the development. It is located north of the National Guard Armory on Detroit Ave.

"We're happy to see anyone interested in Tech Village," he said. Grinnell explained that the project is open to visitors 8 a.m.-5 p.m. Monday through Saturday. It will also be open 2-5 p.m. on Sunday for the next few weeks, he added.

"They can visit the site, look over our plans and actually pick out the apartment which they like," Grinnell said. "We would like to know how long they will be tenants, but no one will be turned away if they plan to stay only a short time."

Prospective tenants will be notified approximately 30 days before the completion of each building so they can make moving arrangements.

Assn. Honors Rodeo Team

Tech's Rodeo Association honored its prize-winning rodeo team at an awards banquet in the Coronado Room of the Tech Union Thursday night.

The team members were presented with black leather jackets with an emblem saying "Southwestern Regional Championship."

The team which competed against the top college cowboys in the nation in the National Intercollegiate Rodeo in Denver, Colo., this past June, is composed of H. C. Zachry, senior art major, Henrietta; Benton Wardlow, sophomore business major, Del Rio; Jerry Carson, senior animal husbandry major, Slaton; and Edd Workman, junior industrial management major, Lubbock.

Bill Barrett and Harold Williams competed with the team as alternates.

Pledge Convocation Opens Here Today

Today is the culmination of fraternity rush week and the pay-off date for both potential pledges and pledge-hungry fraternities.

The Pledge Convocation will be run somewhat differently this year and will be in two shifts. No one will be allowed to enter later than 10 minutes after sessions begin. The first shift is at 1 p.m. and the second at 2 p.m. in the Ag Auditorium.

Rushes should bring pencils and take alternate seats in the auditorium. Tech's grading system and scholastic probation will be explained to make sure each man is aware of pledging requirements.

Rushes who find it impossible to attend either of the afternoon sessions may contact Dean Thomas P. Stover in the Dean of

Men's office to fill out a preference card Monday.

Lists of pledges and their fraternities will be distributed in the Tech Union between 5:30 and 6 p.m. today, according to Mike Denton, assistant in charge of fraternities.

An Interfraternity Council meeting at 5 p.m. will approve or disapprove the list of men filling out late preference cards. All fraternity presidents will be present at that meeting.

Holdovers, pledges who failed to make their grades last spring, will attend the convocation with other rushes.

Fraternity members are cautioned not to be in the vicinity of the Ag Auditorium during the time of the convocation, as official silence began Friday.
