## No. 1 La Ventana Beauty Wins New Title In Legion Contest

Beverly Besanon was chosen "Starlet of 1947" at the American Legion show, "Stars of Showtime", presented at the Panhandle-South Plains Fairgrounds Tuesday night.

Beverly was chosen by Governor Beauford Jester and presented in La Ventana as Tech's number one beauty for 1947. A prize of \$100 was awarded Beverly, who is a junior arts and science student from Seminole. Pat Jones of San Angelo won second place and \$50, and Lea Parks of Dallas, third, was given \$25.

Fifteen beauties from the South Plains and other parts of Texas paraded three times—once in evening dresses and twice in bathing suits—before judges and a crowd of 1,200 people.

Jerry "Call Me Judge" Stoltz, senior journalism major from Hobbs; Metro Goldwyn Mayer scout E. B. Coleman and E. C. Bannan from Chihuahua, Mexico, were judges.

Delight Hardin, freshman, and graduate Christina Tippet, both of Lubbock, were other Technans in the show.

Funds raised will be used for veteran's rehabilitation and child welfare, according to J. M. Hall, American Legion service officer.

## Reports Declared Unofficial On Delayed Dorm Completion

There is no official basis for the report of the local press that there were "indications" that the new girls' dormitory would not be completed in time for the opening of the fall semester" at the Tech Board of Directors meeting Saturday in Fort Worth, college authorities stated this week. No official statement on the completion date has been made by Tech authorities.

A power saw, tools and insulation used in construction of the new dormitory for girls were destroyed by fire yesterday noon, but on the job it was said building will not be slowed up. The fire razed saw and storage sheds but did not spread to main storage building nearby.

but College Architect Wyatt C. Hedrick reported to the Board that every effort would be made to complete the structure by fall.

Work is being pushed and is continuing on a seven day a week basis when labor is available through Saturday and Sunday, it was said on the job. Construction delays have been caused by materials and labor shortages, Hedrick told the Board. Work on the dorm roof was resumed two weeks ago after a 55-day strike in the roofing manufacturers' industry.

A total of 1,112 reservations have been received for the girls dorms, 150 for Doak hall, 272 for Drane,

and 690 for the new dorm. Registration for rooms in Sneed and West halls, boys' dorms, total 960, with a waiting list of 500, it was reported to the Board.

## Second Session Enrollment Tops Last Year 11 Percent

Final registration figures for the second summer term total 2,257, with 1,742 men and 515 women, according to the registrar's office. The office estimated an increase of 11 percent over last year's second summer term total of 2,011.

Arts and Sciences division heads the list with 800 enrolled, while Engineering is second with 705 students. There are 378 Business Administration students, 272 Aggies, and 127 Home Economics students. All figures include graduate students in each division.

## Library Facilities, Staff Expanded; Installations Double Book Capacity

Construction of \$50,000 book stacks which will more than double the book capacity of the Library, and installation of 95 study carrels for use of graduate students and faculty members are now under way. Two new staff members, a documents librarian and a reading advisor, are planned

for fall, Librarian A. S. Gaylor announced.

An expanded recreational reading section will be housed in the west reading room on the second floor, in a step toward realization of the Library's plans for a separate fiction reading room. The reserve collection will be moved to

this room, along with books of general interest and collections for collateral reading in various courses, Gaylor said. The room will be supervised by a reading advisor, who will also be on duty to instruct students in making full use of the library facilities.

Circulation desk and card catalogs will be moved to the second floor, and the reference room will be on the first floor with a more compact arrangement of periodicals, he said. A Southwest history room is planned, to be housed on the first floor of the building, he added.

The new book stacks will be arranged on five levels, making room for between 250,000 and 300,000 volumes.

## Tech, A&M May Get Wheat Land; Joint Application Partially Cleared

Tech and Texas A and M college may get a portion of the Pantex Ordnance plant land near Amarillo from the War Assets administration within a few days, according to an article in Tuesday's Avalanche-Journal.

The article stated that word has come from Amarillo, where Cong. Gene Worley had telegraphed from Washington that the applications of the two schools for the land and buildings had cleared the legal division of the WAA. Effort is being made to cut red tape so that the schools can have the 8,600 acres in time to have it prepared for seeding in wheat.

Experiments to determine the cause of wheat poisoning of cattle in the winter wheat belt will be carried on if the schools receive the land.

Leases with all tenants who farmed the land last year have been cancelled by the government,

but they were assured that if the application of the colleges is approved the farmers will be given new leases at once, the Amarillo News-Globe said.

President Whyburn and Dean Stangel of Tech conferred last week with A and M and experiment officials at the invitation of Chancellor Weymouth, member of the Tech board who has been working on the project for two years, according to the Amarillo paper. Neither Dr. Whyburn nor Dean Stangel has yet made a statement on the matter.

## Disabled Vets To Report To Ad-109 Before Aug. 5

In order to receive subsistence pay, disabled veterans attending Tech under Part 7 of the GI Bill must report to the VA office, Ad 109, before Aug. 5 if they have not done so, this semester, Veteran's Coordinator H. A. Anderson announced this week.

All veterans are to report to the office during the last two weeks of the summer term to get leave covering the period between the summer and fall terms Anderson said.

## Pianist Bodfors Appears August 7

Franz Bodfors, called "the new master of the piano," will appear Thursday, August 7, at 8:30 p. m. on the Administration building green under the auspices of the Artist Course.

The impressionist dance team, Grace and Kurt Graff, originally scheduled for Monday night will not appear because of Mrs. Graff's illness, Dean J. G. Allen, director of the summer recreation program, announced.

Bodfors has recently returned from training abroad with the great Artur Schnabel at Lake Como, Italy. Previously, he had scholarships with Dr. Rudolph Ganz and Jan Chlipusko. He also studied under Alfred Cortot at the Ecole Normale de Musique in Paris.

Success and recognition marked his musical preparation in the form of awards and degrees, bachelor and master of music in piano and in composition under Arthur Olaf Anderson and Louis Gruenberg. Study at Beloit college and Northwestern university was included in his scholastic training. He has travelled extensively in both Europe and America.

Franz Bodfors has been brilliantly recognized by critics for his (Continued on Page 4)

## Standstorms Have Little Respect For Concerts Ex-Techsan Recalls

Tech graduate Gordon Gaines, baritone who appeared on last night's Artist Course program, remembers one of his concerts at Tech that was presented under unusual circumstances, to put it mildly.

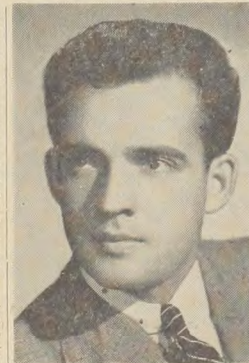

The program was slated for a fine summer evening on the Administration building green. But during the concert, a typical West Texas wind-and-sand-storm came up. If Gaines could manage to keep his hair and his coat tails from blowing in his face, then every time he hit a high note he ended up with a mouthful of sand. To top it off, one of the casters under the piano legs broke with sound effects resembling a minor dynamite blast.

According to age-old stage tradition, the show must go on—and it did. But as Gaines recalled the incident this week, he cast a worried glance at the sky and hoped for fair weather.

### Sunday Night Presentation

A second performance to be given by Gaines during his stay in Lubbock will be a presentation of "Elijah" Sunday evening at the First Methodist church. Last night's concert at Tech included classical numbers, spirituals, and selections from musical comedies and operettas.

Gaines graduated from Tech in the summer of 1939, and considers the campus greatly improved since that time. He received a B. A. degree, majoring in English and minoring in music. He credits Mrs. Myrtle Short, voice instructor here, with being instrumental in starting him on his musical career

GORDON GAINES  
Baritone  
\* \* \*

and encouraging him to continue in New York.

He attended Eastman School of Music and also spent a year at the American Academy of Dramatic Arts.

### Accompanist Is Technan

Rev. Charles E. Fike, who played Gaines' accompaniment, is also a Tech graduate. They worked together in musical circles while in Tech, went to New York at the same time, and were together part of the time while both were in the army.

Rev. Fike has an M. A. degree (Continued on Page 3)

## Typewriting Room Available By Fall

A typewriter room in the Library is expected to be available by fall, Librarian A. S. Gaylor announced this week.

As soon as possible the Library hopes to have typewriters to rent to students at a nominal hourly fee, but plans are underway now for providing space where students may bring their own typewriters, he said.

## Foreign Students Eligible For Five New Scholarships

Five \$100 scholarships for foreign students attending Tech will be made available each semester beginning this fall by the Tech Board of Directors, the college committee on scholarships and awards has announced.

Applications must be made to Dean J. G. Allen, a member of the scholarship and awards committee, by August 15. Three applications have been received.

Eleven foreign students enrolled in Tech last fall, compared with nine who enrolled in the spring.

In order to win one of the scholarships, a student must have attended Tech a minimum of one semester and have attained a grade point average of 15. The scholarship may be renewed by application each year if the grade average is maintained.

### COMPLETE DEGREE WORK

Number of candidates for degrees from Tech in August were given by the academic deans as follows: about 51 from the Engineering division, 25 from Agriculture, 30 from Business Administration and six from Home Economics. Figures were not yet available from Arts and Sciences.

**ENTRE NOUS**

"Texas Tech, the only state college that has not had inner turmoil."

This was our alma mater hailed last year, and that is well and good, and fairly true. Yet the makings of turmoil are present, and the lid won't stay on forever.

Item: the new dorms.

The time is fast approaching when some college official will have to make a statement as to whether the girls dorm will be completed in time for the opening of the regular session. Granted, whatever statement is made may turn out to be wrong. With building problems what they are today, the facts of "to be or not to be" will probably not be known 'til the literal last minute.

Still, 690 reservations have been made for the new dorm. That is 690 girls who deserve a statement before they arrive to register. If everyone continues to "decline to make a statement" then the reservations should not have been taken.

Item: no August commencement for Techsians.

West Texas State Teachers college, with only 72 candidates for degrees at the end of the summer, will have graduation services. Tech, with about 200 candidates, will not.

West Texas gives the names of proposed graduates. Tech can't even give the number, although degree cards had to be filed by June 11. The *Toreador* finally obtained incomplete figures, but what it cost in shoe leather and phone calls will never be known outside the news room.

And we'll bet you 20 cents that West Texas has more than one honor roll a year.

Item: "Hush-hush" attitude.

The Strange Case of the Morgan Petitions last spring was shushed because appointments of three Tech directors were pending and unfavorable publicity might be a stumbling block in the way of the appointments. When we got our directors the tumult and the shouting had died before they got started.

Item: fact-finding, Exhibit A.

The committee which allocates funds from student activity fees wanted to know if the Board of Directors had okayed a compulsory activity fee for the next four years. An act of the Fiftieth Legislature permits a compulsory fee. The Board had made its decision but no announcement had been made.

One poor sad committee member was sent back and forth, up and down, and around in circles asking for "yea" or "nay" from several college officials, all of whom declined to make a statement. Fortunately, someone lifted the Iron Curtain before the student collapsed.

Exhibit B.

In seeking out the report on the Student Union Building Fund published last week, we informed the Business Office who we were and why we sought the information. When the report had been prepared and we went after it, this dialogue took place:

"Who are you?"

"Winifred Larabee."

"Yes, but what are you? What office do you hold? Why are you asking all these questions?"

"In editor of the summer *Toreador*."

"Well, we have to be careful who we give information to"—and then came phone calls for authorization to release the report: a report on money which came almost entirely out of students' pockets.

Our case rests for this week. Maybe Tech will remain the only state school without inner turmoil. We hope so, but we decline to make a statement.

**Editorial . . .**

The Exes must be the public relations department for any college, as the Tech Ex-Students News stated this week. Through that sort of an active public relations department Techsians past and present, and as Tech itself, will profit to an immeasurable degree.

Praise goes to the Alumni and Ex-Students association for the hard job that it has tackled, to get those press agents busy and to raise the prestige and position of Tech. By so doing, it will raise the prestige of each of us who will say, "I went to Texas Tech."

It will mean political development for the college, which is the life's blood of any state-supported institution. With a strong group of exes backing us, Tech boosters will one day be more than mere voices crying in the wilderness. We will then be heard from—even so far away as in Austin, and even when the legislature is in session.

The Association has started on the big job of contacting former students, between 8,000 and 9,000 graduates and about 50,000 other ex-students. The job of getting more recognition for Tech lies ahead.

In our 22-year history, enrollment has increased almost 600 per cent. We have made good academically, as manifest by our approval by the American Association of Universities last fall. This recognition means that our faculty has made good.

We have grown physically in spite of the handicap of insufficient appropriations. With funds from sources other than the state, we have built four dorms, the Press building and the Museum—plus the two dorms and the stadium under construction.

Our athletic achievements are ever putting us in higher realms in the sports world.

Our score is good and should be acclaimed wherever there is a Techsian. The Alumni and Ex-Students association strives to see that this is done. It wants the sign of the Double T writ large upon the map in bright red letters.

The *Toreador* says, "That's the way it should be. More power to you, exes."

**Vitamin Pills Will Never Supplant Diet Of Fried Chicken, Apple Pie**

Fried chicken and apple pie are here to stay.

Vitamin pills, mineral extracts and other forms of concentrated food capsules will probably never replace the present more conventional human diet, according to Dr. R. C. Goodwin, Arts and Sciences dean and chemistry department head. And he gave numerous reasons to substantiate his theory.

In the first place, science has not yet learned to manufacture all of man's complex food needs synthetically, and probably never will. Even if this were possible, the synthetics would probably be too expensive to be practical. Also, man's stomach could not function efficiently on a diet of thimble-size pills—it needs to be literally full before digestive juices will follow.

Now if successive generations of man should choose to live exclusively on those concentrated capsules—if they were available—and finish filling their stomachs with hay to start the digestive process, the possibility exists that in a thousand years a man might evolve with a very small stomach capable of handling the food pellets alone.

But meanwhile, little girls had best go right on learning to cook. It isn't very likely that men will pass up beefsteaks and French fries in favor of fodder.

So, professor, please pass the strawberries.

President and Mrs. W. M. Whyburn and family left Sunday to spend their vacation in California.

**Texas Headed For Milk Shortage, Hardest Hit Areas Include Plains**

Texas is apparently headed for another milk shortage this fall, L. B. Harmon, professor of dairy manufacturing, predicted following a meeting of dairymen from West Texas and other points over the state held here.

Worst shortages will probably be on the North and South Plains areas and in south Texas along the coast, he said. The milk surplus which has been evident this summer in the area around Fort Worth, Dallas, Brownwood and Eastland will probably be eliminated in the autumn months, according to the dairymen present at the meeting.

One of the reasons for the shortage is that farmers tend to ease up somewhat on milk production efforts when field crops are excellent as they are now in the Panhandle. But the major cause is the common practice of dairymen of breeding more cows for spring freshening.

The breeding practice causes summer when demand is lightest, and leaves the October to February period with low production.

The obvious solution is for more milk producers to breed for early fall calf crops, Harmon said. But he predicted that it will probably take at least four to five years to increase the percentage of cows freshening in the fall to the extent needed to eliminate annual winter milk shortages.

Some producers in the north and central part of the state are planning to build up grade A volume and ship milk into the Rio Grande valley and along the coastal area, it was disclosed.

valley and along the coastal area, it was disclosed.

New Ice Cream Equipment**

Dairy manufactures students are learning to make ice cream with the most modern equipment in the industry, according to Prof. K. M. Renner, department head.

The department has recently put into use a new creamery package continuous freezer with a capacity of 40 to 60 gallons per hour and a new low pressure homogenizer to make ice cream mix at the rate of 200 gallons per hour. A batch freezer and a high pressure homogenizer had been in use for some time.

Las Vivarachas, women's social club, will hold its annual reunion in Dallas August 1-3.

# 13 Techsans Enter Tennis Tournament

A record entry of 13 Techsans played in the third annual Lubbock City Tennis championship tournament which got under way last Monday.

Ed Scudday registered a first round singles victory over Barney Bevers 8-4, 7-5, 6-1 and Jeff Davis eliminated Bud Hyberg in straight sets 7-5, 6-1. H. L. Burgess beat Pat Wiman in straight sets 6-2, 14-12.

In men's doubles, Henry Cunningham and Doc Blanchard bested O. A. Fanning and Jim Sanders 6-2, 6-3.

Glenn Ivy, Tech senior who would have been defending champion in this year's tournament, had to withdraw from the tournament because he was leaving the city.

Techsans drawing first round byes in the singles division were Jack West, David Hester, Harvey Mason and Doc Blanchard. Other Techsans competing in the tour-

ney include Harold Spuhler, z. D. Pickens and Wayne Roby.

Roby and Scudday were quarter-finalists in last year's tourney. Roby lost to Ivy and Scudday succumbed to Houston Boyd, 1945 champ and finalist last year, in one of the most hotly contested matches of the tournament.

In the women's bracket Mrs. Houston Boyd and Mrs. Alfred Strehl, defending champions, retained their women's doubles title in Tuesday afternoon's matches, defeating Techsans Susie Blackwell and Carla von Roeder in straight sets 6-2, 7-5.

Matches are being played off each evening starting at 6 p. m. on the Dupre and Meadowbrook courts. Finalists in all events will probably be decided by the end of the week, according to Curtis Barrett, city recreation director.

Trophies will be presented to all winners by the recreation department.

# TAAF Boxing Meet Entries List Adams, James, Stevens

Heading the list of entries for the Brownfield District TAAF boxing tournament slated at Cub sta-

dium in Brownfield August 7-9 is Techsan Tom Adams, light heavyweight from Brownfield who earlier this year battled to district and state Golden Gloves titles before losing in the national Tournament of Champions at Chicago. Adams will also be out to defend his title as state TAAF light heavyweight champ.

Gene James, who earlier this year copped the New Mexico state Golden Gloves heavyweight crown and later saw action in the national meet at Chicago, has also submitted his entry. James, a former Techsan, will represent Lubbock.

Red Raider Cal Stevenson rounds out the list of Tech entries in the three-day milt' meet. Stevenson took part in a number of amateur bouts while in the Marine corps. He played end with the Raiders last year but will play in the backfield next season.

from Columbia university and a B.D. from Southern Methodist university. He is pastor of the Gruver Methodist church.

Television is all that prophets have claimed for it, and more, Gaines says. He will continue this fall with the United States Rubber company's television show Tuesday evenings over WABD. On last year's show he was master of ceremonies and feature soloist.

### Air Force Activities

While in the army air force, Gaines was assistant conductor of singing as well as appearing in the cast of the air force show, "Winged Victory." As head of the special service division in Atlantic City, he and Lt. Dick Chapman, one time national golf pro, organized the army air corps singing unit. Gaines presented daily programs in Convention Hall during processing of cadets, and taught marching songs to the cadets.

Before entering the service, he appeared in "Lady in the Dark" in New York. Since then he has been in Milton Berle's "Spring in Brazil" and Kreisler's "Rhapsody." Last season he made a concert tour in the East, and will present a concert in Pittsburgh August 10.

## Senior Courses To Be Resumed By ROTC Units

ROTC senior courses will be offered next fall for the first time since the war, Col. Robert T. Riordan announced. Before, only freshmen, sophomore and junior courses were available. New courses will be for the Air Force, Infantry, Signal and Engineer Units. About 90 seniors are eligible for the courses, he said.

Around 200 juniors have signed up for the fall term ROTC training, Riordan said. He further stated that the junior quota is smaller than the freshman and sophomore quotas, so juniors designing ROTC training this fall are requested to add their names to the list now to insure their acceptance.

### 39 ATTEND CAMP

Air Force students who attended the summer ROTC camp at Randolph Field returned last week and part of the group registered for the second semester of summer school. Special arrangement was made for the students to enroll a week late for the second term in order that they might attend the camp. Thirty-nine students attended the summer camp at Randolph Field.

Signal corps and Engineer corps students are still at camp but are expected to return this weekend, according to Lt. Thurston M. Mallard of the Military Science department. Maj. John M. Goodman and a group of 15 students are at-

interpretative command of the master-works, and for his direct uncompromising approach to the fundamentals of the musical message. Young Bodfors is also a profound interpreter of the spiritual aspects of great music. In his instinctive musicianship he shows a powerful independence of thinking and his conception of music gives it an entirely new beauty and reality.

### STITT VISITS

William T. Stitt, 1933 mechanical engineering graduate visited Tech campus last week. Stitt is with the Pan American Airways of Brownsville, Texas.

## Alumni Association To Remain Inactive In Building Election

The Executive Board of the Alumni and Ex-Students' association has decided at a meeting not to take an active part, as an association, in the special election of August 23, according to D. M. McIlroy, executive secretary.

The election will bring to the vote of the people a proposed amendment to the Texas constitution which would create a 30-year building fund for state colleges.

The Alumni organization stated that its official publication shall be open to both sides of the question, consistent with its policy of reflecting the views of the exes.

A permanent financial plan for the association, plans for homecoming and plans to acquire the Amarillo Pantex plant were other matters which were discussed at the meeting. Pres. Elmer Tarbox presided.

## Wesley Foundation Gets Chapel Funds

Tech Wesley foundation is to be given \$75,000 to establish a chapel and education unit for Tech students at St. John's Methodist church, it was decided at the Texas Methodist Conference in Houston, recently. Of this sum, \$50,000 has been raised, Rev. Cecil Matthews, director of student work, announced.

The Methodist Student Building fund is a two-year program and is to be completed next May, Matthews said. The Wesley foundations of Texas A. & M., University of Texas, West Texas State College, TSCW, and North Texas State College are each to receive \$75,000.

### FURNITURE RECEIVED

Two carloads of new furniture for the dormitories now under construction have been received and another is waiting to be unloaded, W. T. Gaston, college business manager, announced this week.
