**TALENTED TECHSANS**—Pictured above are the five winners in the Tech Union talent show held Friday night. From left is Bennie Dunn, Edsel Buchanan, Joe Naylor, Jay Johnson and Martha Mack. The quintet will be eligible to enter the big Texas A&M Intercollegiate Talent Show, later in the year.

## Council 'OKs' Varsity Show

Student Council members apparently found a willing sponsor for the 1956 version of the Varsity Show at their regular meeting Tuesday night.

Temporary council approval was given to the Tech Union for sponsorship of the annual extravaganza.

Tech's Varsity Show operated in the red last year and in previous years, according to council figures, and growing sentiment indicates that the show can no longer be supported by Council funds because of dwindled activity fee sales.

Before the Tech Union sponsorship is final and certain however, the Tech Union Board and the Union Program Council must accept or revise the provisions under which sponsorship is given, and the provisions will then be submitted again to the Council for final approval and final go-ahead. Future of the show still hangs somewhat in the balance in search for sponsorship.

Other business conducted at the council meeting included the adoption of a resolution that each meeting of the council be opened with a prayer. Acceptance of the resolution was unanimous.

Dr. Wayland Bennet, acting head of the agriculture economics department, was chosen as faculty sponsor for the Student Council.

A report was given on conditions existing in the campus infirmary. The investigation committee found that no complaints had been registered against the

(Continued on Page 4)

## Campus Politicians To Discuss Issues

A debate between the "Students for Stevenson" and the "Techsians for Eisenhower" will be held Monday night at 7:30 in the workroom of the Student Union Building.

Members of the team supporting Stevenson are Craig Austin and Don Ludwig, Joe Ben Hudgens and Willis Taylor comprise the team supporting Eisenhower.

Charles Stogner, chairman of the Stevenson group, and Dave Hand, co-chairman of the Eisenhower group both expressed confidence that their team would win the debate. Stogner also says he is extremely confident that the student voters of Tech would vote Democratic this year.

The Stevenson group met last night to discuss what could be done to persuade the student voters to vote Democratic, while the Eisenhower group will meet tonight at 7:30 to discuss the same topic and to also discuss what they can do to help the Eisenhower Headquarters of Lubbock County.

## Annual Lectures End Today

By Dale Johnson  
Torreador Staff Writer

The lecture "Your World—Christ or Chaos" at 7:30 p.m. in Lubbock Auditorium, and a 10 p.m. bull-session in Gordon Hall will end the annual series of Willson Lectures tonight.

Since Monday, Dr. Louis Hadley Evans of Hollywood, Cal., has been lecturing to large audiences and holding "bull-sessions" in various dorms with good-sized groups of students.

The session tonight in Gordon Hall will be the second gathering in a men's dormitory and all male campus residents are invited to attend. Two sessions have already been held in women's residences.

### Feature Evan's Subjects

Beginning at 10 p.m., all of the sessions have been featured by Dr. Evans' discussion of questions submitted to him beforehand and during the get-together.

Tuesday night Drane Hall hosted the lecturer, a nationally known Presbyterian minister. Approximately 125 women attended, both from Drane and other dormitories, according to Mrs. Alice May, Drane Hall counselor. The gathering was in the dorm lounge and questions concerning topics from Christianity and college life to marriage to judging others were put forth. Mrs. May said the "girls were very pleased" and many have stated they wished a recording had been made of the sessions.

### Evans Visits Doak

Monday evening Dr. Evans was in Doak Hall to answer queries propounded by male students. According to L. A. Phillips, Doak Hall supervisor, the reaction was one of "tremendous interest" and the listeners seemed to "garner quite a lot from the sessions." He estimated that over 100 men attended the meeting held in the second floor lounge.

The lectures of the man picked by both Life and Newsweek magazines as one of the outstanding religious leaders of the day also have attracted great audiences.

### Capacity Crowds Gather

Wednesday's lecture drew a near capacity crowd for the ground floor of the Lubbock Auditorium. "Your Marriage—A Duet (See Willson Lectures Page 4)

## Pep Rally Set

The Red Raiders will be given a send-off tonight at a pep rally at 7 p.m. in back of the Administration Building. The Raiders leave Friday morning for their game with the University of Arizona in Tucson Saturday.

The cheerleaders and the Raider band will be on hand to lead songs and yells. A special entertainment feature is also planned, according to Shirley Dupriest, head cheerleader.

## Beauty Selection Set For December

The annual La Ventana Beauty Contest will be held Dec. 2, at 2 p.m. in the Student Union Ballroom.

All organizations sponsoring entries must have their names in to the La Ventana office no later than Nov. 1.

The list of entries should be typed in alphabetical order. Any contestant wishing to enter after the above stated date will not be considered.

Twenty girls will be chosen in the initial contest, from which the top eight will be selected at a later date.

There will be a panel of five judges who will select the top twenty beauties.

Contestants are to dress in formals.

## Deadlines Slated For Handsome Man

Deadline for submitting nominations for Tech's Most Handsome Man is Friday, Nov. 9, 5 p.m. The annual selection is made by popular ballot at Theta Sigma Phi's mock night club, Club Scarlet, Nov. 17 in the Rec. Hall.

Each organization on the campus is eligible to nominate a candidate. The candidate must have a 1-point average unless he is a first-term freshman and he must be enrolled for at least 12 hours' work during the current semester.

Entry blanks have been sent to each organization by Theta Sigma Phi. These should be returned along with a 5x7 glossy photograph of the nominee to Mrs. Margaret Schrader, Tech Press, Journalism Building.

Seven run-off candidates will be selected by AWS Council on Nov. 12. Finalists will be announced and voted on by popular ballot at the mock night club. Each paid admission will have one vote.

Eight skits presented by campus organizations will make up the floor show. Groups selected to give skits will receive \$5 from Theta Sigma Phi, but participants in the skits will not be admitted free. Tickets will sell for \$1 per person.

Groups whose skits are chosen will be notified by Friday, Nov. 9, says Barbara Pearce, president.

Theta Sigma Phi, honorary journalism fraternity for women, presents Club Scarlet annually.

## Fine Heads Rodeo Council

Dr. Neil Casey Fine has been named chairman of the new Texas Tech Rodeo Council, Dr. E. N. Jones, Tech president, has announced.

Dr. Fine said the Rodeo Council, initiated last spring, is to be comparable in operation to the Tech Athletic Council, which is in charge of intercollegiate sports.

## Union Schedules Listening Party

Union activities scheduled for Saturday and Monday include a party, dance and movie.

Saturday, a Football Listening Party of the Texas Tech-Arizona University game will be sponsored by the Hospitality committee. The party will begin at 8 p.m. in the Union. Patti Hill, committee chairman, urges all students to attend and support the team. There will be a record dance after the party.

A movie, "The Hasty Heart" starring Ronald Reagan, will be shown Monday at 7 p.m. in the Union ballroom. No admission is charged.

He explained that the Rodeo Council is to be a policy making group for Tech intercollegiate rodeo competition.

It will be responsible for eligibility of participants under National Intercollegiate Rodeo Assn. rules, methods for financing the Tech team's operation, scheduling of intercollegiate rodeos on and off campus, and maintenance of a high level of conduct at all times.

"Our aim is to work with the rodeo team and its sponsor, Koy Neeley, in improving Tech's rodeo activities in every way possible," Dr. Fine said.

Dr. Fine is acting director of the animal husbandry department and Neeley is an associate professor of animal husbandry.

Rodeo Council members in addition to Dr. Fine are Morley Jennings, professor of health, physical education and recreation; Lewis N. Jones, dean of men; Arch Lamb of Lubbock, representing ex-students, and Rob Brown of Throckmorton, representing the student body.

## Plans Progress For Celebration During Big Texas Tech Homecoming

A replica of Oklahoma A&M Aggie burned in effigy will take the place of the mountainous wood pile this Homecoming pep-rally, according to Eddie Henson, Saddle Tramp president.

"This will take a great financial load off the Saddle Tramps shoulders," he said. "For we won't have to buy all those out-houses, red wood dog houses and white picket fences."

After "Saddle Tramp Circle" is completed, Henson said, replicas of our opponent's mascots will be burnt every pep-rally.

Also scheduled for the pep-rally Friday night, Nov. 2, is the coronation of the Homecoming Queen. Other things on the agenda are the downtown parade Saturday morning, Nov. 3, Tech-Oklahoma A&M football game Saturday afternoon and the homecoming ball Saturday night in the Lubbock Coliseum.

Woody Herman and his nationally famous new Third Herd will play for the dance.

With the largest Texas Tech student body in history—8,055 strong—serving as hosts, this homecoming for the Exes should be the greatest in the history of Tech.

Registration of former Techsians begins Friday afternoon (Nov. 2) at the Student Union Building and all major hotels will continue through 12 noon Saturday.

More than 35 floats are expected to enter the parade, which will start at 10:30 a.m. on east Broadway and move to the campus, led by Tech's own "Big Red Band."

## Dancers Open Artists Programs

Costumes worth a half-million dollars will make up the wardrobe of the four Caucasian dancer-actors in the Tech Artists Course's opening attraction 8:15 p.m. Friday in the Lubbock Auditorium.

The To Yo Za "Theater of the Far East" features an elaborate setting of colorful costumes, many of which are gifts from an Indian maharaja. Also included in the costuming are masks, wigs, scarves, bells and swords.

The culture of India, China, Japan and other countries of the Far East will be depicted in the dances and acts performed by

Petra Chan, Forrest Coggan, Janet Green and James Barnett. This is the only company in existence performing authentic dances of the entire Far East.

Exotic music used in accompaniment to the dances was recorded in the Far East by native musicians and adapted especially for American audiences.

The program varies from comedy to tragedy and from modern theater pieces to folk and classic dances.

Second of the Artist Courses will follow close behind the To Yo

Za performance with the presentation of Nadine Conner, noted star of the Metropolitan Opera, on Monday at 8:15 p.m.

Besides her Metropolitan performances, Miss Conner is well-known by radio and TV audiences for her performances on such programs as "Railroad Hour" and "The Voice of Firestone."

Admittance to both the performances of the Artist Course series will be by student activity book or a charge of \$1.00 for the To Yo Za and \$1.50 for Miss Conner's performance.

### NOW IS THE TIME

Now is the time for all good men to come to the aid of their country.

Sound like a shop-worn typing exercise? Actually it is, but it could also be an excellent slogan to remind college students and staff to cast their ballots in the Nov. 6 national presidential election.

Voting is just the thing to aid both the party and more important, the country.

Absentee balloting is almost completed throughout Texas and students who are not legal residents of Lubbock County will find themselves unable to vote very soon. That is unless they are going to be home in the middle of the week... a rather unlikely happening.

The procedure is very simple. First of all, a student must send a self-addressed envelope to the county clerk of his particular county. Then a ballot will be returned to him to be filled out and returned immediately.

For Lubbock students the method of voting amounts to waiting until Nov. 6 and then merely taking the trouble to go the precinct polls.

While voting is being done, it would be a good idea to come to the aid of Tech by casting a vote for amendment three to the Texas Constitution which would allow more money to Tech in the next 20 years.

America's future is in its young people. Many of the Tech students are facing this fact for the first time in their lives by receiving their initial ballot.

There's no time like election time to come to the aid of your country.

—Floyd Wood

### LITTLE MAN ON CAMPUS

by Dick Bibler

"I LIKE THIS COURSE - IT'S SO PRACTICAL."

### Judging Team Wins In Wool Exposition

Tech's wool judging team placed first in the American Royal Livestock Exposition in Kansas City last weekend with a total of 1,609 points and beat out Ohio State.

Members of the wool judging team are: Troy D. Jones, Clarence P. Smith and Charles Proband. Prof. R. C. Mowery of the animal husbandry department is coach.

Jones was high individual in the wool contest, fifth in grading, third in breeding fleeces and first in commercial fleeces. Smith was ninth in grading and third in commercial fleeces. Proband was tenth in grading.

Tech's meats judging team placed 14th in the American Royal Exposition. Team members are: Sutton Crofts, Proband and Smith. The team is coached by Prof. Stanley Anderson.

All three teams return to the campus sometime today.

### Custodians Save College Money

Tech's custodial department can clean floors 37 cents per square foot cheaper than industry can. The Tech cost is 17 cents per square foot, compared to 55 cents per square foot for industry.

The custodial group, composed of 51 men, mop, polish, wax and shine 792,753 sq. ft., or 18.2 acres, of floor per day.

"In my estimation, the Tech custodial department is doing the best job in Texas," says Marshall Lee Pennington, comptroller. "The custodians take great pride in

their job; they are conscientious and reliable. Charles F. Libby, head of the department, has attracted national attention for the job he is doing."

Libby has been elected to the sub-committee of building operations by the Texas Physical Plant Committee. In case of his absence from the campus, L. M. Miller, foreman-at-large, handles the cleaning operation, and Mrs. Mary Miller does the administrative work.

Thirty-five of the custodians wear red shoulder patches. To win these patches, a custodian must score 90 or above on a series of ten tests.

In an average year, the custodian department uses 562 gallons of wax, 490 gallons of cleaner, 109 gallons of liquid hand soap, and 5,400 yards of cheese cloth. They clean 23 buildings.

The department paid \$122,000 in wages last year and total cost of operation was \$141,000.

### Library Vacates Classroom Space

Library rooms that are now being used for classes will be needed as space for books by the end of this year, says R. C. Janeway, librarian. Because of an increase of both students and books, the two basement rooms now being used for class rooms will be needed as storage space by the close of this year.

Average student use of the library has more than doubled in the last six years, Janeway says.

Handbooks are now available for students to aid them in reference work.

Better Inside Than Out LOT-A-BURGER

911 College & 1935 19th St.

### Marines To Offer Officer Program

Students interested in receiving a commission in the Marine Corps may obtain information from Captains Mare A. Moore and Robert W. Lewis who will visit the campus next Tuesday and Wednesday.

Marine Corps officer programs offer commissions only to the college graduate. Members of the platoon leaders class train during two six-week summer training periods and are eligible for a commission upon graduation.

Seniors and graduates may apply through the officer candidate course and be offered a commission after successful completion of a ten-week training course. Training as a Marine Corps pilot is available through both programs.

### Five Tech Chemical Engineers Will Receive Top Ranking Scholarships

Elected to receive top honor scholarships worth from \$100 to \$600 are five Texas Tech chemical engineering majors. Announcing the winners in behalf of the committee on scholarships and awards is Dr. S. M. Kennedy, assistant dean of arts and sciences.

Those receiving honors are: David M. Groves, Leonard E. McNeese, and Monte J. Wise, seniors from Lubbock; Ray Neil Lewis,

Junior from Lakeview; and Roger G. Sewell, freshman from Odessa.

Scholarships donated by the Monsanto Chemical Co., Dow Chemical Co., Eastern States Petroleum Co. and the Tech department of chemistry and chemical engineering are awarded students on the basis of academic performance and prospects of future professional success.

# Studies Keep Red Raiders Busy Tough Foe Awaits Raiders

At one time a football player didn't have time to study anything except physical education. It's different at Texas Tech, where grid practice sessions are scheduled late enough (4:30 p.m.) to permit its 49 varsity members to major in 24 different courses.

Coach DeWitt Weaver concedes that the late workouts have their

disadvantages but contends that all in all he'd rather have it this way.

"We're interested in the kind of boy who will choose his school on the basis of what he plans to study in preparing for his future," Weaver explains. "A lot of our boys come here because not only does Tech have an excellent all-around scholastic program, but also we allow them to take courses that have late afternoon labs."

Business administration and physical education are the most popular courses but not to any marked degree, as five Raiders each are majoring in them. Next most popular is personnel management, with four majors.

Petroleum engineering, a particularly strong course in this oil-rich region, and pre-law have three majors each. Two Raiders are listed under each of the following—marketing, traffic management, secondary education, education, agronomy, civil engineering, and history.

One each are studying accounting, finance, industrial engineering, electrical engineering, pre-dental, geology, dairy industry, mechanical engineering, commercial art, agricultural education, social science, and government.

Captain Don Williams, quarterback from Graham, is majoring in social science, and the alternate captain, tackle Bob Killeulen of St. Louis, is a commercial art student.

Statistically speaking, Texas Tech's Red Raiders may return from Tucson, where they play Arizona Saturday night, still searching for their first victory.

Whereas Arizona is mentioned several times in the latest release of the National Collegiate Athletic Bureau, the Raider's don't even scratch the listings.

Arizona quarterback Ralph Hunsaker ranks second nationally

in passing behind Stanford's John Brodie and third in total offense behind Brodie and Notre Dame's Paul Hornung. Hunsaker has completed 51 of 93 passes for 620 yards. Tech's best tosser, quarterback Buddy Hill, has only 18 completions of 38 passes for 219 yards. What's more, Hill may not get to play much, due to an injured knee.

Hunsaker, who runs well also, has a total offense mark (running plus passing) of 764 yards. Again, Hill is Tech's total offense leader, with 270 yards.

On a team basis, the outlook is just as discouraging.

Arizona ranks 11th in total offense with an average gain of 353 yards per game. Tech's 190.3 is understandably not listed. The Wildcats are rated 15th nationally in forward passing offense with an average of 130.2 yards a game as compared with Tech's 70.5.

So far Tech has lost to Texas Western 17-13, to Baylor 27-0, to Texas A&M 40-7, and to West Texas State 34-14.

However, a glimmer of hope for the Raiders Saturday night is afforded by a look at the 1952 season.

That year Tech had lost six games before defeating the Wildcats 19-14. Actually, the win did not interrupt a losing streak because the previous week Tech and Hardin-Simmons had hooked up in a 14-14 tie to snap that string. This season the Raiders carry a skein of four consecutive losses with them.

Only year Tech failed to beat Arizona in Tucson, in 1936, when the two fought to a 7-7 deadlock, Pete Cawthon's Raiders had lost three straight.

Arizona's lone triumph in the 17-game series came at Tech's homecoming, in a 7-6 game.

**Wakey To Meet Teammate**  
Texas Tech's best pass receiver, end Ken Wakey of San Antonio, teamed with Arizona's all-conference center, Paul Hatcher, three years ago when both were playing for San Diego Navy.

**HIGH RANKING FRENCHMAN**—Jean-Claude Bouchon, a high-ranking graduate of the University of Paris, is learning about Texas in a nice way. His tutor is Linda Pruitt, freshman journalism major from Berger. Bouchon is sponsored at Tech by the Rotary Club for a year's study at Tech.

## Tech's Engineering Frenchman Says American Girls 'Nicer' Than French

Jean-Claude Bouchon, a tall, blonde Frenchman from Paris, is at Tech for one year studying electrical engineering. He is a graduate of a school of engineering in the University of Paris where he was ranked first in his class.

His studying at Tech is under the sponsorship of the Lubbock Rotary Club, which pays for his scholarship, and the Paris Rotary Club, which pays his transportation costs to and from Paris.

Bouchon thinks Tech is a very good college. He said the work here is not so hard as in France, but there are many more inexpensive activities for the students here. The nightclubs in Paris are too expensive for the student and he cannot make money while going to school unless it is done by very hard work. Even then the salaries are low.

Skating, tennis and music listening are Jean's favorite hobbies while in France. He prefers to do all his work in one day and then loaf the next. While away from Paris, he misses French food, French books and his motor scooter, which is the chief means of transportation for the French student.

American girls, in Bouchon's opinion, are often nicer than the

French girls, but the nice French girls are more refined than their American components. The boys and girls in France have more of a tendency to become "friends" rather than sweethearts with more double and triple dating than here because of limited use of the car, he added.

In describing Paris, he compared it with Lubbock. "Paris is completely different—it is bigger, older, the life is faster, and the people aren't so friendly because of its large size."

Upon returning to France, Jean plans to work for an electrical firm, either American or French. Before starting to work he must serve in the armed forces for a short period. He prefers to be in the Navy because of the training he can get in radar and radio.

### COUNCIL MEET . . .

(Continued From Page 1) operation of the infirmary during the Fall semester.

A monthly "President's Luncheon" was re-established by the Council. Plans provide that a luncheon be held each month for discussion between council members and President Jones. Student Council members say that such a dinner, which has been tradition in the past, will help the President to better "feel the pulse of the campus." Time and date has not been set.

Election Committee members

### Phi Gams Plan Visitor Reception

Plans for the coming visit of Delores Paulikas of Chicago, national vice president of Phi Gamma Nu, were discussed at the Tuesday night meeting of the women's honorary business sorority.

Plans were also made for a social hour to honor Miss Paulikas. Members and pledges will also attend.

The meeting is at 7:30 p.m. and will be held at the work-room of the Student Union. A pledge initiation is also scheduled.

New pledges are Carolyn Blankenship, Mary Jo Cappleman, Shirley Cartwright, Jean Hennings, Betty Sue Howard, Myrna Martin, Ida Lou Price, Flo Patterson, Pat Stooksberry, Shar-Strickland and Susan Weatherford.

### WILLSON LECTURES . . .

(Continued From Page 1) or a Duel," was Dr. Evans' topic.

Reviewing American divorce rate from colonial days, Dr. Evans disclosed that the number of divorces had increased from 1 in 600 marriages to 1 in 3 modern-day marriages.

"Marriage is more than the joining together of two persons," he said, "it is the joining together of two souls." He upheld Christian Unity in the home as the greatest fighting force against our rising divorce rate.

Tuesday evening an overflow crowd heard Dr. Evans speak in the Union ballroom. His topic then was "Your Vocation—Living or Life." In that discourse, Dr. Evans put forth the theory that a man must have a goal in life to really attain the full value of living. That goal must be tied to a man's profession.

Monday morning unofficial estimates placed the number of students attending the opening lecture on "Your Religion—Fog or Faith?" at more than 2,500. In that talk, Dr. Evans declared that a man must think through his religion and have a basis for his beliefs.

were instructed to investigate present conditions regarding election campaigning procedures. They will draw up recommendations for new laws governing campaigning in future elections.

Absentees at the meeting were Wick Alexander, Hugh Fewin, Don Hay and Jimmy White.

## 21 Groups Enter Floats

Twenty-one sororities, fraternities, and all-campus organizations have entered floats in the Homecoming Parade.

Sororities with entrants are: Sigma Kappa, Gamma Phi Beta, Delta Delta Delta, Delta Gamma, Zeta Tau Alpha, Pi Beta Phi,

Kappa Alpha Theta, Alpha Chi Omega and Kappa Kappa Gamma. Fraternities entering floats are: Kappa Sigma, Sigma Nu, Alpha Tau Omega, Phi Kappa Psi, Sigma Chi, Sigma Alpha Epsilon.

Entries from all-campus organizations are: Cosmopolitan Club, Phi Upsilon Omicron, American Chemical Society, Newman Club, Baptist Student Union, and the Home Economics Club. Possible other entries are expected.

Floats will be judged on originality, craftsmanship display, effectiveness of float idea, and overall appearance. A best float will be selected from each of the three classifications. The best all-round float will then be chosen from one of the three previous selections.

## Geology Club Sets Field Trip Plans

An election of officers and plans for a field trip highlighted a meeting of Tech's Geology Club last week.

Jay McCollum was elected president. Vice president is Melvin Houx. Paul Ragland will serve as secretary-treasurer. They are all juniors from Lubbock. Lloyd Stewart, senior from Lamesa, was elected reporter, and Bob Vaughan, senior from Lubbock, is activities chairman.

The club is planning a geology field trip to the blanco beds north of Crosbyton Sunday. They will leave the Science building at 8 a.m. Anyone interested in geology is invited to go on the trip, according to Vaughan, and freshmen geology majors are urged to do so. The only requirement is to bring a lunch.

Persons interested should contact Vaughan at PO3-7784 or at the Union between 5 and 10:30 p.m. on Mondays and Wednesdays.
