

## Campus Plans To Welcome Texas Solons

Plans are now being formulated to accommodate approximately 30 state legislators on the Texas Tech campus Thursday and Friday.

The group, composed of both representatives and senators, was invited to visit Tech by Lubbock Rep. Delwin Jones. Jones is handling negotiations in Austin, while the Office of the President and the Lubbock Chamber of Commerce are working on the visit in Lubbock.

Tech President R. C. Goodwin has been in Austin since Sunday, and will release details of the visit when he returns today.

### Purpose Of Visit

Purpose of the visit, according to James G. Wells, assistant to the president, is to acquaint the legislators with the Tech campus. Many of them have never seen Tech before, he said.

The group is expected to arrive by chartered plane Thursday afternoon following adjournment of the legislature for the weekend. Many will attend the Tech-Texas A&M basketball game Thursday night.

The legislators will tour the campus Friday morning and will be guests at a noon luncheon in the Tech Union. They will leave Lubbock Friday afternoon.

Names of legislators attending will not be released until Thursday.

TROPHIES WON BY WORDS — A number of trophies have been won in the last two weeks by members of the Forensic Union at various places. (Left to right) Silver cup was won at the Model United Nations. Two were won for second place

and top speaker in competition in Abilene last weekend. Two weeks ago a first place for manuscript reading was won also in Abilene. (Left to right) Chris Hickey, Hac Brummett, Hal Upchurch, Doug Andrews and David Bradley.

### —Nuclear Physics—

## Researchers Use Books

By DAVID SNYDER  
Copy Editor

Most people think of experiments and laboratories when they think of research, but much research is conducted from behind a desk using only books, words and figures.

Nearly as many Texas Tech professors conduct theoretical research as do experimental research, and the fields range from textile manufacturing to human behavior.

Two such theoretical researchers are Dr. M.A.K. Lodhi and Dr. Y. N. Kim of the Physics Department, both doing work in nuclear physics.

Lodhi, who came to Tech in 1963, is a citizen of Pakistan while Kim, here since last fall, is from South Korea.

Theoretical researchers read information accumulated by other researchers to investigate the connections between proposed theories and to predict what will happen in experiments.

They also try to discover theoretical explanations for observations made in new experiments.

Their research is strictly paper work. For example, Lodhi is "investigating the regularities and systematics of light nuclei with special significance on the element lithium."

He has never seen lithium, for he is not interested in its shape, size or form, but only in its minute nucleus.

Lodhi takes other researcher's theories and adds to them, combines them or disproves them. Results of research work is published and made available to scientists all over the world.

Five institutions are presently working on the same problem in a program which began June 15, 1964 and continues until Aug. 31, 1966. Stanford University in California and a university in Osray, France, are working on the experimental side of the research.

Texas Tech, Florida State University and the University of London are working on the theoretical side. All exchange results freely.

The Tech budget for this program is \$23,403, used almost exclusively for salaries since no equipment is necessary. Lodhi's salary is not increased because of this work, but he says the administration expects him to conduct research as well as teach.

He has applied for a research grant from the National Science Foundation, but if it is awarded the money goes to Texas Tech rather than to the individual.

By encouraging research which will eventually be published, the college receives international recognition through publication of results.

Lodhi attended high school in India and received his bachelor and master of science degrees from the University of Karachi in Pakistan. He received two degrees, including his doctorate, from Imperial College, a branch of the University of London.

Lodhi learned of Texas Tech through an advertisement in a physics magazine.

Kim is also working with the nucleus, but is not concerned with any particular element. He is interested in elementary particle physics, the splitting of the nucleus.

Kim has applied for a research grant from the state, but has received no word on its acceptance. Recently, the University of Moscow asked for some of his research findings.

Kim received B.S. and M.S. degrees from Seoul National University in South Korea. His doctorate is from the University of Birmingham in England.

He has done research work at Copenhagen, Denmark; Heidelberg, Germany; Paris, France, and the University of Washington. He came to Tech from the University of Alberta, Canada.

Kim has done more research than actual teaching, believing research is necessary for teaching. "Probably the most important job of the professor is to do research work," he said.

## Paradis Will Receive Two Service Awards

Capt. Robert L. Paradis, Tech Air Force ROTC instructor, who recently returned from duty in Viet Nam, will be presented two

ROBERT PARADIS

NEW YORK (AP) — A federal grand jury indictment Tuesday named a second Canadian white woman among the defendants in a fantastic scheme to blow up the Statue of Liberty, the Washington Monument and the Liberty Bell.

Indicted with the three American Negro men and Canadian white woman arrested earlier was Michelle Saundier, 39, of Montreal, a schoolteacher studying for her doctor's degree at the University of Montreal.

### Will Be Extradited

U.S. Atty. Robert M. Morgenthau said the government would move to extradite her from Montreal, where she is under arrest.

The indictment accused the five

of conspiring to blow up the national shrines and of conspiring to smuggle explosives here from Canada to carry out the plot.

Miss Saundier's connection with the case had not been disclosed before the grand jury action. Morgenthau said there was "a strong possibility" of other indictments.

She is in custody in the Canadian city.

### Earlier Arrests

Police and FBI agents arrested the three men and the other woman in New York Feb. 16.

They are Robert Steel Collier, 28; Walter Augustus Bowe, 32; Khaleel Sultana Sayyed, 22, all Negroes; and Michelle Duclos, 28, of Montreal.

Collier additionally was indicted by a Bronx grand jury on a charge of possessing explosives.

Police said the defendants intended to destroy the shrines of democracy to call attention to the Negro fight for civil rights.

## Vital Craft Blows Up

CAPE KENNEDY (AP) — An Atlas-Centaur space rocket exploded into a boiling fireball on its launching pad Tuesday, dealing a damaging blow to U.S. plans to launch a Project Surveyor spacecraft this year to determine if the moon's surface can support astronaut expeditions.

The explosion occurred two seconds after the 108-foot-tall rocket blasted off in an attempt to hurl a dummy Surveyor model toward a make-believe moon in an important rehearsal for the real thing.

The fireball mushroomed more than 200 feet high and flung flaming wreckage over a wide area. No one was injured, but damage to the launching pad was extensive, possibly as much as \$5 million.

distinguished service awards at a noon luncheon today in the Union Executive Room.

Capt. Paradis will receive the Fifth Oak Leaf Cluster Air Medal and the Bronze Star with "V" Device for "Combat Distinguished Service."

The Bronze Star is 13th on the list of distinguished service awards, and the Air Medal is 14th.

Capt. Paradis served in Viet Nam from Nov. 28, 1964, to Jan. 6, 1965, and took part in the parachute training program as well as making jump targets.

He was forward air commander and had the specific job of selecting new targets.

Capt. Paradis was nominated for the awards because of the way "he expertly planned and coordinated the air requirements and, through his untiring efforts and excellent liason with U.S. Army and Vietnamese air force personnel, greatly improved the support for brigade operations."

The awards will be presented by Colonel William G. Downey, Area "I" Commandant, ROTC.

### AWS Petitions

### Needed Monday

Women students interested in running for AWS offices must fill out an indication of interest blank and return it to the Office of Dean of Women by 5 p.m. Monday.

Blanks can be obtained from AWS representatives or from the Dean of Women's office.

## Parking Tickets - \$\$\$

Campus Traffic and Security officers issued 13,288 parking tickets last semester.

Bill Daniels, chief security officer, said Monday that receipts for reinstatement of cars receiving tickets totaled \$4,594 for the fall semester, and that receipts have reached \$1,248 this spring.

Reinstatement receipts totaled \$11,012 for 1963-64.

Many tickets are not paid because students say their parents were driving a student car while visiting the campus, Daniels said.

The department derives most of its income from the reserve parking lots. Vehicle registration brought in \$1,259 and the issuance of card keys garnered \$1,166, bringing a total of \$30,839 receipts last Fall.

# U.S., Viet Squadrons Blast Viet Cong Bases

DA NANG, South Viet Nam (AP) — U.S. and South Vietnamese air force squadrons, no longer restricted to tit for tat reprisals, rained tons of bombs and rockets on two of North Viet Nam's military installations Tuesday in the heaviest such strike of the war.

More than 160 land-based planes — jet fighters, fighter-bombers and bombers and propeller-driven Sky-raidiers — attacked the port of Quang Khe and a munitions depot at Xem Bang. They left them wreathed in smoke.

U.S. officials estimated from 70 to 80 per cent of the installations were destroyed and said from three to five of North Viet Nam's 30 Soviet-built gunboats were sunk at Quang Hhe.

### Operation Success

They termed the operation a resounding success. They said there will be further action against both the target areas as prime sources of Communist aggression of South Viet Nam.

U.S. Ambassador Maxwell D. Taylor outlined the new ground

rules, framed in keeping with a policy declaration of President Johnson in a Washington speech for Feb. 17 that "continuing aggression" would be met by "continuing action."

Asked in Saigon whether the new thrust was in retaliation for Viet Cong attacks on American installations, Taylor said:

"No, definitely not. These air actions are joint actions by the Vietnamese air force and our own for the purpose of replying to continuous aggressive acts across the 17th Parallel coming from the North. It does not matter whether the immediate victims have been Americans or have been Vietnamese or a combination. Actually it has been a combination."

### U.S. Escort

Twenty U.S. Air Force F100 Super Saber fighters escorted 19 Vietnamese Skyraider fighter-bombers for the attack on Quang Khe.

They loosed between 50 and 70 tons of bombs — including some 750-pounders — on 60 to 70 build-

ings and four naval installations at that port, about 60 miles north of the border and 15 miles north of Dong Hoi, which was the target Feb. 7. The strike was made from an altitude of 1,000 feet. Fire and smoke surged aloft.

U.S. B57 Canberras and F100s lost more than 120 tons of bombs on the munitions depot at Xem Bang, 15 miles north of the border, and sped away to the eruption of secondary explosions from a large ammunition dump.

Returning pilots said North Vietnamese anti-aircraft fire seemed light and inaccurate. But not all planes returned.

### Cost Great

The cost appeared to be greater than in any of the four previous raids — the Gulf of Tonkin action last Aug. 5 and the retaliatory strikes of Feb. 7, 8 and 11.

Meanwhile U.S.-South Vietnamese air raids on Communist North Viet Nam were termed the work of "barbarous pirates" and were "a new act of open aggression," Moscow radio declared Tuesday.

Moscow radio said the air blow "sharpens the situation in the Indochinese peninsula, which is tense even without this."

### Public Protest

"The Soviet public unanimously protests against the new provocation of the U.S. militarists, poisoning international situation in Southeast Asia," the broadcast continued.

"A group of planes tried to strike at the town of Vinh," Moscow radio said, "but the Vietnamese anti-aircraft gunners barred their path with fire."

Vinh is a provincial capital 140 miles north of the border and there was nothing in U.S. reports to indicate it was under attack.

## Calvary To Be Backdrop For Military Ball

"Calvary Post of the 1800's" will be the theme of the Military Ball, March 13, in the Tech Union Ballroom.

The event, traditionally formal with the Cadets in full dress uniforms and their dates in formal gowns, will be modified slightly this year to agree with the setting of an Army Post of the Old West.

Blue and gold of the U.S. Calvary will carry out the theme. Cadets will wear dress blue or Army green with white shirts and bow ties.

Crowning of the queen of the Military Ball will climax the event. She will be chosen from six finalist selected by members of the Cadet Brigade.

Following the crowning of the queen a grand march will be led by military science professors, officers, cadets and graduating seniors and their wives or dates.

Music will be furnished by the Court Jesters, Tech stage band, under direction of Dean Killion.

# Red Raiders Defeat Arkansas Hogs, 87-80

By ALAN SEARIS  
Sports Editor

Texas Tech won its 11th conference game of the season Tuesday night, dropping Arkansas 87-80 in Fayetteville.

The win was Tech's 13th win over the Hogs in a series of 19 games which began in 1942. Tech beat Arkansas earlier in Lubbock 93-78 and is the only team to hold an edge over Arkansas in Southwest Conference play.

Arkansas' conference mark slid to 5-8 and their season mark went to 9-13 with the loss. Tech pushed its season record to 17-6 and its conference slate to 11-2.

The victory would have given the Raiders at least a tie for the SWC championship, but this can't happen now for Tech has been ruled out of title consideration since they played an ineligible player for nine games in the second half of conference play.

Dub Malaise led Tech in scoring

with 30 points. Harold Denney hit 18, while Bobby Measels had 17. John Talkington scored 19 points to top Arkansas in that department.

Tech grabbed a 25-23 lead with 8:21 remaining in the first half and never lost it. They led at the half 49-46, and led by as much as 16 in the second half (82-66).

For the entire game Tech hit 54.5 per cent of their field goals and Arkansas managed a 49.3 average. After grabbing the opening tip,

the Raiders took a 2-0 lead on a basket by Malaise. Ricky Sugg tied the score quickly, but Malaise hit again to give Tech a 4-2 margin. Orval Cook tied the score, and then Arkansas took the lead 6-4 and held it until Malaise tied the score 23-23 with 9:39 remaining in the initial period.

### Tech Grabs Lead

Harold Denney gave the Raiders a 25-23 lead with 8:21 remaining, and Tech maintained it until the first half ended. The Raiders led

by as much as ten points in this span, but when the whistle blew ending the opening stanza Tech was on top by only three points, 49-46.

Arkansas hit 22 of 37 field goals for a 59.5 percentage in the first half, while Tech connected on 19 of 33 for a 57.6 mean. Each team grabbed 14 rebounds. The Raiders hit 11-16 free throws, while Arkansas got only 2-5.

The first half was tied three times — 2-2, 4-4 and 23-23 — and the lead changed hands four times. Tech's biggest lead was by ten, 49-39, while Arkansas' largest bulge was by six, 10-6 and 16-10. Malaise topped the Raiders in scoring in the first half with 19 points, and Denney was second with 11 markers. Talkington led the Hogs with 12.

The Raiders employed a 2-3 zone defense most of the first half in attempts to force the Razorbacks to take the outside shots. In the second half they changed into a 1-3-1. Arkansas used the 1-2-2 zone defense.

### SWC Record In Danger

Tech's 87 points gives the Raiders a good chance to break the SWC record for most points scored in one season, 1,189, a mark Tech set last year. Coming into last night's game the Raiders had scored 1,057 points. With the 87, they now have a total of 1,144, 45 points shy of the record with one game still remaining to be played.

Texas Tech closes out its season play Thursday in Municipal Coliseum against the Texas A&M Aggies.

COACH AND STARS — Basketball Coach Gene Gibson is shown here with two of his stalwarts on the Tech basketball team. Harold Denney (left) and Dub Malaise were both All-SWC selections last year. Malaise has already been awarded an Honorable Mention on the NEA All-America team for 1965. The Tech five close out the season here Thursday against Texas A&M. —Staff Photo

## UT Baseball Has Problems

Problems are many for the University of Texas baseball club—namely, pitching and hitting.

UT's troubles began last May when Coach Bibb Falk's Longhorn's sank to second place in the Southwest Conference, their lowest ebb since 1959, meaning they won four straight conference crowns.

Pitching poses the real problem. Last season the Longhorns left 231 runners stranded on base in 24 games while compiling a 16-7-1 record. But that hurling staff had some experience.

This year only two men return to the mound who saw any action in 1964 — John Collier, 2-2, and Robert Wells, 1-1. Soph pitching prospects are Robert Oliver; Gary Moore, a football defensive safety; and Minton White, a basketballer.

Along with pitching, hitting adds to Texas' troubles. But Falk's woes may be soothed in some way by an infield which may match that of 1964. Last year's defensive crew compiled a .956 fielding average, a figure that placed them among the top 15 major colleges in the nation.

Key returning players are first baseman Buddy Young, whose .379 batting average last season was the best for a Longhorn since 1958; power hitting outfielder Ward Summers; infielder Ed Denman, who tied the UT doubles record in 1964 with 12; and Butch Thompson, who is hoping to regain his sophomore All-America status after an ineffective junior year.

## Student Bowlers Win High Honors

Tech students rolled away with high honors at the Association of College Unions Bowling Tournament for Region 12, Feb. 20 at Texas A&M.

In the team division, Tech won third place and in doubles events, captured second place. The second-place doubles team was composed of Glen Jennings from Tech and Stanley Muir from Louisiana.

Jennings, representing Tech in the singles division, won a first. Overall second place award went to Tech bowler Jerry Weems and third place was taken by Jennings.

Weems will be on the Region 12 team that goes to the national tournament in St. Paul, Minn., in March and Jennings is an alternate to the team.

Those traveling to the A&M tournament were J. P. Davis, Marvin Henderson, Lyndon Maeker, Weems, Jennings, and sponsor Ronald Burrus, assistant director of Tech Union. Region 12 includes universities from Texas, Oklahoma and Louisiana.
