### THE NEW TERM

We have just gone through an ordeal of examinations which showed us, to some degree at least, just where we stood with reference to our studies for last term. Regardless of whether we were satisfied with our work for last term or not, we are now facing a new term which offers great possibilities. A good start on our new studies will mean much toward getting our interest in the subjects and finally toward the grades which will be recorded for us at the end of the term. On the other hand, a bad start will handicap us throughout the spring months. General opinion seems to indicate that a student's interest in academic subjects decreases with the spring. But a good start will solve much of the problem of interest and thereby prepare the student for the "letting down" which often occurs near the end of the school year.

### PICKING THE BEST

In a recent issue of The Semi-Weekly Campus of Southern Methodist University we find a ballot to be filled out by the students of that university indicating the twelve students who have done the most for the university this year.

We commend the idea of trying to express appreciation to students who have contributed much to university life. But we believe ballots of this kind will be misused. In most cases, too few students will consider seriously just what constitutes real worth to the college. Instead, many of them will vote for some person whom they think is a regular fellow. If only a small percentage of them do so, the value of the ballot is ruined.

It is our opinion that several students who should rank near the top in an election of this kind might be unknown by the student body at large. Many students work hard and consequently do not have time to mix with the student body as much as is ordinarily necessary to win an election. In many cases, they would have little chance to receive recognition in an election which might be designed primarily to select hard workers. (The assumption that hard workers, in most cases, are of the most value to a college is, of course, conceded.)

To be sure these students should be able to show something more than hard work. They should be able to show a product. But, generally speaking, college students who work hard are of more value to a college than are the loafers.

And, if a mistake should occur, which we believe is highly probable in such an election, it would be better for all concerned if no selection had been made.

### TIGHTENING DOWN

Expressions from many students indicate that there may have been a "tightening down" on the part of the faculty last term. Some believe that courses in general were more difficult than ever before in the history of the school. One student remarked that courses have been getting harder every year.

Whether or not this is true, we do not know. We are not surprised, however, if it is the case. In fact, we kinda hope it is. We do not know whether the faculty is conscious of any change or not, but we think it is only natural that our scholarship is higher than it was the first year.

We are glad that Tech's scholarship can be compared favorably with that of any other first class college or university. What is a degree worth from a college with low standards of scholarship?

### THE SUMMER SESSION

It was quite an event for Texas when a summer school was established on the high, dry, and healthful South Plains of the western part of the state; where school-teachers, hardworn by the cares and shortcomings of somebody else's children, can come and be a school kid themselves once more, and yet make of it a vacation.

The summer school at Texas Tech has made quite popular the long-regarded burden of summer study. Why waste your summer in idleness when you can enjoy all the thrills of a well spent vacation, and yet be improving your faculties of knowledge? Why not make that eventful trip to Carlsbad Cavern this summer, with a jolly crowd of students?

Why not tell that school teacher friend of yours back home about our summer school?

### Tech Livestock Get Many Prizes

More honors were gained by Tech's livestock exhibits at the recent Fort Worth Fat Stock Show than by any previous showing of the school of agriculture has attempted. Animals were entered in the swine, horse and sheep divisions. Winnings by the college livestock in the hog division were first and third on singles in the heavy Poland China barrow class and first on pen of three barrows. In the Tomworth classes Tech had first on light single barrows and first

on light pen, which was later judged the champion pen.

With the sheep exhibits, Tech won first in get of sire class. Also, Tech owned the third prize yearling Hampshire ram, second prize Hampshire ram lamb, third prize Hampshire ewe lamb. The college Southdowns won fourth prize ram lamb, third prize ewe lamb and second prize pen of wethers. First and third prizes on grade carlot Rambouillet lambs and Grand Champion carlot were won by Tech entries.

Holbert, Tech's Percheron stallion, won first in the three-year-old class and was later judged reserve grand champion of the show being defeated only by an out-of-the-state entry.

## Football Schedule Considered Best In Tech History

The best football schedule ever arranged by Tech will be played this year. A total of 10 games will be played by the Matadors, five at home and five away from the local gridiron. The season will be opened by the fourth game on September 28 and will in all probability be closed by Canyon on December 6. However this is not known for certain.

One of the outstanding features of this season is the transference of the Turkey Day game from Canyon to Simmons university. Beginning next year at Abilene the Cowboys will alternate between Lubbock and Abilene from year to year.

Howard Payne again resumes athletic relations with the Matadors after a lapse of 10 years. They will be here November 19, their old date the first two years of Tech's existence.

Two games will be played with conference teams—T. C. U. here, October 26, and Baylor at the Cotton Palace on the following Saturday. This will be the fourth game T. C. U. and Tech have played. In the past the Tech student body and supporters have accompanied the team to Fort Worth but this year, in all probability, they will run to Waco as the Frogs return the game to the lair of the Matadors.

The two weeks beginning October 26 and ending November 11 will be the most strenuous period of the whole season. The Frogs will be played the first day. The next week end will see the Crimson tide in Waco. Then they come home for a game with A. C. C. on Armistice Day. The Wildcats have beaten the Matadors the last two years when they found the Bull Fighters in the inevitable let-down after a big game.

Considered from a financial standpoint the schedule should clear a good profit that will bear the expense of the other sports that follow later in the year. Canyon and Simmons will always draw big crowds in their local towns with Tech.

The biggest gates will come when T. C. U. and A. C. C. enter the Matador arena on October 26 and November 11, respectively. T. C. U. will draw a record gate because it is the only conference game on the local gridiron and the second in the history of the institution. A. C. C. having beat Tech the past two years will also draw an excellent gate, as the game comes on a holiday.

The Baylor game at the Cotton Palace will prove interesting to Central Texas fans as this will be the first appearance of the Crimson tide in that section of the country.

The complete schedule is as follows: September 28, Wayland at Lubbock. October 5, Sul Ross at Marfa. October 12, Daniel Baker at Lubbock. October 19, McMurry at Abilene. October 26, T. C. U. at Lubbock. November 2, Baylor at Waco. November 11, A. C. C. at Lubbock. November 19, Howard Payne at Lubbock. November 28, Simmons at Abilene. December 6, Canyon at Canyon (tentative).

Deward H. Reed, graduate of last year, who is now a principal teacher in the Big Spring school system, was here during exams.

## 4 More Debates On Tech Schedule

With the debating season drawing to a close at least four more contests are still on the schedule, with the possibility of one or two being carried.

The freshman team goes to Canyon in the near future for a verbal tilt with the freshman team of the Teachers. This will be the second encounter between the two schools this year. The Tech varsity team recently defeated the Buff's team in a critic Judge's decision in Lubbock.

The first girls debate in the history of the institution is to be held in the near future between Los Matadors and the Simmons Cowgirls.

Howard Payne will come to Lubbock the second week in April to open a series of annual debates between the two schools.

The last debate of the season will come when the varsity team, Anna Jo Pendleton, Debate Coach, journey to Waco to return a debate with Baylor University.

## Interview Students About Employment

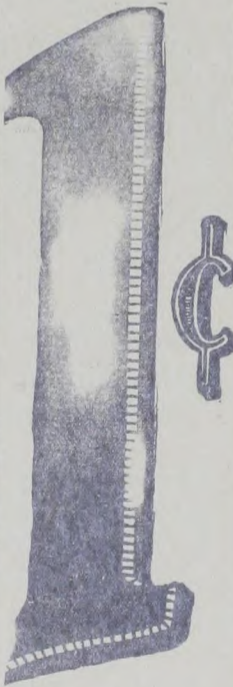

James Harrison of St. Louis, supervisor of college relation of the Southwestern Bell Telephone company, visited Tech last week in company with the Texas Plant Supervisor from Dallas and the local representative of the organization.

Eight seniors from the departments of Civil, Electrical, and Mechanical Engineering were interviewed with regard to employment. Mr. Harrison and his companion lectured for about two hours to the group, outlining the organization of the associated Bell companies and describing the different kinds of employment offered. An explanation of the wage scale of the company was also given; \$120 is the monthly salary which is paid at the start and this is raised to \$135 at the end of the first six months and \$150 at the end of the first year. From that time on the employee's salary depends on the amount of ability demonstrated. It is said that this salary of \$150 per month is an exceptionally large amount to be paid to men who have been out of college for only one year. According to Dean Miller, it is more than probable that several Tech engineering graduates will be employed by the company.

Miss Haven Sawyer, former Tech student and daughter of Mr. and Mrs. T. W. Sawyer, of 2325 Broadway and Grady Watkins, formerly of this city and now of Texarkana, were married at 2:30 o'clock, February 9, at the home of her parents, Dr. W. R. White, pastor of the First Baptist church read the ceremony. The couple is to live in Texarkana where Mr. Watkins is headquartering of the Remington-Rand Typewriter company.

## More Heat Less Gas

There is only one suggestion for the better use of a radiant type Gas Heater, beyond having a good flame, proper connections, keeping burners and heating elements clean and general care in not burning gas needlessly.

This suggestion is to watch the flame so that it does not GO OVER THE TOP of the radiant grid which throws out the heat. This wastes heat and gas, besides not giving you all the heat that there is in the gas burned. The flames should be just high enough to heat the grid or other radiating material and no higher.

The principle of this type heater is incandescence, the use of a small amount of gas to produce a great deal of heat, practically all of which is utilized.

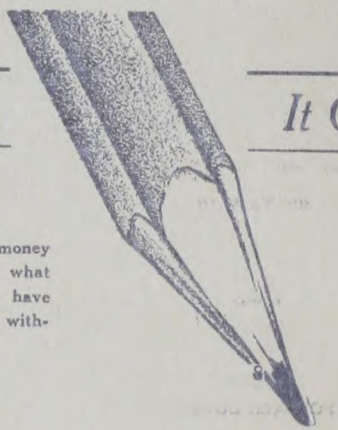

Simply turn on enough gas to make the entire grid glow—and no more.

But who wants a "fairly good egg"?

When his Lordship the Bishop asked his guest how he enjoyed the breakfast egg, that timid—but always truthful—young curate replied: "Parts of it were excellent, sir!"  
Now isn't that just like saying that such-and-such a cigarette is mild? Mildness in tobacco is not to be despised, but is it the *ne plus ultra*, the *summum bonum*, the . . . in plain English, is

that all you ask from your cigarette? We think not.  
Take Chesterfield's mildness for granted, and get the full relish of its rich, real taste under your tongue. That's its difference from the common run—all the difference between plus and minus. Chesterfields are mild . . . and yet they satisfy!

**Engineers Win Hardest-Fought Meet In History Of Intramural Relations; L. A. Lose By One-Half Of One Point**

Making a garrison finish, the Engineers won the hardest fought track and field meet in the history of intramural track relations. In fact, so close was the contest that at the end it was found that the pupils of J. H. Tadlock, had won the meet by one-half of one point. The total scoring shows the Engineers with a lead of 68 points. The Big Knowles crew was second with 67 1-2, and Vaughn Corley's Farmers placed third with 27 1-2 points.  
The first day's weather was ideal, but the second day was very windy and as a result slowed up the contestants in both the dashes and running events. As a result the time in several of these races was extremely slow. Several men who showed up well are assured of regular berths on the varsity if they continue to improve as they did previous to the meet. "Big Sid" Knowles looked well in the weight events and as a result took first place in both of them. Wilkins was slowed up considerably with a sprained leg and as a result never did hit his full stride. Lawrence, Chenoweth, Wilson, Cole, Howard, Waller and Kimbrough are men who showed up well in the dashes. Wingo, Shell, Perry, Koeninger are good distance men.  
The first day of the competition seemed to indicate that the Liberal Arts would walk away with the honors in a fashion similar to last year when they made three times as many points as the other schools combined. The end of the first day's races showed the school of poetry in the lead with 31 1-2 points, Aggies 11 1-2 and the Engineers in the vanguard with only 10. But Friday the Engineers showed their heels to everything the other two schools could put against them. It was no common thing for the Engineers to win three of the four places in a certain event time after time. In fact it was not first places that won for the gentlemen of the hairy species but a greater number of second, third and fourth places.  
Below is a summary of the points made and the places:  
Liberal Arts, six first places.  
Engineers six first places.  
Aggies, one first place.  
Liberal Arts, five second places.  
Engineers, seven second places.  
Aggies, two second places.  
Liberal Arts, two third places.  
Engineers, seven third places.  
Aggies, four third places.  
Liberal Arts, six fourth places.  
Engineers, three fourth places.  
Aggies, five fourth places.  
Wilkins, Liberal Artist, was high point man with 14 2-3 points. Lawrence, Engineer, second with 11 1-4 points, and Knowles, Liberal Artist, third with 10 points.  
Javelin throw, Knowles, Liberal Arts, first; Te Engineer, second; Kimbrough, Engineer, third; Grimes, Aggie, fourth; Distance 151 feet, 7 inches.  
120-yard high hurdles: Wilkins, Liberal Arts, first; Hays, Engineer, second; Finney, Aggie, third; Waller, Liberal Arts, fourth. Time 17.3.  
220-yard low hurdles: Waller,

**Play Tournament To Be Big Event**

Arrangements are well under way for the West Texas colleges' one-act play tournament sponsored by the Sock and Buskin club, to be held here the 28th and 29th of this month, according to Miss Purdie, general chairman.  
Five colleges will be represented by players and directors of speech departments. Simmons university, with Willie Ray McDonald directing, will present "Cabbages," a comedy by Staadt; McMurry, Antionette Sparks, directing, "Mansions";

Howard Payne, Lois Boli directing, ward Payne, L. Boli directing, Eugene O'Neill's "Ile"; A. C. C. M. ry Hale directing, Theoria's "Jean Marie"; and Tech will present Tennyson's "The Falcon," directed by Miss Purdie.  
Rue Parcells, of Amarillo, well known in Little Theatre work, has agreed to act as critic-judge for the tournament.  
Twenty-four players and directors will be at Tech for the tournament. The program includes a luncheon for all visitors noon the 28th, presentation of three of the plays that evening, and of the other two the afternoon of the 29th, followed by a reception for the visitors; and the formal presentation of the two best plays the evening of the 29th.

### Special Editors Agree On Dates Of Publication

Editors which have been chosen for the special editions of The Toreador have agreed on the following dates of publication.

Following this Liberal Arts issue which was edited by Martha Pfaff, will be the Aggie edition which will be edited by ... Huff. Then on March 3 will be the Engineering edition and on March 10 will be the Home Edition. Walter Burns will edit the Engineering paper.

A magazine issue of the paper is being planned for March 17 and is to be edited by Margaret Turner. Although none of these special editions will omit news pertaining to the entire college, the plan is to give particular emphasis to the schools in the school editions and to the more literary articles in the magazine edition.

Following the magazine issue will be a paper which is to be edited by a class in journalism which is being taught by Prof. Cecil Horne and which is studying news editing this term.

### Sock And Buskin Elects Officers

Dramatic club in special meeting held Monday night, elected the following officers for the spring term: Wilburn Edelman, president; Anna Belle Collins, vice president, and Ruth Officer, secretary-treasurer.

Following the election of officers the club was presented with the play "The Eligible Mr. Bangs" which was directed by Miss Pirtle and played by Margaret McNabb, Zona Stiles, Hal Lary, and Dayle Wallace.

Plans for the One Act Play Tournament were discussed and the committees were named for the several duties to care for the contestants and directors who will be here March 29 and 30. Tickets will be on sale by several students and at the office of the speech department from this time until the tournament.

### Movie Scheduled For Next Tuesday

"Conowingo" is the name of a three reel movie relating to a great hydro-electric plant of that name on the Susquehanna River in Pennsylvania which will be shown in the auditorium of the Engineering building on the night of March 25, beginning at 7:30 p. m. The opening of this plant has been termed as the largest engineering event of the year, so the showing of these pictures is reported to be of especial interest to all engineering students. An unusually large attendance is expected at this performance.

also: Carl Peterson, Lamesa; Lloyd Pyant, Amarillo; Eugene Smith, Vernon; Roy Taylor, Russellville, Ark.; Ivo Wilson, Quanah, and Troy Olene Baker, Mrs. Rosa Mac Burford, Anna Jo DeWald, Naomi Halsell, Hugh E. Killin, Otis Koen, Jess Lockhart, Mrs. Ethel McCauley, Lucia McIlvain, Ruth McKee, Hazel C. Martin, Elmer J. Moore, Raymond Painter, Helena Peters, Florence E. Pickett, Hazel Reeves, Harold Roberts, Walter Schneck, Mrs. Sue Alice Tubbs, George Wilkins and Cecil Williams, all of Lubbock.

### Freshman Queen Crowned At Dance

Miss Irene Frnka, of Garwood, was crowned queen of the Freshman class in the annual dance held at the college gymnasium on Friday evening, March 8. A blue improvised canopy beneath which floated hundreds of many colored balloons, and shaded lights helped to create a very effective setting for the presentation of the beautiful Freshman girl.

A very unique plan was carried out in the presentation. A large paper fish was brought in after Canon Clements, one of the college's smallest boys dressed in tattered overalls and carrying a fishing pole invited the guests to "See what I caught."

The fish was opened and Miss Frnka stepped out. She was dressed in a gown of white satin and tulle, and wore a crown of brilliant diamonds. A large shower bouquet of white rosebuds was carried by Miss Frnka.

Lennie Langston, one of the class sponsors presented the queen after which she and Jimmie Whiteside, class president, led the grand march. They were followed by the court and its attendants who were as follows: Miss Lena Bert Medlin and Jack Buckler; Miss Mary Fruzzell and LeRoy Vaughn; Miss Beth Wulman and Jimmie Broderick; Miss Mary Elvan Burns and Bion Reeves; Miss Mary Lois Gamel and Walter Coffman; Miss Rita Hufstader and J. R. Johnson; Miss Camille Stobaugh and J. P. Rhuman; Miss Zona Stiles and Elmore Smith; Miss Zella Riegel and Lennie Langston.

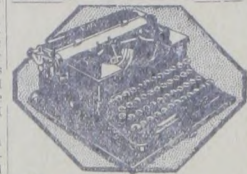

During the evening the girls were given favors of dolls and dancing continued until 12 o'clock. Music was furnished by the Florida Crackers orchestra.

Patrons and patronesses were Mr. and Mrs. Gus L. Ford, Mr. and Mrs. J. W. Gamel, Dr. and Mrs. J. H. Stiles, Mr. and Mrs. Henry Frnka,

Mr. and Mrs. A. F. Holt, and Mrs. Mary Doak, dean of women at the college.

If it happens in connection with Tech, it should be in the Toreador, and you, student or faculty member, should report it.
