

— Mock Murder — Ellis Dies After Fall

In a mock murder, James Ellis, junior English major, was killed Monday when he was thrown from the west tower of the Administration Bldg. shortly after 11 a.m.

Ellis was carried in a Sanders ambulance to Methodist Hospital where he was declared dead on arrival at 11:08 a.m.

POLICE INVESTIGATING

Lubbock city police are conducting an investigation in an attempt to determine the identity of the murderer.

WITNESSES SAID that Ellis and an unknown male assailant had been fighting in the tower.

Frank McGlouphlin, sophomore government major, said, "The two men fought for about half a minute. Then they disappeared to the other side (east) of the tower. The next time I saw them, they were still fighting. After about a minute, one of the men was knocked down. He was picked up and thrown from the tower. He fell through a tree and hit the ground at the foot of the tree. I recognized the person thrown from the tower as James Ellis."

Lubbock City Police were summoned. Almost immediately they arrested Robert Hoffman, who was just leaving the building. Officers said Hoffman was wearing a coat which closely matched witnesses' descriptions of that worn by the murderer.

HOFFMAN RELEASED

However, police reported later that Hoffman had been released at 2:30 p.m. and was no longer considered a suspect. Hoffman proved, according to the police, that he was in Dean James G. Allen's office at the time of the murder.

AN INVESTIGATION is currently under way into Ellis activities for the past several days, with officials seeking clues to motive and identity of his murderer.

Clyde Prestwood, prosecuting attorney announced that when the assailant is arrested, he will be brought to immediate trial for murder with malice (first degree) in the court of Judge Audrey Bednarz.

James Ellis was the son of Judge and Mrs. James A. Ellis of Lubbock. He is survived by one brother, Johnny.

Folk Sing Set Today

A slight St. Patrick's Day touch will be featured today at the hootenanny in the Tech Union. The affair is slated to get underway at 7 p.m. in the Coronado Room.

KTXT-FM Radio will broadcast the show which is free to everyone. Howard Grant will be emcee.

Students are asked to come early in order to get seats, according to Sue Wiginton and Gary Graves, publicity chairmen.

Highlight of the program will be a parody written by Rob Lawson and sung by the Ones Three Plus One.

Others appearing on the program are Suzanne Johnson, Pat Sain, Rosemary Thompson, Pam Lindsey, The Wanderers, Robin Campbell, Larry Williams, Pete Kellogg, James Bowling, Blue Grass Two, John Werhle and The Gentrymen.

The Entertainment Committee of the Union is sponsoring the show.

Staff photo—Moore

DEATH PLUNGE — James Ellis, Tech junior, is shown in a fatal fall from the tower of the Ad Bldg. Monday morning. Ellis was dead on arrival at a local hospital after witnesses reported the Tech athlete was pushed from the building after a scuffle with an unidentified student, top center. The staged "murder" kicks off the annual Pre-Law Club Mock Trial.

SC Petitions Go Out

Students wishing to run for Student Council positions or for cheerleader may pick up petitions and rules today from 6 to 8 p.m. in the Mesa Room at the Tech Union. A 50 cents filing fee is required.

Dates for the elections are as follow:

April 10—Executive officers and cheerleaders.

April 15—Runoff.

April 24—SC representatives.

April 29—Runoff.

Campaigns for cheerleaders and executive officers begin April 6, and SC representatives' campaigns begin April 19, according to Pat Hamilton, Council secretary.

— Fraternity Focus: Part Four — IFC Court Fills Important Needs

(EDITOR'S NOTE: This is the fourth in a series of articles explaining the fraternity system at Texas Tech. This issue will deal with the Interfraternity Council Court.)

By **CECIL GREEN**
Treador Copy Editor

The Interfraternity Council Court at Texas Tech is easily an only one-of-its-kind institution on campus.

While most organizations on campus are run by student governments, most of them still have to face administrative officials when the matter of disciplinary action comes up.

Not so with the fraternity system here. Whenever any disciplinary problems arise, the Interfraternity Council Court has sole jurisdiction to handle the punishment of any fraternity.

At least they have been able to dole out decisions in all cases that have come up in recent years.

According to IFC officials, the Court was organized on campus several years ago, and since that time it has been one of the busiest bodies on campus.

"The Court has to decide on many issues each year," said IFC President Gary Lawrence, "but most of their work is involved with interpreting the IFC Constitution and working out the exact meaning of that document."

So far this spring, the Court has ruled on two interpretation

CECIL GREEN

— Screening Board — Court Gets Appeal Suit

By **BRONSON HAVARD**
Treador News Editor

The student Supreme Court convenes today to hear an appeal requesting that the Student Council action establishing a cheerleader screening board be declared unconstitutional.

Chief Justice Ronnie Suiter announced Monday the court would begin hearing testimony from the counselors for the plaintiffs shortly after 5 p.m. today in the Social Science Bldg., room 217.

TWO STUDENTS APPEAL

The controversial screening board case was brought before the court on an appeal filed by Doug Boone and David Northcutt who are opposed to the Council action on constitutional grounds.

IN THE CASE, dubbed Boone and Northcutt vs. the Student Council, members of the Tech Pre-Law Club, will serve as legal counsel for the parties. This will be the first case for the court this year.

David Black, vice president of the Pre-Law Club, will represent the plaintiffs and Bob Ford, member of the club, will represent the Council.

"I think that the Student Council does not have the constitutional power to establish a cheerleader screening board which has more voting power among its seven members than 12,000 other students," Black said.

BOARD HAS 'MORE' POWER

He added, "By that I mean that these board members would in effect have more power in electing the cheerleaders than the members of the student body to which this right has been constitutionally granted."

Ford, who will represent the Council, was unavailable late Monday for comment but Council President Royal Furgeson said, "The Student Council feels that the decision the Supreme Court will render will provide valuable guidelines for our legislative procedures."

DECIDE ON LEGALITY

On the case Chief Justice Suiter said, "The Court will not make a decision on the merits of the case but on its legality and procedures."

He added that the court will decide on points the plaintiffs make.

Members of the court and their schools are justices Ann Orrick, business administration; Glen Reid, home economics; Frankie Claunts, arts and sciences; Tony Masso, engineering; and Tod Oliver, agriculture.

Student Illness Lets Up

Infirmary attendants reported a let up Monday afternoon in the mysterious illness which struck more than 80 Tech students treated over the weekend at the Tech infirmary and at least one city hospital.

DR. FRED P. Kallina, infirmary physician, said the sickness was "not an epidemic" and apparently not food poisoning since students who were treated on the campus reported eating in the dorms, Union, and off campus.

A Lubbock physician on duty at Methodist Hospital Saturday and Sunday, Dr. Ansel McDowell, reported treating from "8-10 students" for "gastro enteritis" which the doctor described as upset stomach, nausea, vomiting and some diarrhea.

DR. McDOWELL said the exact cause of the illness was not determined and speculated that it was "highly contagious to have had that many have it." He added that had the sickness been caused by food poisoning, the students would have had to eaten the same contaminate and the illness probably would have been more wide spread.

He went on to say that the illness was short termed, lasting only from four to six hours. There were no students reported hospitalized at Methodist Hospital.

Dr. R. C. Goodwin, Tech president, said, "It is not an epidemic, and I'm sorry that it is happening. The whole situation is in Dr. Kallina's hands."

cases and is now in the process of deciding a larger case—the one involving a fraternity breaking established college regulations about having alcoholic beverages at student functions.

RULES ON HAZING

In the past, the Court has handled other cases that violated official statutes. Last year, the judicial body ruled on a case involving a fraternity breaking the hazing rules as set up by the state.

Also, the justices have heard cases involving incidents that violated the IFC Constitution, particularly those concerning the Rush rules.

"If these or similar infractions of rules were to happen in other campus organizations, the offending group would probably be taken to some dean's office for disciplinary action," Lawrence said, "but when they happen in fraternities they go directly to the Court."

"This places the Court in a somewhat unusual position, since it has a lot of responsibility and power," he added.

And the court is indeed a powerful branch of the fraternity system, since it is virtually unlimited as to what it can do to punish or interpret.

MUST LOOK OBJECTIVELY

"For this reason, the Court members must at all times look at matters objectively when a case comes before them," Lawrence said. "There must be no personal opinions or ideas as to how a

● Campus Briefs

Dr. J. William Davis, head of the government department at Tech, will speak at the Ninth Biennial Convention of the League of Women Voters of Texas tomorrow in Corpus Christi.

Dr. Davis, a member of the Citizens Advisory Committee on Constitutional Revision, and a nationally-recognized authority on constitutional law, will address approximately 275 delegates, representing 3,500 members of the 35 local Leagues of Texas, at a luncheon.

He will speak on "Some Problems of State Government," including comments on reapportionment, state-local relations and Texas constitutional revision.

The convention will continue through Thursday.

The comptroller's office announced that seniors who plan to graduate in May must pay their fees today.

Comptroller Bob Price said, "Late payments will not be accepted. Students who fail to pay their fees will not receive a diploma and their names will not appear on the commencement program."

There is a \$5 graduation fee or a \$1.50 absentia fee for seniors who will not take part in graduation ceremonies.

Fees may be paid at the cashier's window of the comptroller's office in the Ad Bldg., room 111. The office is open from 8 a.m.-noon and 1-5 p.m. daily.

Tech's Angel Flight and Saber Drill Team won second place trophies in competition with four area drill teams in Dallas Saturday.

Using precision military drill, the two groups competed with units from North Texas State University, Texas Christian University and Eastern Oklahoma A&M College.

Officers of the spring pledge class of Women's Service Organization are Marilyn Treadwell, president; Lane Schultz, vice president; Marcy Pritchard, secretary; and Pam Sparkman, treasurer. Pledge trainers are Lynn Simpson and Karen Gay.

AAU TOURNAMENT

DENVER (AP)—Sixteen teams from 11 states and the District of Columbia have entered the 57th annual National AAU basketball tournament, opening Sunday.

One entrant is the U.S. Armed Forces All-Stars.

Channing Club Wins MUN Debate Award

Channing Club's Nigerian delegation to the Model United Nations walked away with the award for debate on the problem of South African policies of apartheid.

Members of the winning delegation, which was headed by George Griffin, Lubbock senior, are Roy Cebik, past president of the club; Mary Dee Harris, Fort Worth senior; and Jill Read, Lubbock senior.

GAMMA PHI BETA represented Brazil and won the 10-minute position paper award. Four delegations won awards for five-minute position papers. The winning delegations are, first to fourth, Ghana, from Tech Forensic Union; Yugoslavia; Congo, represented by West Hall; and Portugal, from Sigma Alpha Epsilon.

Honorable mention for position papers went to Tech Forensic Union, Pi Beta Phi, Sigma Kappa, Delta Delta Delta, Women's Service Organization and two independent delegations — Poland and Panama.

Honorable mention in Debate went to Tech Forensic Union (two mentions), Mortar Board and Sigma Alpha Epsilon.

The General Assembly, under the leadership of Dwight Young, passed the Nigerian resolution on the discussion topic without amendments.

THE NIGERIAN resolution survived an attempt by Brazil to have it removed from consideration. An amendment to the resolution from the Philippines delegation was defeated, as was Albania's amendment to seat Red China. Other amendments were blocked from consideration, and the resolution passed 25-18. Columbia, Norway, Sweden and the

United States abstained on the Nigerian vote; Bulgaria and Cuba had left the session before the vote.

Highlighting Tech's Model U.N., Philip Deane, director of the United Nations Information Center in Washington D.C., outlined six major goals of the United Nations. Deane's goals were to formulate international law, train people to administer this law, learn to live with international law, "sit on the lid" when conflict breaks out, provide substitute forms of conflict and decrease the frequency of conflict.

DEANE WENT on to say that further purposes of the United Nations were to keep nations "trading insults instead of bullets" and keep extremists out of power in developing nations.

He said, "We can be loyal to mankind without being disloyal to our own countries." Asked about the admission of Red China into the United Nations, Deane said that the U.N. is not a "club" for like-minded people, but rather, an organization to solve conflicts. He pointed out that nations having conflicts should want all parties in a position to solve these conflicts peacefully, and he said that all countries should, for this reason, be admitted to the United Nations.

BODI-GARD

STOPS HOODLUMS-ATTACKERS- VIOUS ANIMALS INSTANTLY!

Temporarily blinds and disables them... stains face for easy identification.

BODI-GUARD is a MUST for young women, night workers, cab drivers, waitresses, postmen, gas station attendants, nurses and small store owners. It is a simple, thoroughly effective self-defense device. BODI-GARD comes in a palm size plastic bottle and can be used effectively in less than 1/10 second. One squeeze will squirt over 15 feet. One bottle can disable 4 or 5 assailants, or can be used several times. Attackers are temporarily blinded (usually about 10 minutes) without any permanent damage, enabling you to escape or summon help. Leaves a harmless, temporary red stain on face and clothing for identification. Try BODI-GARD at our special introductory price. You will never be without it again!

BODI-GARD makes a unique and practical gift for college students. Give the gift that may save your friend's life... BODI-GARD.

Court Fills Needs .. Sukarno Calls Up Volunteer Force

(Continued from Page 1)

certain decision might help a particular fraternity. That's why Court members are carefully selected," he added.

The Court is composed of five justices, selected by the IFC officers and approved by a majority of IFC representatives. Usually, three of the justices are senior members of IFC and the others are undergraduates who have shown a potential for leadership in the coming years.

"The main qualifications for Court members," Lawrence said, "include objective thinking, good judgment, past experience in school and fraternity work and a leadership potential that has shown itself before."

Present members of the Court are Chief Justice Gary Cook, of Pi Kappa Alpha, Bob Wood of Delta Tau Delta, Jerry Gibson of Phi Delta Theta, Larry Strickland of Kappa Sigma and Dan Neely of Sigma Alpha Epsilon. The justices serve for one semester and are eligible to hold their post for more than one term.

HAS SET PROCEDURE

Before the Court can hear a case though, a certain procedure must be followed, depending on the type of case the Court is to hear:

- When a fraternity desires an interpretational ruling on the Constitution, they must petition the IFC president and get him to inform the Court of the case.
- When a charge is brought through the Dean of Student Life's Office charging that a fraternity has broken some official regulation, the charge is read at an IFC meeting and the Court is informed of the case.

All charges are brought through the Dean of Student Life's Office to avoid bad feelings, according to Lawrence. Even when a fraternity wants to charge another fraternity, they go through the Dean's office, and the party bringing the charges is never known to the defendant.

Then, once the Court is ready to work on the case, it acts more as a board of inquiry. That is, the justices do not prosecute the group brought before them, but they bring in witnesses from both sides to determine facts and acquire pertinent information about the case.

Also, when the Court is interpreting rules or regulations, it may call in anyone who might help them settle issues and determine meanings of the written laws.

Once the Court is ready to rule on a case, it is free to assess any punishment or fines which it wishes or deems necessary in view of the violation. The only exception concerns violation of Rush Week rules, which are specifically provided for in the IFC Constitution.

'COURT RULES FAIRLY'

"In most instances, the Court rules quite fairly," Lawrence said, "but I believe that it is ever bit as harsh as college officials would be; the justices always have made as strong a recommendation for punishment as college officials would have."

The IFC Court is not the final word in a case, however, but the appeal trial is long and complicated.

If new evidence is discovered and an appeal is submitted to the IFC and the justices feel that the new evidence warrants a new hearing, one is held.

Secondly, an appeal for reconsideration may be made if the charged group feels an injustice has been done. Once this appeal is made to the IFC, a five-man appellate committee is formed, composed of the faculty advisor of the charge group, the IFC president and three faculty members appointed by the IFC officers and approved by the IFC representatives.

This appellate committee has the power to raise, uphold, reduce or dismiss the decision of the IFC Court.

Therefore, the IFC Court fills an important post in the overall fraternity picture, proving that students can control students effectively.

High Court To Rule

The highest student voice on campus—Tech's Supreme Court—today will hear the Student Council cheerleader screening board case.

The legal motion of the court may be a bit creaky, since this will be the first case the high court has heard this year. But probably once the legal machines get a little grease from the prosecution and defense attorneys, the trial will start rolling.

The plaintiffs, Doug Boone and David Northcutt, contend that the Council's establishment of a cheerleader screening board is unconstitutional.

Council by-laws specify that new regulations dealing with all school elections must be made before Oct. 15. The SC set up the screening board March 11. About five months late if the screening board is to apply to this year's elections.

Also, the Council constitution lists specific qualifications for cheerleader candidates. No mention is made of candidates having to appear top notch to a seven-member screening board.

Oh, Student Council, it appears you have made a blunder. The by-laws and constitution are in simple, printed English.

Seems reasonable that if the Council is to have by-laws and a constitution, these legal guides should be followed. It's fine if the Council wants to change its legal compasses. But changes should be made before rules are made which violate those legal guideposts.

In short, why didn't the Council amend its by-laws and constitution and then incept the screening board?

Maybe today's trial will reveal the answers to such questions.

After the Council had voted to establish the screening board, Royal Furgeson, Council president, admitted to THE DAILY TOREADOR that the new board was illegal.

He said, "Yes, Gayle, technically, it is illegal. But we'll alter that before the election."

However, Furgeson has since stated that he "changed my mind," and now believes that the board is constitutional.

Well, any fellow can change his mind. But the Council by-laws and constitution have not been changed. They still read the same.

We believe the student Supreme Court should take a thorough look at the facts and render a decision based on legality, not the merit of the screening board. And we think the Supreme Court justices will do just that.

—Our Town—

Why Does A Youth Become A Criminal?

(EDITOR'S NOTE: This is the kickoff article for a new DAILY TOREADOR column called "Our Town." The column will deal with situations in Lubbock and the South Plains.)

By LIZ LYNE

Toreador Copy Editor

When three local high school boys were charged recently with stealing 12 automobiles, Lubbock policemen viewed the theft as just another case of juvenile delinquency.

While their offense is greater than many others committed in Lubbock, these three boys are part of a framework that is becoming sadly familiar to local policemen—an increase in juvenile delinquency.

The group of young boys who did \$15,000 worth of damage to one building several months ago also are part of the evergrowing framework.

The rate of juvenile delinquency in Lubbock is rising steadily out of proportion to population increase, and local law enforcement officers are at a loss to explain the growth.

"Delinquency is definitely on the rise here," Gene Fawkes, training officer for the Lubbock Police Department, says. "You would expect most of the offenders to come from the poor sections of town. This is true in a lot of cases, but there has also been a big rise in delinquents from the wealthy neighborhoods."

Unhappy home environments, personality problems, poverty and mingling with undesirable company are the reasons most often cited for juvenile offenses.

However, these reasons do not account for the steady increase in juvenile crime.

"We just can't say what's causing the rate to climb," Fawkes says. "Kids out running around in cars, kids wanting the things they see other kids having, kids out just raising hell—they get into trouble

and we bring them here. It's been happening for a long time and it will probably go on happening."

Young offenders are handled in several different ways. If a boy is found guilty of truancy or petty theft, for instance, he may be placed on probation.

If he has committed rape or robbery, he may be sent to Gatesville.

If he seems to have psychological disturbances, he may be referred to the Lubbock Youth Service.

At the Youth Service, an offender undergoes psychological testing and counseling in efforts to discover what it is that motivates him toward criminal acts.

Jim Brown, counselor for the Youth Service, has his own theory concerning juvenile delinquency.

"Nine out of 10 times it's an unhappy home life," Brown explains. "The kids who come here are usually from a home in which they are not loved or cared for, a broken home, or a home that should have been broken."

"Occasionally we get a psychotic deviate who isn't morally remorseful for his actions," Brown adds, "but that is certainly the exception."

The Youth Service aims its counseling problems before he graduates into serious crime.

Brown is quick to name adults as partly responsible for delinquency.

"There's no telling how far the delinquency rate would drop if so many adults weren't ashamed to refer these kids for counseling," Brown says.

"Most of the kids who get into trouble have a serious problem. It may be a problem at home, a problem with adjustment at school, or a personality problem. It's a shame that we usually don't get to handle these problems until the kid has already gotten into some kind of trouble."

Council Scope

Prexy Explains Goal Of Name Committee

By ROYAL FURGESON
Student Council President

Almost one month after the Board of Directors announced its decision on the name change, the Student Council initiated its first positive action in relation to that decision.

In the Council meeting March 10 your student legislative body unanimously approved the formation of a new name-change committee for the purpose of channeling and recording further dissent on this issue. In formulating this action, the advice of many interested parties was taken into consideration by the Student Council.

SINCE THE BOARD decided on Feb. 15 to recommend to change our name to Texas Tech University, there has been strong dissent in many areas of the campus.

ROYAL FURGESON

One student has even felt compelled to stage a demonstration while numerous others have contemplated such action.

FOR ALMOST ONE month, this segment of the campus has been seeking some avenue through which it might voice its dissent; and, now, we feel that perhaps such an opportunity has been devised through the Student Council action.

The Council feels that, unless leadership is exerted now, this present dissent and discontent could be channeled into areas of irresponsibility. Such action could only, in the end, have detrimental results. With these possibilities in view, the Student Council has formulated its new name-change committee.

THE BROAD PURPOSE of this committee will be to give students every possible opportunity to voice their opinions concerning the name change through the most rational, and therefore the most effective, channels.

Organizations may send resolutions to the committee or may send representatives to the committee. Individual students may appear before the committee or present written statements to the committee.

GROUPS OR INDIVIDUALS who wish to initiate action should certainly appear before the committee to explain their motivation and to discuss the possible means to implement their actions. Coordination of all further action is essential to the committee's effectiveness.

The name-change committee will thus conduct open hearings and also prepare a file of statements and resolutions. It will be co-chaired by a member of the Student Council, Kent Hance, and by the student outside of the Council, Jim T. Richardson.

ITS MEMBERSHIP will also be composed of Student Council members and of members at-large. This combination will, we feel, give capable and interested students outside the Student Council an opportunity to formulate policy concerning the name change through this committee.

If you, as a student, are interested in being a part of this committee, come by the Student Council office, Ad 161, and fill out an application. All are welcome.

ALSO, IF YOU, AS A student or as a member of an organization are interested in appearing before this committee, contact us in the Student Council office. Resolutions that you wish to submit can be sent through the campus mail or brought to the Student Council office.

We, the Student Council, would like to emphasize again our position concerning further action on this issue. We feel that the dissent among students must be given a useful means of expression. A possible concise statement embodying our intent would be: "Organization, Not Agitation."

A look at the city map on Brown's office wall indicates the extent of delinquency in Lubbock. Neighborhoods are dotted with pins showing race, sex and types of problems involved with delinquents. No neighborhood is completely free of pins. While there is a dense concentration of pins in the lower economic sections of Northeast Lubbock, there are also numerous pins in the neighborhoods of \$30,000-\$150,000 homes.

Juvenile delinquency, as any crime, affects the entire community. The crime committed by a young boy may shape his whole future, either by community prejudice or by his own propensity for committing additional crimes.

The family of the young offender often must face public embarrassment and shame.

The offender may be discipline problem for his teachers. He may also be instrumental in persuading young companions to join him in criminal acts.

The delinquent may affect innocent people when he steals, robs or commits assault.

Society must receive the brunt of the young offender's actions.

The typical young delinquent is a white male, age 15 or 16. He may be a member of a church, and he may already have a police record. His crime is probably burglary or theft.

While there are many young men in Lubbock who fit this description and who never get into trouble, there are many others who do get into trouble.

What makes a youngster become a criminal? This is a question that may plague Lubbock law enforcement officers for a long time to come.

Tension Grips Mba's Nation

LIBREVILLE, Gabon (AP) — Three hundred French paratroopers are the mainstay of power behind Gabon's pro-French president, Leon Mba.

Their withdrawal could spark new violence in this tense West African nation, which until last month knew little political and no racial strife.

For France, the stakes in Gabon are high. It is West Africa's potentially richest nation, with large reserves of iron ore, manganese and uranium, important to the atomic industry.

France has been helping Mba since Gabon gained independence in 1960.

Tension and uneasiness then gripped many of this equatorial land's 450,000 people. In some areas school children assaulted their French teachers. Saturday all schools were closed, two weeks ahead of the annual Easter vacation.

The tension has given rise to anti-American bitterness among Gabon's 6,000 French residents. Shots have been fired on the U.S. Embassy building and Americans have been threatened.

● Raider Roundup

(All meetings and special event announcements for the calendar must be reported to THE DAILY TOREADOR by 4 p.m. on the day preceding publication. This calendar will be regularly published on Tuesday and Thursday mornings only.)

Lowell Cross Named Fellowship Recipient

A Texas Tech graduate student in music, Lowell Cross, has been named the recipient of a Woodrow Wilson National Fellowship Foundation award.

Cross, music librarian at Tech, received notice from the Foundation that he would receive the award to attend the university of his choice to work on a masters degree in music.

Cross was selected from 11,000 college seniors, representing a total of 904 colleges and universities in the United States and Canada.

THE FOUNDATION, dedicated to developing "college teachers for tomorrow," is the largest private source of support for advanced studies in the liberal arts in North America.

Awards went to 1,507 students for the 1964-65 academic year. The fellowship includes full tuition and fees for the first year, as well as \$1,800 and dependency allowances.

Cross, who is especially interested in electronic music and has composed music in this field, plans to attend the University of Toronto which offers a degree in electronic music.

He received the B.A. degree from Tech in English in 1961 and another B.A. degree in music in 1963. He attended Lubbock public schools and graduated from Lubbock High School in 1956.

He is the son of Dr. and Mrs. J. C. Cross. Dr. Cross is a professor of biology at Tech.

Crewman Hospitalized

WASHINGTON (AP) — The Russians have notified U.S. military authorities that one of the RB66 crewmen recently shot down over Communist East Germany is in a Soviet military hospital.

Informed sources said the Russians reported to U.S. military liaison officers in Germany that the American flier is not in serious condition. They offered to allow an American medical officer to visit him at Magdenburg.

The identity of the officer was not disclosed.

Three Air Force officers parachuted from the RB66 after it was shot down by a Soviet fighter in East Germany last week.

The sources said a U.S. Air Force flight surgeon, Capt. John Monroe, would go to the Soviet military hospital at Magdenburg to see the flier.

No other details were immediately disclosed.

Exciting things are happening everywhere at Ford Motor Company!

After Ford's spectacular debut in last year's Indianapolis 500-mile race, many people wondered what we would come up with next. Well it's here! Ford Motor Company engineers have developed a brand-new V-8 especially for this year's competition at Indy. Although it's the same size as the 1963 version, this racing engine is a much "livelier" performer because of four overhead gear-driven camshafts and other refinements. Overall results of these revolutionary changes: an increase of at least 44 horses, delivering 420 hp or more at 8,000 rpm.

Ford engineers met many challenges in developing this engine. But this is just typical of the challenges being accepted every day by our employees . . . that's what makes Ford Motor Company such an exciting place to work. And not only in engineering. Exciting opportunities exist in manufacturing, finance, sales, marketing, industrial relations, purchasing, traffic, product planning, styling and research. All types of career opportunities for all types of graduates. If you're looking for an interesting career—look to Ford Motor Company. A growing company in a growing industry.

Pics Meet South Plains Nine In Home Doubleheader Today

Coach Doug Gibbons' freshman baseballers go in search of their second and third wins today when they take on the South Plains Junior College nine here.

Probable starting pitcher for the Picadors in the first game will be Eldon Fox, who pitched the fresh to victory in their first game of the year against Odessa last week.

Fox whiffed 13 Odessans and collected two doubies to pace the Pics to the win.

Danny Davis will take over the pitching chores in the nightcap.

Starting at first for Tech will be Chuck Worrell; at second, Jerry Tidwell; at short, Lee Watts and at third, Tommy Thomas.

In the outfield, Chris Galanos, Larry Kroeger and Keller Smith will provide backup assistance.

The catching position is undecided, with either Mike Hancock, Jack Hines or Norman Schuesler slated to call the signals.

The frosh play a return match with SPC on March 21 at Level-land. Play starts at 1 p.m. on the Tech baseball field.

Clay Takes Army Test; Does O.K., 'I Guess'

LOUISVILLE, Ky. (AP) — After a three-hour written examination, Cassius Clay emerged from an Army center Friday and announced: "I did all right, I guess." The heavyweight champion will learn the outcome in about four weeks. "I'll know when they call me."

The Army ordered him to take the examination again after his first test in Florida last January was inconclusive.

This one, said Clay, "was a little

tougher, more to it. But I'm sure I did okay."

The 22-year-old boxer, neatly dressed in a dark suit, then posed with Lt. Col. David Dixon, commanding officer of the recruiting station. He declined, however, to be photographed wearing an Army cap.

"I ain't in no army yet," he explained. "I been warned about photographers."

"Why, they even took a picture of me in New York last week with some model and it's on the cover of a magazine. And now they say we're engaged."

CLAY, ACCOMPANIED by his personal photographer, Howard Bingham, showed up at the draft board at 7:20 a.m. and said, "I'm early, ain't I?"

The Army thought he was late, that he should have been there at 6:45 a.m. But Clay contended his notice said 7:30.

He asked if Bingham could drive him to the testing center, but was turned down. "We have an Army staff car here for you," he was told. He wasn't however, getting VIP treatment. The regular transportation—a bus—was not available.

Clay was alone for one part of the test then joined about 125 other men for other portions. It was divided into four sections, consisting of arithmetic, English, mechanical aptitudes, and pattern analysis.

WAS CLAY NERVOUS? He didn't say, but a man who sat next to him reported the champion appeared nervous. At one point, walking to another testing room he forgot his overcoat.

Maj. Tom Farrington, public information officer, said that if Clay passed the examination, it would not preclude his enlistment in a reserve unit for six months.

"He'd have to find one with a vacancy," Farrington explained.

Distance Men Show Promise For Olympics

SAN FRANCISCO (AP) — The United States hasn't won an Olympic gold medal from 1,500 meters up since 1908—but that string of futility could be erased in 1964 by Tom O'Hara or Jim Beatty.

O'Hara is the 21-year-old arm flailer from Loyola of Chicago who surprised the track world with his 3:56.9 mile in the National AAU meet last year already has bettered the indoor mile record this winter.

His rapid improvement causes some experts to foresee a world record by O'Hara this year—and that would put him among the favorites for the Olympic 1,500.

BEATTY HAS BEEN pointing for the Tokyo 5,000 ever since his flop at the 1960 Olympics. His spotty competitive record is balanced by his recently broken world two-mile record, strong 5,000-meter times and experience. If fit, he could win.

Veterans Dyrol Burleson, sixth in the '60 Games, and Cary Weisiger figure to give O'Hara strong backing—if not a beating—in the 1,500. That threesome is probably the toughest for any longshot U.S. Olympic hopefuls to crack.

THE 800, BY CONTRAST, is a fairly open event for American candidates but not one likely to produce a U.S. medal winner. Jim Dupree missed making the 1960 U.S. team by two inches but as the consistent recent U.S. leader, he shouldn't miss this time.

The most interesting threat could be Steve Haas, an Occidental sprinter who moved to 880 yards last year and ran 1:47.6 despite limited experience. Oregon Staters Morgan Groth and Norm Hoffman, Missouri's Robin Lingle and perhaps 1960 Olympian Ernie Cunniffe also are in the fight.

SMU Takes Crown; Sets Six Standards

Six records were set in the Southwest Conference meet concluded Saturday in the Tech pool, and all six were set by members of the powerful SWC championship team, Southern Methodist.

It took only three Mustangs to set the six records, with middle-distance swimmer, Tudor Lacey, gathering in three of the marks.

Lacey's new mark of 1:48.7 in the 200-yard freestyle broke the old record of 1:49.5 set in 1963 by Jim Graves of Texas. His 5:05.1 clocking in the 500-yard version of the same race broke the old record of nearly five seconds.

The old mark of 5:10 was also held by Graves and also set in 1963.

The third mark for Lacey to break was in the 1,650-yard freestyle. Lacey completely shattered the old mark with an 18:07.0 time. Graves set the old mark of 18:53.6 in 1963.

Another Pony, David Quick continued the SMU dominance in the freestyle races by winning both the 50- and the 100-yard distances in record time.

His 22-flat time in the 50-yard race bettered the old mark of 22.2 set in 1963 by Bob Baker of Texas A&M, and his 48.4 in the 100-yard distance broke the old record of 48.6 set by defending champion Phil Simpkins of Tech in 1963.

The other Pony record breaker was Jon Rowe. Rowe bettered his own mark of 1:02.3 with a 1:01.3 time in the 100-yard breaststroke.

Sophomore diver Jesse Marsh

was the only bright mark on an otherwise drab Tech showing in the meet. Marsh took the honors in the 3-meter diving competition and finished second in the 1-meter dive.

Phil Simpkins, defending champion in the 100-yard freestyle had to settle for the third place position, and picked up a second place ribbon in the 50-yard freestyle.

Second Week Of Workouts Begins For Footballers Today

Coach J T King's football squad starts its second week of spring training today, with workouts still

to be conducted in two separate parts.

Beginning at 3 p.m., the defensive specialists take to the field to begin polishing up points that looked ragged during the team's first scrimmage Saturday.

Then at 4:30 p.m., the offensive group begins to work on plays not quite up to par in the scrimmage.

According to King, the scrimmage Saturday was ragged, but no

worse than could be expected after three days of workouts.

Also, King added, the fact that the team has been practicing as two separate units contributed somewhat to the overall number of mistakes made in the game.

The Raiders will workout through Thursday, taking Friday off and holding their second scrimmage Saturday.

On Campus with Max Shulman

(Author of Rally Round the Flag, Boys!
and "Barefoot Boy With Check.")

WELL-KNOWN FAMOUS PEOPLE: No. 1

This is the first in a series of 48 million columns examining the careers of men who have significantly altered the world we live in. We begin today with Max Planck.

Max Planck (or The Pearl of the Pacific, as he is often called) gave to modern physics the law known as Planck's Constant. Many people when they first hear of this law, throw up their hands and exclaim, "Golly whiskers, this is too deep for little old me!"

(Incidentally, speaking of whiskers, I cannot help but mention Personna Stainless Steel Razor Blades. Personna is the blade for people who can't shave after every meal. It shaves you closely, cleanly, and more frequently than any other stainless steel blade on the market. The makers of Personna have publicly declared—and do here repeat—that if Personna Blades don't give you more luxury shaves than any other stainless steel blade, they will buy you whatever blade you think is better. Could anything be more fair? I, for one, think not.)

Max Showed no indication.....

But I digress. We were speaking of Planck's Constant, which is not, as many think, difficult to understand. It simply states that matter sometimes behaves like waves, and waves sometimes behave like matter. To give you a homely illustration, pick up your pencil and wave it. Your pencil, you will surely agree, is matter—yet look at the little rascal wave! Or take flags. Or Ann-Margret.

Planck's Constant, uncomplicated as it is, nevertheless provided science with the key that unlocked the atom, made space travel possible, and conquered denture slippage. Honors were heaped upon Mr. Planck (or The City of Brotherly Love, as he is familiarly known as). He was awarded the Nobel Prize, the Little Brown Jug, and Disneyland. But the honor that pleased Mr. Planck most was that plankton were named after him.

Plankton, as we know, are the floating colonies of one-celled animals on which fishes feed. Plankton, in their turn, feed upon one-half celled animals called krill (named, incidentally, after Dr. Morris Krill who invented the house cat). Krill, in their turn, feed upon peanut butter sandwiches mostly—or, when they are in season, cheeseburgers.

But I digress. Back to Max Planck who, it must be said, showed no indication of his scientific genius as a youngster. In fact, for the first six years of his life he did not speak at all except to pound his spoon on his bowl and shout "More gruel!" Imagine, then, the surprise of his parents when on his seventh birthday little Max suddenly cried, "Papa! Mama! Something is wrong with the Second Law of Thermodynamics!" So astonished were the elder Plancks that they rushed out and dug the Kiel Canal.

Meanwhile Max, constructing a crude Petrie dish out of two small pieces of petrie and his gruel bowl, began to experiment with thermodynamics. By dinner time he had discovered Planck's Constant. Hungry but happy, he rushed to Heidelberg University to announce his findings. He arrived, unfortunately, during the Erich von Stroheim Sesquicentennial, and everyone was so busy dancing and duelling that young Planck could find nobody to listen to him. The festival, however, ended after two years and Planck was finally able to report his discovery.

Well sir, the rest is history. Einstein gaily cried, "E equals mc squared!" Edison invented Marconi. Eli Whitney invented Georgia Tech, and Michelangelo invented the ceiling. This later became known as the Humboldt Current.

© 1964 Max Shulman

* * *

Mr. Shulman is, of course, joshing, but the makers of Personna Blades are not: if, after trying our blades, you think there's another stainless steel blade that gives you more luxury shaves, return the unused Personnas to Box 500, Staunton, Va., and we'll buy you a pack of any blade you think is better.

Southwestern Author Donates Original Books, Two Manuscripts

S. Omar Barker, Southwestern author, has donated several books and manuscripts to the Southwest Collection at Tech. Included are two original manuscripts.

One of the original manuscripts is a first-draft (pen-corrected for copying by the author) of "Coward's Courage" — a western short story to be published in 1964 by Progressive Farmer.

THE OTHER IS a corrected typescript of "All-American Mutt" which was published first in The New York Herald-Tribune Sunday Magazine in 1934. Six years later it was reprinted by Houghton-Mifflin in a literature text for senior high schools. Then in 1962 it was included in Great Dog Stories of All Time. It is presently being considered for reprint in England.

A native of New Mexico, Barker grew up on a mountain ranch and is a graduate of New Mexico Highlands University. He now lives in Las Vegas, New Mexico. Since 1925 he has been a professional free lance writer, and his work has appeared in Saturday Evening

Post, Reader's Digest, Argosy and Maclean's.

Barker has published more than 1,500 short stories, 1,000 fact articles and 2,500 poems in about 110 different periodicals in the United States.

A MEMBER and past president of Western Writers of America, he received this group's Spur Award for the best western short story in 1955 and its Justin Golden Boot Award in 1961 for "distinguished writing in the Western field 1954-1961."
