Ranch headquarters

Carriage house added

By HAL BROWN Special Reporter

Tech's Ranch Headquarters is well on its way to becoming a full-fledged outdoor exhibit with the addition of a carriage house from the U Lazy S ranch,

building to be moved to the Ranch Headquarters site. Currently on the site is a blacksmith shop.

The Carria e house is the second

The carriage house was built in 1905 by John B Slaughter who founded the U Lazy S and had been in constant use until it was moved to the Museum.

One end of the house has a harness room, (harnesses required special care and had to be protected from the weather.) and two smaller rooms where saddles were stored (one room for Slaughter's saddles and another for hired hands' saddles.)

The center section of the house was used to shelter buggies and surries. In the other section of the house is a storage room for feed for milk cattle.

The building was donated to the Headquarters by John F. Lott of Lubbock. Accompanying the building was a \$20,000 gift to cover moving and restoration of the building.

Lott is a member of the Ranch Headquarters Association, a group of ranch historians and ranchers interested in history, seeking to help the Ranch Headquarters become a reality.

Plans for the Ranch Headquarters eventually call for persons to "populate" the exhibit and perform daily tasks in the places and ways they would have been performed in the early days of ranching (for instance a blacksmith is to be in the blacksmith shop to make horseshoes etc. for souvenirs and illustrate the process a blacksmith went through to produce the things he did.)

The Headquarters will eventually have over twenty buildings with a large manor house in the center of the site surrounded by a windmill, a milk and meat house, the carriage and harness house, barns, stable, granary, corrals, the blacksmith shop, office, and a chuck hourse.

Several dwellings ranging from a pair of dugouts (one a two story), a double log cabin, a stone house with rifle ports over the door for defense from indian attacks, to a bunk house and several dwellings adapted to the realities of living on a

Jerry Rogers, director of the Ranch Headquarters, said buildings were ex-

New housing official asked about dorms

Ed. note--This is the first of a two part series dealing with preliminary plans and impressions of Clifford Yoder, Asst. to the Executive Vice President in charge of residences and dining.

Clifford Yoder, Asst. to the Executive Vice President in charge of residences and dining, arrived in July after being hired by Tech last spring.

Since then he has been tending to the

running of the dormitories and making preliminary observations for future

Yoder replaces former director of housing Guy Moore.

Q. What are your impressions of the housing facilities at Tech?

A. I came here during the summer and all the dorms were closed up and I can't tell very much about them by going into an empty place. I want to see how it lives a little bit. I've got some impressions that

may change in the next few weeks.

Q. Why are dormitory food lines in double line cafeterias closed leaving only one line serving students and creating up to 30 minute waits?

A. I don't know why we have only one line open. The only reason I can think of now is there have been some problems in recruiting help. I have paid some attention to the problems we've been having in Wiggins and have spent my lunch hour there. I'll find out.

Q. Will there be any changes in dor-

mitory menus? A. As a general rule I've been rather pleased with the items I've seen on the menu. I'd be interested in talking on specifics on what's not very popular.

Q. Brussles sprouts, boiled carrots and pickled beats as vegetable choices.

Ocassionally are served. A. Anytime you feed a large number of people you're going to find some that aren't happy with all of the selections and hopefully we find many that can find some satisfaction with the things we

I've got a number of national preference charts to show which vegetable is popular and which one isn't. We'll need to get out and do some sampling here to see whether the traditional preferences here are right or wrong.

Q. There has been some talk of a commercial firm taking over Tech's food

service. Do you favor this?

A. I don't think so. Not at this point. I know something about these private concerns and doubt that the large food operation of Texas Tech should consider one of these concerns very seriously at this time.

Q. If the students have complaints about the food, who should they talk to? A. They ought to do several things. One, they should talk to the food manager in the food unit where they are and begin there. There should be, in my opinion, a regular dialogue. This is the lady or man that has a lot to do with the menu, a lot to do with the preparation and a lot to do

with the people who are serving it.

They should begin a regular dialogue with the people who are closest to the product. Go from there to Mrs. Bates who is a recognized authority in the area of student feeding. Go to her and discuss the

matter with her.

Q. What do you think of placing complaint boxes in the cafeterias?

A. Personally I think it's kind of silly. I would a lot rather look the student in the eye and talk about his problem — it's really our problem and his problem — -I'd rather he looked the food manager in the eye or look Mrs. Bates or me in the eye and talk about it man to man rather than the resident writing down some kind of thing and putting it in a complaint boxthat's kind've high schoolish.

pected to be moved in to the Headquarters site regularly for the next

The Headquarters, Rogers said has been in the planning and fund-raising stage for two years now and is just becoming a reality.

The museum is planned to be a 'living museum" to represent the entire ranching history, not just that connected with West Texas or one period in par-

Rogers said that the Headquarters is only one of several outdoor exhibits planned for the Museum.

If you think those artificial plants in the

library look pretty realistic; then look

again. They are! And to the surprise of

may, there are several plants alive and well in the Croslin Room at the front of

"The plants are really nothing new

and have been around for eight years,"

said R. C. Janeway, librarian. When

plans for the library were made, Elo J. Urbanovsky designed several deep plant wells to contain the necessary dirt and

Former board member honored by fraternity

By LAYLAN COPELIN Special Reporter

Alvin R. Allison, a self-taught depression lawyer known as the father of Tech's law school, was initiated last night into Delta Theta Phi, a national honorary law fraternity, in a courtroom named for himself.

The honor cited Allison's efforts over the years in support of Tech and its law school specifically.

Allison, a 1930 graduate of Tech, said the school had done a lot for him and he wanted to give something back.

"I had it in the back of my mind to help Tech ever since I left in 1930," added

FROM TECH, ALLISON moved to law school at University of Texas. "But I never finished," said Allison," because in the depression a buck was a buck."

"Because I was not able to finish law school was another reason Tech was and is so important to me," said Allison.

Allison's career led him to the state

legislature in 1939, representing a nine county district in the Lubbock area. Following a successful career as civil and criminal law, which brought cases

from New York to California, Allison became a member of the Tech Board of Directors in 1961. "I introduced the resolution for the Tech law school in 1962, but it did not pass

the Board of Directors until 1963," said

There was some opposition on the board because of a question of priorities. Some board members thought other things should come first, said Allison.

"I believe the law school helped us bring the medical school here because the state saw we could set up a graduate school and run it," Allison reflected. Finally in 1964 the law school passed

even the most optimistic people had

hoped for. "There are two reasons for

this," said Janeway. "Some plants just naturally grow better in shade and we had underestimated the amount of light that comes in o the library."

Growing plants indoors requires special care. Horticulture students

handle this part of the job, performing such tasks as watering and cleaning the leaves of the plants. This is necessary

since there is no rain to naturally wash

Currently, the most unusual plant in the Croslin Room is an olive tree. Also, a

small palm tree is doing well. Two years

ago there was even a lemon tree that was

producing large size fruit. Students quickly found out the lemons were for

real and they dissappeared rapidly.

Library plants rebuff skeptics

the approval of the Commission of Higher Education by a vote of 15-1.

A BIG BOOST to Tech's hopes in those days was Dean Keeton of the Texas law school, said Allison.

"He believed Texas needed another law school and that Tech should be the choice, though at first he thought I was talking about a night school," said Allison.

Reflecting on the situation of laws today, Allison believed there is little difference from his days as a student except for the statues changed by the

One change in the law standards have been the mandatory need to graduate from a law school, said Allison. "Tech's law school, fully accredited and acknowledged across the nation, is better because of our dean and faculty,"

"Our students benefit also from the lower ratio between teachers and students. We never intended Tech to be a large school; no more than 750 students," said Allison.

Citing the success Tech law school has achieved, Allison warned that the standards must never be lowered or "it will take fifteen years of hard work to build back."

Looking to the future, Allison said, "Judge Brown of the 5th Circuit Court of Appeals has told me personally that soon some civil appeals cases will be heard in Tech's courtroom."

Earl Dillard, Manager of the book department of the Tech Bookstore, said

that the Bookstore always seemed to run out of some titles but that this year

seemed to be better than other years for

Dillard said there were often empty

shelves where a book belonged but that the book was actually in stock.

Books are often in the basement of the

the availability of books.

Book buying problem

Some students this year after being plauged with registration worries will be faced with yet another problem when they can't get the books they need for their courses.

According to Bookstore owners and managers its an impossible job to get everyone the books he needs because of changing conditions.

Bookstores order books on advance information about enrollment gained from instructors and the stores records of the historical requirements for that course. Sometimes enrollment figures are misleading and cause the Bookstore

Special orders are placed when books are not in stock. Chester Banks, co-owner of the Varsity Bookstore, said that books can generally always be gotten, usually

in 2 or 3 weeks. Banks said Varsity was out of about two to three hundred boods. No titles were available on the books not in stock

The following is a partial list of the books that are now temporarily out at the Bookstore. Janick, Plant Science; Jansen, History of Art; Strickberger, Genetics; Fortran IV manuals; Fundamental Accounting Principles; Economic Development of the United States; Fundamentals of College Chemistry; the French 141 text; the Geology 143 lab manual, the Journalism 130 text; College Algebra, and Approaches to Ethics.

Dillard and Banks said that the problem wasn't as bad this year as it has been in previous years. This was generally attributed to better advance information from the instructors. (Related picture page 8)

A FEW PEOPLE in the library and some outsiders have been conducting plant research on their own time. Mrs. Lera Smith had a vine of ivy growing in

'70 census figures show 204 million

WASHINGTON (AP) - The first rough nationwide tally of the 1970 census, called the most accurate ever by those who took it, showed Tuesday just about what the Census Bureau had estimated all along-a

nation of more than 204 million.

The last states to be added to the preliminaryy national total were New York with 17,979,712 persons and New Jersey with 7,091,995.

That made 200,263,721 Americans counted so far, and Secretary of Commerce Maurice H. Stans estimated that addition of such uncounted categories as servicemen abroad, ships' crews, transients and those turned up by rechecks would bring the national total to between 204 million and 205 million.

That compares with the 1960 figure of 179,323,175. Among the highlights of the

preliminary figures:
-California grew more than any other state to supplant New York as the

nation's most populous.

Of the 25 largest cities in 1970, 13 had lost population, most notably St. Louis with a 19 per cent decline, Cleveland with 16 per cent and Pittsburgh with 15.

-Farm population declined by one-third, from 15 million to 10 million.

-About half the counties lost population and one-fourth of the others grew only

-Past migration patterns continued from the center of the nation outward and from South to North. -Suburbanites outnumber central city

dwellers. Stans noted that the preliminary figures were in line with the 204.8 million estimate that the Census Bureau had projected on the basis of 1960 figures and

growth rates. That estimate was for April 1, when the census was taken, and has now topped

Stans said despite protests that the census had missed large chunks of people in some localities that had expected a larger count, he believes the 1970 count would prove to be the most accurate in

water. At the time there was some question as to how well plants would survive indoors. THE RESULTS WERE better than

11,000 per day

Buses circle campus

An estimated 1,000 students a day ride the eight buses that circle the campus, said Ernie Prenevost, manager of Lubbock Transit.

The bus company maintains four routes in an effort to reach every area of the campus. Buses run from 7 a.m. until about 5:30 p.m. Monday through Friday. The yellow route runs from the

coliseum parking lot up 15th Street to the Business Administration building and the Wiggins Complex. It then goes on 17th Street to the University Center (Tech Union), and back to the parking lot by way of Boston Street.

YELLOW BUSES run every six minutes from 7 a.m. until 8 a.m. They are scheduled five minutes apart from 8 a.m. until 4 p.m., and 10 minutes apart from 4 p.m. until 5:35 p.m.

The blue route goes from the east stadium lot on 15th street to the BA building and then to the Agriculture Building at 15th and Boston. It then returns on Boston to the stadium lot. Blue buses are scheduled ten minutes

apart from 7:05 a.m. until 4 p.m. and 20 minutes apart from 4 p.m. until 5:35 p.m.

Green buses follow a circular route from the 6th street side of the coliseum lot to Thompson and Gordon Halls. The route then goes on Flint to the BA

building, and follows 15th to the Ag building and returns the way it came. Green route buses are scheduled 10

minutes apart from 7 a.m. until 5:35 p.m. The red route circles the coliseum lot and goes through the campus on Boston. It continues on 17th to Wiggins Complex and on Flint to 15th Street.

The red route then goes past the BA building to the Ag building and back to the coliseum lot by way of Boston. These buses run every 20 minutes from 7:08 a.m. until 4 p.m.

EIGHT BUSES run until 4 p.m., but only four buses run between 4 and 5:35

"Some bus stops have been moved or eliminated in order to improve the overall traffic situation," said Prenevost. All bus stops are painted yellow and have "bus stop" painted on

A detailed bus schedule will be printed

Midland schools win desegregation suit

MIDLAND, (AP) - U.S. Dist. Judge Ernest Guinn denied Tuesday the government's integration charges against the Midland school district.

Guinn ruled that there is no racial segregation or discrimination in the

Midland Independent School district. He said there is a unitary school system in Midland in full compliance Midland was one of the 26 Texas school

districts sued by the Justice Department in behalf of the Department of Health, Education and Welfare. Guinn said school officials soon will be notified officially of the ruling.

HEW had contended that six of Midland's elementary schools were racially identifiable and had asked the court to force the closing of at least one of them, Washington Elementary School.

Generous reward

Call it censorship or practical policy Tech's administrators seem to have played their usual havoc with one of Tech's many student-faculty committees.

Last spring the Union Board (now the University Center Board) went to great lengths to try to provide a reasonably adaquate determination of what would and would not be sold on the Center's newsstands. The basic object of the work was to avoid censorship by content. A list of publications was arrived at, essentially, on the basis the the probable sales success of each publication and a majority vote of the Board. An effort was also made to provide a few publications from each and all major catagories of publications--such as women's magazines, men's magazines, sports magazines, etc. It was also decided by the Board that if a magazine did not sell it would be removed from the stands and replaced by another. The natural assumption being that if a particular catagory for controversies sake say, men's magazines--did not sell the entire catagory would be removed from the list of newsstand publications. The point of this is that the Board gave a great deal of responsibile thought and considerable effort to forming the list that would be fair in selection and fair to students.

And, pray tell, how is the Board rewarded for its efforts. ZAP! Three of the magazines "Playboy", "Evergreen" and "Ebony" were cancelled by the adminstrration even before the Center received the first copies. More to everyone's chagrin they didn't even feel it was necessary to tell the Board about their latest change in somebody else's policy.

The administration removed the three publications because they thought it would look bad if the three were on the newsstand while Tech was in federal court trying to prove that it had the right to ban such a nasty, nasty publication as the Catalyst. We have to admit that their reasoning is very good, although they seem to have forgotten that these publications or ones like them have been sold on this campus and were beging sold when the Catalyst was banned.

The saddest thing that comes of the whole affair is that the administration has put the University Center Board in the same catagory of uselessness as they put the solicitations committee when they banned the Catalyst. What, dear administrators, is the point of having student-faculty committees if they can't do anything without your permission. The only advantage that we can see in cases like this one is that low the Caprock, Jess en oyed the Boards and committees take the work load off the his work on the farm clearing people who are getting paid to do the work.

NEWS BRIEFS

by Associated Press

Black panthers lose

PHILADELPHIA (AP) - Fourteen Black Panthers seized after a brief shootout with raiding police Monday lost a bid today to go free in \$500 bail as two judges finally agreed to keep bail at !100,000 each.

Common Pleas Court Judge Thomas M. Reed said the high bail fixed Monday night in a special arraignment before Judge Lee Weinrott, also of Common Pleas, should prevail.

Weinrott said the bail was "preventive medicine" and "for the good of everyone con-

He had overruled Reed who had fixed the \$500 figure in a writ of habeas corpus-and Reed nullified his own order today for the 10 men and None of the defendants was present in the 30-

minute hearing this morning. Charges against them range from assault with intent to kill to assault and battery and conspiracy. The raids on three Black Panther centers,

ordered by Police Commissioner Frank L. Rizzo, followed a weekend during which a park guard sergeant, Frank Von Colln Jr., was killed at his desk. Six other policemen were wounded in other

A fourth man was arrested Monday on murder and conspiracy charges in connection with the slaying of Von Colln and the wounding of a park guard. John Prescott, 21, was ordered held without bail. Three other men and a woman had been arrested earlier.

Construction at A&M

COLLEGE STATION, Tex. (AP) - Construction crews have started site preparation work for Texas A&M's 15-story Oceanography-Meteorology Building.

The \$6.7 million structure, which will be the second-tallest building between Dallas and Houston, will include 121 highly specialized research laboratories.

Vietnam POW film

WASHINGTON (AP) - A North Vietnamese film of American prisoners of war was shown on national television Monday night as the Defense Department sent telegrams to families of missing servicemen to view the film to see if they could identify relatives.

Reproductions of the poor quality film was made available to television networks which voluntarily showed it on newscasts Monday night. Some networks said the film may be shown again Tuesday.

The Pentagon said each military service dispatched telegrams over the weekend and Monday to next of kin of missing servicemen, informing them such a POW film was available.

The telegrams stated film reproductions or still prints of the film would be circulated and for relatives to come to a given regional location to see if they recognized their missing servicemen.

Tate trial

LOS ANGELES (AP) - The Sharon Tate murder trial was recessed for another day today due to the illness of defendant Susan Atkins, and the three women defendants complained of in-

The judge agreed to make a personal in-

Miss Atkins was taken to the jail ward of a county hospital Monday for tests in connection with what her attorney said was a flareup of old trouble with an ovarian cyst. Today the attorney said the problem proved to be an impacted colon, which was being treated, and she should be ready for trial Wednesday. The tests showed no cyst troubles, he added.

Charles M. Manson, 35, leader of a hippie-type clan, is charged with murder-conspiracy along with three women followers in the killings of

Miss Tate and six others. Attorneys for the women moved at a hearing with the jury absent to have the judge order the sheriff's department to allow them to interview witnesses in the jail attorneys' room, rather than

through a glass panel. The judge said he would rule on the motion Wednesday. Manson complained last month that he had to interview witnesses through a screen, interfering with voice communication and vision. The judge after inspecting facilities said

he could see no problem.

Murder charge

dismissed

COLORADO CITY, Tex. (AP) - A judge dismissed a murder with malice charge Tuesday against Mrs. Judy Monteith, 18, in the death of her 3-month-old daughter in January.

Dist. Atty. Ed Paynter of Abilene asked Judge Austin McCloud to drop the charges when he rested the state's case against the woman's husband, Robert Eugene Monteith.

Monteith, 23, a former Abilene High School track star, is on trial in the death of his daughter, Stephanie. He also wab charged with murder

Prosecutors alleged the infant was beaten to death Jan. 10. Both parents are being tried simultaneously.

The state is seeking the death penalty for Monteith.

"I just didn't think we proved the case against her," Paynter said after he asked that the against Mrs. Monteith be dismissed. An Abilene physician, Dr. Herman Schaffer, testified that the infant's death was caused by bleeding and brain damage brought about by

A&M coeds

COLLEGE STATION, Tex. (AP) Preliminary figures indicate coed enrollment at Texas A&M has set a record for the second year. University officials said first figures for this year's fall enrollment shows coed enrollment will exceed the fall record of 1,138 established last year when women were accepted as

students. The university had been open to women on a limited basis since 1936. Total enrollment at the university this fall is expected to surpass 14,000.

Tech regent named

AUSTIN (AP) - Former Atty. Gen. Waggoner Carr, will head a committee of 100 to study legislators' duties, pay and ethics, House SpeakerGus Mutscher announced Monday.

"Our task on the commission will be to accurately evaluate the full work load of the elected representatives including the demands on his times taken by aiding the people in his district; as well as being away from his business during the legislative session and working on interim study committees," Carr said.

Carr also is a former representative and House speaker. He now practices law here. Mutscher said an executive committee of 12 members would be named to set the agenda for the full membership of the committee.

Innocently flushed

HOUSTON (AP) - Police and sheriff's deputies tear gassed the wrong house and flushed out an innocent family terrorized by the raid Monday

Police, led by two informers, were seeking two men wanted in the shooting of a deputy sheriff. They forced Mr. and Mrs. T.J. Cromeens and their two sons out of the house.

The wanted men were in an exact duplicate house on another street a block away and escaped during the confusion.

Deputy Sheriff Michael Scottie had been

wounded Aug. 25 in a shootout with burglars. The Cromeens and their son, 15, ran into the yard. Mrs. Cromeens yelled that a child was still in the

Police Lt. J.E. Gunnran into the gas-filled residence and brought out a 10-year-old son who was huddled in bed with the covers over his head. No one was injured and Gunn apologized.

SPY satellite

CAPE KENNEDY, Fla (AP) - The Air Force Monday night rocketed a secret spy satellite toward a stationary orbit above Southeast Asia to replace a similar payload that failed in June. The satellite is intended to gather a great amount of intelligence data about Russia, Red China and North Vietnam. Sources said it was launched earlier than originally scheduled

because of the June failure. A two stage Atlas-Agena rocket blazed away from Cape Kennedy at 8:55 p.m., EDT to propel the Superspy toward a lingering outpost some 20,000 miles above Indonesia.

The Air Force placed a secrecy lid on the launching and made no advance announcement. A brief statement five minutes after liftoff said merely that the rocket had been launched with an experimental payload.

Sources reported the satellite's main job is to provide early warning of an enemy missile attack from land or submarine.

They said the 26-foot-long Agena stage carried a television camera to spot missile sites, air bases, troop movements and other military installations and infrared and X-ray sensors to detect the exhaust of a rising rocket It was the fourth secret launch of an Atlas-

Agena from Cape Kennedy in two years. The sources reported the first two were operational prototypes and that they achieved nearstationary orbits above Southeast Asia. The first operational satellite in the program,

called Project 949, was launched toward a similar orbit June 19. It reached a preliminary path ranging from about 112 to 20,736 miles high. But a couple days later, the Agena engine failed to restart to kick the payload into the nearstationary path.

The sources said the satellite would be able to monitor test firings of both Soviet and Red Chinese missiles and would provide immediate warning of a hostile missile attack.

Court upholds ruling

NEW ORLEANS (AP) - A federal appeals court Monday upheld a ruling that Charles Denton Watson be extradited from Texas to California to face trial on a charge of murder in the slaying of actress Sharon Tate.

The 5th U.S. Circuit Court of Appeals rejected Watson's contention that there was no evidence to show he was in California at the time of the

Watson's extradition to California had been staved by the Texas Court of Criminal Appeals pending his appeal. The 5th vacated the stay in affirming the lowercourt's ruling.

Watson was indicted on seven counts of murder and one of conspiracy. He stayed in the custody of the Collins County, Tex., sheriff

pending the outcome of the appeal. Bill Boyd, 31, Watson's attorney, said Monday night at his home in McKinney, Tex., that he would ask the 5th Circuit Court for a rehearsing of the extradition case since it had been heard only by a three-judge panel. Boyd added that he would take the case to U.S. Supreme Court if

Principle argument against extradition has been that Watson could not get a fair trial in California because of "massive publicity" of the

blows to the chin area.

SELLING BOOKS - Bookstores beseiged by students selling books have been crowded with

Q: How much voice should students have?

A: I think you have to remember that when a student goes to college, he is making a contribution of up to four years of his time of which he might possibly, conceivably use to earn a salary. I think the one thing that he has a right to expect is that he not be bored. It's on this basis that we've developed our curriculum pattern: That you ought not to require him to do busy work that he should have known back in

high school or junivr high. Q: During the moratorium last fall, it was interesting that Trinity allowed some political science classes to be held outdoors.

A: Actually, there was more than that. There were two or three outside speakers. I think our own professors and students had more to say and were more relevant. But they were both here and they argued the two sides. There's a great deal A: There's a very great dif- of education that takes place

Trinity prexy finds small schools more closely knit

> Q: Do you see relative calm ahead for Texas campuses or

> > A: Well, I think we have maoped. I think we need to develop a better sense of valeswhat is important. I think we need to develop a faith, some conviction, some belief, some things we're willing to dedicate ourselves to. And I think young people are doing that today. I think we've cone to realize there's so much worthwhile to be learned, and so much to be

done with it, that there is less just irresponsible milling around and burning things down and burning things down and criticizing and doing very lit-

tle about it. Q: Do you think that's where

some colleges have failed?
A: I think there's no doubt about it. There's been a lack of communication. We get impatient, we don't want to be bothered, but if we'll take the time, we're enriched by it. I take a great deal of time, or have in past years, letting peo-ple come in this office that, really, if I ran a tight schedule, I never would see. This king of thing gives an openness and a sense of freedom that I think is good.

Trinity Page 2 Q: How did Trinity handle the Kent State protest?

A: The students had a worship service in our chapel. It was not a formal church service, but it was a very effective thing. Their only demonstration was that they walked walked out of the chapel in the evening with lighted candles and brought them to the fountain.

About 10 of our students, along with some hangers-on, went to the park afterwards and Tom Flower local peace advocate led a few of them over to Ft. Sam Houston.

UNIVERSITY SEMINARS IN THEOLOGY AND CULTURE

FREE DORM DELIVERY

University Seminars are non-credit educational offerings of the United Campus Ministries as a means for mature reflection upon ideas, events, and movements from the perspective of the Christian faith. They are informal, discussion centered opportunities to meet interesting people, examine different ideas, and grow in understanding God and the world. Each Seminar usually involves from 7 to 12 students and a teacher who meet weekly for 1 1/2 hours to discover the joys of intellectual exploration within the context of a community of love and concern.

Teachers for the Seminars, all professionally committed both to the Church and the University, include Ann and Don Coleman, Pat Ginn, Alwynn Barr, Gene Sorley, and Bob

There is a \$5.00 fee per student for each Seminar; registration begins September 1 and concludes September 13. All Seminars will commence during the week beginning September 13. For more information or to register for a Seminar contact one of the participating campus ministry centers.

"HELLO DOLLY" -- Walter Matthau and Barbra Streisand star in this musical comedy now showing at Fox Twin Two.

Cinemaddict

by CASEY CHARNESS

Two. Starring Barbra Streisand, Walter Matthau, Michael Crawford, Written and produced by Ernest Lehman, chore-ographed by Michael Kidd, dir-ected by Gene Kelly. 20th Century - Fox.

"Hello, Dolly!" is an opulent musical that shows every cent of its \$20 million budget. It has bounce and exuberance-and it has its bad, its very bad, moments. And it has Barbra Streisand.

Most of the pictures hinges around a \$2 million set recreation of Old New York that resembles Disneyland's Main Street, U.S.A., with a little paint photogenically chipped away here and there. It's a set to live in, big, believable and sentimental.

What isn't there is located in a homey Yonkers, N.Y. setting,

ber, in the Harmonia Gardens restaurant, a sumptuous, chic backdrop for the number.

Around this elegance is created a charming picture - postcard atmosphere based more in nostalgia than cotton-can-

The scenery, some of the dancing and Miss Streisand have the movie to themselves. The vaudeville atmosphere of the original stage show, is inexplicably almost the longest running Broadway show in history. Thus, we are stuck with that particular brand of phony emotion that is so often referred to as "musical comedy."

Michael Kidd's choreography is another diversion, and it is welcome that this dance master, creator of the memorable "Seven Brides For Seven Brothers" numbers, has recovered from his temporary setback that he suffered for the painful "Star!" numbers, and has bounced back into filmic style.

"Put on Your Sunday Clothes," however, shows obvious influence from Onna White's choreography for "Oliver," in which she achieved the ultimate a feat Kidd reproduced almost

Mostly, though, his choreography, if predictable, is still energetic, and his fantastic "Waithey still gave best choreogra-phy Oscars. ('Dolly," inciden-Sunday, Nov. 15: "That Cold tally, won three Oscars in Ap-Day in the Park," Coronado ril: one each for best sound, best adapted musical score and

These split screens are only half effective. The first minutes of the movie are in straight 35mm, which then develops into split screen, placing two 35mm movies side by side. But initially, the sound goes only with the picture on the left, while the right side serves as screen filler, not even as complement

picture. But it is certainly no- on does the technique function efficiently. Here, three screens alternate, fading in and out on WOODSTOCK: Red Raider dri- each other, effective because ve-in. A Wadleigh - Maurice she is spotlighted against the

night sky. When split screens focus on one subject, and surround it, capturing it from all angles, then we get a 3-D image. When tegrating them, they look like spliced amateur movies.

Furthermore, I refuse to believe that anyone who thinks can accept director Michael Wadleigh's pale, foolish view of rock Americana. He is playing the imagist of a role conception, photographing according to popular typecasting of hippies and freaks.

The freak society is based on more than music. But "Woodstock" would make music the the hippies' reason for being.

The "Woodstock Nation," if it exists, and I think it's only a lame attempt at modern mythmaking, is shown in this movie to be a very self-contained, yet empty put-on.

Wadleigh's so-called "interviews" are annoyances-his setup love-making and skinny-dipping scenes are pretentiously romantic. And the appeal of his film, what little there is, come only from the performers themselves, not from his cameras. The singers put out not from the bottom of their hearts, but from the depths of their guts, and lower.

I expected to be swept up bodily into the film, and what it shows-like the way you'd become a sworn Pisces after seeing Bruce Brown's "End-

Council approves Pornography law repeal

WASHINGTON(AP)- Repeal of all U.S. laws against pornography for adults but enactment of laws against exposure of children to obscene pictures were among recommendation reportly given final approval by the President's Commission of Pornography.

Also given final approval, a commission source said, were recommendations, for a massive "sex reeducation" program in America and laws against public display of pornography or its use in unsolitcited mail advertisements.

The most controversial recommendation-repeal of censorship for adults-and its sup-

U.S., U.S.S.R. make effort at

demilitarization

GENEVA (AP) - The United States and the Soviet Union pledged today to continue ef-forts for the demilitarization of the sea bed, beyond the envisaged ban of atomic wea-pons installations on the ocean

The pledge was contained in the latest revision of their joint draft treaty outlawing mass destruction weapons in that environment, tabled at the 25nation disarmament talks to-

Presented by U.S. delegate James F. Leonard and Russia's Alexei A. Roshchin; the two conference cochairmen, it was the fourth version of the draft treaty that has failed thus far to obtain approval from the full conference.

The first draft was tabled early last October, followed by revised drafts with minor changes presented at the end of the same month, and on April 21.

The draft treaty would ban only mass destruction installations, not conventional ones like submarine tracking stations already set up on the sea bot-tom, and would not affect submarines equipped with nuclear

The new draft will be presented to the U.N. General Assembly in New York later this month. The Geneva conference goes into recess next Thursday.

Young GOP's to hold meeting

The Texas Tech Young Republicans will hold their first meeting of the year Wednesday, at 7:30 p.m. in the Mesa Room of the Tech Union University Center.

Guest speaker Christopher Cobb will discuss the "Eggers for Governor" campaign, Cobb is the West - Texas field director for the Republican Party. Goals of the Young Republicans are in promoting student interest in Texas politics and interest in the Eggers and Bush campaigns, according to Richard Glenney, public relations

A&M coeds

director.

COLLEGE STATION, Tex. (AP) - Preliminary figures indicate coed enrollment at Texas A&M has set a record for the second year.

University officials said first figures for this year's fall enrollment shows coed enrollment will exceed the fall record of 1,138 established last vear when women were ac-

cepted as students. The university had been open to women on a limited basis since 1936. Total enrollment at the university this fall is expected to surpass 14,000.

a draft report was disclosed by the Associated Press three weeks ago. But this recommendation was reported approved intact:

"The commission recommends federal, state and local legislation prohibiting the sale exhibition, or distribution of sexual materials to consenting adults should be repealed.

"We believe there is no warrant for continued governmental interference of the full freedom of adults to read, obtain or view what materials

The draft conclusion that there is no evidence that exposure to pornography causes sex crimes or harms children reportedly was modified to specify the commission's research does not indicate such

The recommendation that children be protected against

porting arguments have been extensively rewritten since edly does not cover obscene written material, on the ground that obscene literature, but not pictures, is too difficult to define even in the case of children.

The 18 - member commission's report was given final approval at a seven-hour session Wednesday and sixhour session Thursday, the source said, and there will be no further commission

The report is expected to be released about the middle of September. The life of the commission expires at the

The White House has noted the commission is not part of the Nixon Administration,

"It was formed under a previous administration..... and the commission's recommendations are not those of this administration," news secretary Ronald L. Ziegler said Aug. 11.

Military bases tighten security

W.SHINGTON(AP)-Military bases throughout the United States are tightening security to combat a growing number of weapons thefts staged with months. mounting boldness.

The Army provost marshal's office said Tuesday some of the measures being taken include the use of improved locking devices for arms rooms and installation of electronic surveilance equipment.

Closer checks on the backgrounds of men assinged to guard and work in the arem rooms also are being made.

WASHINGTON (AP) - The Senate refused today to require the winner of the Navy's rich-est shipbuilding contract to

share it with another shipyard. By rejecting a military pro-curement bill amendment offered by Sen. Edmund S. Mus-kie, D-Maine, the Senate left untouched the Navy's award of the \$2.1 billion contract for a new U.S. destroyer fleet to Litton Industries' Ingalls Division at Pascagoula, Miss. It was a victory for Chair-

man John Stennis, D-Miss., of the Senate Armed Services Committee who defended the choice of the firm in his stateinstead of Bath, Maine, Iron Works - as the single supplier of 30 new destroyers.

Muskie's proposal was aimed at having the winning firm subcontract half the program to another company - to avoid concentrating all the work in one shipyard.

Muskie said the subcontract-"He is not an assassin," she ing would have meant that the second shipyard would be paid mainly for labor spent on constructing 15 ships - "which would equal approximately 20 to San Camillo Hospital and homicide, said, "It's tragic but to 25 per cent of the total

Cowboys acquire Adderley in trade

DALLAS tex. (AP) - The Dallas Cowboys, battling to come up with a winning combination in their defensive secondary, Tuesday traded center Malcolm Walker and defensive end Clarence Williams to the Green Bay Packers for cornerback Herb Adderley. Walker, in his third year with the Cowboys, battled back from an injury to become Dallas' starting center in 1968 and battled Dave kers for cornerback Herb Adderley.

Walker, in his their year with the Cowboys, battled back from an injury to become Dassas' starting center in 1968 and battled Dave Manders in other years for a starting role.

Williams, a first year player from Prairie View, was the Cowboys' 11th round draft choice in 1969. He eventually wound up on the !axi squad last year.

Notes, quotes

Tech launches 45th grid year

By Bob Brewster

Notes and quotes while waiting for the season to begin:

Tech celebrates its 45th birthday in football this season. The Red Raiders launched the sport in 1925 and were 6-1-2 the first year. This season also brings to a close Tech's first decade in the Southwest Conference, having opened SWC football competition in 1960.

JIM CARLEN told his 1970 Raiders to report back in shape this fall. He took his own advice, and after a rigorous schedule on the banquet circuit which saw him average about a speech a day, he started working out himself. He dropped more than 15 pounds and is ready for the upcoming season.

SPEAKING OF the banquet circuit, Tech President Dr. Grover Murray popped a funny at the Saddle Tramp picnic Sunday. After Carlen spoke to the members, Dr. Murray went back to the speaker's stand and told this story: "I have a son-in-law who recently went to work for Texas A&M, which kind of wounded my family pride." joked Dr. Murray. "Coach Carlen came up to me and handed me a present, a Texas Tech tie clip.

Carlen, knowing that Dr. Murray wore a bow tie and did not need the clip then said: "Well, you can send it to your son-in-law at

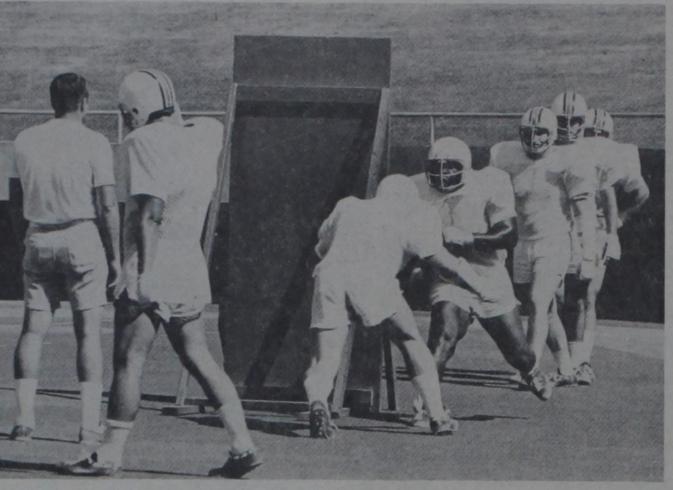

THE LAST time Tech scheduled 11 regular season games was in 1953 when the Raiders racked up a 10-1 season record and knocked off Auburn, 35-13, in the Gator Bowl. Tech's only loss that year was a 27-14 setback to A&M.

THE ONLY major injuries so far (knock on wood) in fall practice for the Raiders have been Aubrey McCain, Mike Henthrone, and Richard Walker. McCain and Henthorne will be redshirted. Walker, a tryout, may return next year.

BRUCE DOWDY, the Raiders' starting defensive end, is nicknamed "Wolfman" by his teamates. Writers here for the SWC press tour asked Bruce if the Raiders called his girlfriend

MILTON HIBLER got some good stories around the conference from the sports writers. The Vietnam veteran was widely quoted for his comment on the Vietnam war: "No comment. I've done my

RAIDER TIGHT end Johnny Odom from Fort Worth has this to say about Carlen: "I didn't know what to expect. "Before we met him we heard all sorts of things, then he had a team meeting. He called roll and guys were saying, 'No. 343, sir' instead of just here. Really snapping it out. You could tell everybody was a little tight. But he started talking and I don't think I've met a square shooter in sity, Wichita Falls, Stiles joinmy life. He doesn't bull you around.

Ex-quarterback

'Mo' top linebacker

By Bob Brewster

Sports Editor

Ever heard the old adage; "Old quarterbacks never die, they just turn into line-backers?" Of course not; it doesn't exist. In fact, old quarterbacks usually turn into no-thing but ex-football players.

However, Tech's best hope for All-Southwest Conference re-cognition this year is a linebacker who was a quarterback in high school. His name is Larry Molinare, and this is what Jim Carlen has to say about him: "Larry Molinare probably has the best chance to be All - SWC out of all the players we have."

THOSE ARE mighty strong

tions this year. The 6-2, 213 pound junior raised a few eyebrows last year when he started for the Raiders, and he figures to do more of the same

prospect for the pros."

Carlen was worried about his linebacking depth last spring, but never about the value of Mo-

also will help us, so our concern in this area has subsided considerably."

played quarterback.

"We went 1-9 that year," explains Molinare. "About all I

words, but the fact is Molinare has been selected for first team all - conference in just about every poll taken on preditions this work. The 6.2 212

A better defense makes for a better Molinare, and SWC op-ponents do not like that. Larry rates Steve Worster of Texas and John Riggins of Kansas as the toughest running backs he this year.

"He's a fine tackler with a great nose for the ball," Carlen explains. "If he had a litimare this year, and both are the more size he'd be a great rated among the best in their respective conformage."

respective conferences.
Molinare, nicknamed "Mo" by his teammates, compares runningback Doug McCutcheon to linare. In fact, Carlen now ad-mits that his linebackers cause less reason for worry.

Worster in the way he bulls over people. "Miles (Langeh-ennig) and (Danny) Hardaway less reason for worry.

"Our linebacking situation has improved greatly," said Carlen, an All-American linebacker at Georgia Tech in his collast spring.

ennig) and (Danny) Hardaway have more speed, but Doug just runs over you," said Molinare, who has been tackling all three in practice this fall and last spring. last spring.

"Last spring we were very Molinare hails from Midland concerned about it, but Mark Lee High School, where he earn-fincannon's knee is well, and ed three high school letters in Mike Watkins has experience football and track. He does not there. We think Reagan Young miss the old days when he
