NUMBER 1

Rapid Growth For College Is Seen In Large Summer School Enrollment And Bright Outlook For Fall Term

Summer Attendance of 1275 Represents Thirty Percent Increase Over That Of The Preceding Year

Third In State

Registrar Sees At Least Ten Percent Increase for Next Year, Making Enrollment Between 2200 and 2400

That Tech will continue to maintain its high rate of growth is shown by the large summer school enrollment and by present indications of a record fall attendance.

Prospects for a record enrollment for the regular session of 1929-30 are excellent, according to a recent interview with President P. W. Horn.

Catalogues Going Out Reports from the Registrars confirm the President's prediction, Mr. E. L. Dohney, Registrar of the college, reports that his office has been sending out on the average about 25 copies of the school catalogue each day.

During the first year Tech had total enrollment of 916 students the next year, 1925-26, showed an increase of 67 percent, making the total enrollment 1535.

Tech People Will Go To Yale Soon

Several Tech graduates and faculty members will do work in Yale University next year.

Library Increases Total Circulation

The circulation of the Tech library is on the increase, according to figures obtained in an interview with Miss West, librarian of the college.

Miss West, librarian of the college, in the session of 1927-28 the total inside and outside circulation of the library was 39,042.

Sheep On Gridiron

Tech's football field, scene of many hard fought battles, is dominated by a more peaceful group during the summer.

Eleven Delegates Sent To Hollister

Eleven college men and women represented Tech at the Southwest Students conference at Hollister, Mo., this summer.

College Is Without Business Manager

Resignation of the position of business manager of the college to accept the presidency of the Montezuma Baptist College in New Mexico, on the part of Mr. E. W. Provenge, leaves the position unfilled at the present.

Ten Applicants Are Working For M. A.'s

Ten applicants for M. A. degrees are endeavoring to complete their work during this summer.

Library Increases Total Circulation

The circulation of the Tech library is on the increase, according to figures obtained in an interview with Miss West, librarian of the college.

Miss West, librarian of the college, in the session of 1927-28 the total inside and outside circulation of the library was 39,042.

Cotton School Is In Middle Of Work For 4 Week's Term

Reporter Finds Members Busy Classing and Grading Samples, Study Covers Cotton Business

"Strict midling," "yellow spots," "1906" and other sounds unintelligible to the immature mind of the ordinary Liberal Arts student were heard on a recent visit to the Summer Cotton School now going on in the Textile Engineering building.

At the time of the reporter's visit the class was interested in classifying cotton. Each member inspected samples from forty bales of cotton and graded each sample.

Instruction covers all principal points and fundamentals of the cotton business, including grading white and colored cotton, marketing, street buying and selling, f. o. b. buying and selling, and relation between interior buying and selling.

College Is Without Business Manager

Resignation of the position of business manager of the college to accept the presidency of the Montezuma Baptist College in New Mexico, on the part of Mr. E. W. Provenge, leaves the position unfilled at the present.

Ten Applicants Are Working For M. A.'s

Ten applicants for M. A. degrees are endeavoring to complete their work during this summer.

Library Increases Total Circulation

The circulation of the Tech library is on the increase, according to figures obtained in an interview with Miss West, librarian of the college.

Miss West, librarian of the college, in the session of 1927-28 the total inside and outside circulation of the library was 39,042.

Collegians Of Long Session Are Younger Than Summer Students

Statistics may be deceiving, but they are nevertheless interesting. A comparative survey of the ages of students of the summer school and those of the regular session shows that the latter have the edge on the former by several years.

The average age of the male students of the regular session is 18.75 years. The average age of the male students of the summer school is 22.85 years.

Many Relics From Southwest Now In Tech Collections

Latest Additions Include Skeletons, Branding Irons, Indian Implements, and Articles From Old Forts

Additions of relics of historic and prehistoric age are rapidly increasing the size and value of the Tech collections, which are at present housed in the museum rooms of the geology and biology departments in the chemistry building.

English Debaters May Come Here

Oxford debaters may include Tech in their tour of American colleges and universities next fall.

Ag. School Serves 500 Farm Children

Many farm boys and girls have taken advantage of opportunity for special completely study in the School of Agriculture for short periods of a day or more during the summer.

Corley To Coach In Las Cruces School

Vaughn Corley, captain-elect of next year's football team, has accepted a position as head coach of the high school at Las Cruces, New Mexico.

Textile Head To Go To Alabama School

Professor E. W. Camp, head of the department of Textile Engineering, will move with his family to Alabama about the middle of August.

Freshmen Girls To Stay In Dorms During Next Year

Regents Designate College Inn Which Will Be Under Supervision Of College Officials

Beginning with the fall term of 1929 freshmen women students at Texas Technological college will live in two privately owned dormitories, College Inn and Annex A.

Orientation Week Being Planned For College Freshmen

Program Is Designed To Meet The Needs Of The New Students In Making Re-adjustments

Plans that will make the third freshman orientation program more complete and helpful than any other college has had are now being worked out by the deans of the college with the assistance of Mr. Roy McCullough, secretary of the college.

LOOKING TOWARD COLLEGE

A college education is rapidly becoming a part of the standard equipment of the young person for life. Each year greater numbers crowd our schools and force them to expand. A critical analysis of the ultimate benefit in the efficacy of our educational system, but its faith the efficacy of our educational system, but its faults are not to be removed overnight. The immediate problem is in dealing with the many thousands of freshman students who will enter our colleges and universities this fall.

An analysis of what prompts students to go to college would not deter those with unworthy purposes or cause them to substitute better ones. A frank discussion, however, of what one may logically expect from college may save some disillusionment and facilitate readjustment.

In the first place, college is not going to be one continual thrill. Motion pictures of college life have presented a distorted view. Some producers should at least visit colleges before attempting to film them. College is filled with harder knocks than other places, because it is filled with more glamorous hopes. Many times its defeats are more numerous than its triumphs.

Every freshman student is not going to become the college hero. He has about one chance in a thousand or more of doing so. Furthermore, being the college hero may not be especially desirable. Heroes are hated as well as worshiped, lonesome as well as popular, and weak as well as strong.

The college viewpoint is not the right viewpoint many times. Students bodies are noted for their ability to make poor decisions. New students who expect to find a correct code of conduct (whether conventional or otherwise) will be disappointed. Opinions are conflicting, and the strongest influence is not likely to be the most satisfactory.

College life is abnormal. The grouping of large numbers of boys and girls in a single community, the constant strain of social functions, the limiting of vision to the local campus, the unbalanced daily schedule of individual students, the brief, intensive periods of cramming—all these things tend to destroy normalcy in college life. The individual who lives normally must be strong.

Home influences can not be ditched abruptly without pain and worry. No matter what other students' code of action may be, no matter how antiquated the new student's may be, his own must not be discarded too suddenly. It may be right after all.

College life, as it has come to be considered, is not cultural. Culture may be found in college, but cultural influences do not dominate. Wise selection of friends and careful discrimination in little matters are necessary in becoming cultured.

Last of all college education will not create genius. It may discover it, stimulate it, fire it but not bequeath it. These things it may also do to the mediocre mind. The ordinary man may be trained to fill a valuable place in society. It is not necessary to be a genius to benefit by college, but neither will college make up for lack of genius. A college diploma is not a Shakesperian manuscript in its first form.

TIME FOR THOUGHT

The summer vacation is a good time for the student away from school to evaluate college, to study some of its problems, and to plan for the coming year. Then college may be seen from a more removed, and perhaps a more accurate, perspective. In the none to well ordered rush of college activities, values become confused, and

plans are warped. Most students and most other people are too busy living to think seriously about life. They are possessed with something akin to the mob spirit. The urge to act crowds out time for quiet reflection. You who have not been made altogether dizzy by being too close to the whirlpool of life will welcome the opportunity to retire, and accustom your eyes to the greater distance, and try to think things through. The man who thinks is superior to the man whose life is only a response to external stimulation, even though the thinking man may come to the conclusion that he is but a creature of circumstance.

What things have you been thinking about during the summer? Have you chosen your vocation? What are the things money will do, and what are the things money will not do? Which are the more important?

Do you owe anything to society for your opportunities in education? Is it worthwhile to try to understand and help others?

Do you notice the harsh differences in men's stations in life? Does it mean anything to you? Is our nation taking a forward looking position in matters of world concern?

Does the sex problem confront you? Or is it taboo? Or do you live without thinking and without self-control? Is life worth living? If so, on what basis?

The foregoing questions are not supposed to indicate the correct answer. There may not be a correct answer. People differ from each other with good reasons. But that is the point: good reasons should be the basis of our attitudes on life's many perplexing problems.

Tech Tacks

The office boy says that it is not so much that beautiful stenograph-

ers are less efficient than their plainer sisters, but that their bosses are less so.

One ambitious prospective freshman girl student has written in regional instructor in education for the summer, teaches his classes on the

second and third floors so vigorously that it is reported that students in the library on the first floor have requested permission to take the examinations and receive credit for his courses.

It is rumored about the campus that Delmar Criswell has reported to the registrar's office that he is now twenty-one years of age and would like to have his grade cards sent to him personally rather than to the folks back home. It is not known whether this action on the part of Mr. Criswell is just a matter of pride on having come into his own, or whether the reception accorded his grade cards heretofore has not been quite in keeping with his ideas of hospitality.

Clarence Whitesides, June graduate of the School of Liberal Arts, has opened up a couple of ice bergs in town. Clarence is putting his ideas on ice, so to speak.

By the time this edition comes off the press, the editor will have passed another milestone on his march (prisoner's step) through this unhappy life. Fortunately for the complete harmony of the staff, this information is being guarded for the reader against earlier publication.

M. H. Duncan, superintendent of the Lubbock city schools and a special

catch rides to town. Having Monday free from classes is quite a convenience. One can study without interruption.

Lubbock has been as hot as the sun. Of course men love to amaze women with their great powers of intelligence. Observe the patience of the married man whose wife does not quite understand just what he means.

And, (speaking about married life), a short while ago Mr. Corry was married. A few days later he appeared with his arm in a sling. It has not yet been definitely ascertained whether or not the two events have any connection.

In spite of the fact that the lasting qualities of his work have been so often discredited, Cupid seems to be more effective than ever at Tech.

A person or an institution is sometimes said to enjoy a bad reputation, but it is suspected that the enemies of that person or institution enjoy it more than anyone else.

Tech doesn't seem to be quite the same place it was last spring. Some of the summer students are actually taking their work seriously.

That college prof who advised college students to be snobs must have had some experience in trying to

unmentionable abode of Mephistopheles.

It is reported on questionable authority that the Home Ec girls are organizing a marriage bureau for the placing of eligible wives.

WELCOME BACK TO TEXAS TECH

We are for Tech once and always.

Students when you are back in school try our service. Our aim is to satisfy you. We believe in Tech. We believe in you. When in need of a tailor use our phone.

Matadors To Fight Way Through One Of Hardest Schedules In Tech History Including Baylor Bears, T. C. U. Frogs

Higginbotham Crew To Be Out For Revenge Over Simmons Cowboys And A. C. C. Wildcats

When the Texas Tech Grid Warriors take the field this fall they will face one of the stiffest schedules of any school in the state outside of the Southwestern Conference, and probably the stiffest that any Matador squad has yet run up against. The line-up of games, while not altogether complete, includes two of the most powerful Southwestern Conference eleven—Baylor and T. C. U. Baylor will be played at Waco while T. C. U. comes to Lubbock. Down at Waco they are already boasting of the fact that the Bruins have an almost sure shot at the Conference title; and, as everyone knows, T. C. U. will have a mighty hard fighting team. While these two contests are the most important, there are many other clubs that are going to give the Red Boys plenty to worry about.

There is A. C. C., who likes nothing better than a victory over Tech. For the past two years the Matadors have shared the ill-feelings of Lady Luck in their games with the Wildcats, and have bowed in defeat by heart-breaking scores. There has been a tendency not to take the Wildcats seriously, but the experiences of the past two engagements have dispelled this tendency. The Wildcats come to Lubbock again this fall and the fans will get to see another tough game.

Daniel Baker, who has never been able to register a win over the Scarlet and Black, comes to Lubbock. The teams have met three times previously—twice they have tied, and once the Matadors have won. The Billies will be out to even matters this year.

The week following the Daniel Baker contest will be spent in preparing for the McMurry Indians. This year the Matadors go to Abilene to meet the Indians on their own field, for the first time since 1926. The Red Skins have not forgotten the outfitting that the Flaming Jersid Warriors handed them four years ago, in Abilene; the Tech's 3-0 win last year in the last minute did not help their feelings in the least—so everything considered—this game ought to be one of the most outstanding on the schedule. The game comes on October 19, and there are possibilities of a special train.

T. C. U. Here
October 26 is the big day at the figal orchard. T. C. U. will send her finest players to Lubbock, to meet the two traditions, a friendly rivalry that has done much toward building up the intense amount of interest the texts in Tech-T. C. U. encounter. For the past three years a special train has carried Tech fans to Fort Worth, but the teams gallant efforts are as yet unrewarded—as far as vic-

Football Schedule

Sept. 28—Wayland at Lubbock.
Oct. 5—Sul Ross at Marfa.
Oct. 12—Daniel Baker at Lubbock.
Oct. 19—McMurry at Abilene.
Oct. 26—T. C. U. at Lubbock.
Nov. 2—Baylor at Waco.
Nov. 11—A. C. C. at Lubbock.
Nov. 19—Howard Payne at Lubbock.
Nov. 26—Simmons at Abilene.

tory is concerned. So to say that the Matadors will be out for revenge will be putting it lightly.

Immediately following this game comes the Baylor encounter, on November 2, in Waco. The question of a special train has been raised several times, but there is as yet no definite plan. That is secondary however. The big thing is for the Matadors to make a big showing against the Bears, for they are one of the strongest teams in the South—especially so this year. The showing that Tech made against last year's Southwestern Conference champions moves us to believe that a victory over Baylor is not the most unheard of thing in the world, by any means. "BEAT THE BEARS" will be the battle cry for a long time before this game.

The A. C. C. Wildcats (fresh from their new den) will invade the Tech Gridiron on November 11. This Armistice Day clash is becoming more or less traditional, and arouses great interest in both institutions.

Howard Payne Again
Howard Payne renews hostilities with the Matadors at Lubbock on November 19. The teams have met twice previously. The Yellowjackets have the distinction of being the first team to hand Tech a defeat on the gridiron. This was in the first year of Tech's existence, and the year following the defeat was avenged mightily on the local grid. For the past two years the teams have not met, and we are looking forward to a great battle this fall.

The Thanksgiving game will be "Bigger and Better" than ever this year. A big special will carry all Tech to Abilene to see the Matador-Cowboy classic. This will undoubtedly be the most outstanding collegiate football game in West Texas. The schools are what you might term "old rivals." They are both fighting for a common cause—admission to the South will—each team, one is no better off than the other. Out of three encounters, there has been one tie and a victory for each school, so this year ought to show plenty fireworks.

Expect Much From Head Coach 'Higg'

Grady Higginbotham, who has been on the coaching staff since Tech opened, and who was Freshman mentor last fall, will be seen in the position of Head Coach when the Matadors report for training this fall. He succeeds E. Y. Freeland, who has been made Head of the Department of Physical Training, and thereby relieved of active duty. "Higg" will be head coach and will have charge of the backfield. Freeland will direct the line. With the combination the Matadors will undoubtedly develop into a "scorcher" proposition. It will be remembered that the Higginbotham coached backfield of 1925 and 1926 was famous for its scoring ability.

A Combination of Rare Beauty and Charm

Sunshine of dazzling brilliance sparkles in Bluebird Diamond. An eternal fire lives in its myriad facets that time can never dull. Bluebird is just another word of saying quality diamonds of registered value.

Huber's Jewelry Store
Jewelers & Opticians
1113 Broadway
Lubbock, Texas

"Higg" has the natural ability of gaining the respect and friendship of every man he works with, which is so necessary to the successful football coach. He will not be like a "new" coach, because he knows most of the men, and knows what they can do. Furthermore, having coached the Frenchmen last year, he will have a thorough knowledge of the host of new material which will be available to the Varsity this fall.

With the old men who will return, and with all the excellent material of last year's Freshman team placed at the disposal of a man like Grady Higginbotham, Texas Tech should certainly come forward for her share of gridiron glory.

College life is a little education and a lotta whoopee.

C. Of C. Gives Ring Ex-Capt. Walker

Percy Walker, popular athlete and former football captain, has been presented with a ring by the Tech Chamber of Commerce in recognition of his service in the East-West football game in California during the Christmas vacation of 1928. The ring is of originality in design. It is white gold and is mounted with a half football carrying the words, "East-West." Divided by this insignia are the figures, 1928. The ring bears Percy Walker's initials on the inside. Dr. Reed, team-mate of Walker, and Julius Herfeld composed the committee that selected the design for the ring.

A hand book for next year's freshman is being prepared. In view of the location of certain far removed buildings, it is suggested that a guide book and a road map would be more appropriate.

School Heads Seek Extension Service

The appreciation of school superintendents of the South Plains for the extension service of the college

is evident from the number of requests coming from them for classes in centers convenient for their teachers while in service. Twelve classes have already been called for. Classes are wanted in Plain-

view, Amarillo, Olton, Sudan, Littlefield, Levelland, Brownfield, Post, Southland, Slaton, Ralls, and night classes are wanted in Lubbock. Subjects requested include English, education, history, government, economics, and science.

Extension classes meet once a week, usually at night, for three hour periods, for twelve weeks, as a rule, they cover the same work which is taken by resident students of the college, and carry the same credits for degree or certificate purposes as the day classes of the college carry, and the work counts as resident work.

During session 1928-1929, twelve extension classes were organized during the fall term, fourteen during the winter term and eight during the spring term. It is probable that this record will be equalled, if not surpassed, during session 1929-1930.

The correspondence work of the Department of Extension is reaching an increasing number of students who cannot come to the college for study. To date, July 19, 163 have enrolled for correspondence study, during June and July. During the corresponding period of last summer, one hundred and fifty-four had enrolled. This work also carries full college credit toward a degree or toward a teacher's certificate. Work is available in over one hundred courses.

Faculty Briefs

F. E. Ballard, professor of the Department of Government, is at the University of Iowa this summer. He is doing work in Political Geography and will likely offer one or two courses of that nature next fall.

Miss Frances Whatley has been traveling in Cuba and Panama during the summer. Miss Whatley is reported to have had some very interesting experiences. They included a trip across the isthmus in a hydroplane and a short visit in a submarine.

Mr. W. B. Gates recently published a defense of the Ph. D. degree in English in the English Journal, a literary magazine of the University

of Chicago. Mr. Gates' article was in reply to certain harsh criticisms that has been made of the higher degrees.

Dean W. J. Miller of the school of engineering is doing research work this summer with the Westinghouse Electric company in Sharon, Penn.

Miss Jonnie McCreary, head of the department of foods in the school of Home Economics, is back in Tech. Miss McCreary spent the spring term in New York following a leave of absence due to illness.

H. R. Nissley, associate professor of Economics and Business Administration, is working toward the completion of his master's degree in the University of Chicago this summer. He will return next fall.

Miss Anna Jo Pendleton has been visiting in Lubbock for several days during the past week. Miss Pendleton has been at her home in Vernon during most of the summer.

Home Ec. Items

The Home Economics graduates of 1928 who will teach this year and their addresses for the school year are: Lila Allred, Levelland; Floy Anglin, Morton; Blanche Brown, Caddo; Mary Hazel Hurn, Post; Willie Hawkins, Rankins.

Alumnae of the school of Home Economics have accepted positions far from home. Merel Williams, who was queen of the 1928 pageant studied in Columbia University this summer. She has accepted a position as dietitian in Earrens Hospital, St. Louis, Missouri. Nena Robertson, who received her degree in 1928 will be Home Demonstration agent at Greenville, Texas.

Estelle Shepherd, who received her degree in 1928 and who has been teaching at Wellington, Texas, for the past year studied at the Colorado Agricultural college at Fort Collins this summer.

Miss Johnny McCreary and Mrs. Edna Buster, members of the faculty of the school of Home Economics, who studied at Columbia University the first term of summer

school, taught during the second session of summer school at Tech. Mrs. Buster will remain through the 1929-1930 session. Miss McCreary will return to New York for further study. Miss Grace Baker, instructor in clothing and textiles has been teaching the second term of summer school at Iowa State college, Ames, Iowa.

B. S. U. HUT

Erection of a student hut near the campus by the Baptist students will probably begin immediately after the beginning of the fall term, according to announcement by Arvord Abernathy, past president of the Baptist Student Union. The hut is to be used as a place for council meetings, officers' meetings, and as a reading room. The Baptist students are endeavoring to meet a long felt need. A campaign was put

on before the close of the spring term, and the students raised more than half of their quota. A second drive will be made in the fall.

The B. S. U. also plans to give a reception for the new students the first week of school and various other social events throughout the year, according to Arvord Abernathy. The new president for the coming year is Clyde Fincher of Chillicothe, Texas.

DEAN IS GRANDPA

The newest member of the administration of the college is Dean Gordon's grandson. He is the son of Dr. and Mrs. J. M. Gordon, Jr., of Temple. The seven pound youngster was born on last Wednesday. He has not yet been named.

Cappleman, who was of school last year will be back in Tech for the fall term.

Second Cavern Trip To Come

Another trip to the wonder caves of the United States, the Carlsbad Caverns, will be made over the coming week-end. A caravan of automobiles filled with summer school students and other interested parties will leave Lubbock on Saturday morning, August 3. Sunday will be devoted to the long trip through the many halls and rooms of the Caverns and to rest. The return to Lubbock will begin Monday morning. The excursion will be made by way of Roswell through the most interesting part of southeastern New Mexico, affording opportunity to see the Bottomless Lakes (one of which has gone dry!) and the New Mexico Military Institute. The entire excursion is being planned under the supervision of Mr. Gus L. Ford, who has during the past year directed in large measure the recreational and social activities of the college students.

The first trip to the caves was made on July 5, 6 and 7. There were over a hundred people from Tech and from Lubbock at the time of the trip. Greater advantage of the opportunity to see one of the greatest attractions of the southwest has been taken by the students of this summer school than was taken last summer school. Only fifty people made the trip last year.

It Is Reported

Buddle Burroughs, ex-student of Tech and a student now at West Point, married Louise Bush of 8521 85th street, Woodhaven, New York, July 4th. On the honeymoon, the couple went from West Point on down the Hudson river. Mr. and Mrs. Burroughs will arrive in Lubbock September 1st, and will enter Tech.

Campbell Loughwiller, that world citizen, has been about the most difficult of all the old Tech students to trace. Last winter he operated somewhere in Kentucky and

neighboring states. About the time of the Mexican revolution he made a trip down to the Mexican border. At the present time he is working at the docks in Galveston. Loughwiller and his old room-mate, John Wisdom, are planning to leave on a trip abroad at the close of the summer school. Their exact destination is unknown even to themselves.

Marvin Renfro is going to old Mexico at the close of the summer school. He has not yet decided whether he will return to Tech next fall or ship out on some foreign bound vessel.

Miss Margaret Turner is acting as society editor on the Avalanche-Journal staff during the absence of Miss Blanche Bean. Miss Turner was society editor on the Toreador last year.

Mart Chamberlain is back in Tech for the summer and is working in Cecil Hornes office.

Thelma Clark is now married and living in Amarillo. She was in Lubbock a few weeks ago.

Raye Culp has a position as proof reader with the Avalanche-Journal.

He has been publishing long and interesting features relative to Tech in each Sunday edition.

Mr. Cecil Horne, head of the department of journalism, is taking his vacation in New Mexico. His fish story will be published on his return.

Mr. H. B. Carroll of the history department spent the first half of the summer in the University of Boulder, Colorado. He did work in European and ancient history. He is now teaching for the second term of summer school.

Several faculty members, E. F. Condray, Ray C. Mowery, and Captain Rhodes Ingerton, will leave for the National Guards camp the first of August.

Dr. A. L. Stroul of the English department is doing research work in the library of Harvard University this summer.

Jack Durham is doing plumbing work in Hamilton this summer. Let's hope he doesn't get lazy.

Hogue Williams, president of the student body, and Scottie Fikes,

president of last year's senior class, are helping to hold the Hamilton county fair. Their official capacity is unknown.

Chip West, an old Tech student, has been transferred from Brooks to Kelley Field in continuation of his work in aviation. He is one of the highest ranking of all the 1800 there.

It is said that Pie Roberts is attending court regularly this summer, but not in any official capacity.

Joe Hunter arrived in Lubbock from east Texas Monday morning driving a new sport model freight train.

No word has been received from Melvin Hunter and Thomas Taylor, who are taking work in the University of Minnesota this summer, but it is thought that they will be starting on their return soon, if they expect to make the trip in Hunter's car.

Mule Fikes seems to like Tech better than ever this summer. He says that the boys are few, and the girls are plenty.

John R. Powell has been running a wheat truck near Dumas this summer.

No information has been received from Bob Taylor this summer, but his friends will probably be able to make up their own line.

MISS BOONE BACK
Miss Lalla R. Boone is back from England after the first of two years' leave of absence. Miss Boone made studies in history while abroad and will write her thesis for a Ph. D. degree in an American university next year. She was in Lubbock a few days ago.

Bill Brown, a Tech student of last summer, is working for the Waples-Platter Grocer company here.

MEET BUCK ATKIN'S

Buck is one of those wide-shouldered, hard-tackling Keen-humored birds you'll find at every university... Buck never dresses self-consciously smart... never wears the kind of clothes that call to you across the street... town boy's think he just "ain't got no pep in his clothes"... But he gets a second glance... and the gang on the campus, just some how, copy his choice in clothes...

Buck's clothes choice is directed toward—

Hart, Shaffner & Marx

He'd rave about them if it was proper to show enthusiasm about anything... comes back season after season for Hart, Schaffner & Marx... they are his idea of typical university type garments.

For school opening Buck favors Tilden—a 2 buttoner—with rolled sleeve-head—Plenty of room for his broad shoulders—athletic thinness in hip lines—high waisted free hanging trousers—in smooth finished clothes of dark grey—dark blue—dark oxfords—and dark rich browns.

Orientation

(Continued From Page One)

purpose of acquainting the freshmen with the school as a whole. The four deans of the college will be in charge. Then the boys and girls will divide and will be given information concerning the opportunities available in the various schools and departments of the college. The entire program on vocational counsel will be based on all obtainable records of pre-college experience of the freshmen and on various tests rendered during orientation.

Later in the afternoon will be an informal reception at the Home Economics Practice House.

"Joy Night," an all-freshman entertainment, comes Friday evening. The program, designed to make the freshmen better acquainted with each other and with their surroundings, is being worked out by Miss Ruth Pirtle and Professor W. R. Waghorne, whose abilities in this line are well known to old Tech students.

Saturday morning will be devoted to very practical suggestions on ways of making the most of college. This will include information concerning the best methods of study, including hints on listening to lectures, a new experience for many freshmen on the proper use of textbooks, on preparation for examinations, and on concentration of the mind. The use of the college library will be explained. Proper budgeting of time and money, which is little practiced by college students, will also be discussed.

Immediate problems confronting the new students will be considered on Saturday afternoon. These problems include matters regarding the transference of records, the plan of registration, the securing of employment, the finding of room and board, the regulations governing college life, the use of the sanitarium, and the taking up of extra-curricula activities.

Saturday night will be free for the new students to entertain themselves as they will. Theatre parties may be given.

Early Sunday morning will be devoted to a consideration of the place of religion in the life of the college student. This meeting will be dismissed in time for the freshmen to attend Sunday school and preaching services in the churches of the city.

At sundown a vesper service will be held on the lawn back of the Administration building.

COLLECTION OFFERED
 Mrs. A. B. Blackwell of Jayton, Texas, has offered her geological collections to Tech. The collection will be housed with the other Tech collections in the Chemistry building. Mrs. Blackwell made the offer through Dr. J. C. Granbery.

Blanche Groves attended W. T. S. T. C. the first term of summer school. She will teach near her home in Stinnett next year.

Forum Notice

During freshman orientation the Forum will follow its usual custom of meeting all the buses and trains on which freshmen will arrive.

Little and big sisters will again be in vogue. If you wish to have a "little sister" next fall, fill out the blank below and send it to Pauline Patterson, chairman of the little sister movement. The goal set for this year is a little sister for every girl in Tech.

The program of the Forum for the fall term includes as its outstanding events the Annual Reception to All-College girls, the big and little sister party, and the All-College Frolic. Miss Kate Pressley will again be chairman of the committee for the frolic and is to be assisted by Miss Sarah Michle as co-chairman. Miss Pauline Patterson, Rolsan, Texas.

I shall be glad to accept the privilege of being a "Big Sister" to some freshman girl for the coming year.

Military Training Gets Federal Help

Operation under Tech's latest federal aid in military training becomes effective at the opening of the fall term 1929. The minimum of three hundred cadets is expected. College credit for Military Science and Training has been recommended. The courses consisting of two hours theory and one hour laboratory each week, in connection with two hours of general reviews and ceremonies each month.

For the benefit of those interested the following information regarding uniforms is given. Regulation serge blouse, trousers, cap, and belt will compose the prescribed uniform. The economy and democracy of the uniform is being more thoroughly appreciated. Measurements and orders will be taken at the beginning of school. Students are advised not to purchase too heavily of civilian clothes for school wear.

New R. O. T. C. equipment has been received for use this fall. With this added equipment and the growing interest, it is expected that several reserve officers will be commissioned. Vacancies for cadet officers will be filled by competitive examination shortly after the beginning of school.
