Reagan offers respect

UNITED NATIONS (AP) — President Reagan has sent Soviet President Leonid I. Brezhnev a letter denouncing an "unremitting and comprehensive" military buildup by the Soviets, but expressing a willingness to "establish a framework of mutual respect" with Moscow.

The letter was sent Monday and delivered today, on the eve of wide-ranging discussions between Secretary of State Alexander M. Haig Jr. and Soviet Foreign Minister Andrei Gromyko.

While the text of the letter was not released, Dean Fischer, a State Department spokesman, did provide reporters with a lengthy statement he said was based on the letter.

It quoted Reagan as saying the United States is "hopeful we can succeed in establishing a framework of mutual respect for each others' interests and for mutual restraint in the resolution of international crises."

The president also said the United States is fully prepared to take into account legitimate Soviet interests if Moscow is willing to do the same with American interests.

If the Soviets agree to such an approach, Reagan said, it could lead to a "solid and more enduring basis for U.S.-Soviet relations than we ever had before."

The Reagan letter was disclosed here within an hour after Gromyko issued one of the harshest denunciations of the United States in years during an address to the U.N. General Assembly.

While the letter concluded on an apparent conciliatory note, it also denounced the Soviet military buildup in recent years which Reagan was quoted as saying "far exceeds Soviet defensive needs and one which carries disturbing implications" that Moscow is seeking military superiority.

Campus arrest

University Police place a handcuffed Gary Don Hamilton, 30, into a patrol car Tuesday. Tech Police apprehended Hamilton after a brief chase

from the Biology Building to the Math Building. Hamilton was charged with indecent exposure.

By PETE McNABB
UD Reporter

A 30-year-old man was arrested in the Math Building after a brief chase Tuesday afternoon and charged with indecent exposure.

Police said as many as 30 campus "flasher" cases now may be cleared from police files.

Gary Don Hamilton, who police said

is a 1973 Tech graduate, was arrested by University Police Department officers after a man pulled down his jogging shorts in front of a Tech woman about 4:15 p.m. Tuesday.

University Police Chief B.G. Daniels said the man was standing inside the Biology Building Auditorium when he exposed himself to a Tech woman who was walking by outside.

After the woman telephoned the police department, officers chased the man from the auditorium, through a tunnel to the Biology Building, outside to the English Building and finally to the Math Building, Daniels said.

Hamilton was arrested in an empty second floor classroom in the Math Building.

V.P. search near end?

By STEVEN HERSHBERGER
UD Reporter

Tech's two-year search for a vice president for Finance and Administration is expected to end later this week, Tech President Lauro Cavazos said Tuesday.

"I am working on that (filling the position)," Cavazos said. "I hope to have that (the hiring process) resolved by this week."

Cavazos declined to name the candidate for the vice presidential position. He also did not indicate whether the candidate is from outside the university or currently employed at Tech.

If Cavazos names the new vice president this week, he will meet a deadline he set during the summer. Cavazos said then he would fill the position by the October meeting of the Tech Board of Regents.

Cavazos said in the August, "I am pushing as hard as I can (to fill the position). I hope I can get it resolved in the next two months or so."

Finance and Administration has been without a permanent vice president since September 1979, when then vice president Ken Thompson resigned to accept a similar position at Michigan State University.

Dan Williams became interim vice president in September 1979 and has

since served in that capacity. Prior to his interim post, Williams served Tech as director of the Office of Systems and Procedure and the Office of Facilities Information.

Cavazos interviewed candidates for the finance post throughout the summer. He has stated he would move cautiously in naming a permanent financial vice president.

He explained the vice president will oversee Tech's dual financial structure consisting of the main campus and the Health Sciences Center.

"It is not an easy position to recruit for," he said.

Concerning other administrative matters, Cavazos said the committee charged with the search of a new director of planning has submitted several names to his office and that he will begin interviewing soon.

Cavazos said he expects to name a director of development sometime during this semester. He has set November as a tentative deadline.

Development is charged with raising funds for Tech from non-public sources. The office also works closely with Tech's support organizations such as the Red Raider Club, the Dad's Association, the Ranching Heritage Association and the Ex-Students' Organization.

Man charged with indecent exposure

Police said he was wearing red jogging shorts, tennis shoes and a green ski mask.

Daniels said Hamilton is an area farmer who frequently comes to Lubbock. He is married and has two children, Daniels said.

Daniels said police believe at least 30 indecent exposure incidents on the Tech

campus — some dating back as far as 1973 — now can be cleared.

Hamilton was in the Lubbock County Jail Tuesday night, and no bond had been set. He is expected to be arraigned today.

Indecent exposure is a Class C misdemeanor and is punishable by a fine of no more than \$200.

Human life debated at forum

By DARIA DOSS
UD Reporter

A physician, an assistant professor of sociology, a minister and a representative from the Lubbock Right to Life expressed their views Tuesday during a forum on when human life begins.

At the end of the forum, a vote was taken on the motion that "actual human life is vested in each human being from the moment of fertilization." Of the 101 audience members, 61 voted in favor of the motion and 40 opposed it.

The issue of the proposed human life amendment also was addressed during the forum, which took place at the University Center.

Celeste Gilbert, a representative from the Lubbock Right to Life, favored the motion. She said everyone has the right to be happy. Abortion takes the right of the unborn away, she said.

The government has a part in the right to life also, Gilbert said.

"The government has the right to protect the unborn by passing an amendment to make it unconstitutional to perform abortions," she said.

Speaking against the motion was Marietta Morrissey, an assistant professor of sociology at Tech.

"Abortion is not the prime method of contraception. It is merely another means," she said.

"The question is whether life in the womb is equal to the moment of fertilization. I believe it's all the same," she said.

Morrissey said 90 percent of Americans think abortion should be legal at some time.

"What if the woman's life was in danger by having a child? Eighty percent of Americans think abortion should be allowed then. You have to consider things like this," Morrissey said. John Judson, an assistant professor of surgery and chief of the cardiovascular and thoracic surgery division at Tech's Medical School, was in favor of the motion.

He said a person does exist before birth.

"A person is established within 24 to 48 hours of conception. It may not look like a human being at this time, but it has its own blood-type and chromosomes. Even though it can't care for itself, it still is a human being," Judson said.

"How about adults? If they can't care for themselves, are they not human?" he said.

William C. Bailey, a Methodist minister and a health care administrator at Tech's Health Sciences Center, was against the motion.

"I've served in churches in three states and taught classes at two other schools. These experiences have brought me to understand real human beings," Bailey said.

"Actual human life is not a scientific issue but a moral one," Bailey said.

A person is one who has reasoning ability, is self-motivated and has the capacity to communicate, he said.

"I'm opposed to the motion on a practicality basis. If abortion becomes illegal,

methods of contraception such as inter-uterine devices might soon be illegal also," Bailey said.

After the speakers gave their opening speeches, audience members were invited to express their views.

John Walkup, an associate professor of electrical engineering, was for the motion.

"For us to decide we don't want a human being shows how far we have fallen. We have to appeal to higher standards," Walkup said.

Fees due Monday in Bursar's Office

Approximately 1,000 Tech students who did not pay their registration fees for the fall semester by the deadline must be reinstated before Monday to be added to class rolls, Marsha A. Barnes, director of accounting and finance, said.

Students who did not pay all registration fees by the Sept. 14 deadline had their registration canceled and must obtain permission to be reinstated, Barnes said. The deadline to pay registration fees to the Bursar's Office is Monday.

The reinstatement policy is the responsibility of each academic dean. The Office of Accounting and Finance issued each academic dean's office cancellation lists of those students who failed to pay the registration fee by the deadline.

The students were notified in

cancellation letters that they were dropped from class rolls. If a student desires to be reinstated, he must obtain a permission slip from his academic dean to pay his fees late to the Bursar's Office.

Academic deans were instructed by the Office of Finance and Administration to deal with students on an individual basis in determining whether the student will be reinstated.

James W. Culp, associate dean of the College of Arts and Sciences, said he received notice that Monday was the deadline for students to be reinstated. Culp said, however, that several students showed him letters that have Sept. 28 listed as the deadline.

Fees will be collected from students during registration next semester, Barnes said. Fee statements will not be mailed to students in the future.

That's using your head!

Diego Hincapie, junior physical education major from Miami, Fla., gives the campus' sports scene a new twist as he brushes up on his soccer game. Hincapie is a forward on the Tech soccer team.

Education Department closes Tech case

A 16-month investigation into a discrimination complaint launched against Tech by the Chicano Law Student Association has ended with a U.S. Department of Education administrator ruling in favor of the university.

In a letter to Tech President Lauro Cavazos, the director of the education department's Dallas office said last week his office is closing the case.

The Chicano law students filed the lawsuit in April 1980 alleging discrimination at Tech in the recruitment and admissions of women and minorities to the Law School, Medical School and Graduate School. The students also charged in the suit that Tech discriminated in hiring, salaries and promotions of women and minorities.

The student group was joined in the complaint by representatives of the National Lawyers Guild, LULAC, National Organization for Women and the Affirmative Action Coordinating Center.

"We have determined that the admission criteria in the graduate and professional schools at Texas Tech University were based on legitimate non-discriminatory factors without regard to sex of the applicant," the letter from the education department said.

Investigators from the Department of Education, as well as 12 other federal agencies, visited Tech occasionally throughout the examination.

Proposed pass/fail revision not in best student interest

Mark Henderson

The following article was written by Tech Student Association President Mark Henderson in response to an editorial that appeared in Sept. 15's University Daily.

"The students are abusing the system!" That statement was heard more than once at a recent Faculty Senate meeting, and when the smoke cleared, that body had voted 21 to 18 to further restrict the pass-fail policy.

The contention of the Faculty Senators is that pass-fail is intended for students to take more hours than are required for graduation, and they wondered aloud how many students are currently doing so.

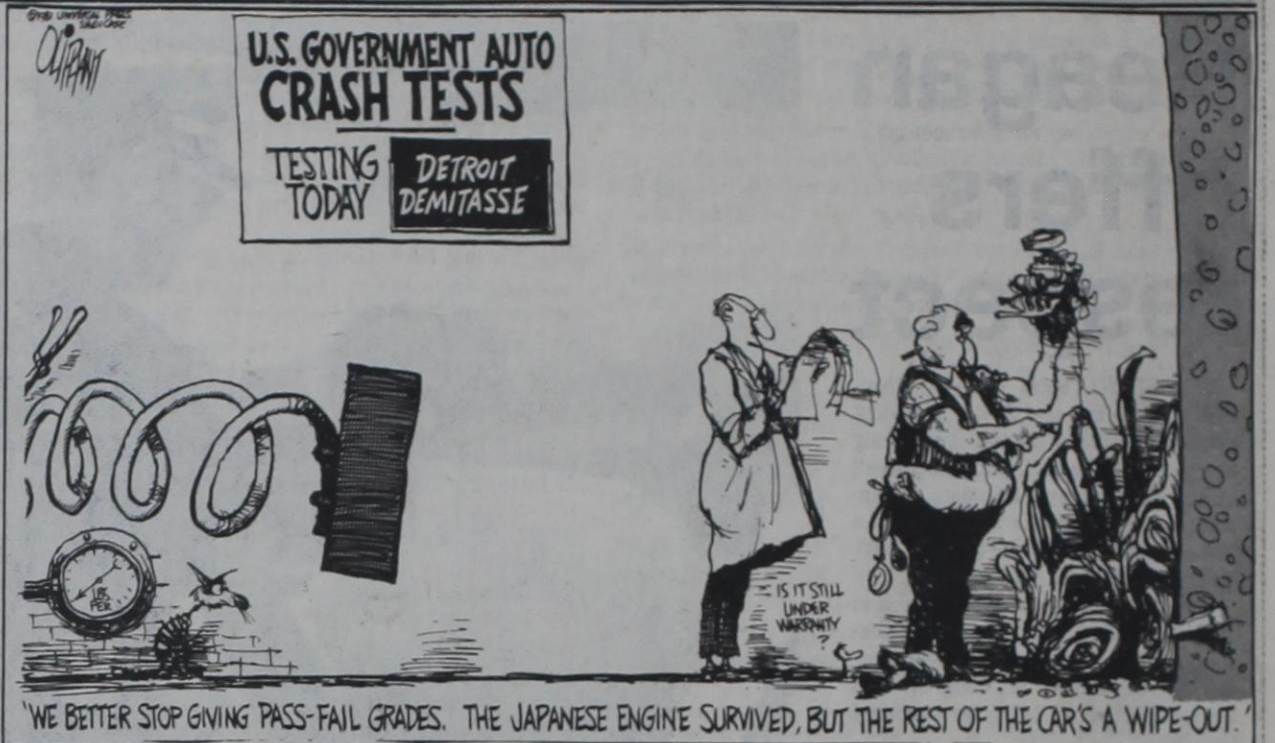

Come, now. How many students have the time and/or the financial resources to stay in school for the summer or an extra semester just to take one of those Asian philosophy courses that our UD editor mentioned. Of course, the answer is very few.

I believe that courses like history, political science, lab science requirements and humanities are required so accountants, engineers, or anyone else will have a broader educational experience than what they get within their own chosen fields. I further believe that a general knowledge in these areas is helpful; however, when these accountants and engineers have to take away from the time spent in their chosen field to read five

history texts, the helpfulness of that history course diminishes rapidly.

Let's face the facts. Many of these courses which Miss Russell called the buttress of a solid education are laced with so much BS that pass-fail becomes a blessing instead of an option. The old cliché "Would you go to a doctor who had taken his courses pass-fail?" doesn't really hold water. He couldn't take his chemistry and biology pass-fail, and if he learns those, I couldn't care less about his knowledge of history or political science.

What about the Faculty Senate's point of view? The very fact that their vote was 21 to 18 shows much less than full support for the proposed revision.

I think it is very unfortunate that this current leadership of the Faculty Senate does not appear to represent the views of the faculty taken as a whole. I find it difficult to believe that the majority of students have the intention of "abusing the system," and I

don't believe that the majority of Tech faculty members are concerned with that possibility.

The ball is now in the administration's court, and they have stated a willingness to cooperate with both the faculty and the students before taking

action. I understand the Faculty Senate's point of view, but I will not accept it. It is my job to work in the best interest of the students, and with that in mind,

I will oppose the proposed revision of the current pass-fail system.

Student claims teaching assistant program lacks quality

Communication problems impair learning process

Rex Castle

I wish to speak to a problem that affects most Tech students at one time or another. The problem deals with a subject often lost in the hustle and bustle of busy college life. I speak of the total lack of quality and excellence in education that is personified at this university through our teacher assistant program. Is it too much to ask that if I must sit and lend an ear to a rendition of the sandman reproducing a textbook in verse and script, that I might do so in my own language?

Although there is something quite reprehensibly funny about watching a baffled, oriental gentleman

stammer and stutter, searching in vain for the correct English word that may or may not describe the

situation of which he speaks, there is absolutely no hilarity involved when I receive a final grade and its imperfection is and always has been totally beyond my control. In every class I have taken that was not watched over by a TA (teaching assistant), I have received a column of four points; in the three classes that I have struggled through with TA's, I have received mediocre B's. If these grades are not proof of a system failing rather than a student faltering, there is none. If every student were to drop every class babysat by an incompetent TA, this system would soon find itself floundering on a

beach like a dying fish gasping for breath.

Who is the incredibly witless ass who thinks, even for a moment, that these magnificent twits can teach me anything more than how not to teach? For it is he who is to blame: Not the foreigner who tries desperately to be understood, not the overpaid walking boxes of Sominex, not the chemistry lab supervisor mucking about in his obesity looking more at a student's shape than her mind, not the lowly TA, but the ignoramuses in charge. The flabby-reared, mushy-brained department zeros who park their cars next to the nearest entrance and climb a flight or two of stairs, and then drop helpless and exhausted behind a mahogany desk

wishing only that they not be disturbed by anyone, especially those damned students. These are the persons who incur my wrath. How can a school that through its name alone represents the acquisition of knowledge on the highest order allow such stupidity to prevail unchecked? For the group of us still striving for academic excellence, being taught by incompetents is the most brutal slap in the face that an institution can render.

Do not pamper me, do not babysit me, do not teach me math in a foreign language, do not bore me: My God, I came here to climb out of my shadowed valley of ignorance, so enlighten me!

Letters to the Editor

To Mr. Richardson:

We acknowledge and respect the right you have to your own opinion; however, we disagree with your conclusions. As Christians, we would like to present our views.

Because of recent discoveries, the Bible actually has some facts to support its existence. The Dead Sea scrolls have been translated and verified by language specialists to correspond to parts of Isaiah and other books in the Bible. Ruins in the Palestine region have also been tested and dated. The results have revealed that the walls of Jericho did fall; other ruins relate to other Biblical stories. The Sept. 21, 1981 issue of Time contains an article about the Ebla findings which are tablets that describe places and activities that are found in the Bible. The empty tomb where Jesus lay and many Biblical names which are identical to those in secular historical writings add to the evidence.

As for your statement about the existence of God, we will not even say that we can use

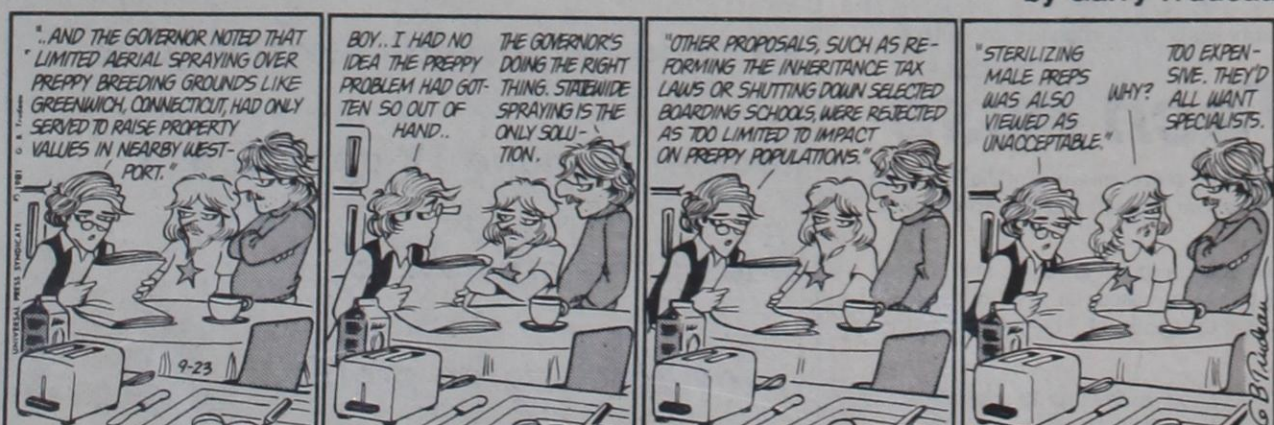

science to prove that. When we made reference to the empty tomb earlier, you no doubt said, "His body was stolen." We cannot prove with tangibles or facts that Christ arose, but you cannot prove that He did not. A quick glance at creation shows that the burden of proof lies not with Christians to prove that God exists, but with unbelievers to prove He does not. You cannot prove with science, archaeology, anthropology, etc.: 1. the reality of emotions such as love, or 2. the contents and workings of your subconscious mind or conscience.

You ask us how we know Christ lives? He lives within our hearts. Christianity is not a religion of intellectualism; it is a simple matter of faith. Most of all, we just want you to know that even if you really believe God does not exist, He still loves you.

News Briefs

Shuttle launch delayed again

CAPE CANAVERAL, Fla. (AP) — The second flight of the space shuttle Columbia will be delayed at least "one or two weeks" beyond its Oct. 9 launch date because a fuel spill damaged up to 250 of its heat-protective tiles, officials said Tuesday.

National Aeronautics and Space Administration officials said nitrogen tetroxide spilled at about 1:15 a.m. Tuesday when a "quick-disconnect" fuel-line connector malfunctioned while the forward Reaction Control System thrusters were being loaded. The highly toxic fuel spilled down the shuttle's starboard side.

Soviets want 'normal relations'

UNITED NATIONS (AP) — Soviet Foreign Minister Andrei Gromyko told the U.N. General Assembly today that the Kremlin wanted "normal businesslike relations with the United States" and not confrontation.

Gromyko, who meets today with Secretary of State Alexander M. Haig Jr., mixed harsh criticism of Reagan administration policies with an offer to open a dialogue with Washington "in order to seek mutually acceptable solutions to controversial problems."

Senate meeting postponed

The Faculty Senate meeting scheduled for today has been postponed until Sept. 30, a senate spokesman said.

Faculty senators were scheduled to make a recommendation on fall commencement exercises at today's meeting. However, Tech President Lauro Cavazos already announced Monday that there would be a commencement ceremony for summer and December graduates.

The ceremony is scheduled for 7:30 p.m. Dec. 18.

Weather

Tomorrow's skies will be mostly cloudy. The forecast calls for a 30 percent chance of rain. Tomorrow's high will be in the low 80s and the low should be near 60.

Reagan to tell Americans 'tough facts'

WASHINGTON (AP) — With Republican leaders balking at any new slash in Social Security, President Reagan planned Tuesday to take his case for further budget cuts directly to the nation.

But while he invited Americans to tune in Thursday night for some tough talk, aides said he would consider, meanwhile, the advice of his GOP allies that Congress simply won't buy elements of his latest package, totaling \$16.3 billion in additional cuts for 1982.

"The president believes it is

particularly important at this time to speak to the American people on his plan to rebuild the economy," said deputy press secretary Larry Speakes. All three commercial networks said they would carry the 8 p.m. CDT address.

Speakes said he had heard nothing to indicate the president had changed his mind about seeking a delay in the cost-of-living increases scheduled for Social Security and several other retirement and welfare programs next year. But he acknowledged that the chief executive wants

"more time to consider" that decision in light of a report from Senate Majority Leader Howard Baker Jr. that such cuts won't fly.

Congress already has approved eliminating the \$100-per-month minimum benefit under Social Security, and some efforts are under way to reverse even that move.

"Tune in at 9 o'clock" (EDT) Thursday, the president told reporters in the White House Rose Garden. Asked if he would tell Americans "tough facts" about the economy, Reagan

replied, "Yes."

Reagan's tentative plan calls for postponing a scheduled cost-of-living increase in Social Security benefits July 1 to Oct. 1. There would be cost-of-living delays in eight other social welfare programs, as well.

IN THE NEWS

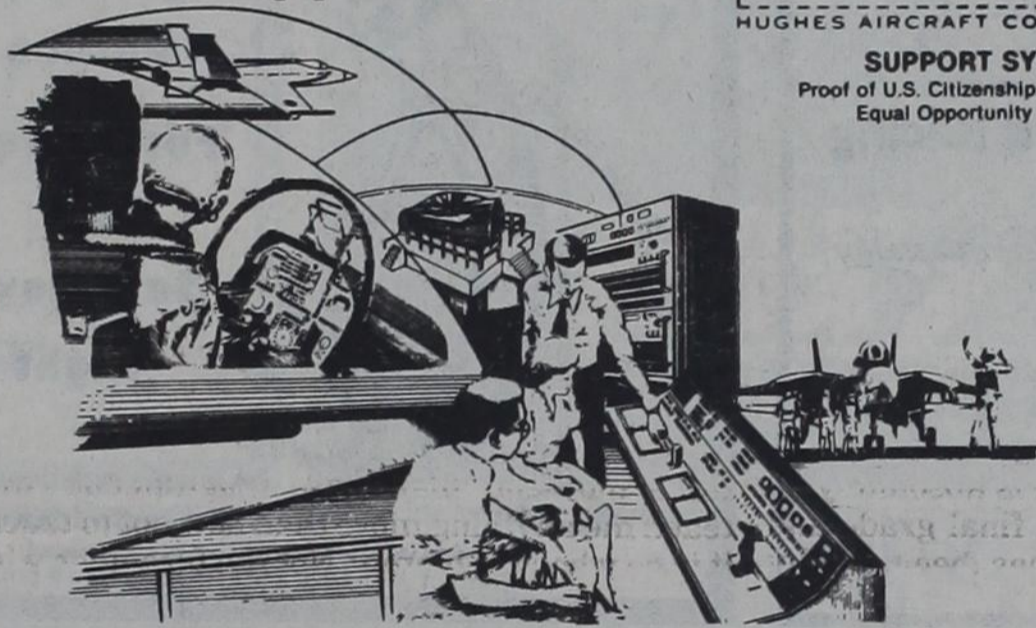

The U.S. Bill of Rights was ratified in 1791.

Who will be first to forecast the future — electronically?

Our electronic simulators, computerized training systems, and logistical support all help forecast or prepare for almost any kind of crisis. Our arm of Hughes Aircraft forewarns and forearms pilots in hazardous skies, troops at the front, and the technicians everywhere who support them.

Bring us your BS or MS degree in ME, EE, Physics, or Computer Science. You can be part of state-of-the-art electronics outside Los Angeles, or part of a field support team almost anywhere on earth. We'll introduce you to people, ideas, and jobs that could change your world. And ours.

It could be you and Hughes Support Systems

Attention All Texas Tech Students:

You are invited to participate in the 1981 Design Art Marker Contest. Cash and prizes will be awarded as follows:

- 1st Prize: \$100 and 126 Color Set of Design Art Markers
- 2nd Prize: \$75 and 72 color set of Design Art Markers
- 3rd Prize: \$50 and 48 color set of Design Art Markers
- 4th Prize: \$25 and 12 color set of Design Art Markers

Original artwork in your field of interest with the exception of posters using Design Art Markers are acceptable.

Entries must be submitted by Friday, November 20, 1981 at 6:00 p.m. to Varsity Bookstore. No late entries will be accepted. Prizes will be awarded on Friday, December 4, 1981. Pick up a copy of the rules and requirements at the campus bookstore, Varsity Bookstore, or Red Raider Bookstore. A seminar featuring art marker techniques will be held Thursday, September 24, 1981 from 10:00 a.m. until 6:00 p.m. at Varsity Bookstore.

1305 University

E-Systems continues the tradition of the world's great problem solvers.

Recognized with Archimedes and Newton as one of the three greatest mathematicians, Karl Gauss also pioneered math in astronomy, gravitation, electricity and magnetism.

E-Systems engineers are continuing in his footsteps today. They are pioneering technology and solving some of the world's toughest problems in electronic transmission and signal-reception in an interference and noise background using basic Gaussian concepts.

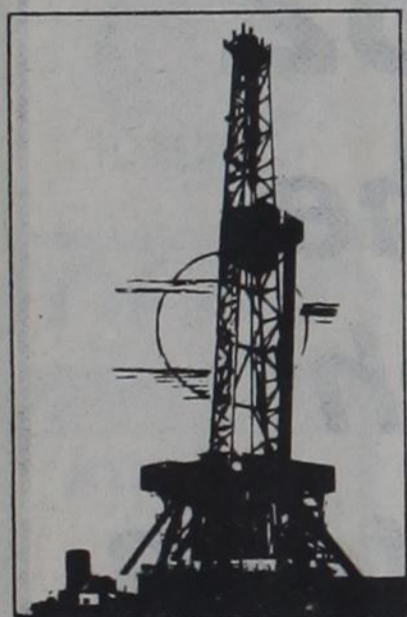

E-Systems "pioneering" in communications, data, antenna, intelligence and reconnaissance projects results in systems that are often the first-of-a-kind in the world.

For a reprint of the Gauss illustration and information on career opportunities with E-Systems in Texas, Florida, Indiana, Utah or Virginia, write:

A WORLD OF OPPORTUNITY

CAMPUS INTERVIEWS SEPT. 25

JOHNSTON-MACCO/SCHLUMBERGER. Many companies talk about their "World of Opportunity" but few, if any, can mean the words quite as literally as Johnston-Macco as a division of Schlumberger. Our products or services can be found making their mark on the energy industry from the U.S. to the Middle East, from the Gulf of Mexico to the North Sea. That's why it makes sense to work for a company whose horizons are endless. As a leader in the designing, manufacturing, and marketing of the finest tools available in the oil field service industry, Johnston-Macco will continue to prosper. It's plain and simple, as Johnston-Macco thrives, your job opportunity and career advancement grows...so why not join a company where your future and their future are one in the same.

We are currently in need of the following individuals:

PETROLEUM ENGINEERS: We are presently looking for Petroleum Engineers to design and start-up enhanced oil recovery facilities. This position also serves as the research-field liaison for EOR projects. A BS, MS or PhD is required.

JUNIOR SERVICE ENGINEERS: This is a training position which will eventually lead to formation evaluation testing services on oil and gas wells. We will also train you to conduct a variety of completion workover and secondary recovery services on oil and gas wells. A substantial amount of work time will be required at oil and gas well locations. This position promises career opportunities in management, field services, and technical development after the initial training period has been completed. Job locations include most of the United States and Canada. Please check your Placement Office for the specific Engineering Degrees that will qualify.

These positions offer excellent starting salaries and outstanding benefits, including company paid insurance, profit sharing, and dental insurance among others. If you are ready to join a company that is encircling the world with its expertise then come to Johnston-Macco/Schlumberger. Please contact your placement office to set-up an interview or send resume in confidence to: Jacques Morin, Johnston-Macco/Schlumberger, P.O. Box 36369, Houston, Texas 77036. An equal opportunity employer, m/f.

Moment's Notice

ACS-SA
ACS-SA will meet at 7 p.m. today in room 5 of the Chemistry Building. A special program on science fiction will be given by Dr. Marx. Everyone is invited to attend. A help session will follow the program.

AED
Alpha Epsilon Delta, a pre-medical honor society, is now accepting applications for membership. Application forms and requirement information are available in room 114 of the Chemistry Building. Each applicant must furnish a complete transcript which must accompany the application form. Deadline for the fall semester applications is Oct. 1 at 4 p.m.

AG COUNCIL
The AG Council will have a hamburger cookout at 6:30 p.m. today at Dean Curl's home, 1810 Banor.

AICHE
AICHE will meet at 12:40 p.m. for a "Lunchtime Seminar" in room 101 of the Chemistry Building. A special seminar will be given on job opportunities with Amoco. Lunch will be provided.

AHEA
The American Home Economics Association will have an "Aloha Party" at 5 p.m. today in the El Centro Room of the Home Ec Building. Featured guest will be Dean Haley of the Home Economics College. Dues will be \$23.

AAS COUNCIL
The Arts & Sciences Council will meet at 6 p.m. today in room 4 of Holden Hall. Dues and membership drive will be discussed.

COE
COE will meet at 6 p.m. today in room 235 of the Administration Building.

CYCLING TEAM
The Tech Cycling team will meet at 8 p.m. today in room 206 of the UC. All bicycle riders are welcome to attend.

DOUBLE T JAYCEES
The Double T Jaycees will meet at 7:30 p.m. today at Gabby's Hamburgers. All interested persons are welcome to attend.

FASHION BOARD
Fashion Board will meet at 6:30 p.m. in room 157 of the BA Building. The Style Show committee will meet at 6 p.m.

HEC
HEC will meet at 6 p.m. Thursday in room 111 of the Home Ec Building.

ITVA
ITVA will meet at 7:30 p.m. Thursday in room 105 of the Mass Comm Building. John Morton, former producer of PM Magazine and CBS freelance editor in Houston, will be the featured speaker. New members are welcome.

KME
Kappa Mu Epsilon will meet at 7:30 p.m. in room 108 of the Math Building. A special program will be given by Jerry Phaneuf, interim director of the Career Planning and Placement Service.

MILLER GIRLS
Miller Girls are now accepting applications. For more information telephone Christie at 793-0533 or Dennis at 747-8420. The deadline for turning in applications is Sept. 27.

MORTAR BOARD
The Mortar Board Club will meet today at Julia Mitschrich's home at 1409 Elkhart. Do you have your pin on?

NSSLJA
The National Student Speech, Language and Hearing Association will hold its first meeting at 12:30 p.m. today in room 280 of the Foreign Language Building. Old and new members are urged to attend and hear about the semester's activities.

PHI GAMMA NU
Phi Gamma Nu will meet at 2 p.m. Sunday in the Ex-Students Association Building. This will be the second rush party. Formal professional dress is required.

POLITICAL SCIENCE
Credit-by-exam in political science test will be given on Nov. 14. For more information telephone Dr. Roland Smith at 742-3121.

PRE-MED SOCIETY
A Pre-Med Society organizational meeting for all students interested in careers in medicine, dentistry, pharmacy and allied health fields will be held 7 p.m. Thursday in the Biology Building, room 101. Agenda includes officer elections and short introductions by Pre-Med counselors.

PRE-VET
The Pre-Vet Club will meet today at 7 p.m. in the Animal Science Building, room 124. Officers will be elected.

PRISM
Prism will meet at 7:30 p.m. today in the Business Administration Building, room 155. All members and those interested in MIS are urged to attend. Robert Leman of West Texas Utilities will speak.

RACQUETBALL CLUB
The Tech Team Racquetball Club will meet at 7:30 today in the Arts & Crafts Room of the Recreation Center. Officers will be elected and the invitational tournament will be discussed. Interested persons are welcome.

RHA
The Residence Halls Association will meet at 7 p.m. today in the BALH 07. Plans for Casion night will be discussed. All council members are requested to attend.

ROTARACT

'Roomful of Blues' sets Lubbock show

By PAT BARTON
UD Entertainment Editor
East Coast rhythm & blues band "Roomful of Blues" will ride the crest of their "blue wave" into Fat Dawg's on Sept. 24.

The band is currently in the midst of their first national tour which began on Sept. 1 and has led them across the country to such sites as Ann Arbor, Mich., Chicago, Kansas City, Fort Collins, Colo., and San Francisco.

"We're really pleased with the tour's reception," Bob Bell, co-manager and publicist for the band, said. "Whenever you play at a new place you worry about getting people to the gigs, but it's gone really well for us so far."

group is basically rhythm & blues, but they try to change and update their sound, Bell said.

"We're pretty much the same as when we started out but we're always trying to assimilate new stuff," Bell said. "Right now we're doing a lot of New Orleans-type rhythm — it's so danceable."

Bell said part of the group's objective is to get its audience to get out on the floor and dance.

"I think there's a grassroots swing toward dance music," Bell said. "People are getting out on the dance floor again — I guess about the only

good thing that ever came out of disco is that it got people dancing again."

Bell said the group has had a considerable run of good luck the recently, and one national critic has tagged the band's sound with the "blue wave" moniker.

"We're most excited about the last few months — we've really had an upswing in our fortunes," Bell said. "We've been getting a lot of national press, and now we've noticed there's quite a buzz going around about 'Roomful of Blues.'"

The band reached its present nine-member form in 1979

Blue crew

Rhythm & Blues band "Roomful of Blues" will perform at Fat Dawg's Thursday. Cover will be \$4.

when the horn section was increased to five. The basic "Roomful of Blues" sound has been around somewhat longer.

"Our music is derived from

Kansas City blues, and we draw on late 40s R&B," Bell said. "It's an exciting new kind of music, and people are really liking it."

Jones overcomes injury to win honor

AUSTIN (AP) — Senior A.J. "Jam" Jones, who pulled a hamstring in pre-season workouts and missed Texas' Sept. 12 opener, has regained his starting job after rushing for 105 yards on 22 carries and scoring two touchdowns Saturday night.

"He (Jones) did some things that makes you remember

why you missed him," Coach Fred Akers told his weekly news conference.

Jones, the Longhorns leading rusher in his first three seasons, will replace sophomore John Walker, who leads the team this year with 234 yards rushing in two games.

Akers said the coaching

staff had selected Jones as the most valuable offensive player in Texas' 23-10 victory over North Texas State. Tackle Kenneth Sims, who had 14 tackles, pressured the passer six times, blocked a pass and caused a fumble, was the MVP on defense.

Akers said reserve defensive tackle Greg Wright and

sub running back Michael Brown both will have surgery and miss the season, giving the Longhorns five players who have had operations this season.

He also said a thigh bruise may force senior wide receiver Donnie Little to miss the Miami game here Saturday. Little's brother, Lannie, a freshman defensive end, had knee surgery earlier.

Texas was ranked No. 6 prior to the North Texas victory.

Tech player wins tourney

Jill Crutchfield, member of the Tech women's tennis team, defeated Patti Bean of Commerce 6-2, 0-6, 6-4 to win the consolation finals competition Monday at the Texas Adult Sectional Championships in Fort Worth.

Crutchfield won three straight matches in consolation play to advance to the finals. She lost her opening round in the championships 6-1, 6-3 to Diana Dopson of Austin.

Defense clicks

By SID HILL
UD Sports Writer

The Raider defense surrendered 66 points and allowed 686 yards to the opposing teams in the first two games of the season.

Colorado beat Tech 45-27 in the first game of the season before the Raiders beat New Mexico 28-21 Saturday.

Senior outside linebacker Lewis Washington said the defense is beginning to overcome its problems.

Washington doesn't agree with those people who have said the team wasn't ready for Colorado. "We didn't physically execute well and we just got whipped," Washington said.

The 6-foot, 204-pound linebacker from Kerens had the most tackles of any Raider with 10 in the opening game and had five tackles in the New Mexico contest.

"We're getting better because not only do we understand what we're supposed to do but we're able to physically carry out our assignments more often," Washington said.

Those assignments are especially important for the linebackers, he said. "The way our defense is set up, the linebackers play a key role."

Linebacker coach David Knaus said Washington is prob-

ably Tech's most versatile defensive player.

"He has the speed to cover a wide receiver man for man and the strength to stop the run."

The other linebackers, Stan Williams on the strongside and Terry Baer in the middle, and Washington on the weakside are the components around which the Raider defense is built, Washington said.

"That might sound a little egotistical for me to say that," Washington said, "but having so much responsibility puts a lot of pressure on us to do a good job defending against the pass and the run."

Washington started the first seven games of last season on the inside at strongside linebacker, but Tech coaches switched Washington to the weakside linebacker position this season.

"The (weakside) position is quite a bit different from the

inside because a lot more running is involved," Washington said, "and I have the responsibility to slow up the wide receivers so the secondary can have time to cover them."

Washington said the Baylor game Saturday is important for the squad.

"The Baylor game begins conference play, and it's so important that I've been thinking about the game since before our first game," Washington said.

"It's also a big game for me personally because a lot of my family and friends from Kerens will be at the game because Waco is only 50 miles from my home."

MILLIONS DIED

Adolf Eichmann, a former Nazi Gestapo official, was sentenced to death in 1961 by an Israeli court in Jerusalem. He was found guilty of ordering the deaths of millions of Jews during World War II.

Recreational Sports

Independents dominate meet

The Intramural Track and Field Championships received some hoopla before the competition began, but that was because, for the first time, the championships were conducted in the fall instead of the spring.

Now that all the running and jumping is over and the winners have received their gold medals (?), there is real reason for hoopla.

The team competition turned out to be little more than a formality. In the men's competition, Sigma Phi Gamma stormed to first place in the one-team field. Several independents challenged the fraternity, but Sigma Phi Gamma had the champion 400-meter relay team (48.1) and the champion 100-meter sprinter, David Harris, who covered the distance in 11.2 seconds.

Horn Resident Hall walked away with the women's title. They outscored their closest competitor, 75-17, and won the 400-meter relay with a time of 1:12.0. Thanks to Janice Malone, Horn also won the long jump and 1,500-meter run. Malone, who was also

the high-point award winner for the women, long jumped 11' 7 1/2" and ran the 1,500 meters in 7:26.15.

For the men independent entries made up almost the entire field of participants and, as a result, the field of winners too. Tim Berry won the shot put title with a heave of 39 feet. Andy

Moore, who was the high-point award winner for the men, won the high jump event with a 5-foot, 4-inch performance. Alan Winn's long jump of 21 feet, 8 inches was tops in that event.

In the running events, Ernest Esquivel won the 800 meters with a time of 2:20.9, while Chris Roland ran 400 meters in 54.3 seconds for that championship. In the 200 meters, Rick Wardlaw finished first in 24.01 seconds, and Mike Adams raced to 4:18.8 time to win the 1,500 meters.

On the women's side, Nancy Canuteson was the only independent winner, running the 100 meters in 16.1. Pat Jefferson did her part for Knapp Hall with a 134-foot, 2-inch toss in the softball throw, and Cecille White of Doak was the 200-meter run champion.

Rush

The Sig Eps and Sigma Nu go after it in intramural football last week.

Swimmers set six new records

In Olympic-like fashion, six intramural records were broken during the Rec Sports swim meet.

In the team competition, Aqualung, which finished in second place, broke the one-year-old 100-yard medley record with a time of 48.78. Curt Buhtman of Aqualung also set a new record in the 100-yard backstroke by shaving 1/4 of a second off last year's best time.

In the 200-yard freestyle, John Tompson of the Alamo Armadillos erased three full seconds off the old mark to get into the record books, and Jim Amick bettered a five-year-old record in the 50-yard butterfly.

Cindy Stowe was the only woman to shatter any records during the meet. She knocked three seconds off the 50-yard breaststroke record and two seconds off the 100-yard breaststroke.

Bike tour ready to go

The Recreational Sports Outdoor Program is sponsoring a van to the Fort Davis bicycle tour Oct. 2-4. The cost of the trip is \$45 for each person and includes transportation for bicycles, four meals, sag wagon for Saturday's tour, a T-shirt and lodging for two nights at the Prude Ranch dorms in the Davis Mountains.

The van will leave Oct. 2 from Lubbock, and the bicycle tour in the mountains will begin the next morning. Participants have a choice of doing a 75-mile, 50-mile, 25-mile, or 10-mile ride.

Persons interested in going on this trip must sign up in the Outdoor Program's Office in the Rec Center and pay the \$45 by Sept. 30. More information is available by telephoning 742-2949.

Run hopes to Ambush Aggies

Killing two birds with one stone appears to be what the Rec Sports-sponsored "Ambush the Aggies Run" is all about. You can show the Aggies what life is all about and get in shape. Participants will begin at 9 a.m. Oct. 3 at the Tech track and run through campus, around the circle, and back, covering two miles. For the heartier souls, though, there is four-mile jaunt that will continue through the campus to the Student Recreation Center and back.

The run is open to all Tech students, faculty, staff and their spouses. The cost is \$3, and all entries must be in the Rec Sports Office by Oct. 2. There will be no registration on the day of the race.

All runners will receive T-shirts.

IM Briefs

More refs needed

If you have self-confidence, integrity and general knowledge of football you are qualified for work for Rec Sports as a flag football official. The starting pay is \$5.25 a game. There are openings for officials during the week from 4-10 p.m., on Saturday mornings from 9:30-noon, and on Sundays from 2-10 p.m. For more information, potential officials should telephone 742-3351 or stop in and see John Bowsby in the Rec Sports Office.

Tennis entries due

Fall intramural tennis will be organized into separate leagues this year instead of the usual tournament format. Leagues will commence at 6 p.m., 7 p.m., and 9:30 p.m., on Wednesdays and Thursdays beginning Sept. 30. The top two players from each league then will vie for the championship Oct. 25. Entries for men and women are due Thursday.

Clinics start tonight

The Sports Medicine Injury Clinic, conducted by Dr. Robert

Yost, an orthopedic surgeon and leading authority in sports medicine, starts at 7 p.m. today in the classroom of the Rec Center.

All of the injury clinics are free and open to anyone eligible to enter the Rec Center. The clinics will be conducted at 7 p.m. every Wednesday until Dec. 9.

The purpose of the clinics is to educate students about athletic injuries that might occur during some form of athletic activity. The clinics provide Tech students, faculty and staff with an opportunity to talk to Dr. Yost on a regular basis.

All about stars

If you're a night person and you want to learn more about the stars you always see above you then you ought to look into the Rec Sports-sponsored Star Gazing Clinic. The clinic provides participants a chance to learn about the history of navigation by the stars, how to spot and identify constellations, and other facts about the stars.

The clinic will be 8:30-10:30 p.m. Sept. 30 in the Audio Visual Room at the Rec Center. Star gazers can sign up in the outdoor

shop this week or should telephone 742-2949.

Workers wanted

Any Tech student, faculty member or staff member interested in helping erect the air-supported structure over the swimming pool at the Aquatic Center Oct. 6-9 should contact Aquatic Center Director Joyce Grimes at 742-3897. Interviews will be conducted from 3-5 p.m. today, and Rec Sports will pay \$4 an hour for anyone hired.

Triathlon scheduled

All triathletes should start getting in shape for the fall Rec Sports Triathlon which begins at 9 a.m. Saturday. Participants will swim a half-mile, cycle 40 miles and run five miles. Entry forms are available in the Rec Sports Office, and entries are due Friday.
