

Election To Launch Homecoming Activity

Tech voters swing homecoming machinery into action today when they go to the polls to select one of 10 young ladies to reign over "Tech 2000 A. D."

This year's queen will be picked from five finalists Friday at 8:30 p.m. when Frank Blair prominent news commentator, opens a sealed envelope bearing the name of the girl elected homecoming queen for 1963.

The five finalists will be presented to the crowd accompanied by music of the Tech Symphony. Immediately after being crowned, the queen will be saluted by the Tyrian Rifles with a one-gun salute fired from the Tech howitzer seen at Tech football games and pep rallies.

The queen and her attendants will again be recognized during the half-time ceremonies of the Tech-Rice football game and during the annual homecoming parade.

QUEEN CANDIDATES

The girls from whom the queen and her attendants will be selected are Jo Beth Barnes, Carole Brashear, Christy Brown, Carolyn Buxton and Jan Mayo.

Also running are Camella Moore, Carolyn McDuff, Lynn McElroy, Kathy Osthoff and Barbara Sperberg.

The coronation will be in the Science Quadrangle following a pep rally and bonfire at the Southwest Conference Circle at 7:30 p.m.

Classes dismiss at 8:55 a.m. Saturday to allow students to watch and participate in the annual homecoming parade.

The parade, continuing with this year's homecoming theme of "Tech, 2000 A. D.", will feature 23 floats, each entered by a Tech organization.

HOMECOMING FLOATS

Entering floats are the following groups: Alpha Chi Omega, Alpha Phi, Alpha Tau Omega, Cni Omega, Delta Delta Delta, and Delta Gamma.

Also Kappa Alpha Theta, Kappa Kappa Gamma, Kappa Sigma, Phi Gamma Delta, Gamma Phi Beta, and Phi Kappa Psi.

The Tech Dames, Scabbard and Blade, ASME, ASAE, Phi Mu, Sigma Kappa, Phi Mu Alpha, Pi Beta Phi, Phi Delta Theta, and Sock and Buskin have also entered floats. One organization is not listed as yet.

The parade will proceed down Broadway to the Tech campus and end at the Ad. Bldg. parking lot.

Trophies to the outstanding floats of the parade will be presented at the Tech-Rice game. The trophies are currently on display in the Tech Union.

SCHEDULED EVENTS

The following is a list of activities for homecoming weekend beginning Friday.

- 10 a.m. —Ex-Students Assn. executive board meeting at the Union.
- Noon—Luncheon for board.
- 1:30 p.m. —Ex-Students Assn. Council meeting and election of officers in the Union.
- 6 p.m. —Dinner meeting of Texas Tech Century Club in the Union Ballroom.
- 7:30 p.m. —Pep rally and bonfire.
- 8:30 p.m. —Homecoming Queen coronation.
- 9 p.m. —Reunion of classes of 1946-1963 in the Union.
- 9:30 p.m. —Reunion and dance for classes 1925-1945 in the Caprock Hotel.

SATURDAY—

- 10 a.m. —Homecoming parade.
- 11:30 a.m. —Buffet luncheon for Exes in Municipal Coliseum.
- 1:45 p.m. —Presentation of Homecoming awards at Jones Stadium.
- 2 p.m. Tech-Rice football game.
- 8 p.m. —Student and Ex-Student dance in Municipal Coliseum.

BA School Organizes Relations Committee

A Student-Faculty Relations Committee has been organized to serve the students in the School of Business Administration.

According to Fred Connel, economics instructor, and committee member, the committee arose from a general need for closer contact between the students and faculty.

The committee will serve as a formalized channel of communication between students and faculty and will meet regularly with students in order to hear and report their suggestions.

Connell said, "It is the mech-

anism by which student suggestions may be made. It is not a body through which students can air their individual troubles, nor is it a censure."

Representatives to the committee are selected on the following basis: One representative from each business club or each business fraternity in the BA School; one member from the group of BA representatives elected to the Tech Student Council; one member-at-large appointed by Dean G. G. Heather; and one member-at-large from the freshman class of the BA School, appointed by Seldon Robinson, freshman advisor.

Campbell Predicts '64 Win For JFK

New Mexico Gov. Jack Campbell predicted Tuesday that President Kennedy will be re-elected by a comfortable margin in 1964.

Speaking on the Texas Tech campus before Lubbock news media, Campbell added that if the Republican Party nominee is anyone other than Barry Goldwater the result will be an overwhelming Demo triumph in New Mexico.

"I believe the Kennedy administration is stronger now than when he carried New Mexico by a very close vote" in 1962, Campbell said. He described current political feeling in the state as "essentially a tossup between Goldwater and Kennedy."

Campbell said it was evident to him that Goldwater was waging a campaign for the executive office, although he hasn't officially thrown his hat into the ring.

Campbell, a Democrat who has been in office only since January, said he has no aspirations for the U.S. Senate post in his state, up for grabs in the 1964 elections.

A Republican, Edwin Mechem, presently holds the spot. Mechem is the former governor of the state who was ousted by the voters in favor of Campbell.

Mechem resigned just before his term expired and had his lieutenant governor appoint him to serve the remaining two years of the Senate post vacated by the death of the previous Congressman, a Democrat.

Placement Office Sets Student Job Interviews

Tech's Placement Service will hold the following job interviews today through Friday in the Placement Service office, West Engineering Bldg.

WEDNESDAY

Jefferson Chemical Company will interview Chemical Engr., Chemistry, and Mechanical Engr. majors.

Central Intelligence Agency will interview Civil Engr., Chemical Engr., Industrial Engr., Mechanical Engr., Petroleum Engr., Chemistry, Psychology, and Biology majors.

United States Air Force will interview all majors.

International Business Machines Corporation will interview Electrical Engr., and Mechanical Engr., majors.

Columbian Carbon Company will interview Chemical Engr. and Mechanical Engr. majors.

Pan Geo Atlas Corporation will interview Electrical Engr., Engineering Physics, Industrial Engr., and Mechanical Engr. majors.

WEDNESDAY AND THURSDAY

Collins Radio Company will interview Electrical Engr., Industrial Engr., and Mechanical Engr. majors.

Texas Electric Service Company will interview Electrical Engr., and Mechanical Engr. majors.

General Dynamics, Fort Worth will interview Architecture, Civil Engr., Electrical Engr., Mechanical Engr., Mathematics, and Physics majors.

Ernst & Ernst will interview Accounting majors.

THURSDAY

Southern Regional Research Laboratory will interview chemical Engr., Chemistry, Mechanical Engr., Physics, and Textile Engr. majors.

United States Department of Commerce will interview Mathematics, Agricultural Economics, Economics Finance, Sociology, Government, History, English, and Electrical Engr. majors.

Michigan Agricultural Company will interview Animal Husbandry, Dairy Industry, and Agricultural Economics majors.

THURSDAY AND FRIDAY

Aluminum Company of America will interview Chemical Engr., Electrical Engr., Industrial Engr., and Mechanical Engr., majors.

Socony Mobil Oil Company, Inc. will interview Advertising, Marketing, Retailing, Accounting, Chemistry, Industrial Engr., Mechanical Engr., Chemical Engr., Civil Engr., Electrical Engr., Engr., Physics, Production, Petroleum Engr., and Exploration Geology majors.

FRIDAY

A.M. Lockett & Company, Ltd. will interview Mechanical Engr. majors.

U. S. Naval Laboratories in California will interview Electrical Engr., and Physics majors.

Standard Oil Company of Texas will interview Chemical Engr., Mechanical Engr., and Petroleum Engr. majors.

HOW SMALL CAN YOU GET?

Today let us address ourselves to a question that has long rocked and roiled the academic world: Is a student better off at a small college than at a large college?

To answer this question it is necessary first to define terms. What, exactly, do we mean by a *small* college? Well sir, some say that in order to be called truly small, a college should have an enrollment of not more than four students.

I surely have no quarrel with this statement; a four-student college must unequivocally be called small. Indeed, I would even call it *intime* if I knew what *intime* meant. But I submit there is such a thing as being too small. Take, for instance, a recent unfortunate event at Crimscott A and M.

Crimscott A and M, situated in a pleasant valley nestled between Philadelphia and Salt Lake City, was founded by

What, exactly, do we mean by a *small* college?

A. and M. Crimscott, two brothers who left Ireland in 1625 to escape the potato famine of 1841. As a result of their foresight, the Crimscott brothers never went without potatoes for one single day of their lives—and mighty grateful they were! One night, full of gratitude after a wholesome meal of French fries, cottage fries, hash browns, and au gratin, they decided to show their appreciation to this bountiful land of potatoes by endowing a college. But their generosity contained one stipulation: the enrollment of the college must never exceed four students. They felt that only by keeping the school this small could each student be assured of the personalized attention, the camaraderie, the esprit, that is all too often lacking in larger institutions of higher learning.

Well sir, things went along swimmingly until one Saturday a few years ago. On this day Crimscott had a football game scheduled against Minnesota, its traditional rival. Football, as you can well imagine, was something of a problem at Crimscott, what with only four undergraduates in the entire college. It was easy enough to muster a backfield, but to find a good line—or even a bad line—baffled some of the most resourceful coaching minds in the nation.

Well sir, on the morning of the big game against Minnesota, its traditional rival, a capricious fate dealt Crimscott a cruel blow—in fact, four cruel blows. Sigafos, the quarterback, woke up that morning with an impacted incisor. Wrichards, the slotback, flunked his taxidermy exam and was declared ineligible. Beerbohm-Tree, the wingback-tailback, got his necktie caught in his espresso machine. Yuld, the fullback, was stolen by gypsies.

Consequently, none of the Crimscott team showed up at the football game, and Minnesota, its traditional rival, was able to score almost at will. Crimscott was so cross after this humiliating defeat that they immediately broke off football relations with Minnesota, its traditional rival. This later became known as the Sacco-Vanzetti Case.

So you can see how only four students might be too meagre an enrollment. The number that I personally favor is twenty. Why? you ask. Because, I reply, when you have twenty students and one of them opens a pack of Marlboro Cigarettes, there are enough to go around for everybody, and no one has to be deprived of Marlboro's flavor, of Marlboro's filter, of Marlboro's staunch and steadfast companionship, and as a result you have a student body that is brimming with sweet content and amity and harmony and concord and togetherness and soft pack and Flip-Top box.

That's why.

© 1963 Max Shulman

I'm Lost - Whee!

A small vagrant with large commotion-causing potential was "picked up" Monday afternoon by Lt. S. O. Boyd.

Boyd, of Tech's Traffic-Security Dept., found the vagrant behind the Room Reservations Office near Drane. He radioed in about 1:30 p.m., "I've just picked up a . . ." Suddenly his message was interrupted by a loud squawling that resembled the sirens of a fleet of fire trucks.

Soon, however, he drove to Traffic-Security headquarters and deposited a small Latin-American girl.

"I was patrolling behind Drane Hall when this little girl came up to me," Boyd said. "I figured that she was lost and I started to take her to headquarters, but when I put her in the squad car, I needed a strait jacket to hold her in."

At headquarters, the shy three-year-old settled down but would not say a word, although she eagerly took a candy bar Boyd offered her.

The bright-eyed girl, Olga Prieto, was at the department about 30 minutes when Patrolman Leland Hart brought in her mother, who had been at Tech Infirmary.

Tech Museum Displays Art To Own '63 Exhibit

Is the plaster flaking on the wall beside your bed? Do you need something to cover the bare spot where your dart game used to be?

Better yet, do you just like art and want to be able to buy something good to call your own?

Then "Art to Own '63", a \$1,000-000 art exhibit presented by the Museum, will be of interest to you.

"Art to Own '63" is one of the largest exhibits of its kind ever to be shown in this area. It offers an opportunity for Tech students to view and purchase original art works and graphics from both Europe and America.

The collection, assembled especially for Lubbock and the surrounding area by Mr. W. R. Fine of the Fine Galleries of Dallas, emphasizes art for homes and business offices. It includes over 300 master paintings, etchings, lithographs, mezzotints, and other graphics.

The paintings, in both contemporary and traditional style, present a wide variety of subject

matter such as landscapes, seascapes, still life and figure painting.

Prices on the original paintings range from a \$45,000 Italian school landscape by Bernardo Bellotto to a \$100 contemporary painting by J. E. Hennah.

The graphic arts section offers a much wider range of mediums at cigarette-money prices. It includes etchings in limited editions by Luigi Kasimir and by Hans Figura (\$12.00) and 18th and 19th century black and white architectural engravings (\$45.00).

There are also facsimile reproductions of the Renaissance drawing of Michelangelo, Raphael and Da Vinci (\$2.00) and water colors at varying prices.

The exhibit includes several serigraphs—an art form that has come into prominence this century.

The exhibition, open to the public, will run from Nov. 8 to the 21. Classes and organizations can make reservations for guided tours given by trained members of the Fine Arts committee.

New AF Pay Scale Explained

Captain William D. Strait, officer selection specialist, will discuss the new Air Force officer pay scale with Tech Seniors today.

According to the scale, new married officers will receive \$4800 starting annual salary, \$7416 after three years and \$8376 after four

and one-half years. An officer on flight status will receive \$6,000 \$9216 and \$10,356 for the same periods.

Students may attend the discussions at the placement office from 9 a.m. to 4 p.m.

The discussion is open to both men and women.

Personal interviews may be arranged by contacting MSGT Herbert D. Smith at the U. S. Air Force Recruiting Office, 1006 13th Street.

Schoolboy Football

DALLAS (AP) — San Angelo, Dumas, Rockdale and Albany lead Texas schoolboy football going into November where championships are won.

The Dallas News poll placed San Angelo at No. 1 in Class AAAA when Galena Park, the leader last week, tumbled before Baytown 24-0. It knocked Galena Park down to tenth. South Oak Cliff moved into second place.

Cadets interested in joining AFROTC Assn. may contact Cadet Maj. William N. Thomas in X-6 from 11-12 a.m. Friday or 2-2:30 p.m. Tuesday. They may also contact Capt. James Webb from 8-12 a.m. Monday through Friday in 26 Social Science Bldg.

Department Heads Concerned Tech Name Problem In Hiring Profs

The old adage, "You're judged by the company you keep," is aptly analogous when applied to Tech and its faculty.

THE ACADEMIC stature of a college or university is largely determined by the professional reputation of its faculty, and to achieve academic excellence, Tech must "keep company" with top-notch teachers.

But in many areas Texas Technological College is stumbling over its name in the attempt to attract the best teachers. This is graphically illustrated by a recent Student Council survey.

TECH DEPARTMENT heads — the persons responsible for faculty recruiting — were asked if the present name hurt their efforts to recruit instructional personnel.

Of those answering, 11 department heads reported the name was a hindrance, two said it was not.

THOSE REPORTING problems were heads of the departments of education and philosophy, foreign languages, economics and finance, government, mathematics, food and nutrition, journalism, psychology, speech, physical education for women and English.

In several cases actual examples were used to document replies. For example: Dr. Morris S. Wallace, education and philosophy department head, said at least 10 regionally and nationally known teachers in his field have by-passed Tech in the

past six years because of the connotations of its name.

DR. THEODORE Andreychuk, psychology department head, reported several potential faculty members expressed no interest in talking to him because of erroneous impressions gained from Tech's name.

"In my visits with individuals at out-of-state schools, I am continually forced to explain the role and scope of the college I represent.

"Nobody seems to know that Texas Tech is a university in the structural sense," said Dr. Emmett Hazlewood, mathematics department head, echoing similar statements made by almost all the department heads who responded to the survey.

OVERALL THE CONNOTATIONS both the words "technological" and "college" were labeled harmful in securing well-qualified teaching personnel, particularly from out-of-state sources.

Department heads reporting no detrimental effects on faculty recruiting efforts were Dr. F. Alton Wade, geosciences, and Dr. Joe Dennis, chemistry.

"**WE ARE AGREED**, however, that in the best interests of the institution the word (technological) should be eliminated from the title," Dr. Wade commented.

Dr. Keith Marmion, civil engineering department head, voiced a similar view, although his de-

partment has no faculty recruiting problems resulting from the name.

"**I AM WELL** aware that the Engineering School's best chance of success lies in being part of an institution possessing broad strengths," he said.

"For this reason a majority of the engineering faculty is in favor of a name change which will permit the other school of our university to realize their full potentials," he continued.

"**THIS I BELIEVE** is not possible under our present name, nor would it be possible under Texas Technological University," Dr. Marmion emphasized.

In the same vein, Dr. James Bennett, associate dean of agriculture, recently acknowledged the need for a name change for "our friends across the campus," though it may not be harmful to his own area.

ACADEMIC EXCELLENCE is the overriding purpose of any worthwhile college or university. Certainly this is the case at Tech. Yet Tech's name is allowed to impair progress toward this goal, a statement supported by academicians across the campus.

Clearly this obstacle should be removed. Approval of the name Texas State University of Arts, Sciences and Technology would remove the stumbling block and significantly speed progress toward first-rate university status.

THOUGHT FOR TODAY: *An excuse is worse and more terrible than a lie; for an excuse is a lie guarded.* —Pope

For Texas Redistricting

Is There A Need?

Last week, Gov. John Connally was in Lubbock, and the big question in his and everyone else's mind was redistricting.

Texas is a big state. It will send 23 representatives to Washington next year. The question is how are these representatives going to be elected?

Recently, the federal court in Houston ruled that the Texas law on Congressional districts was unconstitutional. This was the first time that a federal court had ruled on congressional districting.

It seems that our districts are lopsided. One of them encompasses 900,000 people while another has only 200,000 people in it.

This, of course, goes against all of our ideas of everyone having an equal vote. It does seem unequal when 200,000 people have one representative, and 900,000 have one more.

The federal court felt that the districts were too far out of balance and needed to be redefined. And until they were redefined by the state legislature (which would have meant a special session), Texas would have to elect all of its United States Representatives on an at-large basis.

This would mean that everyone in the state would vote for all of the representatives instead of voting for the one from the district in which the person resided. Anyway, this is the way it stood 10 days ago.

The governor was displeased. He said that the court hadn't understood Texas' problems on population and geography.

Thursday night, in his speech at the Lubbock Chamber of Commerce's 50th Anniversary Banquet, he made only one reference to the question, and it was a dilly. He stated, in so many words,

that as long as he was governor, no federal court was going to infringe on the rights of this state.

He also said that if anything was going to be done about redistricting, some people in the state capital were going to have to get on the ball.

Meanwhile, Attorney General Waggoner Carr had been pulling some strings. Friday, Supreme Court Justice Hugo Black announced that the Houston ruling would be delayed until the Supreme Court could rule on the appeal, made by Carr. This meant that, for the time being, Texas would retain its present districts.

Now, Gov. Connally felt he had breathing and working room and time to work out an orderly method of dedistricting.

But the question is still not decided. Conceivably, the Supreme Court could rule with the federal court, and Gov. Connally could either call a special session of the Texas legislature, or we could vote for our representatives on an at-large basis.

If the Supreme Court overrules the federal court decision, Texas will probably keep its original districts for the 1964 election.

The legislature could then redistrict the state considering geography and population. Watch out for that one. There may be quite a furor in Austin when it comes up.

Of course, the old districts aren't the best thing, but it seems a lot better than everyone voting for all of the representatives.

And a final mention should go to Gov. Connally for sticking up for Texas in true states rights fashion. He is, of course, only doing what we elected him to do, but notice the vigor in which he is going about it.

It is rumored that the Democrats have their eye on him for the big spot in 1968. At least it would give the Kennedy's a rest.

—Douglas I. Smith
Editorial Assistant

Solons Resort To Fisticuffs

WASHINGTON (AP) — A dispute between two Texas congressmen erupted into a one-punch fight Tuesday just off the House floor.

Rep. Ed Foreman, Republican, said Rep. Henry Gonzalez, Democrat, struck him once. The fight ended then, Foreman said, because he told Gonzalez, "I think you must have lost your mind," and walked away. Gonzalez left.

Foreman and other members agreed Tuesday's incident began when Gonzalez approached Foreman on the House floor and said, "I understand you have been calling me a Communist."

Foreman said he denied this, but told Gon-

zalez he had discussed his voting record. Foreman said later he had said in a speech in Houston that Gonzalez's votes had been a disservice to the Constitution and had helped the Socialist-Communist cause.

Foreman said Gonzalez then threatened to beat him, adding, "I might pistol whip you."

"Why don't you get about it?" Foreman said he asked, and both men stepped outside the House chamber into the lobby.

As they left the chamber, Foreman said, Gonzalez aimed a punch at his head, he ducked and the fist landed on his right shoulder.

Swiss Student Speaks

Letter To Editor

Editor:

As a Swiss student and teaching assistant in the School of Arts and Sciences, I'd like to tell you what I think about the burning question of a name change.

Last year I applied to the Institution of International Education in New York for a place to study in the U.S.A. in the field of languages. After careful examination of my papers, the institute decided that Texas Tech would be a good place for me.

ATTEND A COLLEGE?

My first reaction was negative. Why should I go to a college after three years of study at Zurich University? In Switzerland, as in many other countries, the word "college" stands for "high school."

My professors, too, told me not to go to a college, certainly not to a technological college because it would not have a School of Arts and Sciences.

Thus, I told the institute in New York that it must have made some mistake in proposing a technological college for me. They promptly answered, sending me ample information on Texas Tech and telling me that the name does not really mean what it suggests. Why then keep such an inappropriate name?

BEST NAME

I really think that "Texas State University" is the best name for this school and that the change should be made as soon as possible.

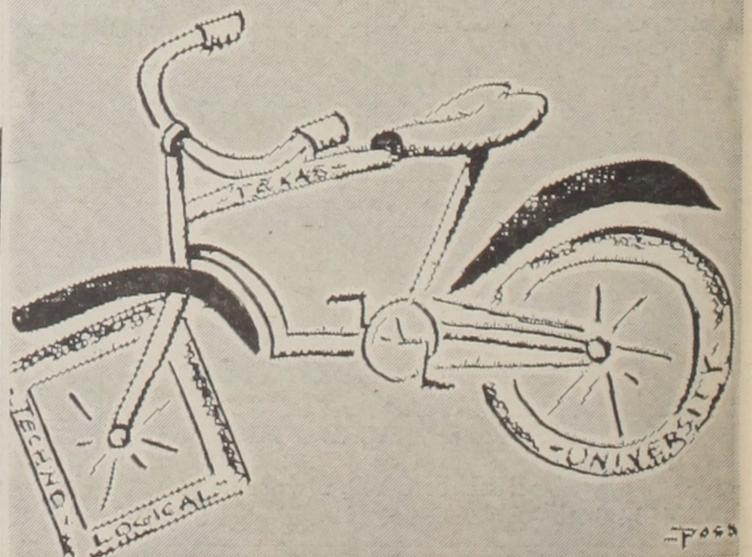

Nobody — not even the opponents of a name change — can deny that our present name is misleading and even keeps students from other parts of the United States or of the world from coming here.

And what about the students who graduate at Texas Tech and then leave Texas? Being a graduate from Texas Tech does not mean as much as being a graduate from Texas State University for everybody who is not familiar with our college.

Tradition is a strong force — but reason should be stronger — and it is only reasonable to give the proper name to everything.

Yours very truly,
Max Peter (Switzerland)

THE RED RAIDER SPECIAL

Off The Deep End

by Lyne

It's not often that one can interrupt the daily rat race long enough to consider the things for which he is truly grateful.

For no apparent reason it struck me the other day that I am three-fourths of the way through college and maybe one-third of the way through my life.

I believe I've got a lot for which to be thankful.

If I could approach my parents and list my various reasons for gratitude, probably the first thing I would say is, "Thank you for sending me to college."

But there are plenty of other things, however insignificant, for which I would attempt to say, "Thank you."

For instance, I'm grateful for their tolerant, if not eager acceptance of the endless parade of stray animals that I dragged home as a kid. Somehow the scrawnier and runtier a mutt was, the better pet he made.

I'm thankful for the small mountains of books and magazines that were always lying around the house. I'm even more thankful for my parents' pretending they they couldn't care less if I read them or not.

I'm grateful for their never demanding that I go practice my piano lessons or do my homework. I usually managed, perhaps because of reverse psychology, to do both.

I suppose I would thank my parents for only occasionally allowing my older brother to beat me up. He was bigger than I was, and inclined to arm-twisting and hair-pulling, and I have the very personal opinion that my survival was purely accidental. It certainly had nothing to do with the survival of the fittest.

I have ridiculously sentimental memories of my first pair of roller skates. Thinking back, I can almost recall the exact sensation of rattling over the rough pavement.

Naturally there are endless other things about which I have warm memories—hot chocolate on cold mornings, the inviolable sanctum of my tree house, licking the spoon on cake-baking days—and I may never again recall some of them as long as I live.

But the vague little thoughts of times past, however worthless for accomplishing a task at hand, are unexpected sources of cheer. In especially dismal or boring moments, it requires only a little reflection to throw you into a laughing mood.

Only yesterday I remembered the time that a man gave me 200 left-over Easter chicks. I promptly brought them home and turned them loose in the house, where chaos reigned supreme and my mother threatened suicide for two days.

Finally we rounded up what we thought was the last stray chick, and peace settled over the household once more.

And then we kept hearing a strange peeping noise as we were sitting in church the next Sunday morning. My mother opened her handbag. You guessed it—inside there was one lonesome little chick.

Worley Duplicates Teammate's Stunt

Just as David Rankin, his former Midland Bulldog teammate, did for Texas Tech two years ago, the Red Raiders' Bill Worley scampered 35 yards with an intercepted Southern Methodist pass in the Cotton Bowl Saturday.

Both Rankin and Worley, now seniors, are happier this time, because Worley's touchdown was the

clinger in a 13-6 victory, and two years ago the Raiders were finally nipped by the Mustangs 8-7.

Another consequence of the run was Worley's taking over the Texas Tech pass interception leadership. He brought down another SMU aerial on the Tech five, and now paces the Raiders interceptors with four for 103 yards.

Don Anderson, the fellow Worley displaced, isn't particularly suffering, because he moved to the top in another category to retain the No. 1 position in four categories. The Stinnett sophomore's 109 yards rushing put him in front in total offense. Anderson has 313 yards of total offense, all gained along the ground, just ahead of

soph quarterback Ben Elledge of Brownwood. The latter has 279 yards, 281 passing, two minus rushing yards.

Since Anderson has carried 82 times his rushing averages out to 3.8 per try. Sophomore Bill Weise of Austin has the best average, 5.3 yards on 22 carries, and is third in rushing total, with 116 yards. No. 2 rusher is sophomore fullback Leo Lowery of Lovington, N.M., 144 yards on 42 for a 3.4 average.

Elledge, who directed a 91-yard scoring drive, now heads passers with 27 completions on 54 tries for 281 yards. Junior Jim Ellis of Lubbock Monterey is second with 19 of 39 for 252 yards.

Favorite target is still senior end David Parks, who has caught 15 passes for 233 yards. Anderson's five catches strengthened his second place spot—with 10 for 109 yards.

Anderson, counting kicks to the SMU 6, 5, and 2-yard lines among his five, averaged 45 yards Saturday to bring his kicking mark to a 41 average for the season.

Junior Teddy Roberts of Gulfport, Miss., still paces punt returners with 94 yards on nine.

SMU blocked an H. L. Daniels extra point try after 11 consecutive conversions—dating back to last season — but the senior fullback from Marshall still leads Tech scorers with 24 points. He never tried a field goal last week, but a successful three-pointer against Rice here Saturday would give him a share of the Southwest Conference record with Texas A&M's Mike Clark, who had seven last year.

Does a man really take unfair advantage of women when he uses Mennen Skin Bracer?

All depends on why he uses it.

Most men simply think Menthol-Iced Skin Bracer is the best after-shave lotion around. Because it cools rather than burns. Because it helps heal shaving nicks and scrapes. Because it helps prevent blemishes.

So who can blame them if Bracer's crisp, long-lasting aroma just happens to affect women so remarkably?

Of course, some men may use Mennen Skin Bracer because of this effect.

How intelligent!

flighty notes on the owls

It may be noted that Herr Jess Neely of Rice is a successful coach. This contention is based entirely on statistics, but can be borne out quite satisfiably by the elusive listings of numbers.

Ol' Jess, who along with Abe Martin of Texas Christian, is the longest reigning coach in the Southwest Conference, has a winning record against everybody in the conference but mighty Texas.

And in that series of contests Neely only trails 10-13-1, with the 13th loss coming last Saturday and the only tie being the 14-14 blemish the Owls put on Texas' 1962 record.

The 13-7 Rice victory over SMU two weeks ago put the grand old man "ups" on the Ponies and extended his mastery to everyone but Darrell Royal's teapippers.

Paul Piper, the 203-pound fullback is another of the reasons Neely rates so high. Piper has remained among the leaders (Jim Lindsay of Arkansas, Harold Phillips of Texas, Tommy Ford of Texas and Tommy Crutcher of TCU) all along in the rushing race, even though the big Rice bone-crusher has played one less game than any of the others.

His average-per-game is the whopping 74.0 that he carries into Lubbock for the Homecoming tilt with the Red Raiders.

With the doubtful start of senior tackle John Mims, the Owls maintain an otherwise injury-free lineup. The 266-pound heavyweight is one of the top tackles in the Southwest, and his injury in the Penn State loss was a jarring blow to the Rice title hopes for 1963. Mims has missed the SMU, Stanford, Texas games, and will probably miss the Tech skirmish.

raider notes

Texas Tech has a respectable 19-13-1 Homecoming record over the years. However, the record with Rice on Homecoming Day is not as impressive. The Raiders are 0-2, having lost 7-14 in 1948 and 7-42 in 1961. The last Raider victory on this day was in 1960 when SMU played dead as the Raiders walked away with a 28-7 Homecoming win.

There have been several conflicting reports as to what J T King told David Parks before he re-entered the game with third and 12 facing the Raiders on their own 6-yard line. There have even been rumors circulating that Elledge passed without permission from King and that the coach was angry with Elledge. Here is the straight scoop:

"Tell Elledge to throw the sideline pass to you if you're open—to me if you're not," King told Parks.

And, as King later explained, "They had such a rush on I didn't think they could put more than two men on Parks."

Speaking of quotes—Donny Anderson, the Raiders' sophomore spectacular, came out of the game after scoring Tech's first touchdown against SMU. He was greeted from the bench by academic counselor Clyde Prestwood, who, thinking Donny would like a drink of water, asked him, "Donny, what can I do for you?" The reply (and Prestwood swears it's true): "Give me some help with that sociology."

Forum Discusses Slow Intergration

"Intergration—Too Slow!" will be the topic of Dr. Merton L. Dillon at today's Challenge Forum.

Dr. Dillon, associate professor of history and author of several books, will give his views on racial issues.

The forum is set for noon today in the Mesa Room of the Union. Reservations must be made at the newsstand before 10 a.m.

Tech, Anderson Win 'Battle Of Sophs'

By JIM WESTBROOK
Toreador Sports Writer

Perhaps SMU's Billy Gannon reflected the feelings of the entire SMU team when, late in the third period Gannon had just made a tackle near the Texas Tech sideline. Gannon seemed to stare directly at Raider coach J T King. It was a look of weariness and despair and seemed to say, "What have you done to these guys of yours?"

It seems Gannon and his mates stared a little too long in the wrong places, and before they could blink, they were on the short end of a 13-6 score and the Raiders had bagged their second conference win in five tries.

The stare didn't seem to bother King, in fact he didn't even notice it. He was too busy running up and down the sidelines, hitching at his belt, slapping people on the back, pacing the wornout path that coaches trod incessantly, and in general just enjoying himself.

And J T King had much to be overjoyed about. One had only to look at the bull-like rushes of

Donny Anderson, the signal-calling of quarterback Ben Elledge, and the stout Raider defense led by John Carrell, C. C. Willis, Bill Shaha, Tommy Doyle, and Bill Worley to see what was making King's face light up.

Anderson, making his best showing of the year, ran through, over, under, and around everything the Mustangs had to offer. On 19 carries Anderson never was persuaded to fall backwards and on many occasions it took four to five tacklers to bring him down.

On the first Raider touchdown, Tech had the ball on the SMU two yard line with a first down. Elledge hit Anderson with a swing pass and Anderson was met by three Ponies at the goal line. Anderson simply put his head down and ran over all three, falling into the end zone for the score.

This game had been billed as the 'meeting of the sophomores.' That is, Anderson vs. SMU speedster John Roderick.

It never came off. Roderick was

bottled up all afternoon and managed to gain only 26 yards in nine carries. Anderson ran loose for 109 yards on 19 hauls and 40 yards on five pass receptions.

Possibly one Raider fan summed up the outcome of the game when late in the fourth quarter he stood up and shouted, "Our sophomore is a heck-of-a-lot better than your sophomore."

And he was!

WHERE ARE YOU GOING THIS VOCATION?

Young scientists and engineers "going places" investigate a variety of challenging engineering avenues before selecting one best suited to their goals. And they look for a professional climate with lots of individual recognition and advancement opportunity. If you are charting your career along this course, let Ling-Temco-Vought be your guide.

As one of the nation's most versatile contributors to the aerospace, military electronics and communications sciences, LTV can offer you a personalized route to an exciting and rewarding future in such areas as **aerodynamics • avionics and instrumentation • operations analysis • dynamics • systems design • servomechanisms • stress analysis • propulsion •**

communications design • reliability/maintainability engineering • reconnaissance systems • amplifier and computer systems • microwave components design • electromagnetic interference control • electronic systems analysis • telemetry and tracking • trajectory analysis • manufacturing r&d • industrial engineering • technical administration . . . plus many others.

For a closer look at the numerous career directions available with Ling-Temco-Vought, ask your Placement Office for our brochure describing LTV projects and products, then schedule an appointment with our representative. Or write College Relations Office, Ling-Temco-Vought, Inc., P. O. Box 5907, Dallas 22, Texas. Ling-Temco-Vought is an equal opportunity employer.

Techsans Get Oil Grants

Two Tech students recently received oil company scholarship awards.

Jerry V. Fox, a graduate student in chemical engineering from Gainsville, and Robert W. Bertrand, a senior geology major from Lock-

port, N. Y., were the scholarship recipients.

Fox received a \$500 educational assistance scholarship award from Standard Oil Co.

The Company also presented a matching grant of \$500 to Tech for unrestricted use in the chemical engineering department.

Bertrand was awarded the Soco Mobil Scholarship for 1963-64. He will receive \$500, plus \$400 expenses.

An additional \$500 will be awarded the geology department.

Spirits Haunt Union Party

Spooks, goblins and witches will haunt Tech Union Halloween night.

The spirits will attend a party given children of Tech faculty and married students at 7 p.m. Thursday in the Coronado Room.

Entertainment will include two cartoon movies, favors and refreshments.

The Hospitality Committee of the Union is sponsoring the party. All eligible children are invited to attend.

UT Hazers All Wet

AUSTIN (AP) — A University of Texas student was hospitalized Tuesday with injuries suffered at a hazing ritual that turned into a free-for-all dunking in a large fountain about midnight.

Police said Robert Shofner Jr., a freshman has been retained at the health center for observation of possible head injuries.

Eleven other dripping wet students were questioned.

Skit, Man Entries Set

Deadline for Tech's Most Handsome Man contest and Club Scarlet skit entries is Friday, according to Jody Allen, Theta Sigma Phi president.

Registration blanks must be turned in to Theta Sigma Phi, Journalism Bldg., room 211.

Most Handsome Man entries should be accompanied by 5x7 glossy photographs.

Club Scarlet, an annual mock night club event is slated for Nov. 9 in the Union Ballroom following the Tech-Kansas game. Tickets will be sold in the Union Nov. 6 for \$1 per person.

La Ventana Photo Choice Mandatory

Students who have had LA VENTANA photographs made but have not returned to Avalon Studio to designate a particular picture for use in the yearbook should do so immediately.

This may be done by going by the studio at 2414-A Broadway between 8 a.m. and 5:30 p.m. Those students who do not go by will have a photograph selected for them by Avalon personnel.

Committee Bows

WASHINGTON (AP) — The House Judiciary Committee bowed today to President Kennedy's wishes and put aside a tough civil rights bill in favor of a measure with broader bipartisan support.

The committee voted 20-14 in favor of the new proposal, but a parliamentary tangle will require another vote before the committee action is final.

The vote had not been formally announced when the committee was forced to adjourn by the start of the House session. Chairman Emanuel Celler, D-N.Y., said it will take another meeting to complete the final vote. He said he hopes it will be this week.

Result: All 3-speed manual transmissions in Ford-built cars with V-8's now are fully synchronized in each forward gear

To get more "go" in low, Ford engineers were asked to upgrade the conventional 3-speed transmission to give drivers more control in all three forward gears—to make "low" a driving gear—and they tackled the problem imaginatively.

Their achievement, another Ford First, is the only U.S. 3-speed manual transmission with all three forward gears fully synchronized! No need now to come to a complete stop when you shift into low—and no clashing gears! It lets you keep more torque on tap for negotiating sharp turns and steep grades. It makes driving more flexible, more pleasurable.

Another assignment completed and another example of how engineering leadership at Ford provides fresh ideas for the American Road.
