VOLUME III.

TEXAS TECH, LUBBOCK, TEXAS, APRIL 17, 1928.

NUMBER XXV.

## STUDENT ELECTIONS TO BE HELD MAY 2ND AND 3RD

### Tech Pageant for 1928—"Within The Reach of the Plains People"— To be Presented on May 12th

WATCH TOREADOR FOR THE ANNOUNCEMENT OF CAST

Won't every Tech student cooperate in his specified way to make this spring's pageant a success? You will be asked to meet only three times for practice and your costume will be rented for you. This does not apply to dancers, however.

Today we hear much concerning a well rounded education and a versatile college life. The yearly production of a pageant and the giving of one each year dates back for a long period of time with many of them, if Texas Tech expects to rank among the foremost in everything, then she must recognize the vital importance and benefit involved in the production of her annual pageant.

Like other arts pageantry is more than an end; it is also a means. Many good results grow out of a pageant.

1. Pageantry is cultural. It gives spiritual uplift which comes about through the harmony of line, color, lighting, etc.

2. Pageantry is educational. It depicts history in connection with world. It teaches one to work with others.

3. Pageantry works for the good of social group. It teaches subordination of self for purpose or picture of whole. It trains leaders; teaches responsibility and immediate action. It offers fine chance for winning sentiment toward cause. Gives variety to community life.

4. Pageantry gives a large number of people an opportunity. It involves more persons than any other college activity.

5. Pageantry is an indirect moral agent; it has grown out of early morality plays. All actors have to work together and be concerned about others as one big family and everyone is on his best behavior. Only the clean side of life is accentuated.

Then considering the facts that the giving of the annual pageant is the precedent set by the oldest and leading colleges and universities of our country, that the results are beneficial to the individual and the group, and that you (not the other fellow) are needed. Can't there be willingness and wholehearted co-operation dominating the preparation and production of the pageant to be presented May 12th?

Your for a successful pageant for 1928.

(signed) Eunice Cox Pageant Master.

### Sophomore Class is to Meet Tonight at 7:45

The Sophomore Class will meet tonight in room 220 at 7:45. Matters in regard to the Hodge-Podge which is to be held next month will be taken up. The president is very anxious to have a good representation at this meeting.

Remember the time—TONIGHT, 7:45, in room 220. Be there!

### Neff to Speak

Hon. Pat M. Neff, former governor of Texas, is to deliver the commencement address in May to the second graduating class of this institution. While Governor of this state, Mr. Neff signed the bill making Texas Technological College a reality and he has at all times shown great interest in the development of the school. He also officiated at the laying of the corner stone on Armistice day, 1924.

Dr. Horn says that Mr. Neff always refers to Tech as "my school".

### New Building Soon.

The contract for the erection of the new science building was awarded to D. N. Leaverton, of Lubbock, last Saturday, April 14, at a Board of Directors' meeting at Ft. Worth.

The building is to house the various science departments of the college and will be a much needed addition to the campus. The entire building and equipment will cost in the neighborhood of \$275,000. It is hoped that the building will be ready for occupancy by January, 1929.

### Military Club Is Organized by Lieut. H. E. Killin

Wednesday night, April 11, there was brought into being a new club, sponsored by Lieut. Killin and organized by the M. T. students.

The club members were unable to decide on a name for the club at the first meeting.

This club was organized for the purpose of giving a better idea of what Military Training means and what it should mean to a citizen of the United States. Too often students get a distorted idea of M. T. The main purpose of the club is to assist in giving M. T. its due.

The following officers were elected: Cain, Pres.; Ford, Vice Pres.; Lindsoy, Sec.-Treas.; Sargeant-at-Arms, Galloway.

Students should enroll for M. T. so they will be eligible for membership in this club which is destined to be the biggest, best and most constructive club of Texas Tech.

### Dr. Granbery Speaks on Factors in History.

Dr. John C. Granbery spoke before the West Texas Historical Society at Abilene last Saturday. The meeting was held under the auspices of Simmons University. In commenting on the Simmons Brand, student publication of the college, said of Dr. Granbery.

"Some Little Known Aspects of South Plains History," will be Dr. Granbery's theme. He has been one of the most interesting of speakers at previous annual meetings of the organization.

### Many P. T. A. Visitors Guests of the College

Ladies visiting the P. T. A. convention were entertained at the home of the President last Wednesday. Many of them visited the campus and were shown about the various buildings. Many catalogues were given out to the visitors and many said that they expected to send their folks to Tech in the future.

### Mr. Cecil Horne Unable To Speak at News Meet

Mr. Cecil Horne, who was scheduled to speak on the program of the Southern Journalism Conference at Waco, was unable to make the trip, due to circumstances over which he had no control.

### Spanish Club to Meet Next Thursday Night

Capa y Espada is to meet next Thursday night at the regular hour. Officials of the club request a full attendance at the meeting.

### Interscholastic League Meet to Be Held Here

EXPECT 2,000 HIGH SCHOOL CONTESTANTS TO TAKE PART IN MEET.

Next Friday and Saturday, April 20-21, are the days of the Interscholastic meet, when schools from the twenty counties comprising district number two, will clash in athletic and literary events. Mr. A. W. Evans is the general director of the affair, while Coach E. Y. Freeland is to be supervisor of athletics.

Preliminaries in all events are to be held Friday, with the finals to be run off on the day following. In accordance with the precedent set last year, various awards are to be made to the victorious schools and contestants in the form of silver loving cups and medals.

Registration of contestants will be held in the Administration building on Friday morning from 8 to 10 o'clock, after which the first preliminary matches and events will be staged.

Although Saturday is to be a holiday, the President requests the student body of Texas Tech to stay on hand, if at all possible, and give any assistance possible to facilitate the running-off of the meet, and in making Tech's fifteen-hundred or two thousand visitors feel at home.

### Over Hundred Participate in Vocational Meet

Approximately 140 boys from almost a score of schools participated in the vocational agriculture contests held at the college Saturday.

Roby and Tulla tied in the livestock division, and Floydada won the plant production, while Silverton won the poultry division.

The boys participating in the meet were entertained by the Board of City Development on Saturday night.

### Plans for Final Senior Formal Are Considered

Plans for The Senior American, the final ball to be held by the senior class, were advanced at a meeting of the class last Wednesday night. A committee was appointed to work out the details for the affair.

The Senior class went on record as being in favor of the college circus which is to be held during the latter part of this month, and took steps to do their part in making this event a success.

Communication from Dr. Horn, advising all members of the class, whether they be June or August graduates, that they are invited to participate in the formal graduation exercises to be held in May, was likewise read and considered.

According to tentative plans the Senior American will be held at the Lubbock Hotel during the few days of May to be devoted to Senior activities.

### Booklet by Mr. Eddy Is Now Available

"Sex and Youth" the pamphlet by Sherwood Eddy have been received and copies may be obtained by calling at the office of Mr. Roy McCollough, Room 308 in the Administration Building. The price of the pamphlet is 15c. A quantity of these booklets were sold while Mr. Eddy was here but the supply was exhausted before the wants were all supplied.

### L. S. Wesley to Be on Campus This Week

IS TO TALK ON ALCOHOLISM, TO AID IN UNDERSTANDING OF QUESTION.

Lofton S. Wesley, Executive Secretary of the Intercollegiate Prohibition Association is to be on the campus on Wednesday, Thursday and Friday of this week. He will meet with various groups about the campus, to aid students in an understanding of the question of Alcoholism. Mr. Lofton S. Wesley, in the words of Bishop Leele, is "a young man of unusual ability, both as a speaker and as an organizer."

Since September, 1926, Mr. Wesley has been with the Intercollegiate Prohibition Association in the capacity of Field Secretary, travelling among the colleges in a number of states. In all his work he has been exceptionally well received by students and faculty. His fair and unbiased presentation of prohibition has won for him the respect and confidence of students, both sympathetic and unsympathetic to the cause.

During the war period, Mr. Wesley served in the army for nearly two years, spending six months of his nine months' service in European countries at General Pershing's headquarters in France.

During his college days at DePauw University, where he graduated in 1926, he displayed the characteristics which have brought him to this position. While gaining scholastic honors in being elected to Phi Beta Kappa, he was responsible for the maintenance of a home with his mother and younger brother. Besides this, he was prominent in collegiate activities, being a fraternity man; on the Y. M. C. A. cabinet; local President and State Vice-President of the Student Volunteer Union; President of the Local Chapter and National Secretary of the Oxford Club; and since graduating, National President.

Any group on the campus which desires to get in touch with Mr. Wesley is urged to see Mr. Roy McCollough to arrange for a conference with the visitor.

### Sparks Elected Chairman Texas Math Committee

At the recent meeting of the Texas Section of the American Mathematical Association held at Texas A. & M. College, Professor F. W. Sparks was elected vice-president of the organization. Since that time Mr. Sparks has been appointed chairman of a committee appointed to investigate the situation of mathematics in the Texas high schools.

This committee purposes to work out a means of correlating the mathematics work in the high school and in the freshman year in college as to eliminate a large percentage of the failures in freshman mathematics.

Tech is justly proud to have one of her faculty members in charge of the committee which is to undertake such a task. Such persons as Dean Puryear, of Texas A. & M.; Dr. Bray, of Rice Institute, Miss Dechard, of Texas University, and Professor Jones of Southern Methodist University, are among the members of the committee.

Professor Sparks will be in Austin on April 20-21 to take charge of the first meeting of his committee.

### Pres. Horn to Speak At Ardmore, Okla.

Dr. Horn received a telephone call from Ardmore, Oklahoma last Thursday, requested him to address the High school senior class of that place on May 25. As the President had an open date on May 25, the invitation was accepted.

### Editors and Business Managers Of College Publications are to Be Elected on May 2nd and 3rd

#### Dramatic Technique Class to Give Play

The class of Dramatic Technique is to present a play "The Youngest" during the early part of May. The play is to be presented in the way of a class task; members of the class constructing the set and making all the arrangements for the production.

#### Students Urged To Entertain Guests Saturday

There is to be no school next Saturday, April 21, but it is the wish of President Horn that the students of the college will be on hand to greet the many visitors to be the guests of the college on that date. The students from district number two, which will participate in the interscholastic meet to be held on April 20-21, are largely from the towns which supply Tech with her students, and Tech students can do much to make the high school students feel at home.

President Horn also requests all students to greet the many Rotarians who are to visit the city on April 19-20. Students can direct their hometown Rotarians about the campus and see that they have a first hand view of Texas Tech.

#### Sophs Will Hold Podge on May 17

The Sophomores will hold their annual Hodge-Podge on the night of May 17. It was first announced that this affair would be held on April 20, but owing to conflicts growing out of the District Meet and other affairs, this date was impossible.

It is planned to make this year's affair the best yet. Tentative plans are now under way and definite announcements will be made later. A meeting necessary that a large attendance be of the Sophomores will be held TONIGHT in room 220 at 7:45. It is had at this meeting.

#### Opportunity Seen for Pre-Meds to Serve Here

Pre-Meds here is your opportunity! The dreadful disease "sleeping sickness" is breaking out in Tech. Many professors report that many of their students in their classes cannot stay awake because of this malady encourage by the balmy spring like weather. Any Pre-Med who can remedy this situation will reap a load of gratitude from the instructors.

#### Pre-Law Club to Hold Session Tomorrow Eve

The Pre-Laws meet tomorrow, Wednesday night at eight o'clock in room 217. Appointment of an executive nature coupled with a business report will constitute the business part of the program. A prominent member of the local bar will speak to the members later.

Several students recently hearing of the famous trial, Pender vs Texas Tech have inquired as to when the famous Texas Technological Supreme Court will be in session again. The Court announces that there has been no reign of terror on the campus for several weeks but it stands ready to prosecute any criminal apprehended.

#### STUDENT COUNCIL SETS REQUIREMENTS FOR STUDENT POSITIONS

Elections are to be held on May 2 and 3, for the 1928-1929 publication heads of the two official Tech publications, according to an order of election issued by the Student Council last Tuesday night.

Candidates for the four positions, Editor of both La Ventana and The Toreador, and Business Managers of both, are to submit their application for consideration of the Faculty Publication Committee to Mr. R. A. Mills, head of that committee, on or before April 24. Included with the application, detailing any experience the applicant has had in work of this nature, must be enclosed a petition signed by at least fifty bona-fide students of the college, asking that the candidate's application be given due consideration.

The Publication Committee will consider all applicants and signify their approval or rejection of the candidate to the Student Council as soon as possible after receiving said application. Thereupon the Student Council will accept or reject the candidacy of the given candidate; if acceptable to both bodies the candidate's name will be inscribed upon the official ballot and voted upon by the student body on May 2 and 3.

By allowing two days for the conducting of the said election, the Student Council feels that each student in the college will have opportunity to vote.

The following qualifications, requirements and salaries for the various positions were adopted by the Student Council last Tuesday after a review of information compiled on salaries given editors and business managers of other college papers throughout the state.

**Must Present Petition**  
All applications for candidacy must present an application for the position they desire to Mr. R. A. Mills on or before April 24. Included with this application must be a petition signed by at least fifty bona-fide students of the college petitioning the Faculty Publication Committee to give the applicant's application all the consideration possible.

**Requirement for Editors**  
The following regulations apply to the Editors of the two publications.

- To be eligible for candidacy for the position of editor of either of the publications the applicant must have completed 90 hours before June commencement. (Thus a Sophomore is eligible if he will have 90 hours completed on or before June Commencement).
- Applicant must have a C (75) average on 15 hours or C plus (78) average in 12 hours in last two terms preceding the election; he must have made no F's or E's in last two terms.
- After election the editor of both publications must make at least C (75) average in 15 hours, or a C plus (78) average in 12 hours; must make no

**WHAT WILL THE FACULTY DO?**

Much thought and some discussion has been given to the subject of the social relations between college faculty members and college students.

Of late more criticism has been made of this relationship, than was previously the case.

It seems that the consensus of opinion among the students is that faculty members rather appear to treat the college students, on the whole, as though the students were slightly inferior to the instructors.

College professors are only human. They are not far different from other folks, and there is no apparent reason why they should be considered as superior.

Naturally, the scholastic attainment of the college instructors is one point in which they are superior to the students, and as such the student looks to the college professor as a specialist in his own particular field. The subject under consideration, however, is concerned with the social relationship, solely.

It has not been long since most instructors in Texas Tech were college students. As a matter of fact, there are at present some members of the faculty who are working for higher degrees. As such they are but students a little further along.

Some of the instructors are of the perfect type; enlightened, possibly brilliant, in reference to our subject, friendly. Some instructors fraternize with students, conduct themselves as though they were on the same level and there is no contempt bred of this familiarity.

It has been said that college professors have to remain aloof from their students in order to maintain their dignity, or the dignity which their position is supposed to demand. This is an absolute fallacy. No instructor who is an educated lady or gentleman need stand in fear of loss of dignity by fraternizing with college students.

Are college students so insignificant, so much below the level of ordinary humanity that they are without dignity? Probably modern fiction, of some types, some motion pictures, and some cheaper magazines would have us believe that college men and women are without this quality of life, but this exists only in the minds of those people who produce these things and make their living by presenting such material to a type of people who are entertained, though perhaps, not influenced by their efforts. Yet there are some who are so influenced. All college students are by no means all that might be wished. There are institutions which contain those who should not be in them. One innocent man is occasionally found in jail, or a child who has parents might be found in an orphan asylum, so may a distressed parent on some occasion send a wayward child to college.

To initiate a move for closer relationships between faculty and student is primarily the duty of the faculty members. If they would only make an opening the students will meet them more than half-way, for they have but one wish in the matter and that is to be no longer treated as children, and thinking thus, they would like to be heard as well as seen.

## The Train Wreck.

By J. Mark Moore.

Writers Note—The accident pictured in this sketch was not an actual happening in its entirety, but it is pieced together from three separate experiences which happened in separate years.

When we got to the wreck a horrible sight met our eyes. The locomotive must have jumped the rail. The steam giant followed by its tender was lying on its side, along side the trackage. The entire train was

a long mass of wreck and ruin. There was little to indicate that just a few minutes prior to the catastrophe that the long line of steel coaches and cars had been a fast mail train. With the appearance of a giant caterpillar, it had sped over the shining rails, past fields and farm houses, past towns and villages. Unlike a caterpillar in swiftness, though, it had the speed and swiftness of a comet. Now all was changed! No wall was wreckage and destruction. The two mail cars had telescoped into each other, smashing both into a mass of splinters and steel. The wheel trucks had become disengaged and had rolled down the

# THE YE EDITORS

The new drive in connection with the Bigger-Better-Evans Field movement that has been carried on by the student bodies of the past is to be designated by the distinctive name "1001 Club". The new drive is to be a part of, and will be carried on in connection with, the same movement which was begun by the student body of the long term of 1923-1924, and which was termed at the time a "Bigger-Better-Evans-Field". In the four years that have elapsed since the beginning of the drive the needs for accommodations have grown to such an extent that other items besides Evans Field proper have come in for consideration. In another article in this issue of The Star there appears a detailed explanation of the different objects included in the benefits of the present drive, among which are, in addition to the actual field itself, a cinder track for Kyle Field and new tennis courts for men. —San Marcus College Star.

It seems the San Marcus, their eyes on the T. I. A. A. championship, have just naturally got to have a bigger and better athletic field. A club has been formed to make this field a reality, its name has been selected as "The 1001 Club."

### COLLEGIATE MOVIES

Princeton undergraduates, in petitioning the local "Movie" theatre owners either to put on pictures showing a fairly true representation of College life or none at all, have voiced the sentiments of American college men everywhere. For a long time these pictures, with their absurd attempts to show what "college life" is were received with huge amusement by their sophisticated audiences, and such scenes as Princeton objects to—a "jealous rival for the hand of a Vassar girl dragging the star half-miler on the morning of the Yale track meet"—were greeted with hoots

of delight. For a long time salvos of sarcastic undergraduate applause met the "great scenes" where apparently a whole coeducational college held all-night jamborees, or where a famous athlete sold his football team signals to the other side so as to get even with the coaches. But after a time these amazing college life scenes began to pale; there were too many in the audiences who took them for a fact and said so; they ceased to be ludicrous and began to be annoying. Princeton students now want them stopped and we are decidedly with

embankment at one side. Cries and means of the injured reached our ears, mingled with the hissing of steam. I saw a section of rail twisted almost into a circle. The force of the impact must have been terrible. Only an extraordinary misfortune could have created such utter havoc. We heard that the train had been late. That the engineer in the cab of the monster mogul had over-used the speed of the locomotive in an effort to gain lost time. It had jumped the rails crossing a switch. (Rights Reserved).

them in that appeal. The composite type of this "movie" of which we have heard, represents the American university and college almost wholly given to gin, "petting parties," and athletics, and that part of its membership that is living a normal life as missing from the picture. We doubt very much whether that is doing any good for the colleges. Great numbers of excellent people who have never been at college take this sort of thing as true. It is all pretty vulgar and lowering to the real standards of the colleges in the public mind. The only thing to do about it is to protest and, if not enough to protest, maybe the movie people will do something about it if only to cease being ridiculous as they now are.—Yale Alumni Weekly.

At last a move has been begun by one of the older colleges to do away with the unfavorable publicity colleges as a whole are getting through the medium of the shallow "college movies" for two or three years. To date the only idea the home folk have been able to get from the moving picture college productions has been that their Johnny and Sallie is having a larapin' good time strumming the old string instrument or pulling the dignified and sedate Dean into the old "mill stream". More power to the Yale Alumni.

A few questions for the Seniors to ask of themselves:

### A FEW QUESTIONS FOR YOUR CONSIDERATION

For what did you come to college? Has your objective changed since you came here, If it has, is your new objective a better one?

Are you getting out of college things that will be of value to you one year—or ten years—from now?

Have you a stronger physique than you did when you came here?

Have you added to your intellectual achievement?

Are you better developed morally and spiritually than you were a year ago?

Do you look the world squarely in the face and do you best—or do you make the rules as you go?

Are you good because it is safe—or do you really love truth, beauty and purity?

What are you doing NOW that will help make you a cultured man or woman?

Has the year been worthwhile to you? Well.....?—West Texas Teachers College-Prairie.

And yet another from the philosopher of Denton, Texas:

### IN RETROSPECT

I'm getting along toward the end of my College days, and am wondering what they have meant to me besides tests, chapel exercises, and efforts to get excused from the fiz ed. College is a place where one comes, stays a little while, and then goes away. The important thing is what takes place while one stays.

I don't know exactly what has been going on in my mental processes since arriving in these parts, but I believe I have learned a few things. I came here wondering; I had it in me to take a college education. I thought I had, but memories of cramped high school days were like a wet blanket on my budding aspirations.

My life here has taught me the insanity of fear. I realize now that we are nearer to the truth about things when we are brave enough to believe in our selves, and strong enough to assist this belief with concentrated action, than when we meekly conclude that we're not as bright as other folk. Doubtless there are but the way to success is to show that one is not afraid of anything except fear.

I have acquired a number of enemies since I have been in college and also a few friends. I have had several great professors, one of whom called me aside as a freshman and told me he believed I could write. He was not just great because he told me that, but only a great professor would have been so generous to a freshman. The chances are I can't write, but the memory of his quite faith, and the homely humor will constitute one of the priceless things that I will take to the world things as they are—Duncan Robinson in the N. T. S. T. C. Campus Chat.

Yes, This is the time for those students who have been in this college life for four years to ask a few questions. Has it been worth while?—to you.

## Student Election.

(Continued from Page 1.)  
For E's after election. (Failure to make the grades specified will automatically disqualify one holding the position and the position automatically becomes vacant, to be filled by the calling of another election.)

4. The editor of the College Annual is to get a salary of \$25 per month for 9 months.

The editor of the college newspaper is to get a salary of \$35 per month for 9 months.

Requirement for Bus. Mgr.

The following requirements apply to the position of Business Manager of both college publications:

1. The business managers must fulfill term hour requirement as applies to Editors in No. 1 above.

2. Applicant must have taken at least 12 hours work for the two terms preceding election and must have passed in at least 10 hours of work.

3. After election the Business Manager of the two college publications must take 12 hours and pass in at least 10. (Failure to make grade as applies for editors.)

4. The Business Manager of the College annual (La Ventana) is to receive ten per cent of all fees collected from advertising.

The business manager of the college newspaper (The Toreador) is to receive 15 per cent from all the fees collected from advertising.

In all cases the Publication Committee is to specify the duties to be performed by the holders of all publication offices.

### What Ho! Real Pink Lemonade at Tech's First All-College Circus

"L-a-d-i-e-s and gen-tle-men, for one dime, ten cents, the tenth part of a dollar you may see this w-u-nderful monstrosity, the great-e-s-t freak in the woo-rr-ld to day."

Such sounds may emit from the Gym on April 28th, according to officials of the Woman's Forum which is sponsoring "the greatest show on earth" the 1928 Tech All-College Circus.

Following the parade which is to tour the entire down town district that "bedazzling-bewitching-spectacle" will be open to the entire student body of the college.

"Step up closer, ladies and gents, so that you may miss none of the wonderful sights ever assembled under one roof." Pink lemonade, and pink elephants, wild men, and wild music, clowns to make you laugh, plays to make you cry. Nothing to offend the fas-ti-dious.

In addition to all these wonders there will be a queen of the circus chosen from one of the classes of the college. Before April 21, each class

will meet and select from its numbers the most fascinating, the most beautiful, the most stately girl which they urge on to victory; for each other class will be contending against them for the honor of naming the queen of the circus. Following the nomination of the class favorite, the voting will be held for one cent each and the most popular girl in college will be chosen to rule over the gigantic spectacle. The three nominees which have been defeated in this contest of beauty will serve as attendants to the Queen, and right proud they will be of that honor too.

Each class, organization or club in the college is urged to furnish a float which will be a part of the parade before the great circus begins. The float adjudged the best will be awarded a prize. Not only floats, however, but including stunts, and booths will make up the whole monstrous event.

Any organization wishing to enter a float, or arrange a stunt are requested to see Margaret Bennett, as soon as possible.

### Freshman in Open Letter Hits Petty Thievery

One of the lowest forms of life connected with a college of any kind is a Petty Thief. The person who is so small in mental caliber that he will steal from his fellow students should have no place among them. I say fellow students, yes, he goes about as any other student, he is hailed as a fellow of a noble organization, but in his own narrow self he is as far removed from them as Mars is from the earth.

The noble idea of honest fellowship, has never penetrated the waste of bone surrounding his head. He sees in every one a type similar to himself, his mind is filled with distrust of the people he comes in contact with. A person of this type is marked by his cynical statements concerning honor and honesty.

It is hard to believe that among the great number of really good fellows of Texas Tech a person of this type could be found. Can he be found? Yes, he may not be found out but among the student body is one or more of this very kind of person, the petty thief.

Dr. Eddy said, "A man is what he is in the dark." This low-minded petty thief is a thief in the dark and a liar in the light. He presents himself as a fellow of the institution and down in his heart he knows he is not and never can be a part of it. In his own mind he knows he is an outcast. If he sees or feels a part of the fellowship around him he knows he cannot become a part of it, for his kind has no part in good fellowship.

A petty thief, a person who steals some trivial something from some other person. It may be only a book or two that he steals, to him they are

just books, they represent a small sum of money if he can sell them, they represent more if they can be used. To the person to whom the books belonged they represent a sum of cash, they represent notes carefully written in the margins, notes that when reviewed may mean the passing of a course. The books to the owner represent an ideal carried through a term and carefully consulted as a guiding friend. He follows the carefully planned course from the selected books and hopes to add knowledge to his quest for education. He considers his books as selected friends, who will give up all their knowledge without a grumble.

The petty thief with very little conception of the real value of the books and with utter disregard for the owner's feeling or financial condition steals the books. He is that much ahead of the game; he has committed a low crime but what of it, no one will find out.

This person can be brought to justice through the efforts of the faculty only. A severe test or check-up on the possessors of books that are to be shown in class would show whether this person was the rightful owner or not. Any student who had a book and could not show good reason for his having it, should be called before the Dean. It was found that he had stolen the book he should be expelled from the school.

This is one way in which the petty thief could be stopped from operating in Texas Tech.

I thank you.  
Fish Mack.  
P. S. Some one took my Trig and Oxford Dictionary.

### Tech Faculty Women to Spend Summer Vacation Period in Study at Oxford University

Dean Mary Doak, and Misses Teague, Gill Harper and McGee, all instructors in the college, plan to attend the summer vacation course under the supervision of the American Association of University Women, which is open to graduates of an approved American College or University, of American College or University, or a teacher on the Staff of an American Public High School.

Miss Harper is to study the 19th century English novel, while Misses Teague, Gill, McGee and Mrs. Doak are to study the 19th century English history and literature. Among the famous lecturers offering work during the vacation course is Ernest De Selincourt, professor of English Language and Literature in the University of Birmingham.

The vacation course is not confined to classroom work entirely, but excursions to various places including Stratford on Avon; plays and pageants to be given by the Shakespearean society, etc., are to be numbered among the diversion for the attendants of the summer school.

The summer vacation course was made possible in order that American University women might have for a brief period all that is best in the life of an Oxford student. Such courses were conducted during 1926, and again in 1927.

Groups of students are to be formed for the discussion under a tutor of some of the principal themes of the course. Students will be lodged in the Woman's colleges where they will have opportunity of meeting some

of the Tudors, who will be in residence during the summer term. Every effort is to be made to provide as many glimpses into typically English life as possible.

The number of students will necessarily be limited and candidates are therefore urged to apply for places as soon as possible.

A limited number of places will be reserved until May 1st for students who plan to enter upon the work of teaching in the secondary schools in the autumn of 1928. In the case of these students there will be required from the Registrar of their college or University a statement to the effect that they have completed by July, 1928, the requirements for teaching in the Secondary schools of their own states, and that they expect to begin work in the fall.

The women from Tech are to sail from Houston, Texas on June 2nd, on the S. S. Derfflinger, a small German vessel, which is to stop one day at Havana, Cuba, and thence proceed to Spain where they will land for a short time. From Spain they will go to Pauognes, France where they will arrive on June 20. Two weeks will be spent sightseeing in Paris. From Paris they will go to Oxford for the vacation course which is to last from July 6 to 27. One month will be spent in touring England and then they plan to return on the S. S. Columbus which is a larger steamer than the Derfflinger, and will take only six days to make the return voyage home, landing in this country about September 1st.

### Fish Day Fetes To be Held at Silver Falls

By JACQUES HARDY,  
Chairman of Committee.

Freshman class day plans were discussed last Tuesday evening at a meeting held at the gym. It is the plan of the class to make their class day one of the biggest affairs that any freshman class of this institution has ever put over. All freshmen should be living with but one aim in mind; that aim is (fish day, Tuesday, May 8th). This is one day that without a doubt will go down in history of Tech as the most glorious day of human events at this institution.

Silver Falls is one of the most beautiful places in West Texas. No better place could have been suggested. It was very kind of Mr. Webb to consent to replace the dam so as to refill the lake with water. Just think of all the amusements that will be available. Fishing, swimming, skating, dancing and last but not least, is a beautiful and elaborate picnic lunch that has been planned. The Sophomores who were fish last year will turn green with envy to know that such a great fish day as they had last year has been over shadowed. Every fresh-

man should be proud to know that he or she is a member of the class of '31. A special train, the longest that has ever been run on the South Plains will carry the Gold Fish class of '31 out of Lubbock to Silver Falls, that glorious day of Tuesday, May 8th.

A financial committee composed of Jack Hardy, Chairman; Lucille Barr, Fay Foote, Leland Mast, William Walker and Rachel Cole, is working untiringly to collect fish day dues. Dues have been assessed at \$2.00 per gold fish. A round trip ticket will be available for \$1.00; \$1.00 for other expenses, thus bringing the total to \$2.00.

One last appeal, fish, and that is: Do not be a millstone about the neck. Pay your \$2.00 and let's show the upper classman that the fish class of '31 is the best fish class that has ever entered Texas Tech. Give the class of '32 something to shoot at.

Pay up, fish, let's go!

### Tech Students Interested in Mexico Univ.

Considerable interest is being manifested in the folder setting forth the advantages to be obtained by attending the National University of Mexico, this summer. This university is,

according to the folder, the oldest institution of its kind in America.

During his recent visit to Lubbock Senor Cabita Lara, promised his support to any student or group of students that might desire to attend the major university in his country this summer. The Mexican Consul said that he would do all in his power to facilitate the enrollment of Tech students in this institution. Senor Lara feels that meeting of American students and Mexican students on a common footing will do much to cement the friendly relations now existing between the two countries.

During the preceding summer members of the Tech faculty have attended the national university and they are enthusiastic in their praise of the courses offered for their benefit.

Several of the courses to be offered during the summer session are to be given in English, and so the bugaboo of a lack of knowledge of Spanish is dispensed with.

Information concerning the summer school to be conducted in Mexico City may be obtained by addressing:

Lic. Julio Jimenez Rueda,  
Director of the Summer School,  
National University of Mexico,  
Mexico, D. F.

The international postage rate necessary for letters to Mexico is 5c.

### Oratory Contest In Full Swing; Next Event on 30

The second event in the Oratorical contest, the seven minute declamation, will be held on April 30, according to the revised schedule announced by Miss Pendleton. The extemporaneous speaking contests were held last Friday.

Following the declamation contests on the 30th, the debate will be held on Wednesday, May 9th, then will come the Oration contest on Friday May 18th. The After Dinner speeches will be held at a date to be selected.

The general public is invited to hear all of these contests.

The winner of the Oratorical contest embracing all of the foregoing will be awarded the Oratorical scholarship carrying an award of \$250.

During the first year of Tech's existence, Eugene Jordon won the award and during the year just passed Erwin Coleman was selected as the winner of the scholarship.

### Prominent Men Invited To The Annual T. I. P. Meet

Ralph Turner, of Kansas City, Missouri, Southwestern manager of the United Press, has been extended an invitation through Delmer Ashworth, president of the T. I. P. A. to be the main speaker at the convention of the Texas Intercollegiate Press Association, April 27 and 28.

Olin E. Hinkle, editor of the Pampa Daily News, has accepted the invitation extended him to appear at the meeting. He will be on the program for the morning of the second day, and will probably take as his subject, "College Journalism as a preparation for Professional Newspaper Work."

Mr. Hinkle is well-qualified to talk at the meeting of the T. I. P. A., since he has participated in its contests while a college student. He is a graduate of W. T. S. T. C. and a former editor of The Prairie.

Gene Howe, editor of the Amarillo Daily News-Globe, who has been invited to attend the meeting at Canyon will probably be unable to attend. It is hoped T. E. Johnson, managing editor of the News will talk on some phase of his work in the newspaper profession.

Intensive work is now being done by officers of the T. I. P. A. in preparation for the convention. Arrangements are being made to entertain the delegates and carry off the convention program in good fashion.

### Buffs Lose to Matadors in Track Meet

SCORE OF 82 2-3 TO 48 1-3 SHOWS SUPERIORITY OF THE MATADORS.

Coach Vic Payne's Matadors took the dual track and field meet from the West Texas State Teachers College Buffaloes Saturday afternoon by a score of 82 2-3 points to 48 1-3 for the teachers.

Red Keith, the Herd's star sprinter, took three first places and one second to cop high point laurels of the meet. On the track the Buffaloes won first places in the 100, 220, 440, 880, Mile run and 220 low hurdles, while Tech grabbed first places in the high hurdles, 2 mile run, and the relay.

Tech easily out-distanced the Teachers in the field events, winning all three places in the Shot-put, Discus, and the Javelin throw.

Results and order of events:

100-yd. dash—Keith, Buffaloes, first; Dixon, Buffaloes, second; Smythe, Tech, third. Time 10 seconds.

Pole Vault—Walker and Hardy, Tech, tied for first; Sanders, Buffaloes, third. Height, 10 ft.

1 Mile Run—Doak, Buffaloes, first; Freeland, Tech, second; Webb, Tech, third. Time 5 min., 2.5 seconds.

High Jump—Tadlock, Tech, and Schlenker, Buffaloes, tied for first; and Pace and Payne Tech, tied for second place. Height, 5 feet, 11 inches.

220 yd. dash—Kieth, Buffaloes, first; Smythe, Tech, second; and Dallas, Tech, third. Time 22.7 seconds.

Discus Throw—Claunch, Tech, first; Edmonds, Tech, second; and Payne, Tech, third. Distance, 120 ft. 1 3/4 in.

120 High Hurdles—Tadlock, Tech, first; Payne Tech, second; and Christian, Tech, third. Time 16.7 sec.

Shot Put—Edmonds, Tech, first; Reed, Tech, second; and Starr, Tech, third. Distance 40 ft., 9 1/2 in.

440 yd. dash—Dieth, Buffaloes; Bagwell, Buffaloes, second, and Corley, Tech, third. Time 53.1 sec.

Javelin Throw—Taylor Tech, first; Fisher, Tech, second; and Edmonds, Tech, third. Distance 154 feet, 10 in.

Two Mile Run—Freeland, Tech, first; Penick, Buffaloes, second; and Rollins, Tech, third. Time 11 min., 17.3 seconds.

Broad Jump—Fisher, Tech, first; Dieth, Buffaloes, second; Woodriddle, Tech, third. Distance 21 ft., 7 in.

220 Low Hurdles—Dixon, Buffaloes, first; Fisher, Tech, second, and Woodriddle Tech, third. Time 25 sec.

880 yd. Run—Bagwell, Buffaloes, first; Neill, Tech, second; and Pearson, Buffaloes, third. Time, 2 min., 8.3 seconds.

One Mile Relay—Tech first, (Hardy, Woodriddle, Fisher, and Corley). Time 3 minutes, 34.1 seconds.

### Matador Nine Wins Last Game From Pirates

The Texas Tech Matadors came to the front and captured the last of a two game series with the Southwestern University Pirates at Georgetown last Thursday by a score of 13 to 8.

The Bullfighters had a much better day at bat and in the field behind the excellent pitching of Volney "Stech" Hill than the previous day. Orville "Buddie" Brothers led the attack with a double, a single, and a walk to make a perfect day at bat.

The team left Georgetown immediately after the game and arrived in Lubbock about 2 a. m., Saturday morning. They will engage the Canyon Buffaloes in a two game series on Friday and Saturday week.

### W. McKirahan is Ranking Player On Tennis Squad

MCDONALD IS SECOND; LAHN, THIRD. FUTURE GAME MAL SHIFT RANK.

The ranking of the varsity tennis squad has been determined by the round-robin tournament that has just been completed. Eight men took part in this tournament, thus each man played seven matches. The following shows the percentage of each player:

Player	Won	Lost	Per Cent
* W. McKirahan	7	0	1,000
* R. McDonald	5	2	.714
* Louis Lahn	4	2	.667
* Wm. Sevell	4	3	.571
* B. Nunnellee	3	4	.428
* Leland Mast	1	5	.167
* C. Hill	1	6	.142
* Quinn	1	6	.142

This shows the ranking four players to be, McKirahan, McDonald, Lahn and Sevell, but it does not necessarily mean that it will remain so throughout the season, because any man may challenge the man ahead of him as often as once a week if he desires. There are many excellent players who are not on the first four and so it will not be surprising to see a few changes before the season is over.

The squad has an excellent schedule of matches and a good chance to win the great majority of them. The next match will be on the home courts April 23. The netters from Simmons University will be here on that date. Last season Simmons won both matches from Tech, here and at Abilene, but the boys declare it will be a different story this year.

On April 27 and 28 the squad will go to Canyon to take part in the Great Plains meet. Tech holds the singles title of the Great Plains and will go up this year to cop both the singles and the doubles.

On May the 5 and 6, the boys will go to Fort Worth and Dallas respectively where they will engage in dual meets with S. M. U. and T. C. U.

Coach Knickerbocker believes that he has material for a very well balanced team, and says that the outlook for the season is very bright.

### Place of Social Sciences is Topic For Pi Gamma Mu

Mr. A. W. Evans in speaking before Pi Gamma Mu, Tech chapter of the national social science society, last Friday night said, "The 20th century bids fair to find its most distinctive contribution in the field of the social sciences".

Mr. Evans, head of the department of education, traced the development of the social sciences, paying particular attention to the fact of their speedy acceptance in the educational world. He said, further, "Philosophy is not only the beginning, but may also be said to be an end of scientific thought".

Mr. W. P. Clement, of the educational department, brought the attention of the society to the subject of how the social sciences in Tech may have a fuller recognition than now obtains. He advocated several general policies, among them being the publication of a magazine devoted to creative thought in the social science field.

Pi Gamma Mu is working on a plan whereby the social sciences of the school will secure the recognition which social science leaders feel their subjects merit.

### Houstonian Cats Drop First Track Meet of Season to Matadors

The results of the Tech and Sam Houston Teachers College dual track and field meet held on the Tech field Monday, April 9th.

Event	Won By	College	Time	Distance
100-yd-dash	Smythe (first) Coe (second)	Tech Sam Houston	16.1 sec.	
220-yd-dash	Coe (first) Smythe (second)	Sam Houston Tech	22.4 sec.	
440-yd-dash	Barris (first) Corley (second)	Sam Houston Tech	53.4 sec.	
220-lw-hurdles	Fisher (first) Christian	Tech Tech	29.9 sec.	
Javelin				
Broad Jump	Fisher (first) Murray (second)	Tech Tech		21 ft.
2 mi. run	Hastings (first) Denton (second)	Sam Houston Sam Houston	10 min. 57 sec.	
Shot Put	Edmonds (first) Reed (second)	Tech Tech		41 ft., 7 in.
Pole Vault	Walker (first) Drake (second)	Tech Sam Houston		10 ft., 9 in.
Discus	Edmonds (first) Payne (second)	Tech Tech		121 ft., 11 in.
880-yd.-run	Hastings (first) Neill (second)	Sam Houston Tech	2 min., 9 sec.	
High Jump	Pace-Tadlock (first) and Drake (first)	Tech Sam Houston		5 ft., 9 in.
1 mi. run	Freeland (first) Denton (second)	Tech Sam Houston	4 min., 48.8 sec.	
Mile Relay		Sam Houston	3 min., 33.6 sec.	

### Tech Scholarship Group Hears Man From Simmons U.

SUBJECT: "THE IMPORTANCE OF SCHOLARSHIP IN OUR NATION CONSIDERED"

The Tech Chapter of the Scholarship Societies of the South met at the college cafeteria Thursday evening, April 12, for the first annual banquet in the history of the local organization.

Dr. O. H. Cooper, head of the department of Education at Simmons was the distinguished guest and speaker of the evening. Dr. Cooper's subject was "The Importance of Scholarship in our Nation".

Dr. Cooper first outlined and discussed the essentials necessary to scholarship, placing special emphasis on health and persistence. According to his address, a scholar many times finds it necessary to say "No". The speaker then compared this organization to the historical Phi Beta Kappa, national honorary scholarship fraternity. He further traced the history of that organization and gave the high percentage of successful men of America whose names appear in the "Who's Who" and various halls of fame, that have worn Phi Beta Keys.

Dr. Granbery, one of the founders of the society and its first president, traced the origins and history of the Scholarship Societies of the South.

Dr. Horn gave a short enthusiastic address, relating some of the accomplishments of the members of this society, and declare as did Woodrow Wilson about scholarship, "Scholarship is the main show of the college circus and other features are merely sideshows."

In a short business session, H. B. Carr, president of the Tech chapter, expressed appreciation to Dr. Horn and others for the interest they had shown in promoting this organization. Following this membership was ex-

tended to Miss Ruth Horn.

A vocal solo was given by Edgar Shelton, with Miss Margaret Halsell playing a violin solo. Miss Mary Hope Westbrook played the accompaniment.

Some fifty odd members and guests were in attendance. Members of the society are:

- Old Members**

### Scribe Points Out Weather Conditions Under Which Matadors Labor in Spring are Handicap in Determining Team Strength

Possibly no one outside of the Plains and many people who live here never realize under what handicaps the athletic teams of Tech and Canyon labor. In football and basket ball there is no complaint to be made because the weather conditions do not play such an important part in the training of a team. But in the spring the severe weather cuts down the training period and retards what time an athlete can make to an alarming extent.

The Panhandle and Plains weather more closely resembles that of the weather experienced by the Mississippi Valley Conference teams than it does the Southwestern and Texas Conference climate. The Matadors have just returned from a road trip through Central and South Texas, clashing with teams that were far better trained. In Waco and Georgetown where the baseball team played summerlike in comparison to the windy Plains of West Texas, weather and climate that permits an athlete to train the year round if he wishes.

A fair example might be given in the recent track meet with Sam Houston Teachers of Huntsville held here last week. The Bearkats were well trained and in good condition as a spectator might easily observe. Yet look at the two weeks previous to the meet and see what kind of weather conditions the Matadors had to train in. Stanstorms filled about two-thirds of the time. The rest was filled with

cold north winds accompanied by a slow chilling drizzle of rain, and the two days previous to Monday, (the day the meet was held) saw snow covering the ground. In fact the snow melted only about four or five hours before the meet started.

Yet despite this the Matadors won by a large score. It takes no large stretch of the imagination to see what the result would have been had training conditions been equal for the two teams.

This is written in no spirit of apology for the showing the Matadors might make on foreign fields. On the other hand we have a just reason to be proud of any showing they might make at all. It only shows and proves that such competition under such widely separated training conditions can not give the true index to the strength of a team in this portion of the state when playing a team that has enjoyed unlimited training. Such competition is not fair to say the least.
