Number III.

## MATADORS TAKE COWBOYS INTO CAMP IN CLOSELY FOUGHT CONTEST, 10-6

### Simmons Slips Over a Surprise in First Hectic Session.

The Matadors again displayed their coming back prowess, Saturday in the tilt with the Simmons Cowboys, when they battled through to a 10-6 win after the visitors had drawn first blood early in the primary session. Simmons began the struggle with a powerful offensive drive which soon netted them a touchdown, but failed on the extra point. The Cowboy count was put over by "Three Yard" Walker. Exchange of kicks, line plunges but few gains on either side characterized the play from then until about two-thirds of the second quarter was over when Tech sprang into action.

Percy Walker gave his usual exhibition of broken field running, when he snatched up the ball on Tech's own 48 yard line to stop only after he had made the coveted goal. DeWitt's trusty toe gave the Matadors the extra counter and Tech gained the lead which they were destined to keep the rest of the afternoon.

The Matadors were within scoring distance, the thirteen yard line to be exact, when the timekeepers' gun boomed out to stop the teams at the half.

Simmons came back from the rest period and seemed bound to duplicate the first session when Walters fumbled; Tech recovered and booted out of danger. The fourth frame was signalled by the Cowboys' sensational aerial attack. At length, however, the Matadors worked the ball to Simmons 17 yard line and Floyd Woodbridge placed the ball squarely between the standards with a beautiful kick, and the scoring was over. Tech 10-Simmons 6.

The game ended with the ball in mid-field. Although the Cowboys played spectacular and consistent football, the Matadors outplayed them save for the first hectic frame. Walker, Nicklaus and Woodbridge seemed to be most consistent ground gainers. Jacques Hardy, the diminutive Marlin High product, showed the fans some real broken field running and punt returning. Hodges, who started at right half, uncocked some good stuff. Calloway and White, who followed the Freelandmen home from the Ft. Worth fracas, were both in line doing their bit to ride the Cowboys. Corley and DeWitt were forced from their stellar playing by painful injuries.

The Cowboys unloosed the best aerial attack the Matadors have yet been up against, which will undoubtedly aid them in further tilts.

(Continued on Back Page.)

### New Mexico Students In Tech Form Club

Thirty students from New Mexico met and organized the New Mexico Club last week. Guy Carter was elected president, Lois Gable, vice-president, and Miss Alston, sec-treasurer. A committee was appointed to draw up a constitution; plans for the year were discussed.

Tech has, in eastern New Mexico, a large field from which to draw students. Through the enthusiasm of these present New Mexico students the interest of all New Mexico in the Tech College will be increased.

### Young Writer Here.

New Mexico Woman Tech Student Has had Booklet of Poems Published.

Among the celebrities Tech has gathered together in its student body of fourteen hundred, is a little girl from New Mexico, Lois Gable by name who bears the distinction of having a booklet of her own poems published some months ago. Miss Gable is a member of The Toreador staff and is taking the freshman course in journalism.

### Weekly Calendar Offers Variety

- Tuesday, Oct. 18
- 7:15 P. M. Freshman Pep Meeting at the Gym.
- 7:30 P. M. Sock and Buskin at the Club Studio.
- 7:30 P. M. Ag. Club.
- Wednesday, Oct. 29
- 9:00 A. M. Student Convocation at the Gym.
- 7:30 P. M. Engineering Club
- 7:30 P. M. Press Club meets in room 217
- Friday, Oct. 21
- 7:30 P. M. All-Tech Pep Meeting at the Gym
- Saturday, Oct. 22
- 3:30 P. M. Tech Meets Sul Ross at the Matador Field.

## TECH MEN TO BE LEADERS SAYS Y SECY.

"I look for a future, when people will say of the leader of Texas, 'He was a student at Texas Tech'."

With this optimistic vision of the years to come, Roy McCullough, secretary of the Tech "Y", made his formal bow to the entire student body at the weekly convocation. Mr. McCullough told of his aim in coming to Texas Tech, "the new-school" where things are done". He expresses himself as being overwhelmed by the cordiality accorded him by the people of Lubbock.

The speaker has been on the campus since mid-September, but has deferred any public introduction until this time as he wished to look about and get his "bearings". Convocation next Wednesday will be conducted by the students.

## TRACTOR GIFT OF FORD MOTOR CO.

A new tractor has been presented to the School of Agriculture by the Ford Motor Company to replace the old one. Both tractors are loaned to the College by the Ford people, the first one being presented two years ago.

Farm machinery is often loaned or given to agriculture colleges by implement companies, in order to acquaint students of agriculture of their product. The Ford tractor loaned to the school has been of a great deal of help in putting the campus in shape.

## Sock and Buskin Players Present Comedy Tonight

Play Given Tonight. The play, "Poor Old Jim," a one-act comedy, directed by Miss Pendleton, supervisor of the Club activities, will be presented this evening in the Club Studio, Room 202, at 7:30. The cast for the play is Glenda Crawford, Clarence Whiteside, and Richard Cavett. The play has to do with the reformation by a very original method of a husband addicted to nights at the Club.

Applications for membership may be presented in person at the meeting tonight; and only old members and such applicants for membership may be allowed to see the play. The first meeting of the Sock and Buskin Club for the current year was held two weeks ago, at which time the plans for the year were discussed, and adopted. There will be Club meetings on the first and third Tuesday evenings of each month; a one-act play will feature each of these meetings. In addition, one public performance will be given each term.

## PAYNE CALLS TECH CAGERS TO WORKOUTS

NEW COACH TO CONDITION MEN THREE MONTHS BEFORE SEASON

First call for basket-ball candidates to report has been issued by Coach Victor Payne. Workouts will be held two evenings a week until December, then daily practice will start. Although it is nearly three months until the season proper will begin, Coach Payne has requested all candidates who are not on the football team to turn out and get into shape so the whole squad will be in good condition when regular practice begins.

The team will be coached this year by Victor Payne, newly appointed Matador coach. Great things are expected from Coach Payne who comes to Tech with a fine record as coach of the Simmons Cowboys. Payne is at present assisting Coaches Freeland and Higginbotham with the football squad.

A cage schedule has not been arranged as yet, this will be done, however, when the Matadors mentors go to Dallas in December to confer with coaches in a joint session of the Southwestern, Texas and T. I. A. A. conferences.

## MASTER OF ARTS DEGREE WORK NOW DECIDED

The following general requirements for the Masters Degree have been proposed by the committee on Advanced Standing and approved by the heads of the departments of the College of Liberal Arts.

Article 1—Admission to Candidacy. To be admitted to candidacy for the Master of Arts degree the student must be a graduate of Texas Technological College, or an institution whose degree is accepted by a recognized association of colleges and which was so recognized when the degree was conferred. All other requirements as to admission are to be left to the department in which the student's graduate work is to be done.

Article 2—Amount of Work Required. The minimum amount of work beyond the Bachelor degree that is required for the Master of Arts degree is 45 term hours. A maximum of 9 term hours of graduate work may be accepted from another institution of equal rank.

(Continued on back page.)

## Dean Miller Head Of Committee on Rural Welfare

Dean Miller spent the first part of last week attending a meeting of the Texas Committee on Relation of Electricity to Agriculture, which was held at the Baker Hotel at Dallas. The Dean is chairman of the sub-committee on Rural Lines.

Dean Miller outlined the organization of the committee of which he is chairman as follows: The institutions sponsoring the work, are the A and M College of Texas, Texas Tech, public utilities of the state, and several farm organizations. The committee on application of electricity to Agriculture in Texas wishes to find out how much electricity is being consumed by the farms already, to ascertain what operations are serving these electrified farms now, and lastly to determine what other electrical operations can be used by the rural resident economically.

Dean Miller and Dean Ledigh, also a member of this state-wide committee, will probably attend another meeting of the group at College Station, on the fifth of November. Very favorable publicity is being given Tech through the work of its Deans.

Mr. S. B. Tadlock, Jr., who attended Tech in 1925-26 and was enrolled for a few months last year, writes The Toreador that he is in Kansas City, Mo. Tadlock has been keeping up with Tech through the Kansas City Star which he says carried an account of the first two games.

## TECH BAND IS A REAL FACTOR IN COLLEGE

LEMAIRE'S ORGANIZATION MADE FINE RECORD AT FT. WORTH

The Texas Tech Band, one of the factors helping to put over our trip to Ft. Worth, and the subsequent good showing of our football team, is back into regular channels this week.

This band, directed by H. LeMaire, composed of eighty-five members, and with a conservative valuation of instruments at more than \$14,000, is distinctly a Tech College organization. It is one of the strongest student organizations in the school—meeting twice each week for rehearsals of an hour and a half, for which no definite credit is given as yet, but with the possibility of one term hour credit.

To date, in addition to twelve regular rehearsals, the organization has met for two special rehearsals, drill, convocations, and games, for more than a dozen different times and a radio concert at Ft. Worth.

Incidentally, the band was very much in evidence at Ft. Worth. The rain, of course, prevented their playing and leading the parade from the Santa Fe station up thru town; but nevertheless, the townspeople of that city knew that they were present—they were all over town.

Exactly at noon, the first concert there was given in the lobby of the Texas Hotel. A large crowd heard the music, and applause was general. At the game, that afternoon, the band made itself heard above everything else there. Then, immediately following, the band returned to the Texas where a half-hour program was given, and broadcasted from the Star-Telegram Radio Broadcasting station.

## EXCAVATION FOR NEW STRUCTURE NEARLY ENDED

With the basement of the new Engineering building almost complete, it is the plan of the construction company to start pouring concrete this week. Completion will be rushed and the building should be finished by July, 1928.

At present there are about twenty men employed on the job and many more will be added later. Tech students went on the payroll last week, and will stay on as long as they give satisfactory service. It is the plan of the superintendent to use as many students as possible.

The building is to have a 275 foot frontage on the East with two wings extending out west. The North wing will be 143 feet long and the South wing will be 120 feet long. It is to have two floors and a basement with all engineers equipment. Some day in the future this building and the Textile building will be connected up.

## Journalist Club Elects Leaders For Year.

Despite conflicting dates with four or five other organizations the Press Club met Wednesday night for the second meeting of the year. Officers for the ensuing year are: Wilburn Eddleman, President; Mary Steele, Vice President; Irene Conner, Sec-Treasurer; Otis Koen, Parliamentarian and Miss Gill, Myrtle Morrison, and Miss Steele were elected on the Program Committee.

Tom B. Morris, editor of The Toreador, gave a brief history of the Press Club from the time of its beginning to the present time. Incidentally the Press Club holds the distinction of being the first club to organize in Tech.

The exciting and interesting life of a foreign correspondent was related in a short talk by Campbell Loughmiller, who spoke of the efforts of all of the big News Gathering Agencies to make a scoop in the way of news for the American reading public.

All Journalism students and Freshmen are urged to report to room 311 for assignments for The Toreador.

## TECH-SUL ROSS CONTEST SHIFTED FROM AMARILLO TO MATADOR'S OWN FIELD

### Two Songs For Your Own Book

Good Morning. Good morning very one of you Here's a handshake from old Texas Tech! Good morning and good evening, too. We wish you luck, by heck! Honoring and cheering you ne'er shall lack Good morning and good evening too. You are just the sort of fellow, just the kind of girlie Just the college that I like.

Matador Song. Tech Matador Ho! (shout) Tech Matador Hold to your line! Tess, stamp and gore But be the sportsman always in the game Whether win, lose or draw. Remember Texas Tech Ho! Matador, Always a Matador.

## EX-MATADORS BACK IN ARENA

Matador foot-ball stock took an upward rise during the past week due to the unexpected return to school of "Dopic" White and "Preacher" Calloway, both lettermen from last year's squad. White is a showy end and Calloway can play any of the line positions, although his favorite places are center or end berths.

Calloway and White should give the Matadors a much stronger line as the team has been handicapped all season by lack of a capable veteran to pair off with "Al" Jennings on the wing position. The injury of Crabtree in the Ft. Worth fracas further weakened the end position, but this has been offset by the timely arrival of the two former Matadors.

## The Student Council Passes Twin Measures

Declaring all high school and letter sweaters of other colleges out of place on the Tech campus, the Student Council began, Wednesday evening, the activity program promised last spring by president "Al" Jennings. The first step in the council program for removal of other school letters from sweaters worn on the campus consists of an appeal to the student body to remove from their own garment the insignia of other schools. Another matter considered and passed by the council was a resolution that all students holding office in a student organization must have signified their real college citizenship by paying their activity fee. A drive is to be started shortly to make the student body 100 per cent paid up.

## Tech "Y" Girls Meet in Devotional Service

Meeting in a "fellowship" devotional, the Y. W. C. A. assembled Tuesday afternoon at College Inn. After several club songs were sung, the girls began to get acquainted. The discussion, "What We Do Twenty-four Hours of the Day," gave the girls an opportunity to know and understand the girl sitting near her. After a picture of the group was drawn on a blackboard, each activity was checked, then those that would be a help to the girls were checked.

At the next meeting an effort will be made to discover the personal needs of girls, as well as the needs of groups of girls. A check will be made on both meetings and a transfer of activities will be made if necessary.

### Teachers Come Saturday to Wipe Out Defeat of '25

The Sul Ross-Tech Game is to be played in Lubbock next Saturday. The shift in schedule from Amarillo to Lubbock was announced Wednesday by Coach Freeland, who would give no reason for the change in the program.

When the slashing, tearing Loboes from the Big Bend meet the blood-thirsty Matadors next Saturday in Lubbock, Tech pep will be there strong. In the first game played between the two teams in San Angelo during the first year of Tech's existence, the lads from down on the border were defeated, and it was a dose that was hard to take. That 21 to 7 score has never been forgotten and in the Wilds of Brewster county, Coach Graves has built up a team that the Natives are backing to the limit.

Headed by Gene Alford, who formerly starred for Tech, the Teachers have a powerful offensive team. Gene is a triple threat man who punts, passes, and carries the ball with all the ability of a talented veteran. Ox Cowan, the mainstay of the Loboes' defense, is also a versatile offensive player, and a line plunging demon. Captain Younger and McNeill complete the list of galloping elusive backs. These four will probably start the game but the Loboes threat does not end with them.

Sul Ross is a member of what is known down there as the unorganized southwestern conference and styles themselves champions of that group. Several powerful teams of New Mexico and Arizona are in the conference; last year the Big Bend school was well represented on the all-conference team.

With a team that averages around 180 pounds, the Loboes are going to invade the Panhandle and fight to carry home the bacon. Nothing would please them more than to beat the fighting Matadors and thus avenge the stinging defeat administered them two years ago by the Scarlet and Black.

It is not known whether the Sul Rossites are bringing a pep squad or not, but reports from there indicate that many people are planning to attend the game.

## Lorenzo Women Hear Regular Travel Talk

Dr. John C. Granbery conducted his regular monthly lecture before the Woman's Club of Lorenzo, last week. The topic discussed, "Arabia and Mesopotamia," was the second of a series of nine lectures to be given by Dr. Granbery to the club.

## Senior Class Take-up Plans for This Year

Meeting, Tuesday night, in the first regular meeting of the year, the Senior class discussed plans for the coming months. By a vote of the class it was decided that the Class of '28 purchase Senior sweaters. The Committee appointed to investigate designs, materials, and color of the proposed sweaters, were instructed to model their design in such a manner that the Senior sweater could not be mistaken for a T letter sweater.

Matters pertaining to Senior rings and the Commencement invitations were discussed briefly, but no action was taken in regard to these latter matters.

## Matador Club Grows.

Business Men Behind the Tech Matadors in Their Every Struggle to Win. One hundred seventy-one members were added to the Matador Club as a result of a one-day drive in the business section of Lubbock, Friday. The business men of this city are solidly behind the wearers of the Scarlet and Black as was shown by this concerted action.

THE COLLEGE JOURNALIST.

What is to become of the college man in journalism? Fought up as he is in the atmosphere of individual initiative and independence, will he succeed when he enters the keen competitive field of the city dailies? The Iowa Journalist thinks he will.

"Sneered at in the past, jibed at often, the college man nevertheless has arrived. He is taking the high places in the world's work.

They give as their authority, the data presented in a survey published by the Wharton School of Finance and Commerce. The survey shows that of the 340 men filling positions on seventy leading dailies as managing editors, chief editorial writers, city editor, news editor or head copy reader, 218 were found to be college men.

Further in the discussion, the article declares that this shows that the university man is good at editing news, it points indirectly to his weakness—a failure as a reporter of news.

This is only too true. The campus training is not of the competitive type met with on the city paper. The college man is not trained in the art of waiting patiently hour after hour for an interview. He has a spirit that prevents his suffering indignities at the hands of the public. Probably the best analysis of the situation is that he has been told to get the story if it was to be had—if not, it was all right.

In many instances, this is exactly what happens. At the first rebuff, the reporter shoves his note book into his pocket and goes on about his business. He does not feel the strong urge of competition in daily life.

The fault lies in the inadequate laboratory furnished by the average university publication. Nothing but the events of the campus are written up. This leaves the full weight of the work on the department editors and the managing editor, hence the man who enters the field of journalism in later life is one who is accustomed to do editorial work.

The administration should take note of this practice. The news field of the college paper should be enlarged to cover the political news of the city and the events of importance to citizens of the locality. The staff should be made to recognize the need for success and good work because failure follows if any member falls down on a single assignment.

Work in the class in journalism and the resulting aim of getting a credit does not stimulate for molding of an energetic journalist from the modern collegiate. Unless he is, himself, already a leader, he is too free from the cares and worries of responsibility to feel a load when it is shifted to his shoulders. When he is shown the need for results he will qualify as a reporter. It takes a felt difficulty to bring forth one's best efforts.—The Hustonian.

## PERSONALS.

Rex Keys and Glen Dobkins of Hollis, Oklahoma, write friends that they will be on hand to see the Tech-A & M game on Oct. 28.

Gordon Young, Tech Sophomore, was run down near the Campus Wednesday and painfully, but not seriously, injured. Young was immediately taken to the Lubbock Sanitarium, where he remained until Thursday morning.

Anna Belle Guffin will leave Lubbock Thursday for Abilene, where she will be a representative to the Methodist Student Federation. The delegates to the Convention are to be the guss of McMurray College while in Abilene.

Mr. Lane, representing the Charles Elliott Co., of Philadelphia, was in Lubbock Tuesday conferring with members of the Senior Class Committee on Invitations.

"Dope" White and "Preacher" Calloway have returned to Tech. The boys were so pepped up over seeing the gang at Ft. Worth that they immediately signified their intention of registering in their old school.

President Horn spoke before the Teachers Institute in Corsicana, Friday.

Miss Mary Shackelford, secretary to the president, returned to Lubbock Thursday, after an absence of four days spent in her old home, Austin.

C. C. Hall, of Athens, has returned to his home by the advice of physicians. Hall has a peculiar blood disease known as hemophilia, which has given him quite a bit of trouble since coming to the higher Lubbock altitude.

Students making the Ft. Worth trip were greeted by several former Tech collegians. Among the old gang were:

will not be disclosed here.

Bob Ewing, it is reported, didn't get the front desk in the Descriptive Drawing Class by choice. It was assigned to him. It is also said that Prof. Sahag told him he headed the class so far—counting in the reverse order.

Sophomores Womack and Calloway said they would make A's in everything if they could keep up with lessons as easily as they could stay broke.

Curtis Reese is another apt student in Descript. Ask him what he thinks about it.

It is reported that the fish engineers are enjoying the drawing classes immensely. They are studying Prof. Svensen's new book, "Drafting for Engineers," and putting their work on sheets furnished by the department.

According to figures released by the Registrar on Sept. 28, the class of Juniors in Engineering has increased 220 per cent over last year's figure. There are also five seniors, while there were none last session. In spite of the decrease in Freshman enrollment, it is amply made up by the increase in the upper classes and it is further believed that the graduates of '31 will be as great as ever.

The area around the Textile building used to be "No man's Land," but since the co-eds have begun to take their PE at the gym it is not uncommon to see idle engineers sauntering over this region.

Another element in addition to the long walk and bad weather will be encountered by the engineers in going from the Textile to the Ad building and that is—the co-eds are going to be met on the narrow walk and somebody will have to sidetrack it is feared. Of course, the courteous engineers will yield the hard surface to the ladies but will immediately put in a plea to the college authorities to widen the walk.

## ENGINEERS LOAN FUND TO BE ARRANGED

Providing the way for a professional education for other students, the students of the Engineering Society met in their first regular meeting of the year last week and made plans for the Engineer Student Loan Fund which was instituted last spring. This loan will be increased from year to year by proceeds from Engineering enterprises and various other methods.

Interest and college spirit were shown by discussing and making plans for intramural football. Professor Shelton will issue a call soon for Engineer gridsters to defend the championship title won by the school last year.

Plans for the social work of the society are being made rapidly. Plans for the Engineer's dance will be announced soon.

The following officers were elected for the year: W. E. Street, Pres., Jack Camp, first vice president, Barney Brady, second vice president, and Edna Houghton, secretary-treasurer.

Student papers on professional Engineering topics will be given at the next meeting.

Signs are being placed on the doors in the Engineering building directing students and visitors to the various departments and laboratories.

There will be an Engineering society meeting Wednesday, October 19.

## A Word From The Yell-Leader

Yell Leader, George James makes the following statement: "Our yell leaders are the happiest men in college now, due to the response given them by the student body. At the last two pep meetings the yell leaders have been well pleased with the response. Students, stay with your yell leaders! Attend all pep meetings and be ready for feature stunts at any time. Remember you are the twelfth man on that 'Fighting Matador Squad'. Yea, STUDENTS, stay in there!"

## Lubbock and Tech Ready for Aggie Game Visitors

With Oct. 28 rapidly approaching, Tech College and Lubbock are completing plans to take care of the largest crowd that ever gathered on the South Plains to see a football game. Thousands of visitors are expected in Lubbock to witness the Tech-A. & M. game as the struggle on the 24th marks the first appearance of a Southwestern Conference team in West Texas. Ex-Aggie students all over the Panhandle are planning to attend the game.

Tickets have been placed on sale in most of the towns within a radius of fifty miles of Lubbock, the Amarillo delegation alone requested more than five hundred reservations. Several special trains will be run into Lubbock for the clash between the two teams.

The Tech band will meet each incoming special at the depot, and the A. & M. Alumni Association will meet the A. & M. players Oct. 27 and will escort them to the hotel.

Elaborate preparations are being made to handle the crowd, as early estimation places the probable attendance at ten thousand, if the weather is fair. Seating capacity of the Tech stands will be increased to approximately ten thousand seats—the steel stands will hold 4,500, and knock-down bleachers will be placed around the field to seat an additional five thousand people.

### GUARANTEED.

A man who was greatly troubled with rheumatism bought some red flannel underwear, which was guaranteed in every respect and a couple of weeks later returned to the store where he made his purchase. "These flannels are not what you claimed them to be," he said to the clerk. "What is the trouble with them?" asked the clerk. "Have they faded or shrunk?"

"Faded! Shrunk!" cried the purchaser indignantly. "Why when I came down to breakfast this morning my wife asked me, 'What are you wearing the baby's coral necklace for?'"

### HOT DAYS.

Arriving home from the party friend wife confronted her husband, "I'll never take you to another party as long as I live," she fumed. "Why?" he asked amazed. "You asked Mrs. Jones how her husband was standing the heat?" "Well?" "Why, her husband has been dead for two months."

### PESSIMISTIC BLUES.

Day is dark, and skies seem dreary,  
'Tis a long, old lonesome day,  
I am lonesome, blue and weary,  
Do you ever feel that way?

When you think you cannot wonder,  
That some kids don't want to stay  
On these bald and endless prairies,  
Don't you ever feel that way?

My guitar stood in the corner,  
So I picked it up to play;  
But it sounded worse than rotten,  
Does yours ever sound that way?

And it's useless to start reading  
With these blues in full array—  
I'd be thinking miles beyond it;  
I'll bet you have read that way.

So I'm writing this for pastime;  
Hope 'twon't bore you or dismay,  
And some day you may be captured  
By the blues this very way.

—ARTHUR CHERRYHOMES.

## CANYON MAN ADDRESSES PI GAMMA MU

### Environment - Here - Considered by Prof. Duflot

With the statement that he could not accept for any length of time any "ist" or become a part of any "ism", Prof. Duflot of Canyon addressed Pi Gamma Mu here Friday night, on the subject, "Heredity and Environment".

The speaker continued, "At the present time I am an interactionist, but I cannot predict what I may be in the future." He endeavored to show the fallacy of a static existence, pointing out the dynamic movement of morals, ethics, and of the more physical things of life.

Prof. Duflot gave numerous examples advanced by the adherents of the two schools of thought, environmentalists and the hereditarians. The speaker showed the fine points and the fallacies in each of these examples, averring that he was treading the middle ground.

Dr. John C. Granbery introduced the speaker, saying that he was a "man who thinks things through". The social science study groups of Tech have had the privilege of hearing Prof. Duflot on several previous occasions.

Prof. Duflot was entertained at an informal banquet in his honor, at the college cafeteria, just preceding the talk of the evening. With Prof. Duflot's address, Pi Gamma Mu, the honor social science society, opens the 1927-28 season.

## Sophomores Plan Winter Ball For Class

A meeting of the Sophomore class was held Tuesday evening in the Gym for the purpose of introducing the class officers for the year and of proposing the activities to be carried out by the class during the term.

A ball for the months of December is the immediate aim of the class. It was not decided whether it would be an invitation affair or for the class members exclusively but the enthusiasm shown at the suggestion of the ball is a point toward the proof that it will be an important date on the social calendar of the year.

The Sophomore class this year is manifesting a great deal of pep and interest in school affairs and, if their first meeting can be used as a criterion, there will be a lack of co-operation and enthusiasm on the part of the class to mar the increasing amount of school spirit shown on the campus.

### Dr. Granberry Offering Course U. S. Diplomacy

Dr. John C. Granbery is offering a course in the "History of American

## Pledges of Club Presented at Party

Pledges of the Las Chaparrillas Club were presented last Thursday evening from 7 until 9 at the home of Mrs. Floy Pryor, 1212 Ave. M. The house was decorated with many beautiful flowers, the club colors of orchid and yellow predominating. Music was furnished throughout the evening by the Tech Tenebradors.

Guests were met at the door and presented to the pledges by the club members. Mesdames Mary W. Doak and R. M. Chitwood served tea, coffee, cakes, and mints during the first hour, and Mesdames J. H. Hankins and Vonelle Gilkerson, Virginia Murray, Haven Sawyer, Virginia Bacon, and Dorothy Rushing. During the evening the football boys, town boys, members of the boys' bridge club, and the young married ladies called in half-hour periods each.

In the house party were Misses Pearl Hensley, Edna Yonge, Cecil Dawson, Almada Murray, Verna Wilson, Sylvia Wilson, Afton Gilkerson, Glensy Honey, Cymbol Patterson, Floy Pryor, Ruth Starnes, Mrs. Royce Waters, and the pledges, Virginia Griggs, Sut Ratton, Clarice Scott, Anna Burson, Ruth McCarron, Tommie Preston, and Waurice Stoker.

## Woman "Y" Worker Invites Girls To Rest Room

By IVO WILSON.

On the second floor of the Administration building in room 203, groups of girls can be seen reading, resting and sharing experiences with each other any hour in the day. Through the influence of Mrs. Doak and others, this room was secured as a rest room, a study room, and the headquarters for the Y. W. C. A. The college has just presented five lovely, comfortable chairs and two cots, completely made, to the girls of the college. Any girl in the college is welcome to come in and it is hoped that she will feel that it is hers to enjoy.

Much more work will be done on the room by Y. W. girls and the advisory board. Pillows are to be made. The two screens are to be painted over and pictures and rugs will be added later.

There are a number of interesting books on the Y. W. desk now, and many more will be added later. Come in and look over the list.

This room is at the disposal of any group meeting for committee work and those who want to rest and study.

The women of the college are very grateful for every effort and kindness on the part of the faculty and college authority who have made it possible for them to have this room.

Diplomacy" on the first and third Tuesday nights of each month. The class meets for two hours twice a month throughout the term. One hour credit is given for this work.

## "ZE AMERICANS ZA NECK" AMUSES FRENCH; REPORTS MISS MARSHALL

"It requires actual living among the French to perfect one's conversational French," according to Miss Eugenia Marshall, who has returned to teach French at Tech after a summer's trip abroad. Miss Marshall spent several weeks of study at the University of France, the Sorbonne, in company with many other students from practically every part of the globe.

The class work was all done in the morning, classes beginning at 8:30. The afternoons were spent in sight seeing trips in and around Paris under the guidance of a professor of the University. All conversation was conducted in French, and one's welfare depended largely upon his ability to speak and understand this tongue.

The professor under whose guidance Miss Marshall enjoyed the sights of France and of Switzerland, knew little English except slang which he had learned from girls from Smith College whom he had on his tours. He seemed to be especially interested and fond of the American slang term, "Ze Americans za like to neck".

The university professors dress in correct morning attire for their classes. This dress consists of striped trousers, frock coat, and tall silk hats.

The students, for the most part, reside in the Latin quarter. During her stay abroad Miss Marshall experienced thrills due to the Sacco-Vanzetti trouble in America. The Latin quarter was especially guarded by Paris police to prevent any demonstration against the American students there. In Geneva, rocks were thrown at the hotel in which she was staying, by the sympathizers of Sacco and Vanzetti.

In France, as in America, the students of the colleges seem to be able to acquire an education with empty purses. The University is especially fortunate in being able to supply entertainment in the form of free admittance to the museums and the art galleries of Paris. Theatre and opera tickets may be obtained for about fifty cents. One may go from one side of Paris to the other in a taxi for fifty cents. Food is high, but transportation is cheap.

Miss Marshall was asked by the French if she knew James Oliver Curwood, whose writings are very popular in France. The people think of America as a land of Indians and Mounted Police. They seemed amazed when she informed them that Curwood was not so popular in America. Walt Whitman is the most widely read of the American poets; Galworthy is used more than any other author, in the college classes.

Besides rock throwing, Miss Marshall's stay in the French Alps nearly

proved fatal. She went to the top of Mont Blanc, a beautiful snow-capped mountain on a cog-wheel train which required about two hours to make the journey. Only a few days after Miss Marshall made the trip, the cog-wheel was wrecked, and twenty-two people were killed.

In Paris, it is easy to distinguish the American women for they dress more expensively than the French, although the French women seem to have better taste, with the exception of their shoes which are atrocious. All Americans are supposed to have money, and the French are capable of making the American woman pay for her clothes.

As a courtesy to the American students at the University, all Americans enrolled there were taken to the official aviation field of France and shown the landing place of Lindbergh whom the French consider a charming and unassuming man. Students were given special rates on rides over the city and shown every courtesy because of their countryman, Lindbergh.

The trip was thoroughly enjoyable and beneficial but Miss Marshall says that it is especially gratifying now that she is home to be able to shop and carry on a conversation in the native tongue without wild gesticulations.

## NEW INSTRUCTORS IN DEPT. OF HOME EC.

The Home Economics Department has two new instructors this year, one of which is Miss Marie Dellene, head of the art department which was established this year. The course consists in a study of applied art and interior decorating. Miss Dellene's classes are full as she has several students from town. Miss Edna Walker, who taught last year in Lubbock High School, is teaching at Tech in the clothing department.

There are 119 students majoring in Home Economics this year, ten of which are seniors; two Liberal Arts students are taking work in the department.

The Home Ec. Club, which meets with Dean Weeks, is taking up the project of furnishing the new practice house being erected near the home economics building.

There are three main divisions in the school of home economics: foods and nutrition, clothing, and design. The department also offers a course in Home Economics for those who intend to teach work of this nature.

## Dean Gordon Reopens Tech in Meeting

Dean Gordon, a member of Committee on Standards, Texas Association of Colleges, who returned Wednesday from a conference with other members of the Committee said in reference to the meeting, "The Committee on Standards of the Association of Texas Colleges met October 10 and 11 in Ft. Worth at T. C. U. The meeting was held primarily to discuss class extension work and correspondence work. The committee especially wants to find out what the colleges are doing. By this means we can set standards for extension work."

The members of the Committee are: Chairman, Dean Colby D. Hall, T. C. U.; P. E. McDonald, N. T. S. T. C.; Dean A. H. Nolle, S. W. T. S. T. C.; E. J. Mathews, Texas U.; Dean Ben M. Wiseman, Weatherford College; Dean S. H. Rider, Wichita Junior College; Dean E. V. White, C. I. A.; Dean P. P. Childs, Trinity, and Dean J. M. Gordon, Texas Tech.

## Short Course May be Offered to Farmers

If room can be found to accommodate it, a farmer's short course will

## Advanced Eng. Work Now Available by Mail

Mr. J. F. McDonald, Director of the Department of Correspondence Study announces the addition of five advanced English courses to the curriculum of the department.

Dr. Carter, in offering these courses, says that material is now ready and work on any of the sections may start at once. The courses added are:

- English 432 and 433—Shakespeare.
- English 435a and 435b—19th Century and Modern English Novel.
- English 333—American Short Story.

probably be offered at Tech some time during the winter, according to Dean Leidigh. Plans at present are only tentative, and it may be impossible for a course to be arranged, Dea Leidigh said.

The course, if arranged, will begin about the 5th or 6th of January. Considerable demand for such a course was evident last year, and public opinion will be tested before it is offered. Similar courses are at present offered to farmers at Texas A & M College, but distance is quite an obstacle to farmers in this territory attending the A & M courses.

## Cowboys Checked.

(Continued from First Page)

The lineup and summary follows:

Tech	Po.	Simmons
Jennings	R. E.	Bounds
Vermillion	R. T.	Pearce
DeWitt	R. G.	C. Daniels
Corley	C.	Pittman
Reed (C)	L. G.	J. Jennings
Carpenter	L. T.	Smith
Lockhart	L. T.	Moore
Woodridge	Q.	Walters
Walker	L. H.	Davenport
Hodges	R. H.	Sanders
Pickett	F. B.	Lynch (C)

Substitutes—Tech, White for Lockhart, Nicklaus for Pickett, Hardy for Hodges, Woodridge for Hardy, West-erfeldt for Carpenter, Carpenter for West-erfeldt, Calloway for Corley, Harris for DeWitt, Lockhart for White; Simmons, McCollum for Davenport, Cohn for Pearce, Gregg for J. Jennings, C. Daniels for H. Daniels, Davenport for McCollum, Walker for Lynch, McCollum for Davenport, Gregg for Moore.

First downs—Tech, 12; Simmons, 7. Passes attempted—Simmons 17. Tech 11. Passes completed—Simmons 8 for 75 yards; Tech 3 for 29 yards. Passes incompletes—Simmons six; Tech seven. Passes intercepted—Simmons three; Tech two.

Punts—Tech 9; Simmons 10. Average—Tech 36 yards; Simmons 27 yards. Yardage gained from scrimmage—Tech 263; Simmons 147. Yardage lost from scrimmage—Tech 18; Simmons 29.

Officials—Marsh (Oklahoma), Referee; Woodward (Fordham), Umpire; Hayes (Baylor), head linesman and Mahoney (Arizona), timekeeper.

## AGGIE NEWS.

Students in senior cattle production courses obtained some very practical experience at the Panhandle-South Plains Fair in preparing and showing beef animals. The exhibitors were benefited by the help of these students, and students obtained experience impossible to obtain in any other way.

At the auction sale of baby heaves at the close of the Fair here, Tech purchased a steer, which will be used for class work this fall. The animal will be used, first for judging purposes, and later for slaughter demonstrations to the students in animal husbandry.

The carcass will be cut into wholesale cuts, and these into retail cuts. The entire beef will be served at the College Cafeteria.

### Tech Stock Winner

Tech Sybil's Vera, a Jersey heifer, bred, fitted and exhibited by the animal husbandry department of the College, was awarded first prize in the junior heifer class of the Jersey breed at the recent Panhandle-South Plains Fair.

The same heifer was later made Junior champion but was defeated for grand champion by an animal owned by the Jersey Farm of Taft Ranch, Taft, Texas. Tech Sybil's Vera calved March 17, 1927, and was defeated for grand champion by a two year old heifer. This is one of the best showings that Tech livestock have yet made.

First meeting of the Agricultural Club was held last week. Dean A. H. Leidigh was the principal speaker of the evening. L. E. Brooks was elected chairman of the program committee. Brooks will appoint other members of the committee.

Next meeting of the Club will be held in the Home Economics building, Tuesday night, October 18. All agriculture students, especially the freshmen, are urged to be present.

Professor W. L. Stangel, head of the animal husbandry department, judged Aberdeen-Angus cattle at the State Fair at Dallas last week.

The agricultural building, now under construction, will soon be ready for occupancy, according to contractors. Plastering was about two-thirds completed at time of going to press.

The junior course in forage crops, under Professor Bower, selected heads of the various sweet and grain sorghums grown on the college farm. According to Mr. Bower, there were about as many types of heads as heads as there were boys, which only goes to show how much members of the class need practice work in this phase of forage crop study.

The material for the college greenhouse was shipped from New York, October 3.

## MASTER OF ARTS.

(Continued from First Page)

**Article 3—Grades.**  
No course may be credited if the grade is lower than B.

**Article 4—Major and Minor Subject.**  
The candidate for Master of Arts degree shall take at least two courses or 18 term hours in the major subject and in addition shall complete a thesis in the major subject which may count as much as 9 term hours, provided however, that all of the work may be done in one department.

**Article 5—Thesis.**  
A thesis must be submitted to the major department and be accepted by the major department and the Graduate Committee before the Master of Arts degree may be granted. Not more than 9 hours may be credited as research on a thesis.

Research in this connection, shall be defined as diligent, protracted investigation, especially for the purpose of adding to human knowledge.

**Article 6—Residence.**  
A minimum of three terms of residence is required.

**Article 7—Examinations.**  
Written examinations are to be entirely in charge of the departments concerned. In addition there must be an oral examination which shall be conducted by the major department, but at which the minor department or departments and representatives of the Graduate Council or Committee shall be present to take part.

**Article 8—Language Requirement.**  
A reading knowledge of at least one foreign language shall be required.

## AMPITHEATRE TO BE ERECTED BY NEW BUILDING

Soil now being removed for the excavation of the new engineering building is being dumped in a semi-circle west of the building site of the new building, where an amphitheatre will be constructed. The mound now being formed will form part of the background, and shrubbery will be planted around and back of the mound. The ground in the immediate front of the mound will be sloped and sodded in bermuda grass. This room will be used for seating space.

Mr. Warlick, superintendent of grounds, conceived the idea of the amphitheatre and is having the present work done. Planting of shrubbery will be under the direction of the Department of Horticulture.

## TECH CAFETERIA MODERN UNIT

The Cafeteria, occupying one of the buildings on the campus, is one of the most modern and most sanitary of its kind in this section of the country.

Electricity is used wherever possible. The ice crusher, prune seeder, potato masher and the dish washer are all run by electric power. In this way human hands are kept off of the food as much as possible. All the employees, from the manager to the janitor, have health certificates and are examined twice each year. All the meat that is used by the Cafeteria is U. S. inspected, all the eggs are candled and all the milk consumed is Grade A.

The Cafeteria is run for the good of the students and not for profit. Everything that is sold is figured at the very lowest price possible.

## Just a "Didja"

Didja ever come to Tech College as a freshman  
And go through the trials and tribulations of registrations,  
And just as you were about through some upper classman said that you'd have to have a physical examination,  
And you walked in and there was the doctor waiting to greet you,  
Well, were you scared to death but he was awful nice and then he began to tell the nurse how your eyes, ears and nose were  
And then did he put an instrument on his ears and over your heart and tell you to breath deep  
Didja? Then did he take it off and you waited for the verdict,  
Did he smile when he began to talk and were you petrified.  
He said, "You are O. K. with the exception of a faint flutter in your heart".  
Did ja feel all funny and walk out wondering who it was fluttering for.  
Say didja, well I know somebody who did.

## College Bureau Aids Many Students

Many Tech Students who find it necessary to make part or all of their college expenses would be unable to do so except for the invaluable assistance given by the employment bureau, situated in room 105 of the Ad. building.

There have been over 600 applications for work, and 350 have obtained regular employment, already, according to Cecil Horne, director of the Bureau. Many more students are expected to obtain work with contractors on the campus and in town. Quite a number will find work later in the cotton fields near the campus.

It is estimated that \$65,000 was earned last year by Tech students, and it is expected that the amount earned will be much greater this year. The bureau attempts to aid those who are in greatest need of its services, and who prove themselves most worthy, according to a statement made by Mr. Horne. Business men in town are co-operating nicely with the bureau in executing this plan.

## I Am The Gink.

(With apologies to Republic Syndicate).

I am the gink who never cracks a book. I make all the socials, shows and other places of amusement and entertainment, so I never have time to study. I sometimes make an A or a B on a little test and I am quick to show it to everybody and let them know that I made it without looking inside a book. I also delight to boast of the course I made last term with a grade of B without buying a text. Of course I sometimes sneak off and study but I never let anyone know about it for I enjoy telling how I passed without looking in a text. I know it bores others to listen to my line but I do it just the same. It leaves the impression that I am extra

## Stock Judges May Go to Royal Stock At Kansas City

Plans are under way to carry the Tech stock judging team to the Royal Lovestock Show at Kansas City, where they will meet some of the best teams of the Nation.

Last March this team won second place at the Southwestern Exposition and Fat Stock Show at Fort Worth. They were beaten for first place by Oklahoma A and M College, but took higher score than Texas A and M College. First and second high point men of the show were members of the team, Al Jennings being first, and Jack Sides second.

## Spanish Club Initiates Freshman Candidates

The Spanish Club in its re-organization meeting held early in October, initiated a group of Freshmen into the mysteries of the organization. In this ceremony the new students were required to sing several Spanish songs and otherwise to display their knowledge of the language.

Officers for the year are: Alfred Ahlman, President; James Aldridge, president; Josephine Witt, Secretary-Treasurer.

Activities of the club are being sponsored and directed by Miss Whately and Mrs. Gates, both of whom have recently returned from leave of absence.

"Jones has some baseball family."  
"So?"  
"Sure! His wife is fly, friend daughter is there with the curves, his son bats, the baby bawls, and he has to steal home every night."

intelligent. I also know that one gets little out of school life if he never studies, but in order to boast I leave studying up to the energetic boobs. I don't have time to study, for telling you how I passed without cracking a book.

## Women Meet in Discussion Group

Tuesday afternoon, fourteen girls, who had been chosen as the representative girls on the campus, met at the home of Mrs. Doak, 2421 Broadway. The meeting was called to discuss problems of vital interest to the women on this campus.

Miss Margaret Turner, president of the Y. W. C. A., acted as Chairman of the meeting. Mrs. Doak talked for several minutes on the life of college women and what a woman should expect from her college.

Mr. McCullough, local secretary of the Y. M. C. A., was present at the meeting and gave valuable hints as to the solution of these problems. Mr. McCullough is especially interested in organizing an association on the campus that can handle such questions as arose at this meeting.

Short speeches were made by Mary Hope Westbrook, Marguerite Bennett and Irene Conner. Suggestions were made, questions asked and a general round table discussion composed the program of the meeting.

## Central Texas Club is Organized by 35 Studees

Following the lead of the students from New Mexico, some thirty-five students from Central Texas met Thursday night and formed the Central Texas Club. The Club met again last night to draw up and adopt a constitution.

Tom Graham, of McGregor, was elected president of the organization, while H. C. Hervey, of Corsicana, was selected vice president.

A move is now on foot to band the East Texas Students together in an East Texas Club.

### BACON WITH A PAST.

A bride stepped into the meat market and asked for some bacon. The clerk said, "I suppose you want the cured bacon?" "Well," answered the bride, "I'd rather have some that has never been ill."

Girls present at this meeting were: Mrs. Al Jennings, Mary Frank Nichola, Sarah Williams, Katharyn Bryar, Sylvia Wilson, Mary Hope Westbrook, Glenda Crawford, Marguerite Bennett, Annabel Collins, Agnes Brown, Pearl Harper, Margarit Turner, Ivo Wilson and Irene Conner.

TECH STUDENTS: Give us one chance to demonstrate our ability and you will become a regular customer.
