'Y' Delegates Plan Trip To Annual Confab

Tech Christian Associations To Be Represented By Ten Students At Hollister, Mo., Convention

The Tech Christian associations are making plans to be represented at the 1931 conference of the student YWCA and YMCA of Texas, Missouri, Oklahoma and Arkansas, to be held at Hollister, Missouri, June 5 to 15.

According to information received by the YWCA and YMCA of the speakers this year will include: Henry P. VanDusen of Union Theological Seminary, New York; Kirby Page, editor of The World Tomorrow magazine; Dr. Paul Harrison, noted missionary physician from Arabia; Dr. Edwin A. Elliott of T. C. U. economics department; Bishop William Scaret of St. Louis; Miss Winnifred Wygal, who visited Tech last December, Harry Bunt, and Prof. R. M. Woods of Eureka Teachers College.

It is planned that at least ten students from Tech will attend the Hollister conference. Arrangements have been completed for private cars to take the delegates.

The conference will deal with the problem of Christianizing various aspects of our modern life: International relations; the college campus; the family; missions; race relations; industrial relations; race relations; and labor problems.

Survey Course Is Being Given

Each Girl Plans Her Ideal Home In Class Taught By Miss Jean Dorrel; Several Talks Are Given

A survey course for girls who wish to become interior decorators, stylist, and homemakers is being given this term by Miss Jean Dorrel in a course called in the college bulletin Applied Arts 431, Interior Decoration.

Two hours each week are spent in making trips to apartment houses, duplex apartments, and private homes of Lubbock people, and to the local furniture stores. The home management house on the campus is also used as a laboratory for this unusual course.

Plan Ideal Home As part of the term's work each girl is to plan her ideal home, selecting the exterior, the floor, and the color scheme for each room.

During the term the class will be given talks by Miss McIntyre, head stylist for the Simmons manufacturing company; Mr. C. E. Russell of the department of horticulture, on "Landscape Planning"; and Mr. A. Kleinschmidt, of the architectural department, on "Floor Plans and Building Materials."

Jack Hightower Is Proud Father

The lonely, dark, beat of Jack Hightower, campus night watchman, changed to sunshine last Wednesday night when little Alma Jean, weighing ten pounds and brimming over with smiles, entered the Hightower home.

Although Jack met disappointment when the doctor announced that the sixth member of the Hightower family was a girl, the friendly guardian of the college after nightfall is the mighty proud father of a giggling youngster.

Quite naturally, all Texas Tech is happy to hear that mother and daughter are doing nicely.

Chess Standing

Standing in the current chess tournament was announced recently by vice-president of the Chess club, Roddy O'Neill.

Table with 2 columns: Name and Score. Includes William Luce (1000), Lecher Williams (1000), Charles O'Neill (750), Riley Millard (500), Frank Ward (500), Roddy O'Neill (333), Ralph Glover (000), Tony Ulrich (000), Norval Mullins (000).

Interscholastic Meeting To Feature Numerous Activities Beginning On Campus Friday

Classes To Be Dismissed From 10 to 3 O'clock Tomorrow So Tech Students May Take Part In Program

Texas Technological college, both students and faculty, will join in assisting to make the district meeting of the Interscholastic league here tomorrow and Saturday a success.

Teams are expected from Andrews, Bailey, Borden, Cochran, Crosby, Dawson, Dickens, Floyd, Gaines, Garza, Hale, Hockley, Lamb, Lubbock, Lynn, Martin, Terry, and Yeakum counties. Lubbock and Plainview are the two cities represented.

Dr. P. W. Horn has announced that all classes between 10 and 3 o'clock Friday will be dismissed so that students may participate in the meeting.

Registration begins in the lobby of Administration building at 8 o'clock tomorrow morning. An entry fee of fifty cents will be charged each contestant with the closing hour for registration set for 10 o'clock. Contestants without badges, obtainable upon payment of fee, will be barred from participation in the contests. The one fee qualifies an individual to participate in all events.

The meeting includes a variety of events ranging from declamation contests to tests of athletic skill. Tech students will find that the program for the visiting students offers a wide range of interesting contests and are invited to attend all the events. There will be speaking contests, a track meet, debates, musical recitals, and volleyball.

Prof. W. A. Whitley Awarded U. of P. Spanish Fellowship

The University of Pennsylvania has given the Harrison Fellowship for graduate students of Spanish to W. A. Whitley of the Tech Spanish Department. This fellowship is worth approximately \$1,000 and carries with it the remission of all academic fees for the duration of the fellowship.

Decide To Go To Conference

Tech YMCA To Send Group To Cosmopolitan Club Meet At Camp Near Denver This Summer; Meet In May

The Texas Technological college Young Men's Christian Association will be represented at the fifth annual state conference of the Cosmopolitan club of Colorado, May 8, 9, 10, according to a decision of the YMCA Cabinet made at the meeting last Monday night.

The conference will be held in a mountain camp near Denver.

There are Cosmopolitan clubs in five of the colleges of Colorado and for the past four years these clubs have united in a conference on international and interracial problems. The membership of the clubs is composed of an equal number of American and foreign students. There are approximately 100 students from foreign countries in the schools of Colorado. Jack Boyd, secretary of the Tech YMCA, was the sponsor of the University of Denver Cosmopolitan club which originated the conference.

The delegates from Tech will be named during the next week.

Home Ec. Studies Look To Summer Session

Summer school Summer school is something to look forward to for the home economics students because of the interesting courses to be offered then. The regular freshman and sophomore courses will be offered but those of particular concern are the advanced courses which may be used to partially fulfill requirements for the B. S. degree and vocational certificate.

During the first term observation in a nursery school will be offered as part of the child development class. The school will be at the home management house under the direction of a fully qualified nursery school teacher. There is much enthusiasm among the students over this feature and many plan to take the course, others wish they could. It is hoped that many teachers throughout West Texas and also other sections of the State will take advantage of this opportunity and attend Tech.

Other courses offered the first term are: Home Economics education for teachers and those who plan to teach; demonstration methods in clothing in which the class will prepare illustrative material that will fill the needs of the teacher in charge of clothing units in the public schools. Another course of much interest is that in construction and renovation of household furnishings. This study deals with the practical problems of selecting, finishing, decorating and repairing linens and bric-a-brac in the home.

The second term only three advanced courses will be offered. Children's clothing and renovation of household furnishings. This study deals with the practical problems of selecting, finishing, decorating and repairing linens and bric-a-brac in the home.

The club is greatly indebted to Dr. and Mrs. Granbery for a very pleasant as well as a very educational evening.

DANCE ANNOUNCED Regular prices of \$1 for stags and 75c for couples will prevail at the all-college dance Saturday night in the Tech gym, according to students in charge. Dancing will be held from 9 o'clock until 13 o'clock. Frank Stone and his Colleagues will furnish music.

Know Every Turn They Teach At Slaton

Seniors in the school of home economics are authorities on exact distance from Lubbock to Slaton. All the teacher training majors have been over this route at least 82 times. These trips were not made for pleasure but to fulfill one of the requirements for a Vocational Smith-Hughes certificate. Each girl takes charge of one class for the 36 lessons. In this way supervised experience is gained which is very valuable to the girl when she begins her actual teaching. Miss Vivian Johnson supervises the work.

Some fun goes along with the hard work. As the car leaves at twelve o'clock it is often necessary to carry lunches. Great are the surprises that boarding house keepers can put in lunches. Then there are the people who stand and gaze at what is in the car and wonder as "Technological" could mean. After the first day of teaching many sigh and say "Only thirty five more days," then after the second day only thirty four and so on. However, as the end draws near certain students have been known to shed a few secret tears over leaving their school children in Slaton.

15 In Washington Mrs. Lloyd Russell '29, who will be remembered as Marian Sansom, is living in Washington, D. C. She and Mr. Lloyd Russell, also a Tech graduate, are exceedingly happy over their young son, Lloyd Jr. Mrs. Elmer Davenport, also a graduate of '29 who was Frances Ferguson, is located in Youngstown, Ohio, where Mr. Davenport is connected with the Trucon Steel company.

Among the graduates living in Lubbock are: Mrs. C. E. Moreman, '28, who was Lulla Belle Rushing before her marriage; Mrs. S. M. Lydal who was Miss Estelle Shepard and Mrs. J. U. Morton, who was Auvonia Huesteiler.

Several home economics graduates are teaching home economics in large high schools in the state.

Tech To Vote On Queen For Annual Event

Election To Be Under The Direction Of The Texas Tech Chamber Of Commerce; Petitions Circulated

Another queen, all hail ye, another queen. Students of Texas Tech will vote tomorrow and Saturday in a contest to elect the young lady who will represent the college here during the West Texas Chamber of Commerce convention, May 14, 15, and 16, in a pageant that is to feature the campus favorites do so by presenting a petition with twenty-five names to either Maddox or Raymond Pfleger today.

The pageant planned for this year will be similar to those held here in previous years, according to college officials. In as much as this city is holding its first West Texas Chamber of Commerce convention it is probable that the college will play a leading role during the three day meeting.

Civil Engineers Cast Vote For Barnard Dean As Proxy

Barnard Dean was elected president of the Civil Engineering Society at a meeting last Tuesday. Jimmie Kerr was elected vice president and Travis Parker secretary.

The Civil Engineering society was organized more than two years ago by the students of that department to promote interest and cooperation.

Members of the civil engineering faculty are sponsors of the organization.

After the social hour a business meeting was held during which the following officers were elected for next year: President, Jamie Ruth Shepard; vice-president, Anna Bass Arnett; secretary, Maurine Havis; treasurer, Ute Wolf.

The height of the entertainment was a visit to the home of Dr. and Mrs. J. C. Granbery. Here the girls had the opportunity to see many interesting and remarkable art objects, such as pottery, baskets, pictures, linens and lace. These were shown through the courtesy of Mrs. Granbery, who had collected them during her residence in Europe. Mrs. Granbery told in an interesting way of her travels abroad.

The club is greatly indebted to Dr. and Mrs. Granbery for a very pleasant as well as a very educational evening.

DANCE ANNOUNCED Regular prices of \$1 for stags and 75c for couples will prevail at the all-college dance Saturday night in the Tech gym, according to students in charge. Dancing will be held from 9 o'clock until 13 o'clock. Frank Stone and his Colleagues will furnish music.

Home Economics Grads Located At Various Places

All watch with growing interest and anxiety the graduates of various schools. It is always interesting to note to what extent students fulfill their plans made while at college. Graduates from the school of Home Economics of Tech have not only made themselves known in the field of teaching but several have actually put into practice what they learned. Also others have entered various fields of home economics work.

Miss Ella Mae Lyle, '28 is teaching in Lubbock high school and Mrs. E. M. Barnett, '28, formerly Marguerite Cross, is in the junior high school. Other graduates teaching elsewhere are: Jaye Brooks, Jacksboro; Lila Allred, Levelland; Floyd Anglin, Tahoka; Mary Hazel Hurn, Pecos; Oueda Middleton, Roby; Blanch Brown, Caddo; Bonnie Lee Cook, McAllen; Willie Hawkins, Troy; Mildred Street, Ft. Stockton; Nora Cooke, Wellington; Bettie Stuart, Parnell; Hattie Mounts, Wellington; Roxanna Ruth Ford, Dumas; and Mable Howell, Hedley.

25 Get Degrees This year there are 25 seniors to get their degrees. Sixteen of these girls are to receive the vocational certificates, while the rest have other majors. The girls to get the vocational certificate with their degrees are: Ruby Kennedy, Evelyn Jennings, Daisy Lockwood, Lula Mae Martin, Margaret Hervey, Pauline Hargrave, Jessie Walker, Eleanor Ragle, Leta Alyce Cross, Joeline Vannoy, Mrs. Gennie Nix Burford, Edith Kral, Lovie Warnock, Thalia Parker, Maude Edison, and Mrs. Lattie Mae Heath Ford. Other seniors are: Mrs. Louise Baird Edmondson; general home economics major, Oreze Treadaway, dietitian major; Mirene McClellan, clothing major; Carolyn Powell, dietitian major; Nannie Mae Gaines, general home economics; Dorothy Gleason, dietitian; Frances Lerner, clothing and Corene Ratliff, general home economics major.

Several of the girls already have their schools for next year, others have had good teaching opportunities offered them. Among those to teach next year are Pauline Hargrave who will teach next year at Shallowater.

Dean Margaret W. Weeks of the home economics school, attended the Southern Regional conference for home economics and agricultural teachers, which met last week in Tulsa, Oklahoma.

The home economics section was under the direction of Miss Edith Thomas, federal agent for the Southern Region and Miss Adelaide Baylor, Chief of the Home Economics Division of the Federal Board.

Representatives from all colleges and universities which have recognition in home economics were present. Dean Weeks represented the school of home economics, Texas Technological college.

Miss Thomas reported an increase of 10,230 students in vocational home economics in high schools over last year, also an increase in enrollment of adult classes of 3,429 students. She stated that the southern state showing the largest increase in Texas.

Probably in no section of the country has the vocational program in home economics benefited more largely through the passage of the George Reed Act than has the southern region. The policies which were set up for administering the Federal funds made available through this act were put into effect during the year 1929-30 and this made possible the expansion of the vocational program in home economics to a greater or less degree in each of the twelve southern states.

The meeting centered around the general theme of how to integrate the home economics curriculum so as to give the student the best possible training for home and family life.

"Yes sir," said the daughter of an overall manufacturer, "I ought to be on the track team. My dad makes the best jumpers in Texas."

Seniors Plan Spring Events

Special Torreador To Be Edited By Class On Senior Day; Dance Is Planned For June 5

Many events are carded on the spring term senior activity list, with the annual banquet, April 30, leading the roll. Senior day has been named by officials to be on May 21 and on that day a special Torreador, edited and written by Seniors, will be issued. On the morning plans are to have senior convocation while the afternoon will be devoted to various other activities.

The seniors will give their annual dance June 5, the night after all examinations are over. Saturday, June 6, the seniors will be entertained by President P. W. Horn and a reception is planned on the lawn south of the Administration building.

Sunday, June 7, is the commencement session and on the following day the seniors will receive their diplomas.

Home Ec. Club Is Entertained

Use Open Air Fireplace To Roast Weiners And Marshmallows; Business Meeting Follows Social Hour

The home economics campus was the scene of a gala affair Wednesday, April 15, when the Home Economics club used their open air fireplace in roasting weiners and marshmallows.

After the social hour a business meeting was held during which the following officers were elected for next year: President, Jamie Ruth Shepard; vice-president, Anna Bass Arnett; secretary, Maurine Havis; treasurer, Ute Wolf.

The height of the entertainment was a visit to the home of Dr. and Mrs. J. C. Granbery. Here the girls had the opportunity to see many interesting and remarkable art objects, such as pottery, baskets, pictures, linens and lace. These were shown through the courtesy of Mrs. Granbery, who had collected them during her residence in Europe. Mrs. Granbery told in an interesting way of her travels abroad.

The club is greatly indebted to Dr. and Mrs. Granbery for a very pleasant as well as a very educational evening.

DANCE ANNOUNCED Regular prices of \$1 for stags and 75c for couples will prevail at the all-college dance Saturday night in the Tech gym, according to students in charge. Dancing will be held from 9 o'clock until 13 o'clock. Frank Stone and his Colleagues will furnish music.

Home Economics Girls From Over State To Be Here For Homemaking Rally Next Week

Expect 500 To Attend Fete Which Will Be Held From April 30 To June 2; Rates Offered By Railroads

Approximately 500 girls from all parts of the state are coming to Lubbock to attend the annual Homemaking Education Rally which will be held here April 30 to May 2.

The Homemaking Education Rally developed from the State Girls' Clothing contest which has been conducted by the Home Economics division of the State Department of Education annually for 11 years.

The new name was adopted this year since it covers the enlarged program more satisfactorily. The coming rally will include the State meeting of Home Economics clubs as an integral part, feature additional phases of home-making, and place greater emphasis on the educational influence rather than the contest element. The entries are in two divisions; individual consisting of projects in child care and guidance, clothing and posture, foods and hospitality, household decoration and furnishing, and group entries composed of essays on saphores, layettes, and publicity portfolios. Extra training will also be given in hotel etiquette.

Marrs Conducts The convention is conducted under the supervision of S. M. N. Marrs state superintendent of public instruction. Miss Lillian Peak, state supervisor of home economics education, (who developed the original plans for the clothing contests), Miss Bernice Mallory, assistant state supervisor of home economics education and Mrs. W. A. Craddock, secretary. The local steering committee composed of Mrs. Walter P. Jennings, chairman, Mrs. Margaret W. Weeks, Miss Gertrude Daniels, Mrs. W. W. Royalty, and Miss Blanche Bean, with the assistance of the home economics faculty of Texas Technological college and Lubbock high school will handle the rally here.

The majority of its meetings will be held at the Hilton and Lubbock hotels.

To Have Banquet Additional entertainment features will be a banquet at the hotel, a tea served by the Tech school of home economics in the home management house, an automobile tour over the city during which the girls will be shown through Texas Technological college and the new high school, and various other programs.

All high schools in the state offering home economics are eligible to enter, the schools being divided in four groups according to their enrollment. Each school is entitled to four contestants, one of whom shall serve as a delegate to the state club meeting and is urged to participate in as many types of entries as possible. The girls in each school are accompanied by a chaperon, usually the teacher. Besides these, other guests are welcome to the rally.

Special rates are offered by the railroads and the Hilton and Lubbock hotels.

On Winning Team Of the four teams entered in the contest O. Cunningham's team placed first. Those composing Cunningham's team are: E. Baker, W. Pendleton and H. McArthur.

The judges of the contest who were announced in last week's Torreador were R. B. Davis and F. G. Blackmon.

P. G. Powers, a senior in the aggie school, was superintendent of the contest, and B. E. Snyder and T. E. Limer were clerks.

Senior Engies Borrow Big Amount From Society Fund

At the last meeting of the Engineering society it was announced that the society's loan fund had loaned more than \$700 to senior students, who are members of the Society.

The loan fund, which was established two years ago, had shown a remarkable growth. It is open to senior students of the society. Funds are secured through dues and freshman chemistry deposits.

Officers of the Society state that when the growth of the fund is sufficient that it will be open to Junior members as well as to seniors.

Advanced Nutrition Class In Home Ec. School Experiments With Rats

Dean Margaret Weeks' class in advanced nutrition is carrying out some experiments on white (albino) rats, showing the effects of certain diets on the health of the rat. The rats are chosen as experimental material because they react to certain diets in much the same way that human beings do, save that in their life span thirty days equals one day in the man's life, thus affording a method of observing the equivalent of several human generations in a short time.

Experiment With South The rats are four in number, were twenty-three days old at the time the experiments began and are fed the following diets. Rat number one is being fed the "typical American diet," consisting of bread, meat, potatoes, sugar and salt. He is known as "Tippy." On April 4, he weighed 41 grams and now weighs only 42 grams, proving that this diet is lacking as there is practically no gain. Rat number two is being fed this same diet plus milk, carrots and spinach. This is a very good diet, as proved by a gain from his original weight of 39 grams to 55 grams. He is known as "Carrie," emphasizing the carrots in his diet. Rat number three is given cage food consisting of cornmeal and salt, plus milk, and hence is called "Calle" because of the calcium content of the milk. "Calle" has gained from 41 to 69 grams showing how milk can supplement other foods in the diet. "Caffey," rat number four, is so called owing to her diet of cagefood plus coffee which contains caffeine. "Caffey" only weighs 45 grams, having gained one gram only. "Caffey" has very little vim, while "Carrie" is full of pep. "Tippy" is very nervous, while "Calle" has a voracious appetite.

These experiments are typical of experiments which can be carried on in high school and which will greatly add to the interest in home economics classes.

What we need is fewer candies and more self-starter novelties.

Home Economics Girls From Over State To Be Here For Homemaking Rally Next Week

Expect 500 To Attend Fete Which Will Be Held From April 30 To June 2; Rates Offered By Railroads

Approximately 500 girls from all parts of the state are coming to Lubbock to attend the annual Homemaking Education Rally which will be held here April 30 to May 2.

The Homemaking Education Rally developed from the State Girls' Clothing contest which has been conducted by the Home Economics division of the State Department of Education annually for 11 years.

Amendments To Be Voted On Wednesday

Qualifications Of Candidates For Publications May Be Changed; Convocation Announced By Council

The Student Council has called a convocation of all students for next Wednesday morning to vote on amendments to the student association constitution.

The amendments are as follows: Qualifications of Candidates for Editor of La Ventana: 1-Must be senior at time of taking office and must have 9 terms at Tech. 2-Must have C average on grades of last three terms. 3-Must have had previous experience on La Ventana or The Torreador staff.

The editor shall receive forty dollars (\$40.00) per month as long as his time is restricted to La Ventana. Qualifications of Candidates for Editor of The Torreador: 1-Must be a junior with six terms at Tech at time of taking office. 2-Must have C average the last three terms at Tech. 3-Must have had C average on sophomore English. 4-Must have had previous experience on The Torreador, La Ventana or have had previous journalistic experience.

Compensation: 1-The Editor shall receive forty dollars (\$40.00) per month so long as his time is restricted to The Torreador. 2-The Torreador shall be allowed fifty dollars (\$50.00) for the purpose of buying cuts for use in the paper. The fund shall be controlled by the editor.

The Qualifications of Candidates for the Business Manager of La Ventana and The Torreador: 1-Must have sixty-five (65) term hours and have spent six terms at Texas Tech. 2-Must make bond. 3-Must make monthly report of financial condition of Torreador and La Ventana to the Student Council and to the Publication committee.

Compensation: 1-The Business Manager of The Torreador shall receive fifteen per cent (15%) of all money received for advertising. The money shall be paid at the time of collection. 2-The Business Manager of La Ventana shall receive twenty dollars (\$20.00) per month and fifteen per cent (15%) of all money received for advertising. The compensation shall be paid at time of collection.

Head Cheer Leader The Head Cheer Leader must have spent two years at Texas Tech. before time of taking office and there shall be no freshman Cheer Leader.

Students are urged by the council to read and study these amendments so there will be no delay at convocation next Wednesday.

Lubbock Firm Is Awarded Contract

The contract for the new power plant has been given to W. G. McMillan of Lubbock, and the work is due to start as soon as the weather becomes warm enough. The old plant will be torn down and work will begin on a permanent fire proof building of brick, stone, and concrete. The boiler will be ready for use by the opening of the fall term of school. In addition to the power plant proper, there will be an extension of all water mains and tunnels for steam and water lines will be installed from the west end of the Administration building to the Agricultural building and to the stock pavilion.

Miss Helen Stephenson of Happy was week-end guest of Miss Edith Bandy of College Inn.

Election Dates To Be Divided

Student Council Officers Will Be Named At Convocation On May 6, While Other Elections Will Be May 14 and 15

Spring elections have been announced as follows: President and vice-president of the student body, Secretary-treasurer, student representative to the athletic council, and head cheer leader will be held May 6 in the gymnasium. This is the date set by the constitution of the student association.

Students will cast their vote for Editors and business managers of both The Torreador and La Ventana on May 14 and 15.

THE NURSERY SCHOOL

Special Home Economic Editorial

The Nursery School is something new on the educational map. It is not taking the place of the kindergarten, but rather, supplementing it as much younger children are admitted from 2 to 5.

The philosophy on which the nursery school is built is that life education begins in infancy. In this school the child develops right habits of eating, of sleeping, of dressing, of playing, of obedience, of self control, and independence, of play and of work.

Mental health is acquired through sheer force of habit. From this experience with other children the child receives the fundamental kind of social education.

Perhaps one of the valuable services of the nursery school is the educational aid to parents. Child training is an art which has to be developed. More and more mothers are coming to realize that the educator and child psychologist can help the parent in the important work of directing children. Mothers whose children are enrolled in the Nursery School observe the methods used there. There are also conferences and discussion groups for parents where child training problems are discussed.

Another service of the Nursery School is that it furnishes a place where home economics students may observe and study children. Training for homemaking is not complete unless work with children is included.

For the first time a Nursery School will be started on Tech campus. It will be in charge of a well qualified director. Already many mothers have reserved places for their children. The home economics students are most enthusiastic over the addition to the curriculum.

ENGINEER'S SHOW

The annual Engineer's show is only a few weeks off. As an attraction of wide interest, the show in years past has drawn large audiences not from the Tech student body alone but people from nearby towns. This year's show has an even broader drawing range. The plans are to hold the show during the Chamber of Commerce convention to be held here in Lubbock May 14, 15, and 16.

The entire school should cooperate with the engineers to make the attraction a success. One way to help will be to boost the show and in that way increase the attendance. If the rest of the school will assist in any way possible it is certain that the engineers will leave nothing undone to put the show over in a creditable way.

CREATIVE THINKING

Hobbing through college is not realized by the student to be the same as living off of somebody else in later life. With a careful study of the situation we find that the two are somewhat parallel. Using material that belongs to another person is not in one sense getting the most out of college. On the other hand students are taught the happenings and writings of other men. Even as the college student may get things wrong the authors of our text books are only humans and they, too, might hit upon the wrong trail. This is a bold statement but it has happened.

Therefore if students were graded more carefully on the ideas and thought that they give during recitation, even though it does not correspond with the book, individualism and characteristic thought might be strengthened. Students would answer more promptly and not hesitate for other students to answer for them. It is embarrassing to the student who faces the problem for the rest of the class giving to laugh by chance he gets the answer wrong. The professor sometimes shows signs of distaste if the students fails to give the book's exact quotations.

Encourage students to answer although their answers may be wrong. Give the student credit for thinking because it is his answer and not somebody's nearby. If this be done it is believed that hobbing through college will decrease.

Jabbering Jingles: Jack Durham star baseball player, Jake Bourland self-made authority on economics, Floyd Woolridge ginning along a dance floor, Jean Jennings dashing madly to her music. Co-eds admirably pretty in flowery pictured cotton dresses, according to male residents. Don Micker's all college dances, Laverne Yovell and Christine Carter on the stage. A good title for their act would be—"Tumid," Chuck Williams impersonations of Cliff Mole, trombonist.

Half asleep crowds scrambling furiously to grab a bite to eat and make their 8 o'clock class. Cup of coffee and roll include the greater part of the morning meal. A cigarette and then off to class.

There is no use asking who has not seen the large double "T" on the gymnasium. It is too plainly blined work of several organizations were responsible for the masterpiece. The gym suddenly has become the center of attraction for campus gazers. Another improvement for the college community. Thanks to those concerned.

Some smiling co-ed thought that a sonnet was a small baby boy. She immediately became the leader of her class.

The senior banquet is being planned for April 30, according to officials of the class. As an annual affair the going out class gather in existence of college life. The one night during the year that seniors are privileged to say and think as they please. A great night for fourth year students.

And then after the banquet comes senior day. It is scheduled for May 21. On the same day The Toreador will be edited by James A. Strange, appointed senior editor. Another high spot granted the seniors.

One of the greatest advertisements for Tech will be the Engineer's show during the West Texas Chamber of Commerce convention to be held in Lubbock. Extensive plans are under way to make the attraction something worthwhile. According to officials of the show nothing will be left undone to make it a grand success. Students will be working on exhibits and the supervision of faculty members. All that can be done to perfect the show because it will be a great boost for the school.

Tom Connally To Speak At Meeting

Senator Tom Connally of Marlin has accepted an invitation to deliver an address at the Southwestern Journalism Conference in Austin, May 1 and 2. He will speak on "Free Government and Free Press." Journalism students of Tech will leave Lubbock Thursday morning, April 30, to attend the Press conference. About twenty-five students are planning to make the trip.

Aggie Creed

To live as gently as I can.
To be, no matter where, a man;
To take what comes of good or ill
And cling to faith and honor still;
To do my best, and let that stand
The record of my brain and hand.
And then, shall fortune come to me,
To work and hope for victory.
To have no secret place wherein
I stoop unseen to shame or sin;
To be the same when I'm alone
As when my every deed is known;
To live undaunted, unafraid
Of any step that I have made;
To be without pretense or sham
Exactly what men think I am.
To leave some simple mark behind
That I have lived for men to find.
If enmity to aught I know,
To be an honest, generous foe;
To play my little part, nor whine
That greater honors are not mine.
This, I believe, is all I need
For my philosophy and creed.

Girls no doubt have a fondness for nifty clothes but they are not always wrapped up in them.

EMBARRASSING MOMENTS

Clothing Students Make Fabrics For Class Study

BY FRANCIS LARMAR

The students in the Clothing Department are developing unusual and interesting types of work.

In one division of the course there is a thorough study of textiles being made. Some materials are actually made by colonial weaving methods. The fabrics woven are made into various useful articles such as tailored purses, coverlets, scarfs, jackets, and upholstery materials. These articles may be made to order by notifying the head of the department or Ganie Nix Burford.

An appreciation of the ancient art of tapestry is brought out through the study of the history, the weaving of small pieces which are brought to the campus by this department.

Cotton and Linen Studied

A complete study of the construction and suitability of fabrics is offered in the freshman textile courses. Cotton and linen materials are also made up in various forms of wearing apparel by beginning classes. Accessories suitable for all occasions and individuals occupy a part of the study of clothing. These accessories are essential for the well dressed woman. Construction of the more difficult and expensive fabrics such as silks and woolsens is taken up in the sophomore courses. Through the knowledge of historic costume and design principles these fabrics are decorated by means of embroidering and tailoring in junior and senior courses.

The dressing of the child is important in carrying out proper clothing ideals. A study of the principles and construction of apparel for infants and older children is an item in the course of clothing study which is looked forward to by people familiar with the department as a means of securing attractive and well constructed clothes for their children.

The commercial pattern is the largest source of line and design for the dressmaker. Classes for the advanced student are conducted in the hocking and draping of special patterns and designs. These methods are carried on through the use of inexpensive cotton material, in which patterns are perfected for a certain individual. This is largely a

Home Ec Class Plan Dinner For Press Meeting

Dean Weeks recently received a letter from the Texas club of Dallas asking that the Foods and Nutrition department of the School of Home Economics, Texas Technological college submit a menu for the Texas Products Dinner which is to be given for the Texas Press Association in San Angelo on the night of June 11.

Miss Twyford's Meal Planning and Table Service class was selected by Dean Weeks to plan the menu. The menu planned is as follows:

Grapefruit and Orange Cocktail; Bouillon, Crackers, Celery, Olives; Roast Leg of Lamb, Mint Jelly; Parsley Potatoes, Glazed Carrots; Buttered Brussel Sprouts; Rolls; Cucumber Lettuce Salad; French Dressing; Apricot Sherbet, Fancy Cakes, Demi Tasse; Salted Peanuts. Every food on the menu is grown in Texas except the coffee and olives. However, it will be possible to select a brand of coffee that is roasted and packed by a Texas firm.

Dead Language Is Brought To Life

A dead language came to life recently in a lighted room before the Greek class at the University of Pittsburgh when Prof. H. S. Schriber, head of the Greek department, spoke the famous Greek word "Eureka" into a new device, developed in the Westinghouse Research Laboratories.

As the word "Eureka" entered the device, curious lines very much like an animated movie wriggled from left to right across a screen about the size of a large plate. These lines showed the "high" and "low" spots of the professor's voice. They made it possible for ob-

CUTTING CLASSES EXPENSIVE FOR TOWN.—It cost 43 cents to cut a class at Texas Christian University!

At least that is the way an enterprising student mathematician has figured out. This student totaled the cost of a year's schooling, computed the number of class periods in a school year, and by the simple expedient of dividing the latter into the former arrived at the cost per class hour.

Hazel Gruver Heads A. W. S.

New President Represents Tech At Conference Of Women Students In Ann Arbor, Michigan

Miss Hazel Gruver, junior in the School of Home Economics, was elected president of the Association of Women Students in the annual election of officers held Friday, 19. Other officers elected were Miss Alice Beckett, Liberal Arts Junior, vice-president; and Miss Ruth Thompson, Home Economics freshman secretary-treasurer.

Miss Gruver left Monday for Ann Arbor, Michigan where she will attend the Conference of the Inter-collegiate Association of Women Students. There will be representatives from the leading colleges of the United States. The theme of the conference will be the adjustment of the college girl to campus life. The point system will be one of the main problems discussed.

Don't grumble, don't bluster, don't grumble and don't shirk, Don't think of your worries, but think of your work. The worries will vanish, the work will be done. No man sees his shadow who faces the sun.

"Here's where I lose ground," said Nancy as she slid into a bathtub.

BOLTS

8 times as strong under super-heat as "before the war"

Trace the evolution of the bolt since 1913 and you trace the amazing post war advance of power and industrial processes... and the Crane contribution to help make it possible.

In carefree days "before the war," a steel bolt was a steel bolt. It was made of any easily obtained steel that forged easily and took threads well. Industry moved forward... stronger bolts were asked for. Ordinary steels were improved to tensile strength of 45,000 pounds. Not enough. A bolt with forged-on head and tensile strength of 50,000 pounds was developed. Still not enough. Cold rolled steel bolts with tensile strength of 80,000 pounds were offered. They had a tendency to snap.

To fully meet the demands of modern high pressure and temperature technology, Crane Co. brought out for its cast and forged steel materials their Triplex steel stud bolts, of chrome nickel steel with tensile strength of 125,000 pounds. The limit is not yet. Even now, Crane Co. can supply bolts for valve bonnets and flanges with tensile strength of 140,000 pounds and retaining strength at well past 1000° F.

By exhaustive laboratory investigations, long carefully charted creep tests, detailed study of service conditions, Crane metallurgists have helped this development. With the same scientific methods they have as strikingly improved bodies, bonnets, discs and seats, stems, packing boxes... so that Crane valves and fittings can be supplied for higher pressures and temperatures than have yet been commercially projected.

Rifle Match Won By Tech

Marksmen Defeat School Of Mines Team By Score 848 To 845; Ord High Point Man Of Meet

In the last scheduled rifle match of the season, the Tech marksmen defeated the Texas School of Mines team from El Paso by the score of 848 to 845. The firing took place on the Tech rifle range east of the city and was of the shoulder to shoulder type. The mines team coming up from El Paso for the event. Team members and their score on the 200 yard calibre 30 range are: Mines, Mulcahy, 138; Dupree, 139; Lockridge, 139; Ord, 151; White, 144; Faust 134. Texas Tech, Chapman 150; Rogers, 144; Langford-Ayres, 130; Hudson, 119; Kuhn-Bedinger, 147; McWilliams, 133. Due to the fact that time was short, Langford, Ayres, Kuhn, and Bedinger were unable to complete their firing and it was agreed that their scores would be counted together.

Four positions were fired, ten shots each prone, sitting, kneeling, and five shots standing. High point man for the meet was Ord of the Mines team with a score of 151. Chapman of Tech was high man for the Matadors with a score of 150.

GETTING OUR NAMES IN THE PAPER

Mona Gowen, dimpled and all, was a striking figure in her role as a shaman queen last Saturday night. Of course we really think the chivalrous Mr. Seymour added to the dignity of the occasion.

Ken Hart has a way all his own of getting his name in the paper. Your add in the Avalanche certainly helps, Ken. Looks like we are going to be short on sport news for awhile unless the naughty burglar returns Ken's typewriter.

Chuck Williams says that families are a boon to his social welfare. See Chuck for further announcements.

John Chatfield used to cover a lot of ground but now he covers a lot of motorcycle.

Carrie Lodal, big smoke stack of the Engineering show, is hearing for the limelight with his plans for the attraction sponsored by his school-mates. We hear that Carrie, Tommy Morris, Winnie Wardell, and Willie Fry are booking a great show for the natives.

Evelyn Heatley is just a freshman but my my, how that brunette gets over. Looks like little Eva is going to occupy the social spot light before she graduates. Nice going old kid, old kid.

Polly Barrow advocates peroxide for those who would like to crash the exclusive circle of blondes. Of course, dear readers, Polly is a natural blonde—and how.

Veta Stafford is a lucky girl. Five of the nicest boys in school room at her home. Leave it to Veta to get the breaks.

Horace Dean is certainly developing into a regular cut-up. The last we heard about the "jack of all schools" is that he has taken Fish Duke in hand and made the boy just off a book or two.

Will Rogers made a big hit in "Connecticut (guess the spelling is Jake) Yankee in King Arthur's Court" but how much better the picture would have been if Walter Burns had played Will's part.

Next week "Colonel" Sparkman will tell us how he was promoted from buck private in the rear rank.

Freshman Queen Crowned At Sixth Annual Dance

Wrong Bait Fish Refuses To Bite

Matt Seymour is a free man today. The rosey checked, curly headed, big fish of the frosh class wiggled his tail, waved his fins, and vibrated his gills to evade kidnaping. According to the story Seymour told around the Toreador office, he eluded a party of big bad men last week in their attempt to break up the freshman ball by kidnaping him. Seymour out ran his pursuers. Seymour attended the fish dance. The fish dance, they say, was a success.

The moral of this story is: You must have a well baited hook to catch a fish.

FORT WORTH, April 23.—Paul Martin, sophomore in Texas Christian University, won second place in the oratorical contest at the recent Phi Kappa Delta regional meet in Waco. His subject was "The Constitution."

Courses are being planned for young people in the Standard Training school at the First Methodist church, May 3 to 6. These will be taught by Dr. E. O. Harbin, specialist in recreation from Nashville, and Dr. J. Richard Spann, pastor of the St. Paul's Methodist church at Abilene, and specialist in Young People's Organization.

A "Business Course Night" will be featured at the Young People's Open House in the Large Hall of the First Methodist Church Sunday evening at 5:45. This is a popular gathering center for young people on Sunday evening.

"I'm fed up on that," said the baby as he pointed to his high chair.

to the high office he now holds in the military world.

Wonder what door knob bumped into Jack Durham's eye?

And now for the little surprise—believe it or not: Mary Beth did not write this column. It's up to you to guess the shy little coed who pinch hit for our friend Sheeley.

Princess Monna from the house of Gowan of Estelline was crowned Queen at the sixth annual freshman dance given at the Uptown dance palace Saturday evening. The queen's escort was Matt Seymour, of Waco, president of the class.

The ball room resembled an imagined bottom of sea colored in an imitation of sea weed. Russian thistles were hung about the ball-room. White and green streamers and varied colors of paper fish hung from the top of the dance palace. In front of the orchestra pit appeared an immense green fish.

At 10:15 o'clock, six boys brought in a large platform bearing a large shell covered with white and lined with green. Matt Seymour, dressed as King Neptune, preceded the queen. He carried a three pronged spear with which he pried open the shell to reveal the queen.

Miss Gowan wore a white chiffon evening gown. Her only ornament was a string of crystals.

Lonnie Langston, one of the freshman sponsors, crowned the queen with a crown of brilliants.

Those in the court were Miss Evelyn Heatley and Walter Storrs; Miss Tina Alexander and Homer Eali; Miss Josephine Carraway and Felix Ballenger; Miss Elinor Aycock and Edgar Hull; Miss Ruth Norman and George Cowan; Miss Dorothy Griffin and Drew Dickson; Miss Mildred Price and Sam Spaeck; Miss Harriet Roach and Jess Rogers; Miss Beatrice Casteel and Worth Gamel; Miss Onal Parmer and Charles O'Neill; Miss Harriet Swaim and Andrew Freeman; Miss Louise Garrison and Henry Long; and Mrs. Burdett Cox and Lonnie Langston.

Representatives of the sophomore class were Miss Jean Shelley, Jennings and Theo Hazelwood; from the junior class, Miss Virginia Bacon and Robert Taylor; and from the senior class, Miss Emma Jean Martin and James H. Dallas.

Mrs. Mary Doak, Mrs. R. M. Chitwood, and Mr. and Mrs. Fred W. Sparks were the special guests of the occasion.

Music was furnished by Frank Stone and his collegians.

There were about 300 guests in attendance.

Rev. J. O. Heymes' theme for Sunday morning worship at ten fifty at the First Methodist church is "Workman Unashamed."

Water—Plenty of Water—When an Axtell Ever-Oiled Windmill Is Used

It runs when other mills stand still; it runs when you are asleep. It will keep your tanks filled, and that to a ranchman is the difference between prosperity and adversity.

It is different from other mills as follows: It has a single heavy cut gear and pinion which reduces gear friction wear and complications 50%. It does away with wrist pins, one of the most troublesome parts of a windmill.

It has bent crankshaft, running on roller bearings. Turntable and rod swivel also operate on ball bearings. It has a positive gravity oiling system.

ACO Towers are made of heavier material and have a wider spread at the base than usual.

The result of 47 years in the windmill business.
