

Serving as Student Court justices for the coming year are Tom Jones representing the Arts and Sciences Division; Bill Hudson, Engineering; Chief Justice Brad Crawford; Ed Wilkes, Agriculture;

Grey Lewis, Business Administration, and Beverly Garner, Home Economics. Appointments to the six-member judicial body were announced today by President Glen Cary.

## Crawford Heads Court, Five Associates Named

By HAROLD CRESWELL

Brad Crawford, senior pre-law student, is the new Texas Tech Supreme Court Chief Justice, President Glen Cary announced today. Chief Justice Crawford and five associate justices, Beverly Garner, Home Economics; Ed Wilkes, Agriculture; Grey Lewis, Business Administration; Tom Jones, Arts and Sciences; and Bill

Hudson, Engineering, were appointed early this week by Cary with the consent of the Student Council and Dr. William Davis, head of the government department.

Patterned after the Supreme Court of the United States, the Student Supreme Court has the duty of rendering opinions in cases of constitutional controversies. It advises the Council as to the constitutionality of proposed legislation prior to its passage by the Council.

A majority vote of the Court, and/or the submission of a written petition signed by at least 50 members of the Student Association (all students are members) declares an act unconstitutional and void.

The court holds the power of removal of Student Association officers. Causes for removal are repeated absences from meetings, malfeasance, neglect of duty, and improper conduct.

As in cases of unconstitutionality, charges for removal must be instituted by petition signed by at least 50 members of the Student Association. The person charged is given an open hearing and the right to defend himself.

a game ticket, is \$16.15. Tickets can be purchased at the Student Council office from 2 to 5 p.m. from any student council member, or at the Union.

Girls making the trip must have a letter of permission from their parent or guardian on file in the office of Dean of Women, Florence Phillips before leaving.

Special precaution is being made to insure that only Techsans ride the Houston special. Each student must present his ID card and his ticket receipt at the time of

## HOUSTON TRAIN OK, DEADLINE EXTENDED

Thanks to the band, ROTC, and over a hundred students, enough tickets have been sold to reserve a special train to the Houston football game, Don Dilley, student association vice president, said today.

The minimum amount of tickets required was 325, and this goal was passed early in the campaign.

"Since the train has been assured, tickets will be sold until Oct. 21, the day of the trip," said Dilley. Cost of the round-trip, plus

## Parking Information To Be Out Tuesday

Professor E. Richard Heineman and his Traffic Committee are preparing an important announcement concerning traffic on the campus.

The full announcement will appear in Tuesday's *Toreador*.

## Frosh, Sophs Pick Presidents

Jimmy McLaughlin this morning began a nine-month term as president of the freshman class following his victory yesterday over Jack House.

The race was one of the closest in yesterday's run-off election, in which new class officers and representatives were chosen.

McLaughlin polled 181 votes to House's 165. As the polls closed yesterday, these additional results were recorded:

Freshman Vice President Richard Estes tallied 212 votes to win over Bill Alexander's 129. Pat Rainer with 209 votes was elected to the post of secretary of the freshman class defeating Jackie Reeves, 138. Freshman AWS representative position was won by Jean Elliott, 73, against Barbara Batton, 65, and Anita Hope, 45.

In the Sophomore runoffs Rob Brown, 144, was elected president, defeating Boone Brackett, 120. For secretary, Donna Abraham, 124, defeated Mary Jo Cappleman, 124. Mary Kay Holmes, 50, defeated Jane Ann Whitfield, 45, and Elizabeth Dinwiddie, 38, in the AWS representative race.

Junior Class runoffs resulted in a win for Doris Wampler, 127, over Margaret Ammer, 87, for class secretary. Sylvia Young, 49, topped Carol Chaney, 41, for AWS representative.

Senior class officers were all selected at last week's primary.

In the Division representatives runoff, Averill Brinkman, 52, downed Mary Frances Wiece, 44, and Dorcas Morrison, 26, in the Home Economics Division. Max Merrell, 126, beat Truman Powers, 111, in Engineering, and Joanne Holmes, 115, won over Bill Parks, 65, in Business Administration.

## LIBRARY ANNOUNCES HOURS ON SUNDAY

Because of continued student demand the Tech library will remain open from 2 to 5 p.m. each Sunday, Librarian Ray C. Janeway announced today. However, it will be closed on Sundays falling during academic holidays, he said.

SWEETHEART . . . TEENY MC CARTHY

## Teeny McCarthy Is Miss Sabre Flight

Teeny McCarthy, freshman from Houston, is the first sweetheart of Sabre Flight, drill team of the Tech Air Force ROTC unit. She was elected over two other candidates at an initiation service Tuesday night.

Miss McCarthy will march with the Sabres during their federal inspection and during other official functions. The color of her cape will distinguish her from the sweethearts of the other three squadrons.

As Sabre Flight sweetheart, Miss McCarthy will compete in the "Miss Topflight" contest later this year. "Miss Topflight" is chosen by the entire unit from the four squadron sweethearts.

An elementary education major, she came to Tech because her friends "brought such good reports back to Houston after their first year at Tech."

Glenda Prangle of Merkel and Jean Elliott of Houston, both freshmen, were the other two nominees for the honor.

The initiation ceremony and sweetheart presentation were presided over by Cadet Capt. Walter McDonald, assisted by Cadet Sgts. Lewis Sitterly of Lubbock and Jean Paul of Wichita Falls. The squadron officially accepted 32 new members into the unit.

Capt. F. J. Richter, USAF, is advisor to the flight, and T. Sgt. Don Rider is his assistant.

## Times Have Changed As Tech Looks Over Thirty Year History

Texas Tech this week marks 30 years of progress from a small prairie college to one of the state's largest and most comprehensive educational institutions.

Perhaps no more fitting symbol of West Texas' rapid growth can be found than this sprawling educational giant which today has 7,149 students bustling over a considerable part of its 2,008-acre campus.

It began Sept. 30, 1925, as a state-supported educational outpost with five buildings, 51 faculty members and 1,043 enthusiastic students who swamped the meager facilities available.

The late Dr. Paul W. Horn was its first president. Makeshift classrooms had to be

improvised to meet the unexpectedly large enrollment and the first student convocation was held in the open prairie.

There were no paved streets on the campus and the only hard-surfaced right-of-way in the area was Broadway, Lubbock's main street, which ran to the campus gates. There were no traffic lights and travel was hazardous, particularly after a rain.

Only President Horn's office and one or two other administrative offices had telephones.

There were no college dormitories, so Lubbock residents volunteered space in their homes to help the first students get their start.

The housing problem and the enthusiasm are much the same today, but both have grown, along with Tech's facilities and program.

Lubbock resident's again were called on this year to provide living accommodations for Tech students for the College's dormitories had room for only 2,700 or so of the more than 7,000 students.

The five original buildings — administration, engineering, home economics, livestock pavilion and dairy barn — have multiplied to 49 structures, including some of the most modern and complete in the state.

The 50th building, an infirmary, is under construction and the 51st,

a new gymnasium, is being planned.

Tech's well-founded Divisions of Arts and Sciences, Agriculture, Engineering and Home Economics have continued to grow and to them have been added a Division of Business Administration and a Graduate School. Tech currently has 40 academic departments and offers work leading to the master's degree in 30 areas and doctor's degree in six.

Tech's present surroundings also bear testimony to West Texas' progress. The college was founded on Lubbock's outskirts. To the West stretched the bald prairie as far as the eye could see. Only two trees were found on

the campus originally and they both eventually died.

Today the College's 2008-acres are surrounded by well-built residences and shopping centers, the products of a prosperous economy and appealing culture which Tech has done much to develop.

Tech's 30th anniversary finds it with almost 100,000 alumni and former students residing in all parts of North America and in many foreign countries.

The anniversary also heralds a future worthy of Tech's tradition so far. Officials expect more than 15,000 students by 1970 and are asking for a \$20-25 million building program to provide facilities for them.

### Ancient Monks Would Be Amazed . . .

The ancient monks, who sat hour after hour laboriously copying manuscripts into mammoth volumes, would be amazed if they could come into the average college classroom today during a quiz. Here they would see tiny scraps of paper seemingly appearing from nowhere with almost microscopic writing on them. What would probably add most to the monk's amazement would be the enormous amount of information each contains.

The "cheat sheet" is with us again. It's nothing new. Most of the methods of cheating now in use are those "tried and true" gimmicks that were ushered in with the advent of the examination. Even the reasoning behind their use is not new.

Let's take a look at what one gets out of it. On one side the only asset is a better grade, and although a good grade is desirable the knowledge it represents is generally considered more important.

On the other side one encounters a multitude of liabilities. Expulsion from a particular class would more or less defeat the original purpose of the "sheet." If a class is graded on the curve, you can hurt your "buddy" who has studied and perhaps spent many hours in preparation for what you can ruin in five minutes. You penalize yourself when you give others a head start in knowledge after graduation. It all boils down to one question. Is it worth it for one grade?

Some people get a "kick" out of cheating. Some think that they are "smart." Some feel that they are not intelligent enough to pass without it. Some are just lazy, but they all fall into one category—Cheater.

The good man doesn't have to cheat. The man who must is in the process of sentencing himself to mediocracy. Feel sorry for him.

—Bob Rooker

### Date Lists: To Be Or Not To Be . . .

To run or not to run — that is the question. William Shakespeare's famous quotation has been paraphrased to apply to a modern campus problem: Should date lists be run in a college newspaper?

Date lists are those long lists of names, usually in microscopic, eye-straining type, that frequent society pages of campus newspapers, and inform the student body who was seen with whom at the latest fraternity drag or sorority sweetheart fling.

We are putting the problem to you: Should The Toreador run date lists on its society pages?

It is sometimes nice to know just what coed is going with what campus male. It is also, on occasion, embarrassing, especially to girls.

Date lists, if run, will take up places on our society page that could be used for news of more club activities, for features on interesting personalities, for fashion, beauty and decorating tips.

We'll let you answer the question for us by filling out and sending to us the questionnaire found on this page.

Are date lists worth it?

—Alton Slagle

#### COLLEGE GRAPEVINE . . .

### Husband Selection Taught To Sooners

By CLAYNELLE ROOKER

"How to select a husband" is now being taught to the girls of Oklahoma University. "The Oklahoma Daily" reports that a course covering subjects dealing with charm and personal appraisal is being offered freshmen girls.

This general orientation course will cover a wide variety of subjects ranging from appropriate dress, manners, make-up, and dieting to hints on studying, taking tests, and "how to select a husband." The paper doesn't indicate whether or not girls will receive college credit for the course.

When it comes to hair, we have news for both boys and gals.

Barbers at Port Huron, Mich. are up against something they haven't seen in years. They are having a run on mustache wax, but the buyers aren't using it for mustaches. Teenagers have discovered the wax perfect for making crew haircuts stand up straight. So says "The Arkansas Traveler," official publication of the University of Arkansas.

TSCW's "Daily Lass-O" quotes from the "United Press" — It won't be long until virtually every woman in the country will be improving on the natural color of her crowning glory. According to a spokesman for the National Hairdressers and Cosmetologists Association, ". . . in a few years there won't be a woman whose hair shade is strictly her own."

High in popularity this fall will be such shades as candlelight, carbon mist, smoldering ember, and chestnut glower.

The association, representing approximately 100,000 hairdressers and cosmetologists, predicted the newest haircut will be "swirl-wave." Featuring soft, spiraling waves, this hairstyle will eliminate the mannish cuts so popular last year. Hair will remain off the collar, but exact length will depend on the length of the neck.

TCU's "The Skiff" printed the following: "Headline from 'The Daily Texan': 'Dip Hour Open to Coeds in Women's Gym.' We've heard of the football boys chewing tobacco, but this . . . the UT girls really must be 'up to snuff.'"

Meanwhile, back at the ranch . . . "The SMU Campus" reports that the construction of Homecoming floats has been vetoed for this year, to be replaced by sorority and fraternity house decorations. Since one objection to the finest floats was the high cost of construction, a \$75 limit will be placed on all house decorations.

Time, mental effort, paper and pencil lead are being conserved by the use of several "brainy" machines at Louisiana State University in Baton Rouge, La.

Any problem whose solution can be expressed as a series of arithmetical operations can be solved with an electronic computer recently added to LSU's equipment.

"The Daily Reveille," college paper, revealed that this machine capable of handling mathematical problems arising in research, will cut the laborious calculations required by many such problems.

What interests us: when will these machines become available for use in math classes?

Fraternity house problems, long regalia and telephones for rooms are some of the for discussion Sunday on Coffee: Grounds

# Sunday Gripe Session Airs Tech Problems

Fraternity housing, parking problems, long registration lines, and telephones for girls' dorm rooms are some of the main topics for discussion Sunday afternoon on Coffee: Grounds for Discussion.

This feature of the lectures and debates committee is a general gripe session for student body members. They may ask questions, make complaints and suggestions, and discuss general school policies and problems with people who know the answers or who will try

to do something about student ideas.

James B. Whitehead, assistant dean of men, will be present to discuss plans for fraternity housing.

Elimination of the parking problem at Tech will be discussed by S. E. Thompson, newly appointed traffic director. He will also explain his parking policy as it now stands.

Reasons for long registration

lines and the possibilities for shorter lines next year will be taken up by John Harding, assistant professor of management and economics, Harding and Registrar Warren P. Clements recently completed a survey of registration procedures in this area, and they will adapt the best features of each to fit Tech.

An AWS representative will be on hand to discuss three occupants in a room in the girls' dorms and private telephones for the girls. Also, student council members will be present for consultation on school matters.

The reason for ten cent coffee in the Union will be explained by Ann Collins, president of the Student Union Program Council. The

Toreador will be represented by Alton Slagle, managing editor.

Coffee will be served at this free discussion period, which will begin at 3 p.m. in the Union

Workroom. All Tech students and faculty members are invited, Wendell Roberts, lectures and debates chairman said. Roberts will moderate the meeting.

## Dinner Bells Will Ring Out Saturday As Vets Hold Barbecue At Mackenzie

Dinner bells will ring Saturday afternoon as Tech Veterans gather in Mackenzie Park for a drag barbecue picnic. Scheduled to begin at 1:30, the dinner will cost Vet Club members \$1 per plate.

Signs are to be placed in the park to point out the location of the feed.

"All veterans and guests are invited to attend the affair," Vet Commander Guy Finley announced at a Club meeting last night.

Other business taken care of at last night's meeting included assignment of committee heads.

Dave Lockwood and Jack Fletcher volunteered to steer the athletic committee, while Jim Snodgrass was asked to be in charge of this year's Veterans' Annual Variety Show.

Wayne Davis and Bill Coffee were put in charge of the Veteran-sponsored COP Pep Rally.

Cmdr. Finley also announced that arrangements had been made for a guest speaker from the regional Veteran's Administration on March 3. The speaker will give a resume of Korean veterans' rights, then answer questions from the floor.

Other business included the election of Charles Baumgardner as Vice Commander of the group. Baumgardner will replace Dave Lawrence, now working in Venezuela.

## Union Sets Study To Master's Music

Do you like to study to music? The noon Listening Hours have been changed to Afternoon Listening Hours from 1 to 3 on Mondays and Thursdays. Students are invited to bring their homework to the ballroom lounge, said Thomas Holeman, chairman of the Union music committee.

Symphony No. 8 in B minor by Schubert, better known as the Unfinished Symphony, will be the featured music Monday.

A Melachrina Concert by the Melachrina Strings will include Memories of the Ballet; Dance of the Hours, by Ponchielli; Intermezzo from "Cavalleria Rusticana", by Mascagni; Air on the G String, Bach; Romance in E flat, Op. 44, No. 1, by Rubenstein; Serenade, Schubert; Malaguena, Lecuona-Ferde Grofe; and Waltz in C-sharp minor, by Chopin.

## Phi Kappa Psi Initiates Eleven

Eleven men were initiated into Phi Kappa Psi Social Fraternity Sunday. The service was held in the recreation room of the Lubbock National Bank.

Those initiated were John Bennett, San Antonio; John Cochran, Houston; Don Covely, Memphis; Jerry Gibner, Spearman; Ken Gullett, Olton; Bob Laughlin, Lubbock; Bill Scott, Dallas; Web Sharp, Amarillo; Jay Thomas, Olton; Bill Trammell, Denver City; Bob Verette, Cooper.

**Why do more college men and women smoke VICEROYS than any other filter cigarette?**

*Because only Viceroy gives you 20,000 filter traps in every filter tip, made from a pure natural substance found in delicious fruits and other edibles!*

1. Yes, only Viceroy has this filter composed of 20,000 tiny filter traps. You cannot obtain the same filtering action in any other cigarette.
2. The Viceroy filter wasn't just whipped up and rushed to market to meet the new and skyrocketing demand for filtered cigarettes. Viceroy pioneered. Started research more than 20 years ago to create the pure and perfect filter.
3. Smokers en masse report that filtered Viceroy's have a finer flavor even than cigarettes without filters. Rich, satisfying, yet pleasantly mild.
4. Viceroy draws so easily that you wouldn't know, without looking, that it even had a filter tip... and Viceroy's cost only a penny or two more than cigarettes without filters!

That's why more college men and women smoke VICEROYS than any other filter cigarette... that's why VICEROY is the largest-selling filter cigarette in the world!

**20,000 Tiny Filter Traps... plus that Real Tobacco Taste**

### Lutheran Students Plan Fall Retreat

Plans for a fall retreat to Carlsbad Caverns, N. M., were discussed at a meeting of Gamma Delta.

Five new members were accepted by the Lutheran Student Organization. They are Agnes Meisner, Kathy Harrison, Joan Druesedou, Audrey Green, and Monroe Johnson.

Other business included the election of Joan Druesedou as secretary.

### Theta Sigma Phi To Initiate Six

Theta Sigma Phi will initiate six pledges tomorrow in the home of Mrs. James G. Allen, 3110 21st.

Pledging the women's journalism fraternity are Melba Neely, Barbara Pearce, Mrs. Nancy Boyles Kaisner, Mrs. Mary Ann Walter, Marguerite Winder, and Barbara Knott.

Immediately following the pledge services, new initiates will be guests at an alumnae tea at which Mrs. Ruth Horn Andrews will be the featured speaker.

Among the many Techsians taking part in a series of dormitory mixers are Claire Kalb, Houston sophomore, and Dean Lee, Clovis, N. M. sophomore.

### CIRCLE K TO MEET

Anyone interested in helping to make the Tech campus a better place in which to live and learn?

Guy Finley, Circle K Club membership chairman, invites anyone interested in working with the organization to attend an informal luncheon Friday, Oct. 14, in Room A of the Student Union Building.

Founded only last semester at Tech, the club is affiliated with Kiwanis International and is one of the more than 100 College Kiwanis Clubs in the United States.

### Halloween Party For Casa Linda

Plans for the annual Halloween party were discussed at a house meeting of Casa Linda this week.

It was also decided to compete in the dormitory contests of Halloween decorations.

Dean Martha Hall, Assistant Dean of Women, urged the girls to recognize their individual and group responsibility while living in Casa Linda, the girls' co-operative house on the campus.

### Two Fraternities Hold Initiations

Two national men's fraternities, Kappa Sigma and Phi Gamma Delta, initiated new members in services this week.

The Lambda Tau Chapter of Phi Gamma Delta held initiation services at the Citizen's National Bank for 22 new members.

They are, Jack Boggs, Shelton Cunningham, Kary Mathis, George Nelson, and Walter Schuler, Lubbock; Bill Bristol, Richard McClure, and Jim McCulloch, Plainview; Don Allison, Lockney; Bill Bean, Burkburnett; and Jerry Cook, Fort Worth.

Don Hay, Borger; Bob Johnson, Phillips; Bob Lapham, Abilene; Jack Link, Presidio; Dick Lowe, Vernon; David Pool, Dumas; Wallace Smith, Amarillo; Raiford Stainback, Coleman; Curtis Talley, Justin; and Bill Waddle, Cedar Hill.

Epsilon Phi Chapter of Kappa Sigma, held initiation services for 16 new members this weekend in the Flame Room of the Pioneer Natural Gas Building.

New members are Bobby G. Alread, Odessa; Walter Pent, Jimmy Don Blackwood, and Robert J. Phillips, Dallas; Lawrence D. Cook, Spur; Murray A. Cooper, Royce D. Kelly, and J. T. Wiley, Lubbock; Marshall A. Hayes, Lott; John D. Hudson, Fort Worth; Terry A. McCright, Hereford; Hal H. Ramsey, Abilene; John V. Sanders, Crowley; Leland M. Stone, Littlefield; Earl L. West, Memphis; and Dale Wynn, Amarillo.

Two newly-elected officers of Kappa Sigma are Gene Steel, Grand Procurator, and Joe McMenamy, Grand Treasurer.

### Sigma Nu Fraternity Plans Sports Dance

Sigma Nu fraternity will hold its Annual Fall Sports Dance Saturday at 9 p.m. in the Student Union Ballroom.

The dance will climax a busy week of activities for the Sigma Nus which has included a mixer with Kappa Alpha Theta, women's sorority, and initiation of nine men into their fraternity.

New members of Sigma Nu are Melade De Gaiish, Corpus Christi; Gene Brown, James Hill, and Bill Seth, Amarillo, Don Croley, Hamlin; Wendel Huddleston, Tahoka; Scott Arbuckle, Dumas; Carey McAdams, Groom; and Howard Fleming, Burkburnett.

### Artists Courses Slate Completed

Musicians and actors from both Europe and America will headline the 1955-56 Tech Artists Course series which opens November 9 with Anna Russell, America's leading concert music comedienne.

Other programs in the series will be the Berlin Dance Theater, December 1; Dublin Players, January 6; Andres Sogovia, concert guitarist, February 9; Jan Peerce, tenor, March 17; and Jorge Bolet, pianist, April 5.

All programs will be held at the Tom S. Lubbock High School auditorium.

## LUCKY DROODLES! LUCKY DROODLES! YEA!

**WHAT'S THIS?**

For solution, see paragraph below.

**A FLIGHT OF IMAGINATION** prompted the Droodle above—it's titled: Flying saucer with Lucky-smoking crew. But it's a down-to-earth fact that Luckies taste better than any other cigarettes—and for down-to-earth reasons. First of all, Lucky Strike means fine tobacco. Then, that light, mild tobacco is *toasted* to taste even better . . . cleaner, fresher, smoother. So, "Glurg shrdlu!" (In saucer language, that means, "For taste that's out of this world, light up a Lucky!")

Tech Anniversary Finds Women Same

It's hard to believe looking back at the first coeds who attended Tech thirty years ago that the girl body has not changed. It was only the glad rags that fooled ya. Underneath that longer-than-life look in the twenties it was the same kind of old girl who is now inhabiting the campus. In fact, even the styles of the late twenties — the long torso, the bobbed hair, the cloche hat, and the bared knee—are back again to help us celebrate Tech's thirtieth anniversary.

Oh that bare knee! In 1925 a Tech freshman's tubular, saggy dress was well below her knees. Two years later she was sporting bare knees.

In 1953 Tech freshmen came to school equipped with an adequate supply of pedal pushers. This year the knees came popping out again via bermuda shorts.

Just what is it about women that makes them want to display their knees? — A general feeling of freedom and a lack of self-consciousness that springs out

every decade or so and expresses itself in fashion.

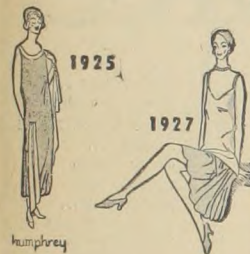

The beginning of Tech paralleled the beginning of a new era of fashion and manner.

Coeds who had carefully protected their fair skin from the sun began to prefer the tanned, healthy look. Voices changed, too.

The American theatre had a deep influence on the change from high pitched, bubbly, women's voices to throaty, gurgly ones. Even the topics of conversation changed from the frivolous to the more serious, specialized ones.

Since those first days the Tech species of female has remained much the same even through the various metamorphoses of style and fashion.

The 1955 Tech coed can wear just about anything she cares to and still be in style. With emphasis on individuality and casualness the coed is once again a free, bare-kneed woman.

Kappa Alpha Theta Retreats Saturday

Members of Kappa Alpha Theta women's sorority will board buses in front of Drane Hall at 1 p.m. Saturday for their annual fall retreat.

Sixty-five members and pledges will participate in the retreat Saturday and Sunday to be held at the Arnett-Benson ranch a few miles from Lubbock.

Sunday morning a sunrise service will be conducted by one of the campus ministers.

Kay Alexander Belongs To Tech

Kay Alexander belongs to Tech. When Kay made her decision to come to Tech no one was at all surprised. The thought that she might go anywhere else was absurd; her whole family has gone to Tech.

Her cousins went to school here. Her mother and father met here at Tech. Part of Tech was built on land originally owned by her great-grandfather, Joab L. Alexander.

Kay's aunt, Miss Mamie Alexander, who lives in Lubbock, was in the first graduating class at Tech in 1927. Miss Alexander also helped to organize the first Toreador.

Kay's mother, the former Geraldine Smith, was the first president of Sans Souci women's social club which became Kappa Alpha Theta sorority in the spring of 1953. Kay is now a Theta pledge.

Continuing the lists of Tech firsts, Kay's brother, Moody Alexander, was the first president of Phi Delta Theta here. All of this sounds as if Kay had no choice but to come here to school. The truth is, she didn't; but, she loves it. Kay will be the first to tell you that she wouldn't go to any other school in the world.

Kay has another brother, Wick, who is a Phi Delt attending Tech on a football scholarship. He is a sophomore.

Kay Alexander, freshman from Amarillo, looks at one of the first diplomas to be issued at Tech. Her aunt, Miss Mamie Alexander, who is shown holding the diploma, was in Tech's first graduating class.

Why Chancellor Adenauer reads The Reader's Digest

"In my country more than 500,000 people read the Digest in German each month. And they read not only about the people of the United States, but about the people of all nations. The Reader's Digest has forged a new instrument for understanding among men."

In October Reader's Digest don't miss:

ALL ABOUT LOVE. How can we tell the difference between true love and physical attraction? Can we really fall in love "at first sight"? What makes us fall out of love? Scientist Julian Huxley brings you a biologist's view of our most complex emotion.

THOSE CAMPUS MARRIAGES. How do student marriages work out? Are young couples able to cope with studies and household chores? What happens when babies come along? Report on today's collegiates who promise to love, honor—and study.

19-PAGE CONDENSATION FROM \$4.00 BEST-SELLER: "MY PHILADELPHIA FATHER." Whether blue-blood Anthony J. Drexel Biddle was teaching judo to the Marines, singing a dubious tenor in opera, hobnobbing with pugilists or raising alligators in the house, he did everything all out—and then some. Here, told by his daughter, is the laughing, loving life of "America's happiest millionaire."

AMERICA'S TOP LABORITE: GEORGE MEANY. Life and beliefs of the man who may lead 15 million workers when the CIO and AFL merge.

# Tech-TW In Conference Clash

Texas Tech's Red Raiders may face their toughest Border Conference test Saturday night when they tangle with the Texas Western Miners at El Paso.

Game time is 8 p.m. for the conference game.

The Miners are the only conference foe to hold a victory over a DeWitt Weaver coached Raider squad. The El Paso team turned the trick in 1952, winning 20-14.

Indications are that Texas Western coach Mike Brumbelow may have his strongest team since coming to the college. His Miners will have 23 lettermen returning. Only 11 were lost by graduation.

Top man and most dangerous for the Raiders will be Miner quarterback Jesse Whittenton. Whittenton was the conference's most valuable player in the 1954 campaign.

Another all-Border Conference selection for Texas Western is end John Howle, who paced the conference in pass receptions and did Miner punting.

On the line the only newcomers for the Miners are a center and guard. Otherwise the remaining forward wall are returning from last term.

Indications from the Raiders this week are that they will be at their best physical shape since before the Texas game. All hands except fullback James Sides and tackle Jerry Walger should be set for the conflict.

After practice for the Techs was slowed early in the week because of rains, the Raiders worked long and hard during mid-week practice on defense and offense. Coach Weaver was quoted as saying that he wished the Raiders would be a little "meaner."

The rivalry between the two schools dates back to 1930 when the Miners took the initial contest. Since that time Tech has won nine contests and lost four with none resulting in ties.

Last year the Raiders had to unleash one of its all-time offensive shows to down the Miners who managed a 7-0 lead and a 14-14 tie before succumbing. Tech finally emerged on the long end of a 55-28 count.

The game will mark the initial conference clash for both teams. In the first games the Miners have won one and tied one. Tech has a two and one record.

## Tech Fencing Team Heads for Mexico

Texas Tech's fencers inaugurate their season this weekend with a trip to Chihuahua, Mexico for an international tournament.

The 1954 squad helped to start the tournament and placed third in competition.

Comprising the team will be Ken Gullett, Gene Brown, Frank Griffin, Bill Worrell and Gene Miles. Miles will be returning to the tourney for a second time. Gullett and Worrell are lettermen. Brown and Griffin are freshman letter winners.

Spokesmen for the team say the team should have a better squad than last season when the Raiders won the Southwest Sectional Championship in both saber and epee and placed second in the foil.

Anyone on campus who has previous fencing experience and is interested in continuing the sport may call Jack Carnell, PO-2-4363 or the men's physical education department.

## Frats Lead Off Intermurals

Four touch football games are scheduled for Sunday afternoon as Tech's intermural sports program gets underway for the year. All of Sunday's games will be in the Fraternity League.

The Dormitory League is scheduled to begin play Tuesday. A starting date for Independent games has not yet been announced.

The dormitory schedule will be found on this page. A complete fraternity schedule will appear in Tuesday's Toreador.

Fraternity games scheduled Sunday are PIKA vs. Phi Psi, K. Sig vs. Phi Gam, Sigma Chi vs. Sigma Nu and SAE vs. Phi Delta.

Officials will be C. H. Kyle, Tom Brown, Bob Smith on field one, J. D. Snyder, George Demere and David Kilgo on field two, Roy Bryand, Gordon Graves and Weldon Swann on field three and Dean White, L. A. Noles and Mike Harris on field four.

Halftime score of Texas Christian's 32-0 win over Texas Tech, 26-0, was the same as that posted by Tech in its 33-19 victory of 1951.

Texas Tech fullback Jim Sides went through the 1954 Gator Bowl and the entire '54 season without losing yardage. He averaged 5.6 yards on 55 carries last season.

College of the Pacific gained 200 passing yards against Texas Tech in 1953 and only two in 1954, yet lost the first game, 34-7, and triumphed last year, 20-7.

# As long as they talk...no fight!

A famous Indian chief once told an American cavalry officer "When pow-wow stop-fighting come soon!"

It was true then and it is true now. So long as the United Nations provides a place where nations can talk out their differences, they won't fight them out. If the talking stops—look out!

So let's keep the United Nations talking among themselves. Let's all help to make the United Nations more effective as a mechanism of peace. The UN needs public support to do its best work. It needs *your* support.

On UN day, October 24th, join with millions of other Amer-

icans and still more millions of people all over the world in celebrating the seventh anniversary of the United Nations.

You can help establish a world wide tradition of the exchange of gifts and greetings among the citizens of all nations. Send for a free booklet which shows you how to have a UN Day party in your own home or community.

The action which we all take in support of the United Nations may decide the future of free men and their enterprises for generations to come. Help to establish the tradition of gifts and greetings on October 24th in your own community. You will be helping the UN and you will be helping yourself. Send for the free booklet today!

**Raider Revue**

**Raiders On 'Comeback'**

By FLOYD WOOD

If Coach DeWitt Weaver's pre-game prediction comes through, the Raiders should have a 9-1 record by the season's ending. Coach Weaver was quoted before the Oklahoma A&M clash as pointing to the Cowboy game as important to Tech as they hit a modified "come-back trail" after losing to TCU. We think the Techs can do it, and doff our hat to them for the first step taken last weekend. Next . . . Let's bury the Miners!

World Series action must have inspired the Tech baseball team. Or else what other explanation is there for baseball tryouts in October? Advance word is that there are some pretty fair prospects among the hopefuls.

Former coach Herman Hickman has turned from front-seat to back-seat coaching as he takes

over as football sports scribe for Sports Illustrated. In the current issue of the magazine he describes activities at Tech thusly: "There is a strong suspicion that domination of the Border Conference by Texas Tech is becoming a permanent state of affairs. Tech has won the conference title six out of the last eight years and this season was after bigger game following its Texas victory before overreaching itself against TCU. I have watched Jerry Walker since his freshman year and there is no better tackle extant. Almost as good is Quarterback Jack Kirkpatrick."

Hickman's change to sports writing to us seems like a natural choice. On a Saturday afternoon in autumn we would much prefer the warm confines of a press box complete with all the college-furnished niceties to the ulcerating, heart-pounding job of guiding the activities of 11 gridders engaged in unpredictable conflict

with 11 similar warriors. Besides, sports writers have no alumni, thank you.

Last week's football picks helped our average considerably. For the season now our record is 15 right, 3 wrong and 3 ties. The one we missed last week was LSU's tie with Rice.

For this weekend: Baylor over Arkansas . . . might be wrong here

Rice to whip Clemson . . . The Owls should bounce back after last week

SMU past Missouri . . . The Ponies to finally take one

Oklahoma to trample Texas . . . here's one we'd like to see the Steers win

Texas A&M over Nebraska . . . we're already impressed, Mr. Bryant

TCU to swamp Alabama . . . Swink rides again

West Texas State to upset Arizona . . . The Buffs better stop Luppino.

**Agronomy Club Plans Picnic**

The Agronomy Club will begin a week of scheduled activities by honoring pledges with a picnic Monday from 6:30 to 8 p.m. at Mackenzie Park.

Pledges will be required to wear the club symbol, a wooden letter "A", while on campus during the week of Oct. 10-17. Climaxing the activities will be the initiation of fall pledges. Eligibility for the club requires a background of 30 hours in the agricultural division.

Sponsoring the organization are Dr. A. W. Young, Cecil Ayers, Dr. Clark Harvey, Chester Jaymes, Dr. Samuel Little, and Gene Spain.

**Hilton Announces Grants For Study**

Four \$100 scholarships are available for business administration students, announced C. N. Hilton, president of Hilton Hotels, Inc.

The Hilton scholarships are awarded annually to the students with the highest scholastic average for the two previous long-term semesters. The scholarships are awarded on applications only, and each student applying must have no less than a 2-point average for the past two long semesters.

Applications must be made in the office of the dean of Business Administration by Oct. 14. John Harding, assistant professor of management is in charge of the awards.

All applicants but last year's seniors must have attended school last year and be attending this year. If any student is awarded the scholarship, he is not eligible for any similar award.

**TW Listening Party Slated At Union**

All Red Raider supporters are invited to attend a football listening party tomorrow night at the Union, said Howard Wallace, chairman of the event, which is sponsored by the Union Hospitality Committee.

The Tech-Texas Western game will be broadcast throughout the building, starting at 8 p.m. A record dance is scheduled immediately following the game.

The safer car wins . . . and Chevrolet's the winning car

Every checkered flag signals a Chevrolet victory in official 1955 stock car competition—not only against its own field but against many American and foreign high-priced cars, too!

Let's translate these victories into your kind of driving. You've got to have faster acceleration to win on the tracks. And that means safer passing on the highways. You've got to have better springing and suspension. For you; safer and happier motoring. You've got to have big, fast-acting brakes and easy, accurate steering. More things that make your driving safer! Come in and drive a Chevrolet yourself.

BUT NOBODY IS WORRIED . . .

# Rodents Run And Play In HE Basement

By BILL LAMBERT

Expose: The Home Economics building has rats in the basement. Not just plain, old fashioned rats, mind you, but big, fat, white rats.

But before Techsians start a campaign for mousetrap funds, perhaps it would be best to explain that the rats are caged.

"We take our rats quite seriously," explains Dr. Nina Wolf Lamb, professor of foods and nutrition. "We use them to demonstrate the effect of improper diets and, in the advanced classes, we do research work with them."

All told, there are about 50 of the rodents housed in the Home Economics basement. Twenty-five of them are used as a breeding colony and the rest for research and demonstrations.

The demonstrations are of a "before and after" nature.

A few favored rats, possibly

with political connections, are fed over a long period of time with good, wholesome food on a well-rounded diet, while others are chosen to demonstrate the effect resulting from the omission of, says, eggs in the diet.

"We have trouble with the girl students," Dr. Lamb reveals. "The ones that aren't afraid of the rats are sympathetic with the ones on a deficient diet."

She has less trouble with the male students, apparently. Men working toward a business administration degree comprise about 34 per cent of the freshman foods and nutrition class, since they can use this course as a science requirements in their major.

One male recently suggested that the rats be turned loose in the kitchen of the department, thus giving students practical experience in dealing with such problems. At the end of the semester the students would be able

to take a short course in trapping, he said.

Dr. Lamb reports that no action will be taken on this suggestion in the foreseeable future, however.

## Merrill To Solo In Symphony Opener

Robert Merrell, Metropolitan Opera baritone, will be guest soloist with the Lubbock Symphony when it opens Monday night in Tom S. Lubbock's auditorium.

Curtain time is 8 p.m. Monday and Tuesday. At that time Merrill will sing a program embracing his work in both classical and light fields. He is expected to draw full houses for both performances.

Orchestral selections will include works by Beethoven, Delibed, Brahms, Franck, Haydn, and Richard Rodgers.

Both Texas Tech's coach, DeWitt Weaver, and Texas Western's mentor, Mike Brumbelov, were navy officers in World War Two.

## Library Of Spanish Linguist Purchased

The library of one of Spain's top literary men who wound up his career as Distinguished Pro-

fessor of Spanish at the University of Texas has been purchased by Texas Tech, Ray C. Janeway, head librarian, has announced.

## Carol Schultz Wins Music Scholarship

Carol Schultz, sophomore voice major from Amarillo, is the recipient of the first D'Aun Marshall Music Scholarship, Raymond P. Elliott, acting music department head, announced.

The grant, awarded on the basis of talent and scholarship, by the Seventh District Federation of Music Clubs, is valued at \$200. It will be given each fall to a Texas Tech student from one of the 48 counties in the Panhandle and South Plains area.

The collection, numbering nearly 2,000 volumes, was the property of the late Miguel Romera Navarro, noted Spanish linguist.

Professors Eunice J. Gates and A. B. Strehli of the Tech Department of Foreign Languages studied with Professor Romera at the University of Pennsylvania.

According to Dr. John C. Dowling, head of Tech's Department of Foreign Languages, the Romera library will "fill in many vital gaps in the Spanish collection at the college and will greatly improve the research possibilities for students and faculty."

## 'Students In Recital' Set For Tuesday

"Students in Recital" will be presented at 4:10 p.m. Tuesday in

the Music building recital hall. Selections from Altenberg through Wells will be performed by vocal soloists, instrumentalists, and seven trumpeters.

## AIIE NAMES OFFICERS

The American Institute of Industrial Engineers named new officers for the year as Hershel Biggs, president; Bill Echols, vice president; John Buswell, secretary; Bill Taylor, treasurer; Dr. J. M. Penick and H. J. MacKenzie, faculty sponsors.

The next meeting of AIIE will be Nov. 7th when Dean of Engineering J. R. Bradford will speak at a dinner.

Scheduled to appear in the recital are, Tom Brown, Yvonne Skinner, Martha Mack, Glenn Finney, Carole Jean Delaney, Mary Jane Hartley, Billie Roark, Helen Hair, Joy Sue Downing, Don Shelton, Darrell K. McCarty, Carol Schultz, Don Armstrong, Jim Edmondson, Phil Pearce, Norman Hemphill, Ken Briden, Don Eirring, Roark Burnes, and Jerry Pickens.
