Developing A Morale

BY COACH FREELAND

A good deal of criticism has been made against our athletes for a lack of training. Some of this has been just and some unjust, but nevertheless the fact remains that there has been some looseness in this respect. We feel especially proud of our athletic accomplishments, and all hope to see the day when our teams will be real competition for the best in the country. Traditions, however, are necessary and a morale and team spirit which will put school and student body above everything else. The day must come when a candidate for a team would count it a privilege to do anything which would cause him to do less than his best for the team. This could be easily carried out if each member of the squad would appoint himself a committee to help carry out training rules. Just a word from a teammate would possibly straighten up a fellow who was inclined to be a little weak. Furthermore just a word from you, a student of Texas Tech, spoken in a kindly way and showing that you have the best interest of the school at heart might get the same results. I do not believe in snitching, but I would like to see it a tradition in Texas Tech for each member of the student body to feel that it is his or her business to speak to a team member, always in the right spirit, if they see such a man breaking training, or doing anything which would render him unfit for giving his best. This tradition would soon show wonderful results and there would be no more breaking training and being ineligible because of a failure in school work. Let's make this a tradition at Texas Tech.

THE FOURTH YEAR

This edition of "The Toreador" goes out to all the old students of Tech and to a large number of prospective new students. To the old students this edition will revive old memories and tell something of what we hope to accomplish another year. To the prospective student it presents some of the advantages Tech offers him and something of the atmosphere he may expect to find as a Tech student. To the old student it extends greetings, and to the new student, welcome.

Next year will be to all students—old and new—pretty much what we may choose to make it. Certainly there will be new problems to meet, new fields to conquer. The old student will find a campus familiar but changed. The new engineering building will be ready to occupy in the fall term, thereby relieving the crowded condition of last year. It is also expected that the chemistry building will be ready for use about the opening of the second term in January. In addition there will be a larger number of courses to choose from, and a large increase in the number of the student body is expected.

So again, we extend greetings and welcome, and hope that you will be one of the two thousand or more Tech students who will be on the campus next fall.

STUDENT CONSCIOUSNESS

At the last general assembly of Tech students in the Spring they voted to make the purchase of the Student Activity Ticket compulsory.

The method of coercion which they decided to use was to develop a student consciousness which would morally obligate every student to buy such a ticket.

This method is highly commendable. An individual can be driven to do almost anything by public approval or disapproval.

May the Tech students develop—among themselves—such a moral consciousness in student activities. The result would be pleasing to everyone.

New Staff Plans Big Toreador; Publication May Be Semi-Weekly

With this, the first number of Volume Four of The Toreador, the new editor, Otis Koen, and the new business manager, Jack Camp, begin the publication of a Toreador which they plan to make bigger and better. The paper is to have a larger working staff than former years. It will probably contain four more columns than the paper of 1927-28. It may become a semi-weekly by the beginning of 1929.

A. H. Dept. Plans For Sheep Plant

The Animal Husbandry Department of the College is fencing the site of the future sheep plant and it is hoped to have it completely fenced by the opening of the fall term. A three inch main is being run to the plant to supply water to the sheep and hogs. The college herds will be moved to the sheep plant as soon as it is completed, saving more room in the poultry plant, where the hogs are now quartered, for extension of poultry work.

Toots Harsten (that pretty girl from big Dallas) can't stay away from a good place. The truth is I don't think it will be long before she will be living with us permanently, eh, what Price?

Jack Hardy, the ladies man from Dallas was seen safely on board the blinds of a passenger train headed for Dallas the other night. But he will be back to take his place with the Matadors next year.

Mr. E. W. Camp after conducting the annual Cotton School for the first six weeks of summer school is studying textile mills in North Carolina.

Jerry Smith is playing around waiting for a new boy to come to town, still the popular girl at all the dances.

Misses Katherine Harper, Lucille Gill, Flora McGee, Gussie Teague, and Mrs. Mary W. Doak are in Oxford, England, this summer.

J. Welborn McKay leaves about August 10 for Berkeley, California, where he will study for the next year.

Irwin Coleman and Mary Hope Westbrook are holding down the Registrar's Office in the absence of Mr. Dohoney.

"Mule" Fikes has returned from Houston where he served as a page during the Democratic Convention.

Hal Lary is working in some kind of an office in his home town, Clovis, New Mexico.

Miss Eunice Cox is in Columbia University now. She taught in the first term of the summer school.

Pearl Harrison, secretary to the president, is spending August in Rensselaer, New Mexico.

Mr. C. E. Qualla and family have sailed for France where they expect to stay for the next year.

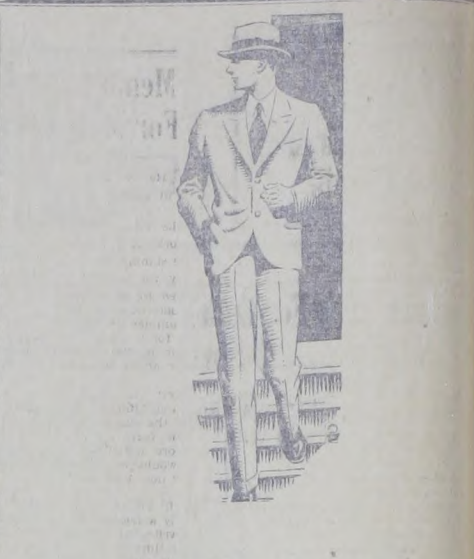

Clyde Brown has accepted a position with the Jayton Public Schools, for next year.

Ethridge Eagan and Guy Carter still reign supreme in the library. It is reported that Bill Sewell is working in a bank in Slaton.

Carroll Clement is in school now for the second term of the summer quarter. He "laid out" during the first term in order to take a trip to California.

Pep Squad To Have 50 Members; 75 Have Applied For Membership

Seventy-five or more applications have been received by Anna Belle Collins, director of the Tech Girls Pep Squad, for membership into that organization for the coming school year. These girls made their applications to try-out the first week of school. Only fifty members will be taken in.

Arenaritas Name of Pep Squad
At a meeting of the pep squad at the close of the last long session, "Arenaritas" was chosen as the name of the organization heretofore known as the Tech Girls Pep Squad.

Miss Collins will be assisted this year in directing the girls by Miss D'Aun Sammons who pledged last year. Two yell leaders will be elected as soon as the new members are initiated to lead the yells for the pep squad during the games; they will also have charge of leading the songs at pep practices.

The same uniforms will be used this year with the exception of the hats. Black felt hats, typically Spanish style, have been ordered to make the costumes complete.

At least three long trips will be made by the girls during the year. If possible they will go to Austin to see State defeated in the second game for the Matadors. It is definite that the "Arenaritas" will help defeat the T. C. U. Horned Frogs at Fort Worth. Trips to Brownwood, Abilene and Canyon have also been planned. They will be present at every game on the home field with new and original stunts as heretofore.

Practically all of the old members of the squad will be back in the fall. The first week will be devoted to trying out those who wish to become members of the squad. The second week will be devoted to hand training in order to be ready for the second game on the home field.

Anyone wishing to make application into the squad should write at once to Anna Belle Collins, Texas Tech, Lubbock, Texas.

home. He will be back at Tech this fall, "uv corse."

Willis Gray (Yoakum) finished his work for a degree the first half of the summer term and left immediately for that well known place referred to above. Willis has spent so much time on the golf course this summer that he was often mistaken for a caddy. Willis will be a student in the Jefferson Medical College at Philadelphia next fall.

James L. Herman, commonly known as "Junior" has turned farmer for the summer. It's a hard life for the farm. Latest news from Stamford didn't say whether Herman would be back at Tech next fall or not. Probably will.

Virgil Young of Plainview, and recently a freshman of this institution, writes that he is having quite a nice time on the parental farm. Virgil is mixing it with the wheat chaff.

Thomas B. Goode (he's not good) of Cooper, Texas, tired of his vacation in about two weeks or less. He says he wishes he was in summer school. The folks put Thomas to work, and so of course he will be back in school next fall.

T. W. Harber, non-com. colonel of the Tech Guards, has been spending part of his time at school this summer, part at Palacios with the National Guard, and part with some female—we didn't get the name. By the by, Harber is from Munday. What? You never heard of the place?

Emmett (Moco) Grantland, the boy orator from Colorado, is spending his vacation as a clerk in his

Studes Visit Wichita Falls Cheese Plant

In order to give students in his cheese making class an idea of how cheese is made at a commercial plant, Professor Renner of the Department of Dairy Manufacturers of the College took his class to Wichita Falls during the first term of summer school and visited the Kraft Cheese Company plant, there.

father's bank at said town of Colorado.

Faye Foote is over in Sudan writing essays that win prizes.

C. J. Atchison and Flora Green are contemplating wedding right soon.

Edna Yonge is sleeping her life away in Post this summer.

Alma Spikes and Jess Lockhart are "still waiting for ships that never come in."

Jack Lyle is reported to be attending the University of Texas. So is Jimmy Allen.

Dr. Allan L. Carter is spending two months abroad.

Dr. W. T. Read is teaching in Northwestern University, Evanston, Illinois.

Claude Denham, class of '27, is doing graduate work in summer school.

Iva Burleson at home in Sipe Springs expects to return in September.

President Jack Maddox is a familiar figure on the campus.

Hooks and Slides

THE FRENCHIES ARE AT IT

Domestic troubles, cable reports indicate, have begun to destroy the harmony that had made models of the four little French fellows who fought together for years and years until they had won the Davis Cup.

The harmonious relations existing between the French players and the executives of the French tennis federation were considered almost heavenly by the American officials during the period when their troops had to be ready for instant call to put down an insurrection by Bill Tilden or Vinnie Richards or Frank Hunter.

But now the French seem to be at it in the same fashion. The officials of the French federation an-

nounced that Jacques Brugnon, one of the famous four, would be dropped from the team this year. And Jean Borotra, one of the more distinguished of the big four, came back with the announcement that if his pal got the air he would take it himself.

TALKING FOR HIMSELF

While posing as the loyal defender of a pal, ready to sacrifice himself for a friend, Borotra obviously is talking for himself. Brugnon was only the helper of the team in doubles. He seldom played singles, but with Borotra he contributed his strokes to a fine doubles pair.

Borotra in the earlier years was an ace in the singles until Cochet developed and then Borotra became the racket carry in the doubles with Brugnon, while Cochet and Lacoste did the star roles in the singles.

So, if Brugnon goes, Borotra probably would be out of a job, and

the French officials, if they want to act hard like the American officials tried to be, may allow Borotra to air himself.

NO TILDEN SPOT FOR HIM

Borotra isn't in a spot to carry a fight against authority as Tilden did in this country. Tilden probably wasn't as big as the game, but he proved himself bigger than the tennis association. Lacoste might do the same thing to the French swivel chair nobles, but Borotra can't.

Even up to a very recent moment Tilden was, and is, having his fun asserting himself against the wishes of the executives who win their Davis Cup rugs on office carpets.

The association insisted that Frank Hunter be left off the team which is to play the Italians in the final round of the eliminations and probably will meet France in the challenge round.

But it has been observed in the cable dispatches that Captain Til-

den has named his buddy, Frankie Hunter, right up there next to himself as one of the four playing members of his expeditionary force.

back this fall to get his sheepskin. Hooray!

Johnny Martin has isolated himself at Crosbyton for the summer. Just what he is doing there, nobody knows, but he will be in Tech this fall.

Alfred (Abie) Bingham is losing his schoolish complexion on a New Mexico farm; among tractor dust, chaff, cylinder oil, sandbars, mosquitoes, horse flies and rattlesnakes.

Martha Pfaff will be in C. I. A. next year.

Ray Waller, 1927 Tech baseball hurler, is playing baseball for the City of Sulphur Springs.

Sylvia Wilson is still in Mrs. Doak's office.

James Atchison is an architect in San Antonio.

Campbell Loughmiller was last heard of at Rome, Italy.

Clona Swinney is at Rule. She has just returned from a vacation in New Mexico and Colorado.

Jack Hardy is in the Southern Pacific Railway Shops at Houston.

Roy McCullough, Y. M. C. A. secretary, is in Estes Park, Colorado.

Cecil Horn is "Somewhere in New Mexico."

Coach Freeland is on a vacation. He declined to say where he was going, saying he would tell Hervey which highway he took.

Dale Wallace, Registrar Dohoney, and Grady Moore are in Columbia University. Grady writes that New York is a real city.

"Dead Eye" Underwood of Willow, Oklahoma has been spending a very pleasant vacation by running a combine and turning dirt toward his father's cotton plants. A rumor has been circulated in Lubbock that "Dead Eye" has revived one of his old love affairs since his return.

"where savings are greatest"

Broadway At Texas Avenue

A Little Word That Built Up A Big Business

There is one word that is more important in our business than any other. It is the word "save."

Twenty-six years ago we realized that if we could SAVE enough money for our customers, the SELLING would take care of itself. That policy has built up our business.

We buy goods in carload lots and by the thousands of dozens. Every added store has helped us cut overhead expenses to the bone.

Save! Save! Save! It is the watchword of our business. We have made money by doing it, we admit, but so have our customers. Elimination of waste always tends to produce prosperity for everyone concerned.

Eighty-Four Texas Counties Represented In Extension School

The territorial distribution of the enrollment in the Extension school while following the rule of concentration within a radius of one hundred miles of the College is widely representative. In keeping with the widening constituency of the College, eighty-four counties in Texas were represented; the largest numbers being: Cochran, 10; Crosby 3; Dawson, 19; Dickens, 9; Gray, 5; Hale, 20; Hall, 5; Hookley, 12; Nolan, 16; Lubbock, 137; Lynn, 13; Nolan, 8; Parmer, 5; Potter, 2; Serman, 6; Terry, 51; and Wilbarger, 6.

On July 1 the Department of Extension was one year old. It began as an experiment. The enrollment during the first year shows that it has provided a service that is appreciated by the public.

The Department has enrolled 239 individual students in 483 subjects. Of the 483 subjects, 438 were taken by correspondence and 45 by extension class work.

Fifteen departments gave extension courses under the direction of twenty-three instructors. The heaviest enrollments were in Education, English, History, Spanish, Government, Economics, Mathematics, French, Home Economics and Agriculture.

A study of the enrollment by months shows that the demand waxed and waned with the opening and closing of the respective terms of the College. The largest enrollments were in September 50, January 84, March 41, June 102.

An analysis of the work of the Department of Extension shows that seven classes of students were served, as follows:

1. High School students who were deficient in college entrance requirements.
2. Students who could not come to College on account of lack of funds.
3. Students who had to leave college on account of the exhaustion of funds.
4. Students in college who needed some subject not available in the regular program of studies.
5. Ambitious students of the college who desired to carry on study while at home during the vacation periods.
6. Teachers in service who desired to improve their scholarship and effectiveness as teachers.
7. Individuals who coveted culture and took work not for credit, but for general improvement.

The co-operation of the President, the Deans, the Business Manager, the heads of departments, and the instructors made it possible for the Director of Extension J. F. McDonald to carry on the growing work of the Department.

Students who need to complete some subject before the opening of the Fall term will have time to do so, thirty days being the minimum time for the completion of a subject. Those interested should write J. F. McDonald, Director of Extension, for application blank and further information.

iversity of Wyoming this summer. He will be back in Tech this fall.

W. A. King, student of '25 and '26, who has been operating a farm at Floydada for the past year, will be in school again this fall.

Professor R. G. Mowery of the Animal Husbandry Department is attending Iowa State College at Ames, where he is taking special courses in poultry.

C. H. Mahoney, Professor of Horticulture, is doing graduate work at Michigan State Agricultural College at Lansing, Mich.

Professor H. J. Ewer of the Astronomy Department is working this summer with the S. E. Cone Grain Company at Lubbock.

Dr. G. Harbaugh is doing small animal practice for the Animal Rescuer League at Boston, Mass. He will be back for duty at Tech this fall.

Professors Stangel and Renner, departments of animal husbandry and dairy products manufacturing, respectively, and Dean Leidigh have constituted the active faculty of the School of Agriculture this summer.

Robert Barnett, student of '25 and '26 will be in college here this fall and expects to bring a freshman or two with him.

R. C. Middleton is a student in Tech this summer and had been taking an ice cream course to keep cool. Raleigh says its the hottest ice cream he has ever had.

Albert Isaacs is an assistant in a hamburger joint this summer, but intends to change his environment by coming to Tech next fall. Some boys just go from worse to worse.

"Happy" Dalton is in summer school, and one of his major studies seems to be human nature. If you are one of these people that don't consider females human (lately they're out), why have it your own way. Name it yourself.

Raymond Dean former Ag student at Tech, has been visiting in Lubbock. Raymond has for the past year been a student at the Oklahoma A. & M. College, Stillwater.

Bernis Carmichael is in summer school for the last half. Incidentally, this cowboy has "forsaken" his horse for a new Ford car and handles it fairly well for an amateur.

John Burroughs is in summer school for the last half of the term. John stayed around the college with the girls so much the first half of the quarter that someone got the idea he was a student and started him to meeting classes.

Enrollment Increase In Agriculture Is Expected By Dean

BY A. H. LEIDIGH

In keeping with the crop prospects of Northwest Texas the School of Agriculture is expecting an increased enrollment this fall. Inquiries received reflect also the fact that the performance of the stock judging teams in defeating Texas A. & M. two years in succession has served to confirm the assertion that the work at Tech in Agriculture is the equal of that given anywhere.

The prospect of good crops is affecting the farmers' prosperity directly, but perhaps equally important is the fact that the farmers' dollar in 1928 will go further and purchase more than it has at any time in the last several years. This condition and the result of a more favorable situation for the farmer is present time in livestock farming, which has "come back" with vengeance just as the people here at Tech College have been saying it would. In consequence of the increased farm prosperity there is a strengthening of the determination of a farm boy who goes to college to stay with Agriculture in his college work.

Texas Tech graduated eleven men in Agriculture in 1928. Every one of these men is at work.

Two changes are being made in the Agricultural staff this year. The new men will be Dr. J. O. Ellisworth, who takes the place of Professor Howell as head of the department of Agricultural Economics and Farm Management, and Mr. C. E. Russell, who will be in the Department of Horticulture. Besides strengthening the staff the School of Agriculture is materially strengthened in equipment, space and facilities as compared to former years. In fact, everything is very favorable and the indications are that we will be able to handle the expected increased enrollment in a very satisfactory way.

Virgil Hobby, graduate of 1928, will leave for El Paso the latter part of August or the first of September where he will serve as Associate Editor of the Southwestern Stockman-Farmer. Hobby has been on the Stockman-Farmer staff for the last two or three years as a part-time writer. He did not accept a full-time position however, until he secured his B. A.

The Toreador will miss Hobby very much Ever since the establishment of Tech he has been one of the hardest workers on The Toreador staff. The paper takes this means of expressing a little appreciation for his service.

Miss Adeline Canova, reference librarian, will leave September the fifteenth for Urbana, Illinois where she will do graduate work in the library school of the University of Illinois. She will return to Tech after a one-year leave of absence.

Bailey Carroll spent part of his summer in Austin getting material for his much heralded thesis. He is at present putting the finishing touches on the said thesis.

Jane Mast is spending a quiet vacation keeping house for her family and longing for the time when she can join her old side kick D'Aun in the mountains.

Cornelia Ratliff and Melba Crawford are living for the time being in Lubbock looking for a job and planning for a big year.

Dillard Starr from Vernon is back in Lubbock looking for a job and planning for a big year.

We must not forget the publicity of Tech at the Democratic convention. Of course Prof Jackson was there telling them how it should be done, but not in company with him were Little and Big Atchison who went down to let them know about the engineers of Tech. Dressed in the afresaid uniforms there were accused of almost everything. We had never heard of Alton Hutson and Dubb Benson and Scotty Turner being newspaper reporters until they appeared in the newspaper box which they occupied during the entire convention, but you have heard what these lawyers won't do.

Ogden Horne is in San Angelo selling advertising for a living.

Johnnie Forkner is still in Amarillo peddling the same brand.

Harry Montgomery is in Amarillo acting as nurse maid and on the side, writing for the Amarillo Daily News.

Ruth Officer is at her home in Turkey waiting for the time for Tech to open.

Lucile Davis has been seen in Lubbock this summer. Although State proves to be quite fascinating, there is no place like Tech according to Lucile.

Shug Lemons was about the last one to leave town but of course we all know why. He is working in Amarillo this summer.

Windy Nicholas is shoveling the gravel at Tascosa this summer. According to reports he will soon be included in that list of happy tho' married's. Wandy will coach for Tascosa High next year.

Sherty Hayhurst that popular boy that gets his name in the papers all the time, is on the home stretch now. He will coach at Brownfield next year.

Andy Hemphill, besides going to Rearing Springs about every week end is planning to teach them a few things in Spur next year.

Truett Smyth, former President of the pre-law club, is in the second primary run-off for nomination as the Democratic candidate of Lynn county for clerk. Three candidates were in the first primary. Truett finished up within 273 votes of the leader. During the contest he made twenty-eight speeches. The second primary will be held August 25. If Truett is not elected he will be back next year. Let's hope he's defeated.

Guy Carter will be in the Law School of the University of Chicago next year. Carter was to be Manager of La Ventana for 1928-29 but Chicago offered him a scholarship which he could not refuse. So we lose him.

Ned Camp reports a splendid time on the geology field trip. He will leave for Emory University, Atlanta, Georgia, about the middle of September where he will take up the study of medicine.

Warren Huff, commonly known as Spivis or Schlatze, is in school for the second term of summer school. Spivis had been cut since the end of the last winter term. He is still towering above everybody else.

Horace Moss, Sophomore from Valley View, has been chauffeuring and electioneering this summer for Marvin Jones, candidate for Congress.

Cecile Dawson is giving the boys in Amarillo a treat this summer.

Heads Pep Squad

ANNA BELLE COLLINS

Miss Collins has been an active leader in student activities for the past three years. She is leader of the Girl's Pep Squad for next year. The squad is to consist of fifty members. Miss Collins already has seventy-five applications for membership. She will entertain others however for every applicant will be given a chance for a try-out the first week of school, this fall.

Otherwise

Following John Bagwell we find him in Boulder, Colorado. He writes back that he has found happiness and the woman with the money.

Dale Wallace, Horace Grady Moore, E. L. Dohoney, Miss Ruth Pirtle, and W. R. Wagborne are attending Columbia University this summer. A Texas club has been organized on the campus of which Grady Moore is reporter, Mr. Wagborne director of music and Miss Pirtle is directing a play which they are putting on up there. Think Tech popularity doesn't travel.

R. Guy Carter has received a scholarship to Chicago University where he will go to study law this fall.

Word was received from Old Ox Keys the other day. He is in that old home town of Hollis, Oklahoma, taking care of the dead.

Melvyn Hunter and Clarence Rello are spending the summer with Prof. Murdoch studying engineering in the University of Michigan.

Since there is no more attraction in Lubbock, D'Aun Sammons is spending the summer in her cabin home in the mountains of New Mexico.

Jane Mast is spending a quiet vacation

AG NOTES

H. L. Hershey is a summer assistant in vocational agriculture at Hereford, Texas. He expects to be in school next fall and says he will bring back a flock of freshmen.

Jim Hall of Nocona writes in that he expects to be back in school this fall with two fish.

Claude Hope is at present an assistant in the United States Field Station at Sacatome, Arizona. He has been working on cotton breeding and cotton root rot. He will be back as usual.

Guy Blanton has been at Panhandle harvesting wheat this summer but showed up in Lubbock during the rainy spell in July for a visit. Lady's name unknown.

Curtis Grimes is pushing a "two-row" at Acuff. He expects to be in school next fall and is bringing a younger brother with him.

The erstwhile professor, Davis Pounds, attended summer school and will be back for a prolonged spell of learning next fall.

Frank Main, sheepman, student, and gentleman? ? has been tending special work in wool at the Uni-

Report From Registrar's Office Full Of Facts And Optimism

Editor's Note: The following article was written by a member of the Registrar's staff and is "first-hand" information.

As indisputable evidence of the fact that Texas Technological College is rendering the people of Texas, and especially West Texas, a summer quarter is finding its place among the best and largest summer schools in the country. It is interesting to note that in the 25 summer school, that of 1927, five hundred thirty-six students are enrolled. The following summer there were six hundred seventy-seven students taking advantage of the salubrious climate to be found in Lubbock during the summer months. This was an increase of one hundred forty-one students, more than double the first summer session. For the third summer session we find another enormous increase in enrollment, one hundred sixty-one students on all parts of the state and other states have come to enjoy a profitable vacation in study within the walls of this new institution. It is noted that this figures show an increase of six hundred twenty-five students over the first year's enrollment and an increase of two hundred eighty-four over the second summer school.

Out of the summer school enrollment for this year we find five hundred thirty-one students who were not enrolled in the College before this year, which boosts our total enrollment for the year to the high mark of two thousand, two hundred and thirteen.

A great feature of the third annual summer session is the widely diversified interests of the students. Texas Technological College is serving many teachers in this and other sections of the state through the Department of Education, and especially during the summer quarter when specialists along the teaching lines are employed. During the present summer session six hundred forty-eight students have been enrolled in the Department of Education, taking teacher training courses and courses in Education. It only have students come for the purpose of teacher training, but any have come to take regular college work and expedite the completion of their college courses. Ninety-four students have been enrolled in a School of Home Economics, forty-nine in the School of Agriculture, and sixty-two in the School of Engineering.

The graduate work offered at Tech is attracting many teachers and others who have already received their degrees. During the present summer school fifty graduate students have been enrolled to be doing work on higher degrees.

Many other students have been enrolled in the School of Liberal Arts doing their work. This statement indeed gives the need of a summer school at the Texas Technological College, and is very gratifying to the authorities here.

Even at this early date many students who expect to be with us this fall are writing for catalogues, information concerning particular courses, and sending in their applications. Everything is ready to begin school in September. In fact, everything, including a wonderful crop outlook, is pointing toward a bumper year of Tech.

Anyone who must take entrance examinations should write Mr. C. D. Eaves or Mr. Harry Hill. The following is the schedule of entrance examinations:

Schedule of Entrance Examinations
Fall Term, 1928-29

Monday, September 17, Forenoon: 8-10, English 1 and 2; biology, 10-12; Economics, botany, American history, 1-3; Algebra 1, Eng. History, Old Testament, 3-5; Algebra 2, Sociology, New Testament.

Tuesday, September 18, Forenoon: 8-10, English 3; Typewriting, Manual Training; 10-12, English 4, Stenography, German.

Afternoon: 1-3, Zoology, Coniography, Drawing, 3-5, Physiology, Com. Law.

Wednesday, September 19, Forenoon: 8-10, Plane Geometry, Solid Geometry, Trigonometry, 10-12, Ancient History, Modern History, Latin, 1-3, French, Spanish, Pato, Speaking, 3-5, Domestic Art, Domestic Science, Agriculture.

Thursday, September 20, Forenoon: 8-10, Advanced Arith, General Science, 10-12, Physics, Chemistry, Physiography.

Afternoon: 1-3, Civics, Bookkeeping.

The requirements of the State Department of Education hold concerning the submitting of notebooks, Notebooks are required for the following subjects: Biology, Botany, Zoology, Physiology, Chemistry, Physics, General Science and Physiography.

Matador Leader

RANSOM WALKER

Walker is without a doubt one of the most brilliant, college football mentors in the Southwest. He will lead the Scarlet and Black next year. Following him will be Vaughn Corley, Bill McWilliams, Jack Durham, Jack Camp, Clifford Brawley, Bruce Reed, Howard DeWitt, Eugene Smith, Prentiss Viles, James Telson, Hurley Carpenter, Waymond, Westerfelt, E. V. Vermillion, Sidney Knowles, Andrew Castleberry, Clayton Barfoot, Jess Lockhart, Dennis Vinzant, Charles Woolbridge, R. C. Pickett, J. H. Tadlock, Glenn Coppage, Levi Walker, Ellison Archibald, Orville Brothers, Frank Emison, Jackie Alexander, James Dallas, Volney Hill, Clarence Hodges, B. R. Taylor, Julius Bergfeldt, Milton Moore, Floyd Wool-

bridge, J. H. Laster, Paul Marr, J. D. Waller, Douglas Smythe and the rest of Tech.

Private Plots

Dutch Waggoner is suffering from a bit of, oh! well, it looked for a while like he was going to get whipped out, but Dutch is a pretty good fighter you know.

Helen Womack is still receiving pretty steady company from Littlefield. Wouldn't be surprised if Spur didn't have two coaches next year instead of one.

Who do you think gave the boys a treat the other day? None other than Estelle Butto. She is going to O. U. next year.

Mary Frank Nichols has returned to her home in Georgetown after getting her B. A. and telling Buck goodbye.

By the way, Mary Frank had some goodlooking friends from Georgetown attending summer school out here. Emily Jervis Enoch, Trudie Foster and Gladys Wales were the Shebas of the campus.

Mac McGee, the farmer boy, is giving Sybil Glenn the rush this summer.

The other day we were riding down Main street and who did we pass? No other than Jerome and Mary. Oh, dear, but they weren't missed so much this summer since Willie Pearl Dockey and Foster Davis got up quite a case.

That's not all Etheridge Egan and Marjorie Mitchell are still here.

You have heard of permanent waves but have you ever heard of permanent smiles? Well, C. W. Ratliff is one permanent smile since

this little pink headed girl (Margie Foster) from Muenster is going to summer school.

Another similar case is that of Carid Caldwell. And let me tell you that girl of his is plenty cute. There are plenty of boys around the institutions that wish Carl would break a leg or something.

After applying his knowledge of agriculture on Mr. Warlick's farm for the first six weeks, John Burroughs is back in the school rushing the school teachers.

But guess who is giving the girls a treat this summer. No other than Rip Vinzant. On the side he is getting ready to whip State next year.

If they give him enough time Ox Reed will soon complete the New Chemistry building on the campus. By the looks of his coats of tan he is certainly keeping in training.

Kathleen Ingham, former postmistress of the College post office and graduate in 1927, is doing graduate work in Government in the University of Chicago this summer. She will teach in Welling High school next year.

Shorty Hayhurst created quite a scene the other day by suddenly "disappearing." Local newspapers feared he was victim of "foul play." A sketch of Shorty's past and his intended plans for the future followed. It developed, however, that our "hero" had caught a ride to Chillicothe where he was visiting "relatives" and was detained by heavy rains.

Miss Ruth Pirtle will return to Lubbock about September 1, from New York where she has been for the past year.

Miss Anna Jo Pendleton says she spent a restful six weeks in Vernon before returning to teach in the second term of summer school.

John Daugherty and Clark Burnett are in Dumas this summer but make frequent trips back to Lubbock.

John R. Powell is abstracting in Lubbock this summer.

Future Of Alumni To Be Very Active Barnett Declares

Second Year of Organization To Be Filled With Work For School; Magazine to be Published

With more than 125 graduates eligible for membership, the second year of the history of the alumni association of Texas Technological college promises to be an active one, according to E. M. Barnett, president of the group. In a statement here this week, Barnett, a teacher in the Lubbock high school, stated that efforts would be made this year to bring the work of the association in closer contact with activities on the campus.

Barnett was elected president of the association in a final banquet held for the class of '28 in the Lubbock Hotel on the night of May 28.

Magazine To Be Published
Featuring the work of the association this year will be the publication of a magazine which will contain information regarding the workings of the association and personal mention concerning its members. The first issue of the magazine will be published in November and all graduates who desire to receive copies of it may do so by sending a check for \$5 to Miss Mary Hope Westbrook in care of the Registrar. Four issues will be published during the year. C. W. Ratliff, graduate in '27 is to be editor during the first year.

Other work will be attempted by the association during the year, correspondence with each member to be maintained throughout as much of the year as possible.

Homecoming Planned
A homecoming is planned for the group here on November 11 when the Matadors meet the A. C. C. Wildcats on the Tech field.

Donna Vaughn had to escort her parents to Paris, Texas, but she is having a gay time.

YES SIR — We have missed you Fellows this Summer. It will be mighty fine to see you back in September.

Our store is full of snappy things for the College Man—the styles have changed, you know, and we have the same patterns, fabrics and styles that will be worn at the large universities.

Hogan & Patton

"The Man's Store"

'As the Twig is Bent the Tree's Inclined'

How is it with the young people of your household? Are they saving money? Have they learned to appreciate the value of the dollar? Are you endeavoring to instill into their minds correct ideas concerning thrift and economy? Are you seeking the opportunity to "bend the twig?" Would you like to listen to a plain suggestion? If so, here it is:

Send the young folks to our bank with the first spare dollar that comes into their hands. The next dollar should be treated in like manner, and the practice so continued until a fixed habit of saving has been established. A goodly bank account will soon result; the young folks will get an inkling of the ways of business, and, being thus "inclined" are likely to grow up into straight and thrifty manhood.

To the Prospective Students of Texas Tech

We are looking forward with great pleasure in meeting and serving you. Our aim and purpose here is to serve the students and faculty of Texas Tech. Being owned and operated by the College, it carries the good will of the student body.

To the Summer School Students

We sincerely hope that you have enjoyed your stay here, and that the work was profitable as well as pleasant to you. May we have the pleasure of serving you again next year.

Guard Life In Camp Palacios, The Place By The Sea Seey Sea

BY ONE UV 'EM

Everything around this burg was in a mighty big fix on July 4th. It being the 4th, and us boys fixing to entertain for Camp Palacios to start another war. For fear you don't understand military technique like our beloved Lieutenant Condray, I'll proceed to say what I mean when I say "Service Battery 131st, Field Artillery, T. N. G." The word service means just what it says. The boys learned to comply with the word service at the suggestion of the best little captain in the T. N. G. What I mean is, the captain above does rate high in the eyes of us boys; if he had just said the word the boys would have swiped anything for him or Lieutenant Condray. Of course you all know who I'm referring to, but for fear you don't, it is no other than Captain Inger-ton of this here college. To go on with the discussing, the word bat-tery doesn't mean who is pitching and catching in today's baseball game, but it means it is part of an army that shoots at each other with big guns. However, we didn't shoot with any big guns. This here service battery is decomposed of the cream of Tech College. Since we was from college we wuz the brains of the regiment, and every time some of those generals or colonels wanted anything done and done rite, they would say, "go over to service bat-tery and get a detail of six men and have them fix it up." Makes its an honor to be in an outfit that re-ceived such personal attention. All you have to do at camp is to ride around on a waggin and see that everybody got their share of ice and other forms of groceries. I forgot to say that the service battery supplies the stomachs that demand atten-tion.

Us college men shure do rate high in a place like that. Of course there is some hard jobs like there is in anything else. Corporal Britain had one of the hardest and meanest jobs in the outfit. That poor boy worked so hard he go to wheer he couldn't stand the weight of his shirt. He would have to get out of his bunk two or three times a day and weight on customers—You see he worked in the supply room.

Sargeant Harbor had a heck of a job. The whole battery felt plumb sorry for him—he was assigned to Regimental Headquarters as person-el sargeant. This may sound high-falutin but it ain't. He had to work from sun-up 'til nine or ten o'clock at nite. He tried to study Spanish so he could make a good grade un-der Mr. Whately, but he couldn't do two things at one time. He couldn't sleep and study at the same time.

To go on with what I started to say, T. N. G. don't mean "There's Nothing Granted"—it means Texas National Guard. Soldiers what I mean, we had a time going down there. We didn't have the least bit of trouble the only thing, William-son who was a specialist and a K. P. (not Knight of Pythis) had his ehad run out a coach winder look-ing at the girls in Belton and Rat-lesnake Owens, our Top Kick, saw him and boy if that specialist didn't catch it! And IT wasn't the kind of "It" that Clara Bow has either. The K. P. got back at our Head Quar-ters asking him what he was looking so hard for, and Sergt. Owens showed him where to get off by telling him he wasn't looking hard, that he was smilin'. This Owens is tough. We kinda overlooked it tho' for we remembered that Dr. Horn said one time about a person's com-posure having something to do with their disposition. Well, Ross—he was in the same tent with Cor-poral Womach and Master Sergt. Cavett taken sick the second day we was there, and Sergt. Owens was never the same, for example one rainy morning at reveille the bugle bled overcoats and all the boys in tent 3 fell out in raincoats—that was the nearest thing the boys had to overcoats. Owens made the boys go back in their tent and pull the coats off. Lieut. Condray was out there too. I know our top kick, heard the call to overcoats. I don't know whether the Lieut. heard it or not, but he sided in with the Sergt. I think we ought to have of-ficers that could recognize the call to overcoats anyway, but as I said, we overlooked the actions of the top kick.

A bunch of the boys went bathing and fishing one Sunday morning af-ter Sunday school. Fish! I never saw so many fish in my life. Every-body had fish for supper that night. Lt. Condray caught two or three bushels of jelly fish, cooked them up and sent the jelly home to his wife. This Lieut. is a real sport.

The working men of the Service Battery got to where they would start fighting every time Harry's band would start playing "The Cas-sion." You see the "Cassion" is the war song of the Field Artillery. The band would play it every morning for reveille at 5 o'clock. It would make us mad to be woke up at such an hour. I felt so sorry for a bunch of our boys one day. They was standing in front of a bunch of of-ficers and when the band began to play, "The Cassion," those boys be-gan to fight something terrible. The reason the editor wanted me

Good Attractions

(Continued from page 1)

proved cast and with new scenery effects. These actors play only to college audiences.

Cyrena Von Gordon, Prima Don-na Mezzo-Contralto of the Chicago Opera Company, appears at the college in April. Miss Van Gordon is everywhere recognized as one of the notable artists who have achieved outstanding successes in grand opera and in the concert field. She is also one of the great American singers who have received their en-tire musical training in this coun-try. Her youth, instead of being a detriment, has proved her greatest asset. She is truly one of the most beautiful singers of the concert stage. Frequently has she been pro-claimed the most beautiful Brun-nhilde the stage has ever seen. Miss Van Gordon has sung with the Chi-cago Grand Opera company ever since her debut. She has appeared in many difficult and beautiful roles as Venus in "Tannhauser," the Queen in "Hamlet," Erda in "Steg-fried," etc. Audiences everywhere recognize in Cyrena Van Gordon an American singer who stands today in the front ranks of opera and concert singers.

There will most likely be added another attraction which completes the course for next year.

Willie Roan, another old-time Ag student, has been visiting the col-lege this summer and will be in school this fall. Willie, while out of school, has been getting some prac-tical experience in raising pur-bled beef cows. He worked for some time with R. V. Colbert, president of the Hereford Breeders association and a breeder of Anxiety Herefords, at Stamford Texas.

Margie Fette is making things cheerful again on the campus this summer. She is to teach in the high school of her home town of Muen-ster during the coming year, plan-ning to return and complete her degree work later. Margie and Anna Belle are still "roomies."

Word comes to us that Orval "Buddy" Burroughs, popular stud-ent here during the first two years, is showing them how they do things down Texas way in West Point. Buddy is now entering his second year in the academy and accord-ing to reports is doing himself and our school proud. Stay in there son, we're for you.

Just as the Editor and Business Manager were perspiring over this edition of The Toreador and were about to give up the task they were interrupted by a Patio Party (we reckon that's the name of it) which a bunch of the faculty members and summer school students were having on the large green lawn in behind the Administration building. Made us want to join them. This is only one of the many such parties they have had this Summer.

Haven't Sawyer and Grady Wat-kins are seen each evening "Stroll-ing in the moonlight."

Student Prexy

JACK MADDOX

These friendships, associations, hardships and joys are things we can remember after we have finish-ed school and are out in the world.

We all come to Tech in search of an education whereby we can make better citizens—both to the country and to ourselves.

Our college offers any course de-sired with the best faculty in the South. Our graduates have found positions upon graduation so it is up to the Student Body to keep the pace and increase it.

There will be over two thousand students next year with plenty of room for them with the Engineering Building just completed and Science Building ready by January 1.

We will be looking for every old student back bringing with him at least one new student in September.

Let us all make the new students glad they came to Tech by showing them what we can and make them glad to "Fight for the Matadors."

Sincerely yours for Every Year a Better Year in Texas Tech.

JACK MADDOX

Summer Greetings

(Continued from page 1)

our faculty.

Miss Vilian Johnson, M. A. Col-umbia, formerly head of the depart-ment of Home Economics in the Teachers College at Kingsville, has been added to our faculty in Home Economics. There will also be ad-ditional members the new students in Engineering and in Agriculture.

Prospects for athletics in the Texas Technological College are brighter now than at any time in the history of the institution. The probability that when Texas Tech's football team meets the University of Texas at Austin on October 6, there will be a battle royal.

During the third year of the col-lege, there were 1,682 students en-rolled during the long session and 958 during the summer session. This made a total number of more than 2,300 different students all of col-lege grade, enrolled during the third year of the institution. We expect to have a much larger number next year and we expect to be able to take care of them even better than we have cared for our students any year before.

The President hopes that he will have the pleasure of seeing you all back again next September and of greeting a group of other folks whom you will bring with you.

Remember that Freshman orien-tation period is September 21 to 23. Every freshman should be present promptly at 9 o'clock September 21. Registration will take place Septem-ber 24 to 26. On September 28 all the churches of Lubbock will ob-serve open house for the students. And on Saturday, September 29, at 8 o'clock, the president and his wife desire the privilege of shaking hands with every student, old or new, at the reception given to them in the Administration building.

RECORD RAINFALL

The rainfall record in Lubbock for July shatters any previous record since 1911 with 6.76 inches. Almost six inches of this rain fell within a period of six days.

The 1911 July rain total was 6.73 inches.

The 1928 year's total is approxi-mately 12.5 inches. The rains have been comparatively general. Conse-quently, Lubbock County Agent, D. F. Eaton, predicts the county's largest cotton crop for this year.

Sitting in the shade of the cam-pus trees we can always find Hugh Anderson and Nettie Mullino.

to write this was because I've took English under Don Murphy and Kenneth Knickerbocker.

SHUFFLIN' FEET

DON'T THEY GIVE YOU A THRILL?

Whether you're going back to college or going off to school for the first time—your blood will tingle with excitement when you become a part of that hurrying, scurrying mass of youngsters from all parts of the country.

Shufflin' Feet

Every where they're hurrying to classes—or out on the campus—or down through the streets with shirt tails flying—happy boys—and hap-py girls—all happy in school—Say—you've gotta come to "Texas Tech" and Lubbock—

And don't forget your friends—

Summer School

(Continued from Page 1)

Mr. Wilkins is Superintendent of Schools at Sudan, Mr. Mathews is Principal of the Senior High School at Lubbock, and Mr. Carroll is to be instructor in history in the Texas Technological College.

It is interesting to know that there are forty-nine people enrolled for graduate work this summer. These hold degrees from the follow-ing institutions:

- Texas Technological College 12
- Texas University 6
- Simmons University 4
- North Texas State Teachers 3
- Ablene Christian College 3
- Baylor University 2
- East Texas State Teachers 2
- Howard Payne College 2
- Southern Methodist University 2
- Columbia University 1
- Baylor College 1
- East Texas Normal College 1
- North Texas Normal College 1
- Oklahoma City College 1
- Oklahoma College for Women 1
- University of Missouri 1
- University of Denver 1
- Rice Institute 1
- Sam Houston State Teachers 1
- Southwest Texas State Teachers 1

Three summers ago, at the close of the first year of her existence, Texas Technological College held her first summer school. The session was only six weeks long as there was no definite appropriation from the Legislature. For the summer session 336 students were enrolled and the teaching force numbered 33. The next summer we had a full ses-sion of twelve weeks with an en-rollment of 677. This summer, the third session of summer school, shows an enrollment of 956 with a teaching force of 58.

The Technological College is new, its buildings are new and its cam-pus is new; and through its summer school as well as its regular sessions it is exceedingly anxious to serve its constituency in every helpful way possible.

Old Studer: (Visiting Tech Sum-mer school) and talking to one who since her debut. She has appeared see you in Summer school."

Summer school studer: "I assure you the pleasure is all yours."

The Toreador acknowledges re-ceipt of the following exchange pa-pers: "The Houstonian," S. H. S. T. S. Huntsville, "The Prairie," W. T. S. T. C. Canyon, "The College Star," S. T. S. T. C. San Marcos, "The Skyline," Sull Ross, Alpine.

Seems queer to me that all the boys have taken a sudden liking to French. But boys I'm telling you that you would, if you could see her. Her name is Madame, and oh, those eyes and hair!
