

NEWS BRIEFS

SALT agreement poll

NEW YORK (AP) - Public support for a new SALT agreement with the Soviet Union is now the highest it has been in three years, an Associated Press - NBC News poll shows.

The increased backing for a new treaty limiting nuclear weapons is based on the growing perception that such a pact will enhance U.S. security and that it will reduce the chances of a nuclear holocaust.

The burgeoning support for a new pact comes as Soviet and American negotiators work out the details of a new treaty, although no date has been set for signing a new agreement.

Eighty-one percent of those interviewed across the country Feb. 5 and 6 said they favor a new SALT treaty. That is six points higher than the backing found in the December AP-NBC News poll and 11 points higher than the November level.

Davis petition

FORT WORTH (AP) - A woman outraged that the state plans to try Cullen Davis again for murder solicitation has been barred from using a Fort Worth shopping center's parking lot to gather signatures for a petition she is circulating.

A district judge granted a temporary restraining order Thursday to the owner of Seminary South Shopping Center. Under the order, Joy Smith is restrained from pursuing the signatures in the parking lot until a hearing next Thursday.

Smith seeks the signatures of two-thirds of Tarrant County residents who voted in the last general election. The petition asks for no further prosecution of Davis, whose recent murder-for-hire trial in Houston ended in a hung jury.

House in session

WASHINGTON (AP) - While the Senate takes the week off, the House prepares to pass its first bill of the year and to hear from demonstrating farmers.

A House panel will consider whether Iranian oil cutbacks mean Americans may soon be faced with long lines at the gasoline pump.

Neither chamber planned a session for today because of Lincoln birthday observances.

But the House returns on Tuesday with a full slate of committee hearings - including the first in a series of sessions by the House Agriculture Committee on the economic plight of the U.S. farmer.

Members of Congress are due to testify on Tuesday while protesting farmers, in town lobbying for increased federal price supports for their products, go before the panel on Wednesday and Thursday.

John Wayne's condition

LOS ANGELES (AP) - John Wayne was recuperating at his Newport Beach home Sunday after being released from a hospital nearly a month after his cancerous stomach was removed in a 9½-hour operation.

The film star was quietly released from UCLA Medical Center Saturday morning, a nursing station attendant said.

Wayne, 71, entered the hospital Jan. 10 for gall bladder surgery, but doctors discovered cancer during the Jan. 12 operation. His entire stomach was removed.

Doctors said the cancer had spread to nearby lymph nodes, which also were removed. But a medical center spokesman said late last month there was no evidence the cancer had spread any further.

Possible strike

NEW ORLEANS (AP) - Police returned to work Sunday after a two-day walkout but city officials waited to learn if a threatened strike by garbage men would be averted days before the Mardi Gras.

Shop stewards for about 300 garbage men, who had announced they would strike today unless their demands were met, scheduled a Sunday night meeting to discuss whether to accept a city Civil Service Commission decision restoring sick leave and vacation time benefits.

Mostly fair today with warm afternoons and cool nights through Tuesday. The high will be in the low 70s, and the low will be in the upper 30s. Winds will be south-southwesterly at 10 to 15 mph.

Iranian monarchy nears ruin

TEHRAN, Iran (AP) - Iran's military chief ordered imperial troops back to their barracks Sunday following days of bloody street fighting and declared his support for Moslem patriarch Ayatollah Ruhollah Khomeini. The 2,500-year-old Iranian monarchy appeared to be in its final hours. Shah-appointed Prime Minister

Shahpour Bakhtiar reportedly resigned and the government news agency placed the toll of recent fighting at more than 200 dead and nearly 900 wounded in Tehran, with scores killed in other cities.

Gen. Abbas Gharabaghi, chief of staff of the armed forces, met with Khomeini's prime minister, Mehdi Bazargan, 70, and said he would

support the government set up by Khomeini to establish a "revolutionary" Islamic republic.

The withdrawal of troops appeared to break the back of the constitutional monarchy that depended heavily on a loyal, united military.

Khomeini, the 78-year-old religious leader who returned to Iran Feb. 1 after 14 years in exile, declared in a statement that "victory is near."

Insurgents took over Tehran, looting military posts of weapons and ammunition, occupying government buildings and police stations and racing through the streets flashing "V" for victory signs. They raided several prisons and released hundreds of "political" detainees jailed by the shah as common criminals.

COMMON CRIMINALS

Early Monday, huge explosions shook the western side of the city near Mehrabad International Airport. Tehran radio said Jay barracks, one of Iran's largest tank garrisons, was in flames. The radio reported heavy shooting there, in Majlis square and two other areas of the capital.

A source close to Bakhtiar told The Associated Press the prime minister submitted his resignation in the afternoon to Bazargan, a friend for over 30 years.

Ibrahim Yazdi, Khomeini's chief aide, said Bakhtiar, 54, had quit. There was no comment from Bakhtiar, and his whereabouts were unknown. Sources said the prime minister, appointed Jan. 4, wrote his

resignation because he could not continue without military support.

Tehran Radio, overtaken by insurgents, said the speaker of the Majlis, the parliament, announced that all members of Parliament also had resigned.

Tehran Radio said some military personnel were resisting Gharabaghi's statement, but it quoted the commander of the shah's elite Imperial Guard as much pride that the Imperial Guard is on the side of the nation.

In one of its first acts, the provisional operational staff of the Islamic Revolutionary Movement closed Iran's borders and all airports for 24 hours beginning Monday, Tehran Radio said.

In Washington, the Pentagon ordered a detachment of 69 Marines sent from the United States to Turkey in case they were needed to help 19 Marines protect the U.S. Embassy in Iran. Six Air Force helicopters were being flown to Turkey in case Americans had to be evacuated from Tehran, Defense Department spokesman Thomas Lambert said.

State Department spokesman Kenneth Brown said the 7,000 American in Iran were safe "to the best of our knowledge."

In Marrakech, Morocco, sources close to Shah Mohammad Reza

Pahlavi, 59, said he was in state of "anguished expectation" as he followed events from his "vacation" seclusion there. He left Iran in mid-January. The sources said he was following the events through Iran's U.S. and European embassies.

In a radio and television address, Bazargan said he was pleased to hear "the army will not interfere in political affairs and that they have supported the will of the people."

The military decision to follow "the will of the people" came after two days of bloody rioting in which many soldiers joined the opposition, exploding the notion that the 430,000-man armed forces were united behind the government.

"The armed forces with all its power supports the wishes of the people," said a statement broadcast by Iranian state radio.

Pars, the government news agency, said 211 people were killed and 870 wounded in Tehran. In the southern city of Shiraz, officials reported 34 killed and 310 wounded in fighting between loyalists and insurgents. Peaceful demonstrations were reported in Isfahan, the country's second largest city.

LPOA requests limitation in tax rate, valuation taxed

The Lubbock Property Owners Association (LPOA) decided Friday to ask Lubbock voters to curb the city's power to increase taxes.

The LPOA wants to limit the tax rate to its current \$1.12 per \$100 valuation and to limit the total valuation taxed to 60 percent of fair market value.

The LPOA also wants to require any increase in taxes, whether by tax rate or percentage taxed, to be approved by Lubbock voters.

The changes in the tax structure will require an amendment to the city charter and the first step in the LPOA's plans will be to obtain enough petition signatures to call for a city referendum.

Some LPOA members expressed fear the ceiling on taxes would prevent the city from keeping abreast of inflationary costs of city services.

However, most members accepted the argument presented by LPOA attorney Warren Goss, that the inflation of property values will increase taxes enough to offset inflated city costs.

The LPOA must obtain approximately 13,000 signatures, five percent of the total number of voters in the last city election, in order to force a city-wide vote on the charter change.

Goss asked LPOA members to collect at least 25,000 signatures, however, to "show city hall we are a force to be considered."

The current \$1.12 tax rate is divided into 75 cents for operational costs, 32 cents to pay bond debts and five cents to the city board of development.

LPOA board member Elmer East said he had some doubts about the constitutionality of a limit on the portion of the tax to be used to pay bond debts.

"When voters approve bonds," East said, "they authorize the government to levy whatever tax is required to pay for the bonds."

LPOA members rejected an amendment which would limit only the city's ability to raise the amount of tax levied for operational costs in favor of the total rate limit.

U.S. Marines sent to Turkey in case of urgent evacuation

WASHINGTON (AP) - The Pentagon has ordered a detachment of 69 Marines sent from the United States to Turkey in case they are needed to strengthen protection of the U.S. Embassy in Iran, defense officials said Sunday.

At the same time, six Air Force helicopters are being flown to Turkey to be ready in case an urgent evacuation of Americans from Tehran becomes necessary.

These were the first significant signs of any unusual U.S. military actions in the long Iranian crisis. Until now, an effort has been made to make it appear Americans were leaving Iran at a relatively unhurried pace.

Defense Department spokesman Thomas Lambert confirmed reports of the new developments. However, he declined to discuss the destination of the Marine detachment and the helicopters. Other sources said they will be sent to Incirlik, Turkey.

In response to questions, Lambert said:

"Six Air Force passenger-carrying helicopters are being moved to a closer location in event it is necessary to use them to move Americans out of Tehran.

"We are also shifting a small detachment of 69 Marines to a forward location in event they might be needed to assist the 19 Marines presently guarding the embassy in Tehran."

Lambert said there had been no attacks on the embassy by Iranian mobs as yet.

Pentagon sources said Ambassador William Sullivan had asked for the precautionary moves by the Marines and the helicopters, and asked that the Pentagon update contingency plans for a possible mass evacuation of Americans.

Sources estimated there are still some 7,000 Americans in Iran, most of them employees of American defense contractors and their wives and children.

The Marine detachment was due to fly from Camp Lejeune, N.C., while the HH-53 helicopters, which can carry as many as 50 passengers, were being dispatched from bases in England.

There were no immediate indications of any alert orders to the Military Airlift Command which operates the big C-5 and the C-141 transport planes in the U.S. airlift fleet.

Defense sources also said there has been no special alert of elements of the 82nd Airborne Division at Fort Bragg, N.C. However, one battalion of that division normally is kept in a higher state of readiness.

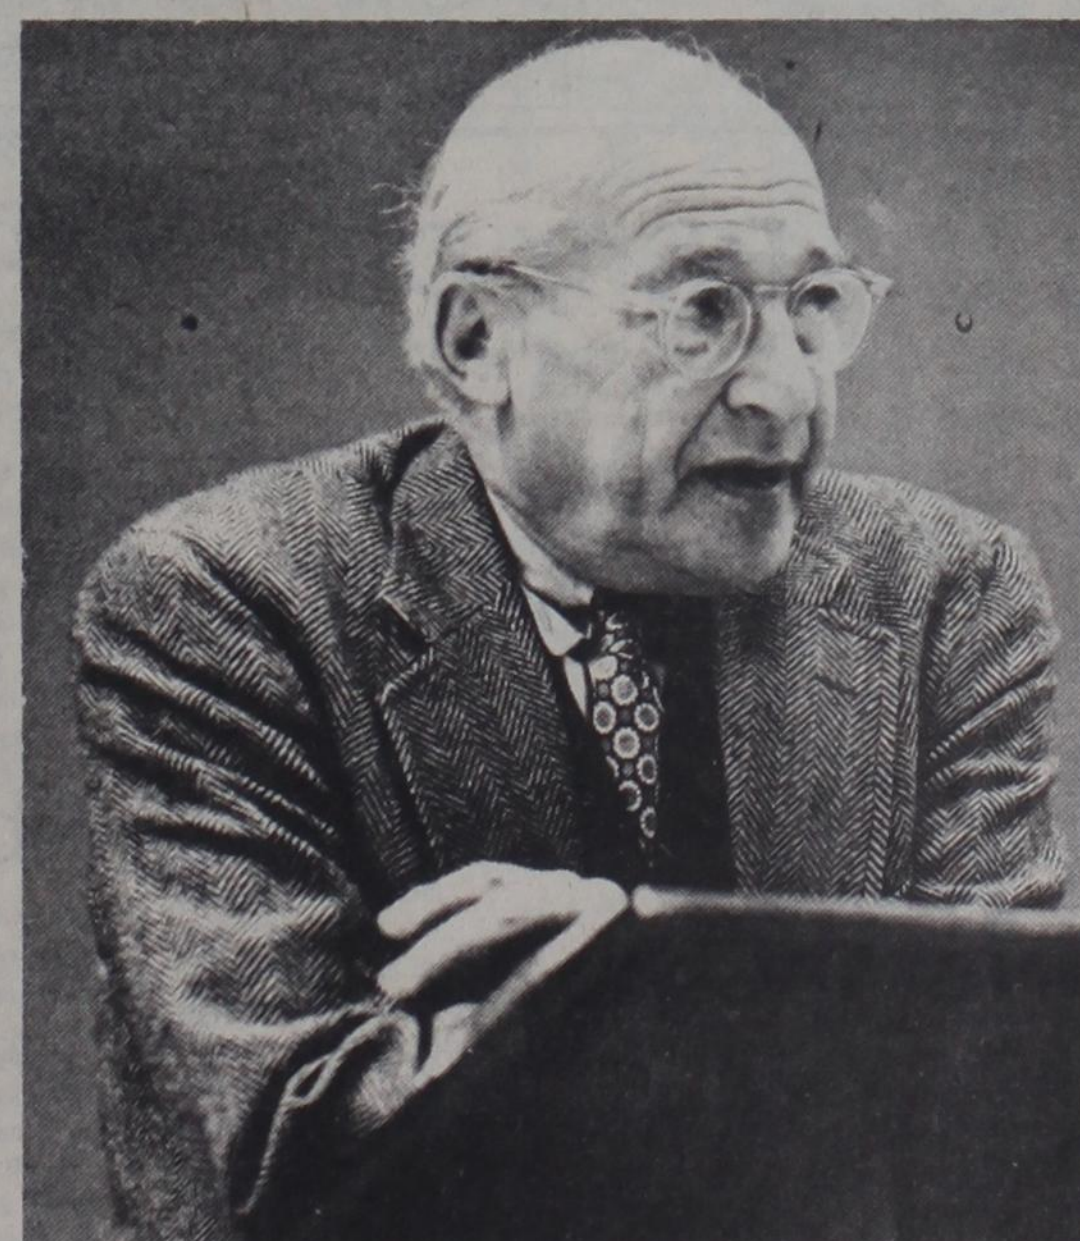

Lambert stressed that the movement of the Marines and the Helicopters is "strictly on a precautionary basis."

"We have no plans at this time to deploy either the helicopters or the Marines to Iran," Lambert said. "We are simply preparing for contingencies."

Ugly Aggie

Raider Red, portrayed by Brad Coleman, sets his sights on the ugliest Aggie he's ever seen. The Ugly Aggie Award was given to David Sears, right, during the spirit mixer Friday. The Red Raiders beat the Texas A&M basketball team Saturday, 67-63. (Photo by Mark Rogers)

Rostow

Rostow predicts major energy crisis

BY MIKE VINSON
UD Reporter

The United States will soon be faced with an energy crisis of major proportions and must launch an all-out effort to increase energy production or be faced with centralized control of energy resources, a national energy expert said Friday.

Walt Rostow, a professor of economics and history at the University of Texas and a former national security advisor made his remarks concerning the energy crisis at a press conference Friday.

The world demand for oil would have exceeded the production capabilities of the Organization of Petroleum Exporting Countries (OPEC) by the 1980s, Rostow said, but the elimination of oil supplies from Iran has made energy production an immediate concern for the United States.

"We are going to have to face up to what we should have faced up to in 1974 and 1975," Rostow said, "an all-out energy production program. We are just waiting for the noose to tighten."

Rostow said he has recently

completed a study of the regional impact of the energy crisis and the investment needed to reduce U.S. energy imports to six million barrels per day.

The investment in energy production needed in the Western Central region, including Texas, would be approximately \$171 billion.

An effort to maximize U.S. energy production would have beneficial effects in addition to increasing U.S. independence in the energy market, Rostow said.

"Sustained full-employment would be possible if a comprehensive energy production program is adopted," Rostow said. Increased energy production would have to solve three crucial problems, according to Rostow.

The administration would have to deregulate all oil and gas prices, Rostow said. The deregulation should be accompanied by an excess profits tax which will permit energy firms to keep windfall profits only if the profits are used to increase production.

A prompt and definitive settlement of environmental issues will be necessary.

"I have been a long-time environmentalist," Rostow said, "but we must find ways to reconcile the conflicts between protecting the environment and producing energy."

Energy sources that have been prohibitively expensive on the commercial market must be made competitive," Rostow said.

The energy resources which must be made commercially feasible include the use of surface and underground lignite, nuclear energy, geopressurized methane gas in the Gulf of Mexico and solar energy.

Rostow said solar energy is a marginally feasible concept, but might be viable in Southern states.

The U.S. cannot count on newly discovered oil reserves in Mexico to ease the impending crisis, Rostow said.

Countries such as Mexico with untapped oil reserves have learned a lesson from Iran, Rostow said. Mexico plans to develop its oil production slowly to avoid the problems that accompany overly rapid industrialization.

Promised land exists for the non-apatthetic

Gary Skrehart

So the promised land of the '60s is only a myth and the '70s generation is lost in the desert of me-ism, right?

Talk of 'Pink Raiders' and pink, white and blue Americans seems to be the thrust of the day. College students are no longer concerned with the social good and more concerned with getting a job while taking care of themselves in the tough world of the '70's.

The protestors of the '60s are pumping gas in Peoria while the children of the '70s are in college trying to get a job with the first friendly corporation that comes along.

Bob Dylan is living in a million-dollar house very similar to the ones those establishment types lived in when he sang against their abuse of society. Even an old protest singer has to get out and hump it to make a buck in the 1970s.

But there are still protestors in the streets of Washington today. Now they wear boots instead of running around barefoot. And they don't even run around. They drive

tractors. The farmers don't have to cuss the hippies anymore. They can spend time protesting for what is right. Things change only slightly—in other words, it's the same play with different players.

The protestors of the '60s didn't want to die in Vietnam. The farmers don't want to starve to death on their farms.

And the evil weed marijuana is still around. Once everyone found out it would not make you go psycho, it became the in drug of the '70s—move over alcohol.

You can find the stuff at a fashionable North Dallas party and even several fraternity men at Tech can be seen partaking of the once sub-culture drug.

Marijuana was once a sign of defiance, now it is part of being young and sophisticated. The times they are a changin'. People still sit around and talk about degrees of "highosity" — in formal attire now. It's a contest to see who can describe the highest high in the competitive world of the '70's. The sentence always begins with "I'm so high..."

Perhaps the music is the only thing which has changed

drastically. Without the Vietnam War, music has had to turn to the old stand-bys of sex and fun for lyrics. The Bostons and Ted Nugents have replaced Bob Dylan. They fire up the amps and sing about rock and rolling, sex, drugs and violence for personal consumption. The louder the music the less you have to think. The loudness also eliminates the need for meaningful lyrics.

To sum it up, we still have Bob Dylan, protestors, drugs, youth music and violence in the '70s just as we did in the '60s. Admittedly, things have changed slightly, but only two things are lacking to bring back that old '60s feeling: a good war and a booming economy.

People are basically the same today. If this decade's children are apathetic, as so many people claim, it is because of the environment.

If Carter can just turn this economy around and find a solid war to pump up the economy to spark the college-age students we can have the "good old days" of the '60s again.

And this time the farmers will probably help. Welcome to the promised land, Pilgrim.

Farmers pampered protestors in cordial, docile Washington

Walter R. Mears

WASHINGTON (AP) - Nowadays, when throngs of protestors descend on Washington to block the streets and demand their way, the government is downright cordial.

Police bend the rules, the mayor counsels leniency and highway lanes are set aside for the demonstrators. In a city where jay walking can get you a \$5 ticket, militant farmers demanding more money for their crops got police escorts on the way to block traffic.

PERHAPS THE people who came to protest against the war in Vietnam eight years ago should have cut their hair and driven tractors.

Instead of permits, they got mass arrests. Before the 1971 May Day demonstrations ended, 12,000 people had been swept up in police nets. Virtually all those arrests were later ruled illegal.

It was not a proud time, but Middle America

generally applauded the roundup of demonstrators.

NOW PART of Middle America is doing the demonstrating, demanding not peace but parity.

The farmers of the American Agriculture Movement did not say they intended to shut down the city. But with nearly 2,000 tractors massed around Washington, it was obvious they were not planning quiet efforts at persuasion.

POLICE SET aside lanes for their "tractorcade" into town, to ease the guaranteed traffic jam. That covered four routes, so the farmers split their forces and tied up eight highways.

Official cooperation, apparently, was supposed to promote an orderly demonstration. In fact, the farmers had more success than the Mayday Tribe in fouling up the city. There were scattered episodes of violence and arrests.

MOST OF the trouble occurred Monday. Late that afternoon police barricaded the tractors on the Mall to

keep them from fouling up traffic anymore.

The farmers plan to spend several weeks lobbying Congress for legislation to increase their prices.

Their reception may depend on how many congressmen get caught up in the four-hour traffic jams the farmers' tractors created.

PRESIDENT Carter said Monday that agriculture is generally prosperous, but that more must be done to ensure that all farmers share that prosperity.

"I don't know of any group that's suffered more from the effects of inflation than farmers," Carter said.

Alfred Kahn, who heads Carter's anti-inflation program, said he does not think farmers suffer most. He said the massed tractors "do not bode well for food prices."

THAT IS the bottom line for most of the people who found the road to work blocked by tractors. They do not set farm prices, they just pay for food.

Letters:

Good job, Iran

Congratulations Iran. Your liberty Sun will rise again and forever. Your people have proven that when people seek freedom, God must fulfill their want.

Iranians, your struggle and victory will not send only Shah of Iran to hell, but also all traitors in the Arab World and Middle East area will follow him.

Iranian people, you gave the American imperialism a great lesson to realize that friendship with people on equal basis is the only guarantee for a stable world and a stable American economy.

The American Administration must realize that sending three hundred pilots and about 50 jet fighters 5-16 to Saudia Arabia in a military demonstration will neither help to stabilize the shaky rule of the Saudi family leaders nor help their new traitor, Anwar Sadat.

As the American Administration was wise and courageous when they recognized Mainland China, they must do so and recognize the Democratic State of Palestine. They must realize that there is nothing called Israel in this world, but there is a Democratic State of Palestine where the Palestinians and Jews can live together with equal rights. They must understand that in the long run, the Palestinian struggle must win, and the racial military government in occupied Palestine will follow the Shah of Iran to hell.

The American Administration must take a lesson from Iran and change their entire policy in the Middle East area. They must tell the American people that Israel is the main problem to achieve peace in the entire world, and Israel is the main problem to achieve a stable American economy. They must tell the people that the taxpayers in the United States pay \$600 per capita every year to support a racial gang's government in Palestine.

Finally, the American government must realize that there are some Arabs in the Arab World who are questioning till what time the U.S. government will continue supporting Israel using Arab money and Arab resources. Unless the American policy

makers realize this problem, sooner or later an Arabian revolution will start in the Arab World.

Name withheld by request

Bored pilots

Dear Editor:

This letter is in response to the soaring article, with quotes from Dave Ross. The article was well written and introduced many aspects of soaring. My gripe is with the statement, "Power planes are all right for awhile, but they're kind of like driving a car for the first time...Soaring doesn't ever get boring, though, because you have to constantly keep alert to your flying conditions." Dave probably thinks that a powered plane does not require any thought process in order to fly it properly.

All pilots know that from the moment you walk up to the plane before takeoff until you walk away from it after landing, you must give flying your full attention. Too many mid air collisions have been caused by pilots who are just flying around bored, not watching what they are doing. If Dave is the type of pilot who gets bored easy, I hope I'm not in the air when he is. That's just asking for trouble.

Roy Gray, Jr.

On the universe

To the editor:

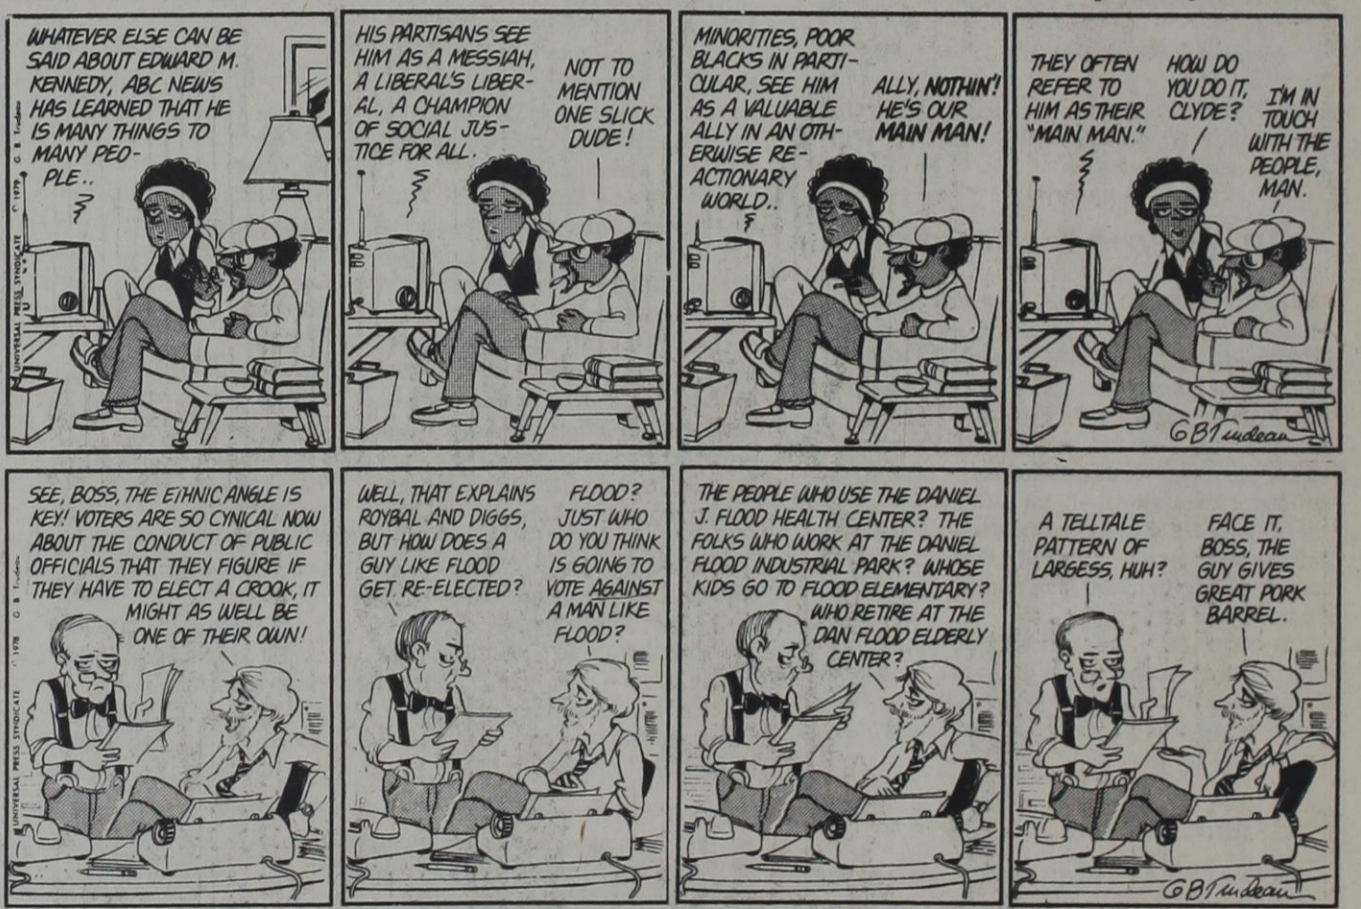

In regards to the article about the order of the universe, the author makes it appear as if our universe is breaking down and falling apart. The planet Pluto has an elliptical orbit that takes it inside the orbit of Neptune but Pluto does have order and is predictable. Scientists can predict where the planet Pluto is at any given time, unless it collides with something, which is highly unprobable. Speaking of probability and the universe, there are really only four logical possibilities for the existence of the universe.

Firstly, the universe emerged spontaneously from nothing. This sounds absurd, which it is, since on the basic laws of physics is that from nothing, nothing comes. Secondly, the universe doesn't exist at all, it is just an illusion in our mind and we only think that it's here. This sounds

absurd also, since predictability indicates that it's not. The universe must have always been here or it must be eternal. This is what is generally thought, but this would contradict the second law of thermodynamics. This law says that the universe is losing energy at a maximum rate so great that it can not be replenished. And according to Einstein's theory of relativity, the end of the universe is maximum entropy at absolute zero. In other words, the universe is losing energy that cannot be replenished and the net result is absolute zero or 460F. Therefore the universe is not eternal because it would be replenishing its resources constantly and that would violate the second law of thermodynamics. The last logical possibility is that the universe was created by an external force. An external force must have been needed to start this giant system. Either you have eternal hydrogen atoms or you have an eternal God. You cannot prove the existence of God from the universe, but you can say that there is a high probability of a force outside this universe that created this universe. From here you can say that there is order; that there are laws; that there is predictability and that these things came about, not as the result of statistical probability, but they came about as the result of a continuous design. We know that it must be a continuous design because whatever chance creates, it almost instantaneously annihilates, by the same principle of its creation. If you were to seat an ape at a typewriter with an infinite ribbon, then after a couple million years, according to the laws of probability, he will eventually come up with "To be or not to be" but by the same principle that brought it into existence will destroy it by reading "To be or not to be, that is the jspqxfjxk." So that if we are here by chance, we should have long ago disappeared by the same probabilities. The conclusion is that we can't prove God's existence, but we can say that there is a high probability of His existence and lead someone to a point where God can reveal Himself to that person in a personal manner.

Human Relations Committee meets, discusses Upward Mobility Program

The possibility of an Upward Mobility Program training and preparing city workers to move on to higher managerial jobs was discussed at a recent Human Relations Committee meeting.

According to Bill Crouch, employment committee chairman for the HRC, there has been a problem keeping the city employees working at the jobs they were trained for. Many of them move on to the promise of higher wages and better advancement opportunities.

"It really boils down to money," Public Informations Director Vaughn Hendrie said. "You hope to hold on to your better employees rather than have them drift on to other jobs."

The employment committee will be investigating the opportunities for

implementing this program that will work with promising minority employees in providing them with opportunities to excel in their jobs.

The HRC voted to involve local firms, companies and businesses in an effort to provide greater equal employment opportunities for minorities and women. They will be awarding certificates of appreciation to deserving firms for their service in striving for equal employment.

A minority newsletter is another recent development of the HRC. It informs minorities of city hall activities and reports of other minority and women workers that have made significant progress in their respective job fields.

The Human Relations Commission, created seven years ago, is a 12-member board that deals with city problems

involving minority issues and relations.

Last fall they recommended the Anti-Discrimination Act to the City Council. This act said that there would be no discrimination in places of public accommodation (i.e. clubs and college hang-outs) on the basis of sex, race and age.

The second installment in this two-part series deals with credit and the businessman. By MARY SAILOR UD Reporter

Extension of credit to a customer is a voluntary act of the seller, according to Malcolm Cleland, president of the Better Business Bureau of the South Plains, Inc.

Businesses that extend credit are making a subjective value judgment of a person's ability and willingness to pay, Cleland said.

Each business can establish its own guidelines for extending credit as long as the guidelines are consistent and abide by equal opportunity standards.

"In the past, credit was often denied to unmarried women or was given to a husband and not to his wife," Cleland said. "These are no longer reasonable excuses for denying credit to a person. Denial of credit is based on the fact that people have not paid their bills."

Sex, race and religion cannot be reasons for denying credit because of provisions made in the Fair Credit Reporting Act and the Equal Rights Act, Cleland said.

Businesses must be consistent in giving credit by allowing everyone the opportunity to apply for credit. Then, if credit is denied, the business is compelled by law to tell the

applicant why he was turned down.

After receiving a credit application, most businesses will first check an individual's credit file with the Retail Merchants Association of Lubbock. If the individual does not have a credit history on file, the business will check each credit reference individually.

Credit applicants are allowed to look at their credit file and can challenge anything they think is wrong in the file, Cleland said.

Local businesses or national firms with local offices are usually easiest to obtain credit with, according to Hadley Phillips, manager of the Retail Merchants Association of Lubbock.

Extending credit is a risk for businesses, so it is best to begin establishing credit with someone local on a personal basis, Phillips said.

"Businesses which deal primarily with college students will probably extend credit to them more easily," Cleland said. "This would depend on their market."

National credit card firms are usually hardest to obtain credit with. College students will usually find it difficult to obtain credit with companies such as Visa and Mastercharge, said Dan Johnston, assistant vice president of First National Bank of Lubbock.

These firms require a

minimum salary of about \$750 a month and two major credit references such as previous loan experience with a bank or credit with a major department store. National credit companies will also look at an individual's stability factor which would include length of employment and length of residence in the same city, Johnston said.

The credit manager of a

local department store said his store analyzes each applicant separately to determine whether the customer will be able and willing to pay. "In a nutshell, we just try to use our good judgment based on our past experiences," he said.

"We have a nationwide program to promote credit at our store for college seniors," the department store credit

manager said. "Some of these seniors have no credit references at all, and sometimes we have unfortunate experiences with them. But on the whole, this program has worked out very well."

"Young people should be aware," he added, "that college age is a bad time to start a bad credit reputation."

Credit

Many college seniors are often bombarded with credit card applications from national firms. Obtaining credit is often easier than maintaining a good credit reputation, so

businessmen constantly emphasize to customers the importance of keeping credit dealings in good standing. (Photo by Karen Thom)

We're looking for the best graduates in the nation. That's why we're interviewing at Texas Tech University.

We've grown because we've made it a practice to employ the brightest, most capable people available. Which is exactly why we're coming here.

We're Halliburton Services, the largest oil field service company in the world. We provide a full range of highly technical, extremely complex services to the petroleum and other industries. This visit, we're interviewing for positions in the following areas of our business:

Manufacturing or Plant Engineering	Research and Development	Field Engineering	Equipment Engineering
To maintain our exacting quality standards, Halliburton manufactures the vast majority of the equipment we use in providing our services. To keep up with booming demands we operate several manufacturing facilities in the U.S. and abroad. We offer a unique challenge because our work involves both long production runs and job shop operations.	A major reason for Halliburton's leadership position is the constant flow of new products, techniques, and procedures from our Research and Development Departments. The departments are widely recognized as both the most productive and the largest of their type in the world. The departments function in four basic areas — Chemical, Mechanical, Electrical, and Tools.	Increasingly, our customers — both minor and independent petroleum companies — rely on the skills of our engineers to engineer oil and gas well cementing, stimulation, and remedial services. As a field engineer, you'll be responsible for thoroughly analyzing the needs of your customer's well, engineering the service or treatment design, presenting your recommendations to your customer, marshalling the equipment necessary to perform the service, and supervising the Halliburton personnel on the job.	One important reason for our leadership in oil field services is the rugged dependability of our equipment. Virtually every piece of service equipment we use is designed and built by Halliburton people. As an equipment engineer, you'll be given responsibility for a specific project.
As an engineer in this department, your responsibilities can range from developing manufacturing procedures for a new product to evaluating quality control procedures.	Several different professional disciplines are required. Eventually you'll be assigned primary responsibility for an entire project. It is a position that requires an individual with a unique understanding of how to practically apply theoretical concepts, able to communicate with field personnel, and who enjoys the challenge of expanding an entire industry's technological base.	Field engineering demands an individual with excellent engineering abilities and who is willing to accept tremendous responsibility within a few months of joining Halliburton.	That responsibility will include all engineering, introducing your product to Halliburton field personnel, and trouble shooting in the field. You'll take charge of the complete project from inception to successful field performance.
Individuals selected for manufacturing opportunities must have a high degree of technical ability, the personality to work effectively with people, and a healthy dose of horse sense.			Equipment engineering demands an individual who is able to cross interdisciplinary lines, who can work well with other engineers and non-technical people, and who has the ability to communicate well.

Sign up now at the placement office. On campus interviews February 26.

Halliburton Services personnel will be on campus to interview candidates for positions in these areas:

Manufacturing Engineering	Research & Development	Field Engineering	Equipment Engineering
Mechanical Engineering Electrical Engineering Industrial Engineering	Chemical Engineering Agricultural Engineering Electrical Engineering Petroleum Engineering Mechanical Engineering Engineering Physics Industrial Engineering Physics Rock or Fracture Mechanics	Petroleum Engineering Mechanical Engineering Civil Engineering Agricultural Engineering Industrial Engineering	Agricultural Engineering Electrical Engineering Mechanical Engineering

If you are unable to interview when we're on campus, please send a copy of your resume to: Bill Baker, Recruiting Coordinator, Drawer 1431, Duncan OK 73533.

Student worked as personal secretary for Anita Bryant

By CHINO CHAPA
UD Reporter

Many Tech students spend their summer months making money at secretarial jobs. And a lot of those students while away the hours dreaming of the day they can shuck those dull jobs and return to school.

Melanie Barrier spent her summer as a secretary, but her job was about as dull as standing next to a lightning rod.

Barrier was the personal secretary to one of the most controversial figures in America — Anita Bryant.

Barrier enjoyed her job so much, she stayed in Miami, Fla., for a few months after the summer and later moved in with Bryant's family.

"My job was exciting and fulfilling," said Barrier, a Lubbock native and Tech student. "Anita has always been one of my idols and working with her was a dream come true."

"I handled all the press for Anita. If someone called up and wanted to interview her while she was on a tour, I would make the arrange-

ments," she said.

"It was really hectic at times," said the 20-year-old journalism-public relations major. "But it was good experience for me and working was a lot of fun."

Barrier first met Bryant in 1975 when she was performing in Dallas.

"I was in the eighth grade and my dad took us to a convention. I wanted to see her because I had always admired her. Ever since I had seen her doing the orange juice commercials I had become fond of her. She came across warm and sincere. Well, I met her and began writing to her."

"One Christmas I was reading her book 'Mine Eyes Have Seen the Glory' and I then decided I would trust the Lord with my life. My idolism for her changed to deep admiration and since then I've read all of her 10 books," said Barrier.

"I again saw her last year at Baylor in a revival and there they asked me to come work for them and, of course, I said yes. I worked for her six months. After I moved into

their house I also took care of the kids and cooked food when Anita was out of town. When she's in town she does all the work. She is a good wife and mother.

"Living with them was really a blessing. Anita became a mother and friend to me. She's a lot of fun, not smug like a lot of people think. Many people have a wrong impression of her. They

Barrier

think that Anita and Bob (Green, her husband) are immaculate and don't do anything wrong. Well, that's not the way they are. They're human and struggle just like we do."

Barrier worked with Green to book engagements for Bryant.

"Bob is a great man. They have had it rough since Anita came out with her stand on homosexuality and started working with Protect America's Children. She receives no income from that. Most of her money now comes from the orange juice contract."

"But she did not make the stand on homosexuality by herself," said Barrier. "Her family backed her all the way. She discussed it with her children and they all agreed it was something Anita had to do."

"Once when she was tired and wanted to retire, Billy, one of her four children, said, 'But Mommy, what will America do?'"

"A lot of people misunderstand Anita. Her stand was not just against homosexuality. She's against

prostitution, ERA and any things that are not right for our moral standards. And all of this is based on the Bible, what we should live by."

"I don't think I would have had this opportunity if it was not God's will. I was planning

to be a nurse and then the Lord opened a door for journalism. He closed the door for nursing. My life is in his hands. Although they asked me to come back, I plan to finish school first. But the Lord could change my mind."

Legislators consider change in Texas primary voting dates

AUSTIN (AP) — Texas legislators celebrate Abraham Lincoln's 170th birthday today by jumping into a hot Republican-Democratic controversy over changing the primary voting dates for Texans.

There has been speculation that arguments over a presidential primary in 1980 and over proposals to move party primary elections from May and June to July and August or later will be the hottest political fuff of the session.

The controversy, which has been simmering undercover for several weeks, comes out in the open this afternoon when the House Elections Committee considers four bills changing election dates.

All four bills would make the party elections later than the present law that calls for the first primary the first Saturday in May, followed by runoffs four weeks later.

State Republican Chairman Ray Barnhart, who opposes any change in election dates, will be one of the witnesses.

On Tuesday, Sen. Jack Ogg, D-Houston, plans to introduce a primary voting bill that has been endorsed in its planning stage by Lt. Gov. Bill Hobby and Speaker Bill Clayton, both Democrats. It is opposed, at least in part, by Gov. Bill Clements.

MOMENT'S NOTICE

Persons wishing to place a Moment's Notice in the University Daily should call 742-3384 between noon and 2:30 p.m. the day before a notice needs to appear. A Moment's Notice will be taken for one day only by telephone.

Persons wishing to place a Moment's Notice in The University Daily for more than one day should come to the newspaper offices on the second floor of the Journalism Building and fill out a Moment's Notice form for each publication date the notice needs to appear.

Mortar Board

The Mortar Board will meet Tuesday at 9 p.m. at 215 3rd St., No. 413 for a pre-selection orientation. All members should attend.

Circle K

Circle K will meet today at 8:30 p.m. in the University Center Blue Room. All interested students are welcome.

Phi Gamma Nu

Phi Gamma Nu will meet Tuesday at 7:30 p.m. in Room 347 of the Business Administration Building. This is the last meeting to pay dues.

Tech Outing Club

The Tech Outing Club will meet Tuesday at 8 p.m. in Room 35 of the Business Administration Building. Slides will be shown of "Endless Cave." Persons interested in going caving next weekend should attend.

Alpha Zeta

Alpha Zeta will meet Tuesday at 7:30 p.m. in Room 101 of the Range and Wildlife Building. This is the formal smoker for the spring. All eligible people are invited to attend.

WSO

The Women's Service Organization will meet today at 6 p.m. at Mama's pizza. There will be a business meeting

at 7 p.m. at Mama's Pizzeria. All members are asked to attend.

Sierra Club

The Sierra Club will meet Monday at 7 p.m. in the Wesley Foundation, 2420 15th St. Tom Griffith will present a slide show of backpacking trip of unlit primitive area in Utah.

Miss Lubbock

Women interested in competing in the Miss Lubbock-U.S.A. pageant, scheduled for April 2 at the Country Squire Dinner Theatre, may pick up applications at Bishop's Campus Photography. They may also apply to Steven Bailey, executive director at 747-5217 or 792-8534.

AMA

The American Marketing Association will meet Wednesday at 7:30 p.m. in Room 352 of the Business Administration Building. The purpose of the meeting is to discuss in detail the field trip to Denver. The guest speaker will be Joe Pollock from National Cash Register. Everyone is invited to attend.

CAMP LONGHORN, Tuesday, Feb. 22 Majors: Any (freshmen, sophomores, juniors and seniors) U.S. citizenship permanent resident visa.

HPER offers physical fitness program

Response has been poor to the new adult physical fitness program being offered by the department of health, physical education, and recreation (HPER). According to Mike Bobo, professor of HPER, only four people have signed up for the program. The program is being offered to Tech faculty and staff and is held on Monday, Wednesday and Friday from 12:30-1 p.m. in the Intramural Gym.

Physical fitness programs have been offered before at Tech, but this semester's program is unique, Bobo said. Participants who wish to pay an additional fee can take advantage of physical fitness tests conducted by Bobo or other trained personnel. The program is designed for people who want to exercise on a regular basis, Bobo said, and the testing is designed to indicate the areas in which the individual needs to improve.

The first level of testing involves the measurement of pulmonary function, vital chest capacity, and muscle flexibility. The second level of testing is conducted in conjunction with the Health Sciences Center, and consists of a blood analysis. An electrocardiogram (EKG) is conducted by a qualified physician as a part of the third level of testing.

Participants in the program spend the first eight minutes of the exercise period doing stretching exercises to improve muscle flexibility. Cardiovascular exercises, such as jogging and walking are done during the next 15 minutes, and in the last five or six minutes participants run and perform calisthenics.

For faculty and staff members who just want to participate in the regular exercise program, the cost is \$5. The costs of the first two levels of testing is \$20 each. The cost of the third level of testing is \$125. Those interested in signing up for the program can contact Bobo at 742-3371.

Lubbock Police busy during Boston concert

While many Tech students were enjoying the Boston concert Thursday night, Lubbock Police officers were kept busy by a number of incidents.

In one incident, Steven Floyd Russell, 22, of 4303 19th St., was admitted to Methodist Hospital after the concert with a wound to his neck.

Russell was leaving the concert about 11 p.m. with two friends when a small man apparently bumped into him. Russell brushed the man away, not noticing the man had cut his neck.

Moments later, another concert-goer pointed out to Russell that his throat had been cut.

Russell's car had been towed away, so his roommate took him to Methodist Hospital, where he was treated for a four-inch wound on his neck, and then released.

Neither Russell nor his companions could identify the assailant or the weapon he allegedly used to cut Russell. In a separate incident, three students were arrested for peddling T-Shirts without a license.

In all, 24 of the estimated 10,500 spectators at the Boston concert were arrested for a variety of charges, according to Lubbock Police Sgt. B. W. Brazell.

EARN OVER \$650 A MONTH RIGHT THROUGH YOUR SENIOR YEAR.

If you're a junior or senior majoring in sciences like math, physics or engineering, the Navy has a program you should know about.

It's called the Nuclear Propulsion Officer Candidate-Collegiate Program (NUPOC-C for short) and if you qualify, you can earn as much as \$650 a month right through your senior year. Then after 16 weeks of Officer Candidate School, you'll get an additional year of advanced technical education. This would cost thousands in a civilian school, but in the Navy, we pay you.

It isn't easy. There are fewer than 400 openings and only one of every six applicants will be selected. But if you make it, you'll have unequalled hands-on responsibility, a \$24,000 salary in four years, and gilt-edged qualifications for jobs both in the Navy and out.

Ask your placement officer to set up an interview with a Navy representative when he visits the campus, or contact your Navy representative at 800-841-8000, or send in the coupon. The NUPOC-C Program. Not only can it help you complete college. It can be the start of an exciting career.

NAVY OFFICERS GET RESPONSIBILITY FAST.

High Flying Opportunity.

At General Dynamics in Fort Worth, we have long-term programs that offer a challenge to the engineering professional. If you are looking for an opportunity to work on such projects as the F-16 Multirole Fighter or advanced aircraft and electronic programs, then General Dynamics is looking for you.

We will be on your campus interviewing February 14 & 15. Sign up now for an appointment at your placement office.

Boston--uninspired, boring, lethargic, soporific

By DOUG PULLEN
UD Entertainment Editor

The words were buzzing all over campus Friday. "How was the Boston concert?" several people could be heard asking, many of whom wanted to see the group's Thursday night concert in the Municipal Coliseum, but weren't adventurous enough to pay \$7.50 to find out.

Well, rest assured. You didn't miss a thing if you were one of those who didn't go to the concert. Boston was dull.

That's not to say the chemistry wasn't present for a brilliant night of hard rock 'n' roll. More than 10,000 people braved the cold weather and traffic-clogged Lubbock streets so they could pack themselves into the Coliseum.

The crowd was primed for the show, thanks in part to a healthy pre-concert diet of taped Beatles and Foreigner records. Sammy Hagar took the stage promptly at 8 p.m. and proceeded to draw upon the

crowd's enthusiasm and anticipation.

But his set began withered in the middle. The show was saved only by Hagar's sheer energy.

Then came the proof of the pudding. Could Boston pull off a good show without studio techniques such as overdubbing, something the band overuses on its records?

Apparently not. Boston gave one of the most uninspired, boring, lethargic, lackadaisical and generally soporific shows I've ever seen. It got so bad that the girl sitting next to me came out of her dreary-eyed daze and began writing a short story about some island near Australia. Now that's boredom.

The crowd's reaction wasn't exactly the same, but it wasn't particularly overwhelming either. Not, that is, until the end of the show when the band resorted to soporific gimmickry and lighting which

diverted the crowd's attention from the monotony of the show.

Boston is a studio band. It can record impressive music, but when it comes to transforming that material into a stage show, the group just doesn't cut the mustard. Boston's music comes across as repetitious and bland in concert, with each song sounding a great deal like the others.

The group's lack of imagination and vigor was glaringly apparent throughout the show. Leader Tom Scholz did little to lead the band, depending almost entirely upon Brad Delp's insipid vocals and Barry Goudreau's lukewarm lead guitar work to carry the band.

Perhaps all this negative commentary is a bit unfair. Boston has been charged with a tremendous task—that of heading a major concert tour with only two albums worth of material to offer. That's not

No feeling

Boston's Brad Delp, Barry Goudreau, Fran Sheehan and Sib Hashian in concert Thursday in the Municipal Coliseum. (Photo by Mike Means)

easy to do, especially when both albums sound so much alike. Boston showed Thursday night that it cannot make the transition from studio to stage. It cannot and probably never will be able to unless its members show little more enthusiasm and creativity.

Still, the Lubbock crowd appeared to be entertained by Boston's predictable show. Granted, it's not difficult to please a hard rock crowd, especially in a market like Lubbock. Throw a few firecrackers, use a gimmick or two, scream a little bit and make some noise on a guitar and a Lubbock crowd will love you. It's hard for locals to be very demanding when there isn't much to demand in the first place.

Boston's show was certainly indicative of this. The band's lack of enthusiasm was readily evident as the band trudged song after song,

taking little time between songs and taking even less time to break the monotony. Each song was given the same lackluster treatment, and each song fell into the same monotonous structural pattern.

The show wasn't without a few interesting twists. "Long Time" was given a lively treatment, preceded by Scholz's intriguing introductory piece "Foreplay," which was pleasantly interrupted by a large, fake pipe organ which rose from behind the stage. Scholz garbed himself in a black cape and played an excellent version of Bach's "Tocatta and Fugue in D Minor."

It's too bad Boston had to depend upon gimmickry to earn its applause. The band has talent, it just doesn't know how to translate its studio energies into a creative and entertaining stage show.

Curtain Call

Music
Helen Reikofski, soprano, in a free graduate recital Tuesday at 8:15 p.m. in the Recital Hall.
Doak Sneed in a free concert Wednesday 11 a.m. to 1 p.m. in the UC Courtyard.

Wrestling pair nets honors

Scott Rice of Tech and Eric Samniago of the University of Texas at El Paso took top honors this weekend as they were named the outstanding wrestlers at the Fourth Annual Invitational wrestling meet held in the Tech Intramural Gym.

Les Davis pinned his New Mexico Military Institute opponent to take first place in the 128-pound division. Rick Alder took first place in the 167-pound division over his opponent from North Texas State University. Scott Rice, 190-pound division, also took first place as he defeated his South-west Texas State University opponent.

Tom Cuthbert, 118-pound division, placed second as he was defeated in the finals by his New Mexico Highlands opponent. Jim Fleming, 134-pound division, Keith Walker, 158-pound division, and Mickey McGarry, 142-pound division, each took fourth place in their divisions. Team points were not kept.

"We had more wrestlers than we expected," wrestling coach Scott Rice said. Approximately 110 wrestlers attended the meet.

"The tournament was run well, especially with the help of Dr. Burkhardt, our sponsor." Burkhardt is an associate professor of Health, Physical Education and Recreation.

Mustangs crush tankers

The SMU Mustangs easily defeated Tech's men's swimming team 72-41 in dual match Saturday in Dallas. The loss dropped the Raiders' season record to 7-3.

Steve Krueger and Sid Glenn were the only Techs to break into the first-place category in individual events. The Raiders' 400-yard Relay foursome, composed of Glenn, Steve Degenfelder, Alan Sutton, and Mike Butler, landed the top spot in that event.

Other Tech team members recording places in the one-sided affair were Jim Welsch, third in the 1,000-yard freestyle, Ed Garvis, third in the 200-yard freestyle, Sutton second in the 50-yard freestyle, Glenn, third in the 400-yard Individual Medley, Richard O'Neill, second in meter diving, and Cody Aufriht, second in the 200-yard breaststroke.

Linksters land 17th in tourney

The Raider golf team of Richard Whittenburg finished 17th in a field of 26 teams Saturday in the Pan American University Golf Tournament in Monterey, Mexico.

Oklahoma State nailed first place in the tournament, while the Raiders fired a team total of 299 Saturday for a 1,196 scorecard.

Tech's Randy Waterhouse shot a 71 Saturday for a 54-hole total of 230. Mark Jarrett shot a 72 for a 225 total, and Jean St. Germain, Larry Selgiman, and Kevin Foster closed out scoring for Tech with scores of 77, 78, and 79, respectively.

Women prepare for state meet

Tech's women's swim team competed in the Texas A&M Group Meet Friday in preparation for the State Swimming and Diving Championships, which will be held in the Recreation Aquatic Center Feb. 22-24.

The meet was a time trial according to Coach Anne Goodman. No team scores were computed in the meet. "Sarah MacDonald had a good meet," Goodman said. "I was really pleased with her 200- and 500-yard freestyles. After the meet Sarah did a time trial in the 200-yard butterfly and did a 2:22.2, her best this year by three seconds."

IM officials meet today

Recreational Sports will sponsor an intramural officials club meeting tonight at 5:15 in Room 207 of the Men's Gym. The meeting is open to all officials and prospective officials within the department.

"We think this is a valuable tool for our intramural program, as it a chance for game officials to get together in a non-working situation and discuss their problems and needs," said Ronnie Smith, Associate Director of Intramural Sports.

According to the department, other objectives of officiating include outside employment opportunities, social contacts with fellow officials, and improvement of the mechanics of officiating and game consistency.

All intramural officials are encouraged to attend. For further information, contact Recreational Sports at 742-3351.

Thinclads place at classic

In a meet that included 43 teams and some of the nation's top performers, the Tech track and field team managed to place in three events at the second annual Oklahoma Track Classic.

Although no team scores were kept, the Tech tracksters finished within the top six places in the 600-yard dash, the 880-yard dash and the two-mile relay.

In the meet, which was held at Oklahoma City's Myriad, Tech's James Mays came through with a fourth place finish in the 600-yard dash with a 1:12.5 clocking; Robert Lepard placed fourth in the 880-yard dash in a time of 1:57.6; and Tech's two-mile relay team placed sixth in 8:06.1.

Battling a Titan

Tech's Lynn Webb (middle) maneuvers inside against an Oral Roberts player in Saturday's action at the Municipal Coliseum. The Raiders won, 65-55. (Photo by Richard Halim)

SWC clubs face stormy schedule

By DENNE FREEMAN
AP Sports Writer

Whatever's wrong with Texas A&M, the Texas Longhorns hope the Aggies don't find out Monday night in College Station.

The Longhorns could take a big step toward clinching the Southwest Conference basketball championship by beating the suddenly slumping Aggies in an always hostile G. Rollie White Coliseum.

Texas is 10-2 and rested. The Longhorns were idle Saturday night while the Aggies traveled to Lubbock to lose, 67-63, to the improved Red Raiders of Texas Tech.

Tech and Texas A&M are

now 9-4 and trail Arkansas by a full game in the loss column in the battle for second place.

The first two finishers in the regular season draw a bye all the way to the semifinals in the SWC postseason tournament March 1-3 in Houston. The third-place team has to play in the quarterfinals, and teams 4-6 get host role in the first round of the playoffs Feb. 24.

In other games Saturday night, Vinnie Johnson scored 25 points and hit a baseline jumper with 15 seconds to play to give Baylor a 74-73 victory over SMU; Houston nipped Rice 75-72, and Arkansas drubbed TCU 108-65 in an afternoon televised game.

Tech trips ORU, 65-55

By CAROLE MACHOL
UD Sports Staff

The Tech women's basketball team stole a victory from Oral Roberts University Saturday as the Raiders rallied from a five point halftime deficit to come out on top 65-55.

Steals and turnovers were a decisive factor in the game as the Raiders worked against the Lady Titan full court press.

The Raiders capitalized on ORU's defensive mistakes and executed a strong offensive attack, forcing the Lady Titans to 26 turnovers in the game. The Raiders finished the game with 18 steals while ORU had only two.

Tenacious defense, led by the theivery of Louise Davis and Jill Owens (who was playing her last game as a Raider) and the red-hot shooting of Rosemary Scott (also in her last game) and Lynn Webb gave Tech the upset. Scott and Webb accounted for 24 points, each hitting for 14.

Sharon Tucker paced ORU scoring 15 points, followed by teammates Cyndy Brady and Ppam Mindemann with 12 and

10 points, respectively.

This was the first loss for the Lady Titans since January 8. They had a nine game winning streak going into the Raider game.

Raider Coach Gay Benson said the key to her team's win was stopping ORU's 6-3 post player Pam Mindemann.

"ORU went to Mindemann for the shots but Davis and Owens did a fine job stopping her from underneath. They had to go to the outside and that's when we capitalized on their mistakes."

Tech scored first in the game with less than a minute to go in the game but ORU managed to tie the score and took the go-ahead shot with 15:15 left in the half. ORU surged to a 12-point lead over the Raiders but Tech came back within five to take a 33-28 halftime deficit.

Liz Havens started the scoring in the second half bringing Tech within three of ORU but the Lady Titans were not to be outdone, putting in two quick shots and leaving the score at 37-30.

The Raiders popped in six shots to ORU's two in the next six minutes of the game and

with 11:13 left Davis stole the ball from ORU, shot and gave the Raiders a 42-41 lead.

For the next two minutes, the score see-sawed back and forth, but with 8:30 remaining Webb shot for two and took the go ahead lead for the Raiders. In the final eight minutes of

the game Tech shot for 21 points to ORU's six and with 15 remaining on the clock, Scott shot from 15 feet out, building the score to 65-55. The Lady Titans got the ball, but weren't able to make the shot and the final buzzer sounded with the Raiders winning the final home game of the season.

You don't have to shop around. Icelandic has the best bargain to Europe. \$295 roundtrip.

You've heard a lot about fares to Europe, but none of them can compare with the one you've just found. Icelandic's 14-45 day APEX fare from Chicago to Luxembourg is just \$295 roundtrip. Tickets must be booked and paid for 30 days in advance. Fare subject to change. No weekend surcharge.

You'll get free wine with your dinner, free cognac afterwards and excellent friendly service all the way across the Atlantic.

We'll take you to Luxembourg, right in the heart of Europe, where you'll be just hours away by train or car from almost all of Europe's most famous landmarks.

Seats are limited, so don't waste any more time hunting. You've already found the best bargain of them all.

See your travel agent or contact the Puffin nearest you. Or write Dept. #C-396, Icelandic Airlines, 18 S. Michigan Ave., Chicago, IL 60603. Or call 800-555-1212 for the toll-free number in your area.

Tech derails Aggie express, 67-63

Win throws SWC race into four-team scramble

By JOHN EUBANKS
UD Sportswriter

The color clash of the red-clad Raiders and the maroon-clad Aggies in the Coliseum last Saturday night looked like an Aggie freshman dressed for his first day of class: He wore a bright red top with maroon bottoms.

Even his classmates admitted that the red stood out.

The red again stood out against the maroon as the Red Raiders defeated the Aggies 67-63 before a record-breaking crowd of 10,199 fans in the Coliseum plus 250 more fans watching in the Municipal Auditorium via close-circuit television.

The fans came prepared, as the majority of them dressed in red. Then, dozens of red balloons and streamers were dropped from the top of the Coliseum.

The Aggies just stared. It took several minutes of play before the Aggie players could adjust to the sea of red, the deafening roar of the Raider fans.

A&M's 6-11 freshman center Rudy "Kinda Moody" Woods committed two fouls within the first three minutes of the game.

He was quickly replaced. Dave "The Slave" Goff, the Aggies ballhandler and playmaker, was called for two ball-handling violations

during the game's first two minutes. Seconds later he dribbled the ball out of bounds without anyone close to him. He was also quickly replaced. The crowd had done its job. The rest was left up to the Raiders.

All they did was score the game's first eight points. It took the Aggies two minutes and 40 seconds to score. Tyrone "Go On Home" Ladson's 20-footer gave the Aggies their first two points. But the Raiders kept on rolling.

Tech upped its lead to 10, 15-5 with 14:31 left in the half, and the closest the Aggies came after that was when they trailed 19-13 with 9:26 on the clock.

That six-point lead was cut to 14, 33-21, on David Little's lay-in with two minutes left in the half.

It was just a matter of seconds before Tech took a 35-23 lead into the dressing room at halftime.

The job was half finished. One key to the halftime lead was Ralph Brewster's play on Woods, he held Woods to only two points in the first half, but he credited team play.

"We really played together," Brewster said. "We concentrated on cutting off their inside attack. We fronted him (Woods) and got

off-side help." The help continued in the second half as Woods scored just two baskets in the second half to end up with a total of six.

Vernon "Still Learnin'" Smith entered the game as the Aggies' leading scorer with a 16-point average but could only muster eight points against a variety of Raider defenders.

Tech coach Gerald Myers continually switched defenses on the Aggies. The switches seemed to confuse the Aggies.

"We came out in a man-to-man defense," Myers said. "We changed because they would always start to score on our defense."

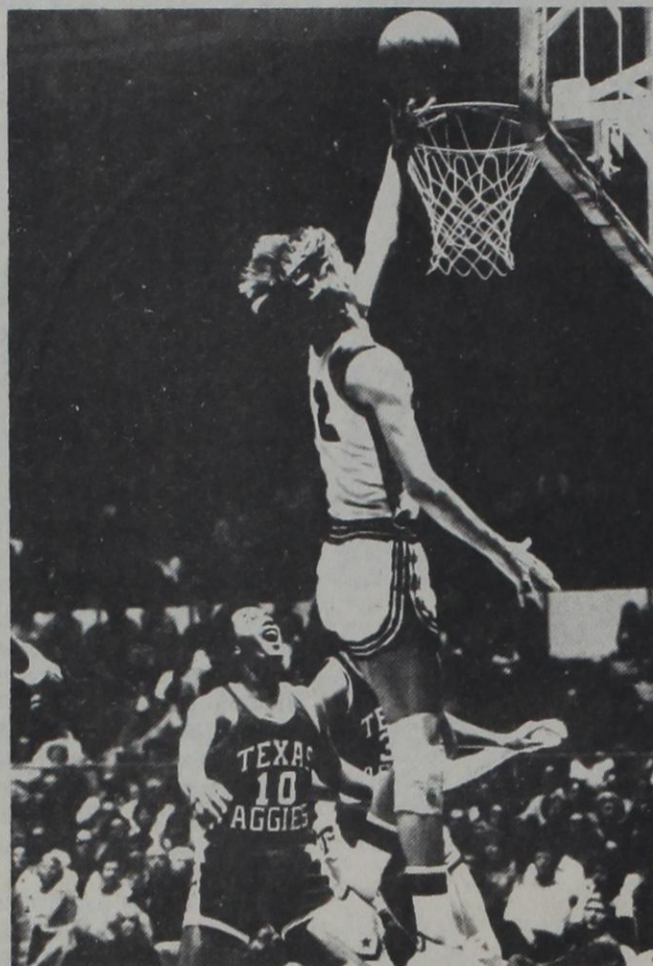

Twice in the second half, the Aggies scored six points in comparison to none for Tech.

Both of those times, the Aggies narrowed Tech's lead to two, 51-49 and one, 56-55.

The Aggies again narrowed the Tech lead by two, 63-61 with 49 seconds left, but as is the case with a team trailing in the final seconds of the game, A&M had to foul.

But they fouled the wrong man.

Kent Williams, who ended as Tech's leading scorer with 18 points, was fouled twice by Goff in the last 22 seconds. He converted all four free throws.

Easy two

'Play not to lose' attitude reflected in Raider victory

By MAURI MONTGOMERY
UD Sportswriter

Playing to win is an idealistic phrase most sports competitors use in their game plans, but the Tech cagers employed another plan Saturday night as they outlasted the futile efforts of a cocky Texas A&M Aggie team 67-63.

The new plan the Raiders have adopted is a 'play not to lose' game philosophy, and from all appearances it seems to be practical as the cagers won their fifth straight game in a row.

"We just go out there and fight for our life, do everything we can to get by a team, and try not to give the game to beat ourselves with turnovers and mistakes," Brewster said. "Like coach Myers has said, we're playing not to lose instead of playing to win."

Brewster said he thought that philosophy had been paying off in the past few weeks, especially since the Raiders' loss to the A&M earlier.

"When we played the Aggies the first time I think we sort of afraid and not as confident as we could have been because of some of our losses," Brewster said. "But tonight we didn't feel anything and just went out there and tried to perform-kind of like a machine."

And perform the Raiders did. Tech jumped out to a 35-23 lead going into the locker room at halftime and never relinquished the lead or

control of the game to the Aggies.

"We showed that we weren't going to be intimidated by them right from the start," Brewster said. "They are really a lot bigger than us, but we used our main strength — quickness to combat that."

Sophomore forward Ben Hill agreed with Brewster that quickness was one of the keys to the game.

"We relied on a quickness and used that and hustling to keep A&M off balance as much as we could," Hill said. "We kept them running all night long so that they couldn't come down and take the easy set-up shot. Then while we had the game going at a fast pace, we distracted Rudy Woods and Rynn Wright as much as possible in order to force the others to shoot," he said.

That strategy wasn't completely successful however. The Raiders accomplished their goal with Woods and shut the 6-11 freshman's scoring tally to only six points, but failed against Wright who popped in 22 points to earn A&M's high point honors.

A&M coach Shelby Metcalf had a similar opinion of Tech's

hustle and quickness. He admitted that the Raiders' quickness added to the strength of the Tech squad.

"We were outquicked by some guys who weren't quicker than ours. Kent Williams really hurt us. He's a great guard, and his dad was an Aggie," Metcalf said. "We tried to recruit him. For some reason, we always get hurt by guys we try to recruit and don't get. Little was also quicker than we had expected."

Tech's squad leader, Geoff Huston, said, "This was a very good win for us. We were playing with six men instead of five and it was an advantage both the Aggies and we were aware of. That sixth man was the Tech crowd. We knew that they hadn't let us down and so we weren't going to let them down."

"When we came out and saw the crowd we almost got too fired up and you could see our intensity in the way that some of the guys came off the bench and performed," he said. "We didn't care who took the credit tonight, we just came out ready to play and win. The win puts us right back in there (the conference race), but it ain't over yet."

Does a college student really need life insurance?

No. Not unless your life is important to someone. Or will be soon. Like if you're planning on a marriage, a family and a career.

But not just a policy. You need a sound program, designed to fit your pocketbook now and your needs 30 years from now. That's financial planning. Let's talk about the right program for you. Person to person.
