Big Foot Wallace's Hand to Hand Fight

By J. C. DUVAL

N the fall of 1842 Indians were more troublesome than ever on the Texas frontier. You couldn't stake a horse out at night with expectation of finding it next morning, and a fellow's scalp wasn't safe on his head outside of his own cabin," said Big Foot Wallace, in a history written by J. C. Duval, entitled, "The Adventures of Big Foot Wallace." "The people on the frontier at last came to the conclusion that comething had to be done or else they would be compelled to fall back on the settlements, which would have been reversing the natural order of things, so we met by agreement at my ranch, arganized a company of 40 men, and here time the Indians came down trengthe mountains we took their arail, if termined to follow it as long as our horses held out. The trail led us up toward the headwaters of the blanc river, and on the third day out I discovered a great many signal smokes_ rising in the direction we were traveling. That night we camped near a water hole, putting out a double guard. Just before sundown I saw a smoke, apnarently about three miles to the northaust of us, and tell satisfied there was a party of Indians encamped nearby. I eacht to the captains of our company and told him if granted leave of absence I would get up an hour before daylight and try to spy out the Indian camp.

Bump Into Big Indian

The emptain told the might guard to ass me out whenever I wanted to re-Whetting up Old Butcher and ranuming a bullet down the barrel of Old Betsy, I left camp two hours before daylight. pended in the direction of that smoke I had seen the evening before.

The chaparral was as thick in some places as hair on a dog's back, but I threaded through it in the darkness but he was wire and active as a wild and after traveling a mile and a half Scat, shock as an cell and was fovered came to a deep canyon that seemed to from head to foot with bear's

smoke. I scrambled down into it and waited until daybreak, then slowly and a word being spoken by either of usthe bottom of the canyon, which was other side, and sometimes on bottom crooked, and in some places very steep and narrow.

"At length I came to a place where the canyon turned sharply to the left, and just as I rounded its corner I came plump up against a big Indian, who was coming down the cauvon, with Intention, I suspect, of spying out our own/camp. We were both stooping down when we met and our heads bumped together with such force that the Indian rolled one way and Arolled the other. We jumped to our feet about the same time, but the encounter was so unexpected that we stood uncertain for a moment, glaving at

Drop Rifles and Grapple

"The Indian had a rifle as well as I, but were too close to fire, so it seemed we both came to the same conclusion as what was best to do, for we both drops ped our ritles and grappled one another, saying not a word. Without meaning to brag, in those days I was young and strong, and do not believe there was a white man west of the Colorado rixer who could down me in a regular bear-hug wrest... ling match. But the minute I hefted that Indian I knew I had undertaken a job that would bring sweat from net and pers haps blood. He was nearly as tall

as I at least six fact one inch. and weighed. I guess arbent 175 pounds net. for he wore an clothes worth mentionings I had the advantage in weight,

"We went at it in dead earnest—not cautiously continued my course along first up one side the canyon, down the

Dropped our rifles and grappled one another."

of the canyon. I was a little stronger. than the Indian, could throw him easily enough, but the moment he touched ground the 'varmint' would give himself a sort of squirm, like a snake, and paperight up on top of me again. I the old home, apple orchard, and creek fight could hold him but for a moment, he where I used to go swimming. All you."

Big Foot Gets a Break "The combat so far was just about even—and all through the fight we had been trying to draw our butcher knives from their sheaths, but neither could get a chance to do so. At last, I realized my strength was slowly fail-ing me and that if I did not do something soon my scalp would be lifted. The Indian was getting better the longer he fought. So next time we rose to our feet I put forth all my

> great force against a sharp-pointed rock lying on the ground. The Indian's head came in contact with the rock, which stunned him temporarily, giving me time to draw my knife and plunge it with all my strength up to the hilt in his body. The moment he felt cold steel he threw me from him as if I had been a 10-year-old boy, sprang upon me before I could rise, drew his own butcher knife and raised it with intention of plung-

strength and gave him a back-

handed trip that threw him with

ing it into my breast.
"I tell you, boys," continued Wallace, with a faraway look in his eyes, "I often see that Indian now in my dreams, especially after eating a hearty supper of bear meat and honey, grappling me by the throat with left hand, the gleaming butcher knife raised high in his right hand, and two eyes blazing down at me like a panther's in the

dark. It is astonishing how fast a man can think under such circumstances. I looked upon the blue sky, and bright sun overhead. Then thought of mother as I remembered her when a little boy,

these, and many more thoughts, flashed through my mind in the little time that knife was gleaming over my breast.

Indian Loses Fight

"Suddenly the Indian quivered, while on top of me, gave a yell, and down went the knife with a force that buried it to the hilt in the earth at my side.

The last time I threw down the Indian a deep gash was cut in his forehead by the sharp-pointed rock, and blood running down his eyes from this wound so blinded him that he struck wildly with his butcher knife, the blade missing me about half an inch. I fully expected him to repeat the blow, but he lay still and made no effort to withdraw the knife from the ground. I looked at his eyes; they were set hard and fast, but there was a devilish sort of grin about his mouth as if he died in the belief he had sent me before him to the happy hunting grounds.

"I threw his body off of me and got up weak and trembling. My knife had gone to his heart. I looked at the dead Indian for a while, lying there so still, and said to myself: 'Well, red warrior, you made a good fight, and if luck had not gone against you you would have been where I am and I would have been where you are. Now, I shall do for you what I never did for an Indian before—I am going give you a decent Christian

"So, I laid his rifle beside him, according to Indian custom, that it might be handy when he got to the happy hunting grounds, and gathered pieces of rock from the canyon, piling them around and over his body, until it was completely covered and safe from attacks of covotes or other wild animals. There I left him at rest in his crude and lonely grave, a foe worthy of any man's steel. This is a true account of my fight with the big Indian in the can-

The MacDonald Observatory on Mount Locke

is the resting that the the Home, Color Phat Can T. Locke, 6.790-tool peak in the M Locke to 199 to a peak of the Davis mountains in Southwestern Texas, site of the new MacDonald Observatory, will hade the second largest telescope in the world. It vill be a co-operative enterprise on the part of the University of Texas, which for buildings from a part of the be-most of the late W. J. MacDonald of Paris, Texas, and the University of Chicago, which is to provide a staff for The observatory. The agreement betweets the two universities is the first en-operative effort of its kind in itsco-operative agreement will mean a saving of over \$1,000,000 to the two universities.

The decision of Dr. Otto Strave, director of the Yerkes Observatory of the University of Chicago, to locate the MacDonald Observatory on Mt. Locke. was made following the return of any expedition, which remained 17 nights on Mt. Locke making observations. that confirmed the findings of two earlier expeditions.

Why Mt. Locke Selected

The tract of 200 acres, which in-

only van BlackCOM cludes Mt. Locker was given the Unisite. It is about 15 miles from Force Davis, the nearest jown, to which a markentheed road is being built. It. Strave believes Mt. Locke offers the best conditions for astronomical research in the United States.

Because the solar system is unsymmetrically situated among galaxy star; ! is creating the telescope and observa- and more than nine-tenths of these. stars and arbulae interesting to astroop mers are south of the equator, the darther south an observatory may be recuted the better the visibility:

The Southern latitude of Mt. Locke approximately 31 degrees, makes many stars visible which are never above the troughly in this country, enabling them horizon at Yerkes Observatory: Wilto build a much larger and effective in-lines Bay. Wis. Atmospheric condistrument than would have been possistions also are much better in the Davis. ble had two independent observatories mountains, nights being uniformly been constructed and staffed. Also the clear and stars twice as bright as in Eastern States. The elevation of Ma. Locke exceeds that of Mt. Wilson and Lick Observatories, and is just a little short of the elevation of Lowell Observatory, hear Flagstaff, Ariz.

Special Designed Telescope

A telescope designed for one type of work is not always suitable for another type. The measurement of close stars. for example, depends primarily upon the revolving power of a telescope, and this, in turn, depends upon large aperature combined with great focal length. The 49-inch Yerlies refractor is admir-

ably adapted for this kind of work. On the other band, the photography of star spectra domands great light-gathoring power, and is best carried out with reflecting telescope of very large aperature. The 100-inch reflector at Mt. Wilson is by far the strongest indrament for this kind of work.

Because the MacDonald telescope must supplement, and not duplicate, equipmeat already available at Yerkes Observatory, and must satisfy the interest and needs of the staft of astronomers who will use it, it was decided that the most useful type of instrument would be a reflector having a concave mirror of about 80-inch aperature and a focal ratio of about one to Tour. This means that the distance from the mirror to the focus would be four times 80 inches or 27 feet.

The Mt. Locke telescope will be much shorter than the Yerkes reflector, which is 62-feet long, but will have the aperature, of about four times the light-gathering power, and therefore will be much more efficient for photography of faint stars or of stellar spectra. The focal ratio is short enough, however, to be suitable for photography of faint nebulae and distant galaxies.

The mounting of the MacDonald telescope is to be constructed in a way that the light of any star may be concentrated in a room of constant temperature, where it may be analyzed with the air of prisms, photo-electric photometers or other analyzers. There will

be a plateholder for the direct photography of comets, stars, planets and nebulac, and specially designed lenses which will improve the optical definition of the instrument.

Building Large Mitror

Second only in light-gathering power to the 100-inch mirror at Mt. Wilson, the MacDonald telescope will have an 80inch mirror made of glass with low coefficiency, of expansion and therefore in a climate where appreciable change of temperature during one night is unusual.

Casting of the Mt. Locke mirror will require at least a year and polishing and shaping will require another year. The building which will house the telescope is to be 100 feet high and 62 feet in diameter inside. The telescope will reveal stars of the twentieth magnitude, or 100,000,000 light years distant. Chief work of the observatory will be astronomical photography, and in this respect it will be the greatest observa-tory in the world. The work to be done is in the newer phases of astronomy and astrophysics, having to do particularly with the physical nature of heavenly bodies. The problems to be taken up will include the study of chemical composition of the atmosphere of stars, the study of distant universes. which involves a test of the Einstein theory, and study of gaseous compositions of the nebulae, comets and Dome Will Be Visible for Miles

The dome of the observatory, coated with aluminum paint, will be visible for many miles; in fact, from Mt. Locke summit one can view Mexico, nearly 100 miles distant, also view New Mexico and perhaps 15 counties in Texas. The leisurely progress in completing of the observatory plant is due to the fact that more than a year will be required for casting the pyrex glass! mirror of the telescope. This vast block of glass will be cooled slowly under-} ground by gradual withdrawal of electric heat, the cooling process requiring long and careful watching. The mirror will be convex, polished by hand, and the inner surface coated with silver. The mirror will reflect into a smaller mirror, which will send its beams back through the 20-inch aperature to third mirror, reflecting into a dark room. There some of the greatest work in astronomy will be accomplish-

Concrete piers for the Mt. Locke telescope axis have been in place for some time, and steel for the first three floors of the observatory building is in place. The dome will ride on 26 beveled wheels, and a motor of seven and a half horse power will be used to turn it. Bottom floors of the building will house the driving machinery, second floor laboratories and work rooms, while the third floor will be used entirely for observing and operating the tele-

of the National Better Housing Ac urpose

O group has been harder hit by the depression than workers in the building industry. New construction has dropped nearly 90% from what it was in 1926-29. About onethird of the workers whose families now are on the relief rolls are normally employed in the building industry, and many others in factories, transportation and other fields are indirectly dependent upon this industry for a liveli-

Until these workers are largely reemployed, no community can enjoy a full measuré of prosperity.

The last Congress recognized this fact. It passed the National Housing Act, one of the purposes of which is to restore to useful private enterprise the largest group of workers still unem-

This Act, among other things, should make available, through private lending agencies, approximately \$1,000,000,000 for financing alterations, repairs and improvements upon all types of real property, and at the lowest charges

ever offered for this type of loan. What every city is now asking is: "How can we get the greatest and most immediate benefit from the National Housing Act? How can we use this

Benefits from the Act

The quickest way to get reemployment in private enterprise is through making property repairs and improvements. This work can begin almost as soon as it is decided upon.

The Federal Housing Administration, created to administer the Housing Act. suggests that every city wishing to derive the greatest benefit from the Act organize a local campaign of modernizing and improvement, under the Better Housing Program, similar to those successfully conducted in many cities during the past two years.

The administration believes that only in this way can the people of a community be fully informed as to how they can take advantage of the new financing feature of the Act, and as to the desirability of making needed repairs and improvements to their property at this time.

The Federal Housing Administration is ready to give assistance to those communities which desire to set up such a program. It will, wherever possible, send an experienced man to the city to assist in the organization work. It will supply literature in necessary quantities for distribution to property Act to improve business conditions and owners, architects, building supply and

By FEDERAL HOUSING ADMINISTRATION to help relieve distress among the un-washington, b. c. to help relieve distress among the un-posters, display cards, news stories, speeches and other material for publicizing the program. And it will suggest sample forms and complete instructions for field workers.

How a Better Housing Program Benefits

A large part of every dollar spent for modernizing goes direct to labor. Most of this money immediately is put back into the channels of retail trade. Every dollar brought out of hiding and paid in wages multiplies in the course of a year many times. Campaigns held in 84 cities during 1932-33 resulted in an average expenditure for modernization of roughly \$10 per capita. (And at that time there was no financing feature such as now provided by the Natienal Housing Act).

Should your community's program be as successful as these earlier campaigns, it would give rise to a gross increase in all business of many times the amount actually spent for rebuilding.

For every building tradesman put to work it is estimated that on the average a family of four can be taken off the relief rolls. With winter coming, a modernization campaign will help greatly to relieve distress among the unemployed, and by putting men to work in private enterprise, will lessen the public burden of relief.

-PAGE 2-

tion and literature.

pair work has been deferred in recent seriously neglected as to jeopardize their future value. Returns from the CWA real property inventory made last winter shows that in nearly every city at least half of the homes are in need of repair, many of them being in very bad condition. The making of needed repairs not only benefits a property and increases its usefulness and value but generally improves the beauty and appearance of a city. A modernizing campaign is a worthwhile civic enterprise which appeals to all those interested in improving the condition of their community.

How to Organize a Local Better Housing Program

Detailed information, showing how to organize a local modernizing and improvement or Better Housing Program will be furnished by the Federal Housing Administration, Washington, D. C. Write the Administration for informa-

The local campaign should be held under the sponsorship of the leading joint sponsorship of several organizations; or under the sponsorship of an to the bay.

Much necessary maintenance and re- organization created especially to air work has been deferred in recent handle it. Those cities, or towns, or years due to force of circumstances. In villages, which push the program most many cases properties have been so aggressively will be the ones to derive the greatest benefit from the National Housing Act.

A tremendous amount of modernizing and repair work needs to be done.

Liberal financing is available. Building tradesmen are waiting to go to work.

The plan is ready.

TIMBER WOLVES MENACING

Timber wolves in Cooke county have been so menacing that farmers go armed to kill them when opportunity is after forded. They have been more daring this fall in that section than for many years, due to summer drouth forcing them from their usual haunts in search of food. Many farmers have lost calves and fowls from depredations of the animals.

CATCHES SEA TURTLE

Clarence Bartley of Morgan's Point near Houston, recently caught a 15pound sea turtle on an ordinary fishing hook, line and pole. It is unusual to business organization, such as the catch a sea turtle even with such stanti Chamber of Commerce; or under the tackle, and fishermen believe the recent Gulf storm drove this turtle in-

CURRENT COMMENT

The School Bells Are Ringing

THE children are all back in school now. The school house didn't burn down like Johnnie may have hoped it would, and while the hard times and drouth have decreased tax money, yet the school boards as a general rule say the term will last as long as usual. The tornado may have come perilously near some of the school houses, tearing down shacks and blowing down trees, but I haven't heard of any school house being destroyed. Therefore Johnnie and Bobbie have had to take up the burden of life, and as I write, some thirty million boys and girls in this country have been called to what was denominated in my school days as "books." The schools of the South in reconstruction times were vastly different from what they are now and if we old fellows didn't learn much it possibly was because we didn't have much chance. Most of the teachers who taught me could hardly pass the fifth grade in our modern schools, except that they put high pressure on arithmetic and spelling and a few other fundamentals: However, one teacher I went to always turned us back in arithmetic when we got to decimal fractions. Decimal fractions were called 'vulgar fractions" at that time and I had an idea the old man didn't think them a proper thing to teach to a mixed class of boys and girls. It was many years afterward before it dawned on me that the old gentleman didn't know how to teach them. We didn't have any busses to carry us to school. I walked never less than two miles to the school house and when I got there at 8 o'clock I had to sit on split log benches until 6 p. m., with two 15-minute recesses and an hour for dinner. We had no one (or wanted) anyone to teach us how to play. And I believe we had as much fun as if we had all kind of coaches and supervisors. The boys played "Cat," "Shinny" and "Townball" and before I received my degree (?) baseball came in and we played that. At that time there was this difference between the way we played it and the present way. We really pitched the ball and the pitcher's prowess was determined by his ability to pitch the ball so the batter could hit it. I have known one side to stay in during an entire noon hour and when "books" were called the score might stand 65 to 0. On Christmas the teacher had to treat the school or have the school barred and closed, and if he showed up without the apples, chestnuts or candy, there was only one thing to do and that was to duck him in the pond. I saw one fellow put in when we had to break the ice. I wonder if the modern school boy would have his ire raised if some one was to come by his school and holler, "School Butter?" In my day this was the greatest insult possible and I have known teacher to turn all the boys out to chase man or boy who offered the insult. We never caught but one of these miscreants and we denuded him of all his garments save one before turning him loose. I did not know then, nor do I know now, why it was an insult to a school to use that word "school butter," and if any old timer can enlighten me I shall be obliged. Our schools usually lasted about four months. We had no grades and the entire school stood up in a long line for the spelling lesson, and if you missed a word the one who spelled it correctly went above you. We are seeing America and America is called it "tripping," and while I was worth seeing. Our national parks duroften "tripped" none of the "trippers"

were like Whittier's little girl who said: visitors than ever before. Yellowstone

"I'm sorry that I spelled the word, I hate to go above you,
And the brown eyes lower fell,
Because you know I love you."

It was a battle for the strongest in the old Ebenezer school, in the school room and on the play ground.

宋 宋 宋 Is It Machinery?

Sir Josiah Stamp, a director in the Bank of England and President of the London Midland Railway, the largest on the British Isles, in an address to a convention of scientists begs them to put on the brakes so far as any new inventions are concerned. Sir Stamp told them that their discoveries were the root of all our troubles. Machinery had displaced man power without giving those it displaced any means of livelihood. He said he trembled with dread as to what is going to happen to any kind of economic organism which is trying to keep in balance, particularly under an individualistic form of society like that existing in England and the United States. He says he trembles still more as to what would happen under any other form of society. That machinery is undoubtedly largely responsible for unemployment in this country can be seen from the government's investigations into the textile strike. It has been shown that in 20 years the machine has played havoc with labor. One machine is now doing the work of what it took 216 employes to do in 1914. This machine can be operated by one young girl and the uestion is what is to become of the 215 who lost their jobs? This machine does not do all the work in a textile mill but other machines have taken the place of many workers. I talked with the superintendent of a North Carolina mill two years ago and he told me his mill was installing three new machines that would displace 42 operators each. asked him what would become of the 126 persons who would lose their jobs and he answered: "That is the serious phase of the matter but nothing can stop progress." An investigation of machinery in the steel mills revealed that but for the machines installed during the last 25 years the mills would be compelled to employ five and half times as many operators as are now employed. If there was some way, as Sir Stamp says, to balance or adjust our new inventions so that all would benefit, the machine might bring the abundant life" we hear so much about and which is so much desired by all. But like the English financier, I can't see how it can be done. We see evidence of the man-slaughter the machine is doing all around us. I counted the cars in one train the other day and there were 104 cars pulled by one engine and manned with a crew of five. And I have seen the time on this same railroad when 15 cars were all the engine could pull. These monster engines have therefore reduced seven crews to one—five men taking the place of 35. Of course, as the cot-ton mill superintendent said: "Nothton mill superintendent ing can stop progress." But with ten million persons on the unemployed list. it is something worthy of serious consideration.

Seeing America

There is one thing the prolonged depression has done that can be put down on the credit side. It has almost stopped the expensive trips to Europe and other parts of the world. Our people ing the last summer had vastly more him, with almost impossible conditions,

Park had 72 per cent more visitors than any year since it was established. Last winter Florida had its biggest year in the way of winter tourists, as did also Southern California. The reason for this probably is two-fold. In the first place the great masses of the people do not think they can afford to spend large sums and yet the desire to go somewhere still exists. Another reason is that a trip to Europe costs almost double what it did 18 months ago because of the devaluation of the gold dollar to 59 cents. This means when the tourist takes his money to exchange it into the money of any of these countries, he finds that he can only receive 59 cents of his dollar in the currencies of Europe. Therefore, if a European trip 18 months ago would cost \$1,000 it will now cost something more than \$1450. As evidence that the above reasons are affecting Trans-Atlantic tourists, I note that Sept. 5th when two of the finest passenger vessels plying between New York and Europe—the Olympic and the Empress of Britian landed at Cherbourg the Olympic had two first class passengers, 14 tourists and 17 third class passengers. The Empress of Britain did a little better with 40 passengers in all, six of them first-class passengers. These were the lowest records in the history of Trans-Atlantic passenger carrying in more than 50 years. To get some idea of how much the owners lost on these trips can be imagined when the crew of one of these—the Olympic—numbers 964 and the other carries a crew of

法 九 宋 Two Pillows and a Silver Ring

There is something quite pathetic to be found in an abstract of title to a small home in my county. It is the will of the wife of the man who owned it. She died a few years ago and the husband in endeavoring to secure a loan had the abstract made. The will is short in which this woman disposed of her earthly possessions. "Being of sound mind and disposing memory" she willed one of her feather pillows to her beloved daughter and the other feather pillow to a very dear sister. To her daughter she also gave her silver wedding ring and adds: "These are all I possess and I bequeath them in loving memory of the many kindnesses bestowed upon me during my many months of sickness." I do not know why she thought it necessary to make the will but it is on record in the county clerk's office and is part of the permanent archives. Two feather pillows and a silver wedding ring! A lifetime's accumulation!

* * * He Was Game

No matter what one may think of the wisdom of Admiral Byrds selfbanishment 127 miles from another human being, in a lonely house built from ice, this does not detract from the courage he exhibited when the crisis came. He became sick, seriously so. He had a radio by which he could summon his companions to come to his was especially severe, the snow had fallen many feet thick covering dangerous crevasses, the thermometer was at from 40 to 80 below zero. He knew, as probably no other man in all the world knew, the dangers that would beset a rescue party. And so he decided to die if need be rather than endanger the lives of others. He grew so weak he could no longer use the radio and his friends knew he was in some kind of trouble. After two failures to reach

the third attempt was successful. They found the Admiral near unto death and it took weeks to get him so he could be taken back to the base where there was comparative comfort. Men who undertake these great explorative expeditions must have hearts of iron. Admiral Byrd's name will rank along with the greatest of them.

What He Uns Missed

A man in Tyler, Texas, had his sight restored the other day after 16 years of total blindness. When asked what change he saw that mostly impressed him, he said: "The way the women dress is simply awful." And yet the year that man lost his sight—1918 was when the flapper was in all her glory. Certainly the women are not dressing now as boldly as they did when darkness came to him. It is true that the styles did for several years after 1918 show more and more anatomy, but really the fashions now are demure compared with 1922 to 1928. That Tyler man missed seeing a lot during his years of blindness.

A Great Reason for Voting

The general election in November so far as Texas is concerned will be simply a ratification of the dominant party's nominations. Therefore, there will be disposition on the part of the voters not to bother about going to the polls. But if the voters will study the constitutional amendments that will be voted on at that time they are likely to see a greater reason for voting than they did in the primary election. The primary was largely a contest that involved the personality of the candidates and had little to do with the real government of the State. But the constitutional amendments affect the taxpayers pocket. For example: These amendments will enable the counties to abolish three offices, and, in my opinion, without los in the efficiency of county government We have already consolidated the of fices of county tax collector and asses sor, greatly saving the expense of maintaining two officers when one could do the work. The amendments we will vote on in November will abolish the office of district clerk, combining the duties of that office with that of the county clerk. Other amend ments will eliminate the offices of county treasurer and county surveyor. The duties of these offices can be absorbed by other officials without the least loss of efficiency. Then one of the amendments broadens the powers of the commissioners court and empowers it to set the salaries of all precinct. officers. These consolidations of offices will not appeal to the office holders but it seems to me the taxpayers should grasp anything that will lessen tax burdens.

One of the amendments, if adopted, will do away with what most people think is the abominable fee system. Undoubtedly there is a great injustice in any system that fines a man one dollar for some slight offense and the officer's fees increases that dollar to rescue. But the winter in the Antartic , eighteen to twenty-five dollars. In my county a crap shooter is fined a dollar but he has to pay \$18.50 or go to jail. One justice of the peace in a Texas city last year received \$45,824 in fees, while the State and county received less than \$500 in fines. In one county in this State a justice of the peace has been averaging \$600 a month for two years by fining the unemployed men who have been riding freight trains. And the men who are fined have no money, but serve out their fines in jail while the county pays the officers their fees.

By HOMER M. PRICE

Marshall, Lexas. (Copyright, 1984, by the Home Color Print Co.)

We can stop this by voting the amendment.

The Fee System

The argument in favor of the fee system is that it makes the officers more diligent in enforcing the law. may be true in some cases. The prospect of fat fees has caused the arrest of thousands of negro crap shooters, but I doubt if these arrests have improved the morals of the communities. I believe by paying an officer a salary consistent with that paid the average citizen who elects him, will get honest, competent men who will conscientiously enforce the laws which need strict enforcement.

"We Love You, Daddy" The papers have carried a news item

that all motorists should read. One night a few weeks ago, on a lonely road in one of the Eastern States, a motor car with a rioting crowd was going at a terrific speed and was on the wrong side of the road. A lone pedestrian trudging along the country road undoubtedly heard the oncoming car, but trusting to the rule of the road he thought himself safe. Or possibly the blinding lights confused him. He was struck by the car, hurled almost a hundred feet, and lived only a few moments after the occupants of the car came to where his broken body lay. He remained unconscious until the end. The driver of the car was not heartless -just carcless. He said out on that rarely traveled road he did not think it made any difference which side of the road he directed his car. The coroner was summoned and the contents of the dead man's pockets showed no money but they found a crimpled telegram which read: "We love you, daddy. When are you coming home? The body, held for several days, was buried in the Potter's field. The little girl who sent the telegram (it was signed Mariet never saw, her daddy again because the driver of a car didn't think it necessary for follow the first rule of traffic-keep to the right. Dadds was evidently looking for work and it may be that telegram had caused him to set his steps toward home, "We love you, daddy. When are you coming home?" A sweet though pathetic message!

The Department of Commerce has just issued a statement that for the first six months of this year the number of deaths from auto accidents shows that there have been 6,000 more tatalities than there were during the same period last year. The statement said if the same ratio kept up the balance of the year that approximately 40,000 persons would die from this cause. Some few States seem to be awakening to the seriousness of the situation and have enacted laws that have materially reduced such accidents. But none of these States are in the Southwest. A locomotive engineer in order to qualify himself to guide a train along the rails must serve years of apprenticeship as fireman, but any 15 year-old child can take the steering wheel of a high-powered motor car and go on to the streets and highways with no rails to guide. Men known to be addicted to the use of liquor are driving automobiles, and are arrested every day, but not generally until an accident has occurred. No matter how one looks at the liquor question, we require the engineer who sets in the cab to be sober, yet the drunken driver of a motor car is a more dangerous individual. We will do something about seeing that only reliable persons handle the steering wheel—but when?

"Uncle Sam," the Story-Teller and Duellist

By JOE SAPPINGTON

522 Sedwick Ave., Waco, Texas. (Copyright, 1984, by the Home Color Print Co.)

NCLE Sam Dover and I were boon companions, although he was 50 years my senior and had gray whiskers a foot long. In the fishing holes. "But, if you must fight, presence of Aunt Sallie, his wife, who I want to tell you how to act. Be calm,

outweighed him 60 pounds, he was meek and cautious in conversation, but away from her he would turn himself loose, so to speak, and recount some of his most daring escapades. He told me confidentalav one day while we were hunting squirrels that he was on good terms with the James and Younger hoys and had been offered \$10,000 by The government to rive information information

lending to their capkill him with his boots on." ture but had spurned the offer as unworthy of his mag-

"I told him if he didn't stand still would

nanimous nature. If I could remember all the hair-rais-

Sam's dare-devil adventures, I will relate the following story:

"Joe, I shore hope you'll never have to fight a duel," he remarked one day after lighting his pipe and casting his hook into one of Cave Creek's best fishing holes. "But, if you must fight,

don't git excited and always make the other feller challenge you, fur that will give you choice of weepins.'

Stranger Looking for Trouble

"Why, Uncle Sam," I interrupted, "did you ever fight a duel?"

"Why don't you ast me how many I have fit instid of astin' me if I ever fout one."

"When did you fight your last duel, Uncle Sam?" I asked.

"Now, lemme see," he mused, "I have fit so many it's hard to keep up with 'em: the last one I fout wuz over that ing stories Uncle Sam told me when I rich girl I wuz engaged to and shot the was a small boy and could put them pistil outen the feller's hand. No, that prio book form, it would make interest- warn't the last one. Now, it comes to eye. "That remark seemed to upsit 'im bristle of shootin' one of his big toes highway, officials of the fair expect a grig reading. As a sample of Uncle me. It was that stranger who come a leetle, an' he come over to whar I wuz off before the Colonel counted three. larger attendance than usual this year.

ble jist after the war. He was wearin' two six-shooters and looked so desperit that most of the men who wuz in Bill Thompson's store when he arriv scattered out. He tried to raise a fuss with three or four of our citizens afore he jumped me, but they wuz afeared of him and taken his insults. Finally, seein' me, he come over to whar I wuz talkin' about the war with some of the boys and ast me my name.

"My name, suh, is Sam Dover, an I'm not ashamed of it, nuther," I said, drawin' mysef up to full highth an' lookin' 'im squar in the eye as I spoke. "'Oh, yes' he replied, you air the

feller what killed all them Yankees, to hear you tell it.'

"Stranger," I come back at him, "all the Yankees I ever killed wuz on the battlefield while facin' me. I have my fust man to shoot in the back or from behine a brush pile, which I'm shore is more'n you can say, you yaller-eyed polecat. Then I calmly turned my back on 'im.

"Let the Coward Shoot!"

"'Lookout, Sam,' some one shouted as he drawed his pistil an pinted it at me. "Let the coward shoot, fur that's carryin' out what I said about a human polecat," I replied, without batin' an

ridin' into our town lookin' fur trou-standin' and challenged me to a duel." Uncle Sam refilled his pipe, lifted his hook baited it with a fresh worm, and resumed his story.

"Bein' the one challenged, Joe, as 1 told you at the start, give me choice of weepins, how fur apart we wuz to stand, an' the time the duel wuz to come off. You ought to have saw his eyes stick out when I said we would fight in a vacant lot behine the Thompson store, 20 feet apart with pistils, the fight to take place in 10 minutes by Bill Thompson's watch. 'Git yoar secunds, says I, an' foller me.'

"Colonel Brown, my ole army officer, said in a firm tone of voice that he would act as my secund. The onery cuss tried to crawfish out of it by sayin' he had no frien to act as his secund. But I wuz determined to make 'im fight and' told 'im we would have no secunds an' that Colonel Brown would give the word to fire.

Calm and Cool

"I can see that cowardly coyote now standin' thar tremblin' from head to foot as he faced me while I wuz as calm

as calm could be.
"'Git ready, men,' called out the Colonel. 'Take aim and fire at the count of five.' But that dern scoundrel wuz so afeard that he came in a gnats-

"You know, Joe, when blood is shod that settles a duel. After he shot his pistil intentional at his toe. I told him to stan still if he didn't want to die with his boots on, an' then perceeded to shoot a small nick outen his left ear, jist nuff to make it bleed a leetle, and to show it wuz a reglar shore nuff duel."

"Say, Uncle Sam, that rich young lady you fought a duel over, was that Aunt Sallie, your wife?"

"No, Joe, yoar Aunt Sallie don't know nothin' 'bout my duels an' if you go blabin' it to her I'll never go fishin' an' huntin' with you agin."

More than likely Aunt Sallie died in course of time not knowing that Uncle Sam, in his younger days, was a real he-devil, a famous duelist and crack shot with six-shooter.

CANNING PLANT EXHIBIT A government canning plant in full

operation will be a novel exhibit at the South Texas State Fair at Beaumont, October 25 to November 4, inclusive. The fair grounds, long considered one of the most beautiful in the State, have been beautified further by many improvements to buildings and acreage. With completion of Highway 40 from the Heart of Texas into Beaumont, as well as extensive improvements of this

HIGHEST POSTOFFICE IN TEXAS

Frijole, in the Guadalupe mountains, near Van Horn, at an altitude of about 8,000 feet, is the highest postoffice in Texas. The town consists chiefly of a government station that reports weather in the mountains.

FARMERS MAKING RAILROAD

Thousands of railroad ties are being hewn by drouth-stricken farmers living between Beaumont and Longview. Some of the farmers are making ties from timber on their own land; others are given similar employment by landowners.

THINKS RATTLER 30 YEARS OLD A native of the piney woods in the Neches river bottom, near Kirbyville, says he is positive that a rattlesnake killed near that town, 61 inches long

and four inches in diameter, was 30 years old despite the fact it had but 10 rattles and a button. It weighed 20 pounds.

HILLSBORO BREAKS TWINS RECORD

Nine sets of twins were born in Hillsboro during August, setting a monthly record not only for that town but possibly for any town of similar population in the State. One set of twins died shortly after birth. The others give promise of living "to a ripe old age."

NATURALIZATION FEES REDUCED American naturalization fees at

Laredo have been reduced 50 per cent, and registration fees cut from \$20 to \$10. Because of this a large number of Mexican residents of that city and Webb county are preparing to become American citizens. Many Mexicans ap-plying for papers have been residents of that county for several years.

MUST ENLARGE MUSEUM

The pioneer museum at Bandera will have to be enlarged to twice its present size. It has received so many frontier relics from early settlers that present size of the native stone building is insufficient to display them to advantage. The museum was established and is maintained by J. M. Hunter, newspaper publisher of Bandera.

CLAIMS GRANDMOTHER HONORS

Mrs. Thomas Todd, 35 years old, of the Twitty community, near Shamrock, is credited with being the youngest grandmother in that section of the State. Her grandchild is Billy Leon Clay, whose mother, Mrs. Bryce Clay, is 19 years old. Mrs. Todd would like to hear from other Texas grandmothers who might claim to be younger than she is.

BUSINESS FAILURES DECREASE

There were but 17 business failures in Texas during August, as against twice that number a year ago. In July this year there were only 17 business failures. Liabilities totaled \$109,000, or 20 per cent under July and 73 per cent less than August last year. Total assets of the 17 firms that failed in August were \$107,000, against \$83,000 for an equal number in July.

FIVE BEARS TOO MANY

"Five bears in one week on our ranch are too many bears," complained County Commissioner H. L. Kokernot, Jr., of Fort Davis. He said he saw that many bears in one week while going over the Kokernot ranch holdings. He came upon one bear eating a freshly killed calf and could not legally shoot the depredator without a State permit to kill bear out of season.

STUDENTS ERECTING RECREA-TION HALL

A recreation hall is being erected on the campus of the West Texas State Teachers' College at Canyon by male students. Native stone and petrified wood will be used in the construction. Furniture is to be mainly home made, of heavy lumber suitable to the general style of the hall. A desert garden, 122 by 44 feet, will be laid out in connection with the building.

MOSQUITOES SING IN TENOR, SOPRANO AND BASS

Dr. C. P. Coogle, malarialogist for the United States Public Service, with headquarters at Washington, D. C., on a recent visit to Houston said:

"Like humans, no two mosquitoes sing exactly alike. We have made tests on these insects and find some sing tenor, some soprano, some bass, and so on. Not only do different species sing differently, but individual insects of the same species have dif-ferent songs. The impression that singing mosquitoes do not bite is wrong; they bite as badly as silent ones. It is true anopheles; the malaria-carrying species of the mosquito fami-ly, is less noisy than other mosquitoes." POSTMASTER 27 YEARS

Oscar Hunt, postmaster at Canyon for 27 years, went in under a Roosevelt (Teddy) and went out under a Roosevelt (Franklin D.) administration. Mr. Hunt held six commissions under five Republican Presidents, and his term was extended on two occasions to Democratic administrations.

NEW CHARTERS SHOW GAIN

During August 119 charters were granted in Texas, with a capitalization of \$2,200,000. The August recordings was an increase of 13.4 per cent over July, a decline of 3 per cent from August last year. Fifty-six of the corporations were capitalized for \$5,000 or

"PIGS IS PIGS"

Leonard Wright, a dairy-farmer living west of Floresville, is owner of a mixed Poland China and Duroc sow three years old that has had 67 pigs, in four litters, according to M. W. Jentsch, a newspaper writer. The first litter totaled 15 pigs, the second 19, the third 15 and the fourth 18.

TWO CROPS FROM SAME VINE

R. L. Brown, a farmer in the Blackwater Valley, near Muleshoe, this season harvested a crop underground and above ground from the same plant at the same time. Above ground Mr. Brown picked tomatoes; underground he dug white potatoes from the same vine. He calls the vine a "mulligatawny.'

GIRL KILLS 28 SNAKES

Miss Nell Owen, a high school girl who lives on the Owen ranch near San Saba, killed with a rifle 28 water moccasins which she encountered near a water tank. The snakes measured from six inches to slightly more than three feet. Miss Owen says some of the larger tried to protect the smaller reptiles by opening their mouths for the little ones to crawl into.

MAIL CARRIER WEARS OUT 15 VEHICLES

In the more than 25 years that W.T. Randle was rural mail carrier out of Decatur he wore out eight buggies and seven automobiles delivering mail on his route. When retired a short time ago Randle said he felt physically able to wear out several more automobiles. For 22 years Mr. Randle carried mail on the same Wise county route.

RETURNS TO TEXAS AFTER 43 YEARS

J. F. Walters of Huntsville, Tenn., returned to Amarillo recently after an absence of 43 years. When he left Amarillo it was a cow-town of about 600 inhabitants. Last census rates Amarillo's population at 43,132.

"When I went to the Plains country in February, 1890, it was plenty cold, and it had not rained for two years, Mr. Walters said. "Fourteen saloons 11 gambling houses and 600 persons constituted all there was of Amarillo when the midnight train pulled in with me as a passenger. But it was a real western settlement."

"HISTORY REPEATS ITSELF"

The old adage that "history repeats itself," is believed by Maury Maverick, Democratic nominee from the new Twenty-first Congressional district, His grandfather, Samuel A. Maverick, at the age of 31, was the first Congressman from the district of Bexar in the Congress of the Republic of Texas. Almost 100 years later the younger Maverick was nominated in the district which comprises Bexar only. The old which comprises Bexar only. Fourteenth included several counties adjacent to and including Bexar. It was the only Texas district to send a Republican to Congress.

BATTLE OF SAN JACINTO WIDOWS MAY ATTEND CENTENNIAL

The only two surviving widows, of the men who fought in the Battle of Jacinto, which turned the tide for Texas colonists in 1836, will attend the Centennial celebration in 1936 if health permits. The widows are Mrs. Mary Catherine Berry, who lives near Baird, and Mrs. Mary M. Price of Rochester, N. Y. Mrs. Berry, 81, is the widow of Andrew Jackson Berry, and Mrs. Price, 90, was the wife of Hardy W. B. Price, a member of Benjamin F. Bryant's company. They would be the guests of the State of Texas.

PELLAGRA IN TEXAS CAUSED 645 DEATHS

According to the State Health Department pellagra, a disease caused by lack of proper foods, caused 645 deaths in Texas last year. It comes on slowly and may not be recognized until the victim begins to have sore mouth, stomach trouble and reddening and scaling of the skin. The longer a person has pellagra the harder the cure. The disease may become so severe as to affect the mind; it is not contagious, and can be prevented by eating the right kind of foods. Diet should include plenty of milk daily, some fresh meat and as many fresh vegetables as possible.

"FOWL PLAY" SUSPECTED

Sid Dunnaway, a railroad man living near Palestine, suspected "fowl play when he began losing chickens, so he set a trap on a fence post. Next morning he found an owl caught in the trap, which measured 48 inches in wing spread.

MARRYING JUSTICE BUSY

Justice W. A. Mathews of Denton is all smiles over the repeal of the so-called "gin marriage" law, which required a three-day notice of intention to marry. While the law was in effect Justice Mathews was called upon only 18 times to perform the marriage ceremony. Since repeal of the law he has married more than 100 couples.

AUTO REGISTRATIONS INCREASE

New passenger automobile registrations continue to make favorable gains over last year. Registrations in 15 counties, representing all parts of Texas, totaled 4,670 in August, against 4,407 in the corresponding month in 1933, a gain of 6 per cent. For the first eight months of this year registrations totaled 35.332, a gain of 42.5 per cent over the same period last year.

LONE MULE WRECKS WAGON

Austin Doolittle, living near The Grove, a short distance from Temple, tied his 950-pound mule to a wagon. The animal got tired standing still and started to walk away, pulling along the wagon, which had been parked on a hill. The wagon, gathering momentum as it descended the hill, dragged the mule until wagon and mule went over a 20-foot embankment. The animal escaped without injury, but the wagon was wrecked.

Herbert Mills, Jr., of Sterling City, Texas, is the new president of the State Association of Future Farmers of ...merica. There are 7,000 Texas farm boys in the association. The State Department of Agricultural Education at Austin will pay Mr. Mills' expenses to the National Convention of Future Farmers at Kansas City in October, to be held in connection with the American Royal Livestock Show.

LAREDO DUTIES SHOW INCREASE Importations of merchandise from Mexico through the customs port at Laredo during August showed an increase of 120 per cent over collections for imports in August, 1933, says Adolph B. Kahn, deputy collector of customs in charge of imports. Collections in August, 1933, were approximately \$17,000, while those for August this year were about \$50,000. Among the imports were many carloads of corn, bananas and other Mexican products which found a ready market in the United States.

GETS GASOLINE FROM HIS OWN

WELL G. L. Hart, a Burnet grocer, doesn't care whether gasoline prices go up or down, for he has his own "filling station" in the form of a well sunk some years ago for water and which is now producing gasoline of sufficient, purity to be used in his automobile. About three months ago water in the well began to get "gasy" after heavy blasting at the site of the Hamilton dam project, near Burnet. Flow of gasoline into the well has so increased that Mr. Hart recovers the fluid by lowering a bucket slowly into the 18-foot well. The well produces from one to 12 gallons of gasoline every 24 hours.

TEXAS MAY MANUFACTURE DOG-

WOOD SHUTTLES Texas may compete with Louisiana in the manufacture and exportation of dogwood schuttles for the textile industry, not only in the United States but foreign countries. There is a vast amount of dogwood trees in various sections of the State, especially in East Texas. This wood has been found highly suitable for the manufacture of textile shuttles. Texans are watching carefully the Dogwood Shuttle Block Mills, a new and profitable industry of the Louisiana Public Utilities Company at Leesville, La. Dogwood is practically valueless in the world's market as commercial timber except for use in manufacture of shuttles for the textile industry. In cut-over lands, which usually has a plentiful undergrowth of this wood, the cutting of shuttle timber should prove profitable. NOT HIS "LAST ROUNDUP

Out of Sweetwater comes the story of a government-purchased dogie that refused to die when shot and left for dead. The animal, condemned by a Federal agent, was shot and the owner compensated. A few hours later the calf, supposed to be dead, was seen walking around and eating grass.

STEER STRANGLED BY GRAPEVINE

Driven by scarcity of range food to eat green leaves at the edge of a ravine, a 2-year-old steer on a Gillespie county ranch, near Kerrville, lost its footing and strangled to death in falling when its neck was caught between a wiry grapevine and an oak tree. When the owner found the steer after it had been missing two days, its legs were dangling down a steep bank, with grapevine twined around neck and horns.

WAS BELLE OF TASCOSA

A short time ago Mrs. Mickey Mc-Cormick, the sole resident of old Tascosa, in the Panhandle, celebrated her 80th birthday. Mrs. McCormick was the belle of Tascosa in the days of "Billy the Kid," when the six-shooter was the law in the Texas Panhandle. From the front door of Mrs. McCormick's 'dobie hut, she can see Boot Hill cemetery, a famous burial ground for men who were slow on the draw.

TEXAS BLUE BELLS IN DEMAND

Texas Blue Bells which grow in such profusion, especially in Montgomery county, are in demand throughout the Northern section of the United States. They are gathered for Conroe florists by persons who pick, strip and pack them for shipment. One month this fall the shipments from Conroe averaged 15,000 flowers daily. Some went as far East as Boston and others to Spokane, Wash.

MAKES RESTITUTION

Coleman White, a Memphis, Texas, ginner received a letter in which was enclosed a \$5 bill and the following: "Mr. White, hear is \$5.00 i beat you

out of. i am sending it to you. i sold you some cotton."

A couple of months ago W. L. Wheat

of the same city, received a letter with \$7 enclosed. The writer said he had cheated Mr. Wheat out of that sum; that his conscience hurt him and he wanted to make amends.

SEABIRD SANCTUARY

There is a seabird sanctuary on Green Island, off the lower Rio Grande Valley coast, where the American egrett is protected by the United States govern-ment. John O. Larsen of Harlingen, caretaker, is authorized to protect the island and its birds as a United States deputy game warden. He says he does not have much trouble protecting the birds from persons who visit the island, but is bothered by coyotes who swim from the mainland to prey on the birds.

DOES A TOAD CROAK?

Austin police have been called upon to decide if a toad can croak like a bullfrog. A woman complained that the croaking of bullfrogs in a neighbor's yard kept her awake. The neighbor said he had moved his frog farm out into the country, and that the croaking the woman heard came from toads that had hopped into his back yard, uninvited. The woman insisted that toads do not croak. San Antonio police said they would read up on the habits of toads and frogs and decide the case later.

DENGUE FEVER WARNING

Dengue fever has made its appearance in Texas, and will continue to spread until checked by frost. In the last 50 years Texas has had three epidemics of the disease, the last one in 1922. The disease is seldom fatal, does not last long, but convalescence is slow. Dengue is characterized by sudden onset, headache and pain in the back and limbs, especially the joints. It is caused by bites of the same mosquito that transmits yellow fever. To prevent dengue, places where mosquitos propagate should be eliminated.

RANGERS CRIPPLED BY LAWS

Texas rangers of today have the same desire to "get their man" as did rangers who served the State in "wild and wooly" days. But department officials at Austin, replying to comments that rangers do not seem as effective now as years ago, lay the blame on too many laws enacted in recent years. One law limits each ranger to 500 miles per month in chasing criminals, which restricts his activities. The State reimburses the ranger for 500 miles of travel in his own car, but after 500 miles he must travel at his own expense. The State furnishes the ranger no automobile, so he has to bear the expense of getting his own car torn up in a wreck or riddled by bandit bullets. Salary is too small to permit a ranger "digging into his own pocket," to catch a criminal. The limit of mileage, it is pointed out, is the reason rangers cannot follow the trail of a criminal like Clyde Barrow, for which the force was criticized for not catching.

FROM OVER THE STATE

REAL "BONE DRY" TOWN

Davilla, in Milam county, is said to be the oldest bone dry town in Texas. At the close of the war between the States, H. J. Chamberland went to Milam county and purchased a tract of land from the M. Davilla estate. He laid out a town and sold lots with a proviso in the deed that intoxicating beverages should never be sold there. Courts have held that such a provision in a deed is binding.

BRADY'S GAS LINE

For a city with a population of less than 5,000, Brady has the longest natural gas transmission line in the State. The gas is piped 45 miles from the Janellen field in Brown county by the Empire Southern Gas Company. The transmission main is six and four inches, respectively, in diameter, with five additional miles of gathering lines between the wells, representing an investment of approximately \$225,000.

ERECTING LOOK-OUT TOWERS

Forty look-out towers are being erected in East Texas, on top of which men will keep a day and night vigil for forest fires. Hundreds of miles of telephone wires will connect the towers, cities and towns in close proximity, so alarms may be given and aid asked to fight fires. The work is being done by recruits from East Texas CCC camps. The tower in Forest Reserve No. 1, five miles east of Kirbyville, is said to be the first erected in Texas. It is 80 feet tall, built of steel and gives the look-out a vista of 50 miles in all directions. Another tower, higher than the first, is being erected 13 miles north of Kirbyville.

BLOOD TRANSFUSION SAVES EDITOR

A blood transfusion is credited with the saving the life of G. E. Watford, 68, veteran Texas publisher, who retired several months ago after sale of the Lufkin Daily News. C. S. Boyles, Jr., and Jack McDermott, his successors, and two other members of the News staff, were among a dozen citizens who offered blood and submitted to tests. Joe Thompson, 21, member of the newspaper staff, was the only one found acceptable, and he gave a pint of his blood. Thompson began his newspa-per career under Mr. Watford. "It just had to be somebody with a little printer's ink in his veins," mused Mr. Watford after the operation.

CONVICTS MAKING LICENSE PLATES

Automobile license plates for 1935 of all Texas motor cars will be a product of the penitentiary at Huntsville. They will be ready for delivery February 15, 1935. County tax collectors will receive 1,389,000 pairs of the plates, to be attached to all vehicles on or before April 1. Material for the work, including 25 carloads of sheet metal, enamel paint and shipping boxes, harman been contracted for at a cost in excess of \$50,000. Machinery to make the plates, bought by the State, cost about \$30,000. There will be eight different colors for that many types of motor vehicles. Passenger car plates are estimated at 1,100,000; these plates will have white numerals on a maroon background. Quantites and colors of other types are: commercial vehicles, 150,000, green numbers on gray background; farm vehicles, 75,000, black on orange; trailers, 40,000, orange on black; dealers, 6,500, black on green; motor buses, 1,500, gray on green; tax exempt (government owned) autos, trucks and trailers, 12,000, white on black; motor-cycles, 4,000, black on orange, and sidecars, 500, orange on black.

BOW AND ARROW INDUSTRY Floyd Pope of Woodville makes bows

and arrows that kill big game in the United States and foreign countries. They are much in demand in England and Australia. Until recently most of his bows, the wood of which is seasoned three years before manufactured into bows, was made of bois-d'arc which in Indian means "wood of the bow." At present Mr. Pope is fashioning his bows from the fir timbers of Seattle's first schoolhouse, built in 1840. When the schoolhouse was razed the Texan laid in a supply of its seasoned wood. The arrows, tipped with steel, are feather. ed mostly from Tyler county turkeys, although wild turkey feathers are preferred for this purpose. In Mr. Pope's workshop is a picture from the New York Times rotogravure section showing Art Young, the celebrated American can archer, squatted beside a slain moose, killed with bow and arrow made in Mr. Pope's workshop. Pope says Young has killed three Rocky Mountain grizzlies, two Alaskan grizzlies, two polar bear, a walrus, an eland (largest species of antelope), three lions united many deer with bows and arrows. Sir Phillip Middleton of London is one of Mr. Pope's best customers. He has other customers in Sydney, Melbourne and Copenhagen. When Stewart Fd. ward White, the well known archer, went big game hunting in Africa he was accompanied by Mr. Young. In its jungles the two bagged several lions with Texas made bows and arrows.

LITTLE FUN Jokes to Make You Laugh

Relativity
"What is the 'relativity' idea I hear so much about?"
"Well "" "Well, it's like this. When you sit with a smart pretty girl for an hour you think it's only a minute, but if you sat on a hot stove for a minute you'd think it was an hour. That's relativity."

No Hobbies "Has your husband any hobbies?"

asked the new neighbor who was call-"No," said Mrs. Neuritch, "he has rheumatiz a good deal, and hives now and then, but he ain't never had no

hobbies." Uncle Si Perkins says Slim Slokum was so excited when he got married that he kissed the preacher and gave

the bride ten dollars.

never rested since."

A Girl's Essay on Boys A little girl wrote the following essay on boys: "Boys are men that have not got as big as their papas, and girls are women that will be ladies by-and-by. When God looked at Adam He said to Himself, 'Well, I think I can do better,' and He made Eve. Boys are a trouble. They wear out everything but soap. If I had my way the world would be girls and the rest dolls. My papa is so nice that I think he must have been a little girl when he was a little boy. Man was made, and on the seventh day he rest-ed. Woman was then made, and she

"Business Is Business"

Two Jews were in business together -Cohn and Rosenstein. Rosenstein had been getting drunk and letting the business go. Cohn said, "The next time Rosenstein comes in drunk, I'm going to shoot him." So he put a pistol in his pocket and waited for Rosenstein. Pretty soon Rosenstein came in, drunk as usual. Cohn pulled his pistol and put it in Rosenstein's face.

Rosenstein said. "How much do you want for the gun?"

Cohn said, afterward, "How could I kill the man when he was talking busi-

Artificial Light

do so, will find it profitable to resort to artificial light—elec-

tric or lamp—to lengthen the daylight hours, or to give the pullets and hens more time to

eat. Give them as near as possible the artificial light long enough each day to equal daylight hours in April and May. Lenthening the day by artificial light simply means that

the poultry will have a few more hours around the feed hoppers, assuring them enough feed so they can assimilate enough food to make more eggs. The light should be placed over the feed hoppers and water dishes.

be sure to see there are plenty of feed hoppers and that they are full of good egg mash. Poorly balanced egg mashes are a waste of time and, although cheap, are poor economy. Increased feed consumption gen-

erally means increased egg-production. Eggs are bringing very profitable prices, but it will require hard work on your part as well as hard work on the part of the layers.

Wet Mashes

a crumbly mash, about 3 o'clock in the afternoon. Make mash a crumbly consistency, if

We recommend giving one feeding a day of

On account of short-

er days and less time for the pullets and hens to eat plans should be made to over come these handicaps

of nature. Those so situated, to be able to do so, will find it

The California Way

New Resident: "I stopped over in San Juan and—" Old Resident: "Pardon me, but you

should say San Huan. In California we

pronounce our J'c like H's." New Resident: "Well, you'll have to give me time. You see, I've been in the State only through Hune and Huly."

"Speaking of bathing in famous springs," said the tramp to the tourist, "I bathed in the spring of '86."

Too Heavy for the Ducks

A housewife of good intentions, but with little culinary knowledge, decided to try her hand at dumplings. Members of her household wouldn't eat the dumplings, so she threw them to the ducks in disgust. A short time afterward two urchins tapped at her door. "I say, missus," they shouted, "your ducks have drowned!"

No Irish There

(Two Jews in a street car). First Jew: "I vill nefer go py Rockaway agaen fer de summer. Nothing but Irish everywhere.

Second Jew: "It's de same at Saratoga, Abey, it's alive mit Irish. I vish could go vere dere was no Irish.'

Mrs. Clancy (on the opposite seat): "Yez can both go to h—l; y'll find no Irish there."

Their First Child

· It was their first child, the sweetest babe in the world and had to have a nice new baby carriage. The fond parents carried the babe to a furniture store, where they made selection of a carriage. Seating the babe in it, Harry wheeled it down the street." Soon they observed that some people smiled and some laughed outright. Harry gave the carriage into his wife's care, and then stepped back to see if anything was wrong. He was horrified to see that they had forgotten to remove the sale card, which bore this inscription in bold print:

OUR OWN MAKE. "Manufactured in Cincinnati, U.S.A."

possible, use sweetmilk or buttermilk. Give all they will eat up clean in 30 minutes. Use

the same mixture as given as a day mash in

hoppers. The feeding of wet mash, now, is just another way of helping them get enough feed during the short winter days. They can pick up or eat the crumbly wet mash quicker than dry mash,

Comfortable Houses

poultryman that provided heat during cold weather to his pullets and hens just like feed and water. He installed a brooder on a plat-

form in the hen houses and when the layers

felt cold they could go to the brooder to get warm, just like when they are hungry, they jump upon the trough for feed. These heat-

ers also help keep the entire house more com-

fortable during cold weather. A few days of cold weather checks egg-production consider-

able, right at a time when eggs are worth real money. When installing a brooder in lay-

house, bear in mind the importance of fire

protection; also that the house is never over heated. Over heating would bring serious re-

Was Tough But, "Dad" Outlived The Old West

By J. D. TANNER

(Copyright, 1934, by the Home Color Print Co.)

F. (Dad) Knight of Tulsa, Okla., is an old pony express rider, who used to carry Uncle Sam's mail horseback between St. Louis and San Francisco, Fort Worth and El Paso. He knew Billy the Kid, Cole Younger, Jesse James, John Wesley Hardin and other bad men of the West.

As a pony express rider, he had hairbreadth escapes from hostile Indians, outlaws and swollen streams.

Knight was born in 1841, 100 miles north of St. Louis, on the banks of the Mississippi river. His father owned six stambouts that plied up and down the fiver, hauling passengers and freight. and knew every landing, every bend, shoul and sand bar that marked the river in earlier days.

When the first guns of the Civil War boomed, Knight lost his love for the rivand became a pony express rider, making a boat for a horse. His route Why along the far-flung frontier towns where he delivered mail to army posts, mining towns and ranch towns. He rode his horse at top speed, averaging about 10 railes per hour. The relay stations were about 20 miles apart, and Knight would get a fresh horse at each station.

Arrow in Neck

There were plenty of risks in the life of an express rider, Knight says, Trails were dim, wolves beset trails and some-

raging streams. Indians also harrassed him. Several times the youthful rider thought he had come to the end of his last ride. An arrow once penetrat-

ed his neck, but by lying low in the saddle and riding hard he managed to escape the attack of a roving band of Coman-He rode 26 ches. miles to a settlement with that arrow in his neck before it could be cut out.

Fighting and eluding Indians were but a part of Knight's job. He also had to contend with outlaws who wanted to rob the mails. Sometimes he would carry \$100,000 on a single trip. "Such things were all in the day's work," said Knight. "I

didn't think much about it, for thinking did no good and didn't make the in 98 days, using 33 horses.

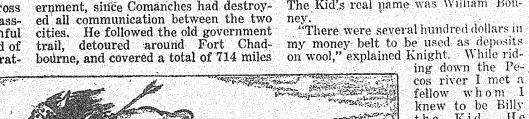

next ride any easier."

Mosts Bully the W

Kright made one run during September, 1870, that he believes set a new record of its kind. The ride was from Fort Worth, Texas, to El Paso, Texas. He was carrying messages for the gov-

"There were several hundred dollars in the between the deposits."

"By lying low in the saddle and riding hard he managed to escape the attack."

Resigning from the pony express service, Knight went into New Mexico to "gather wool" for his father. It was there he met Billy the Kid face to face,

Meets Billy the Kid

ing down the Pe-

cos river I met a fellow whom I knew to be Billy the Kid. He rode alongside and began questioning me. Wanted to know where I was going, if I had anything to eat, and if I had money? I did not dare to tell him I had money for meant little to him. fear he might put Of all the men a bullet in my back. So I said: "I have \$3.85

and some grub.
"Then I proposed that we camp, cook something to eat, and rest a while (it was about sunset) and about midnight.

Billy agreed to sions.

this, for he was dead tired and hungry. "Da
He didn't tell me his name, didn't know man p that I knew him, but I had seen the Kid often riding with his gang and knew him well.

"He lay on the ground and watched me closely, but said nothing while I fried

some bacon and fixed the coffee. After we had eaten, I took my horse around back of a hill to 'stake him out.' I left on the horse saddle and bridle, so I could get going quickly when opportunity came.

Custer His Hero

"Billy was too tired and drowsy to be suspicious of me. Soon after I returned from staking my horse I laid down; feigning sleep. In a short time the Kid was snoring. I arose quickly, left some food for him, made my way to my horse and rode off as fast as I ever rode in my life.

"I didn't want to take any chances with Billy the Kid. He was a dangerous killer and killing another man

Of all the men Knight knew in the glamorous days of the old West, Custer is the one he talks about

"A grander man than Custer never lived," Knight says. "He was kind and gentle, but a fighter, too."

Knight has strong convictions as to why Custer and his men met their doom at the Battle of the Little Big Horn. It is sufficient to say that he start riding again does not believe Custer was at fault or was properly supported by other divi-

> "Dad" Knight is still a pretty good man physically for his age. He can read and write and keeps up his health with long walks. His philosophy is to look for the best in everything and take the world as God made it and not as man made it.

NEW SURVEY BEING MADE

A survey of the metropolitan areas of the State, now -under way, embraces a study of all activities under the dipetion of the municipal au-thorities in the various areas studied, including police and fire protection, health safe-guards, schools and playground activities. This surey, the first of its kind undertaken in the South, has for its aim the analyzation of existing conditions in the larger cities of Texas and their environs, with a view to making possible suggestion of needed reforms in municipal policies. The study embraces five cities of more than 100,000 population and their immediate surroundings, namely, Dallas, San Antonio, Fort Worth, Houston and El Paso.

SEEK EXTENSION OF TREE BELT

Reception of the Federal government's proposal to produce a belt of trees from the Canadian border to the Panhandle of Texas, has been varied, but West Texans are proceeding with their plans on the assumption that it is going to become a reality, and that it is a good thing.

Dr. Bradford Knapp president of Texas Tech College at Lubbock, has been engaged for some weeks in leading a fight to have the shelter belt extended into West Texas. The government has proposed to expend \$75,000.-000 in raising a belt of trees from the Northern border to the Panhandle in an effort to aid water and soil conservation.

PRISONER BREAKS HUNGER STRIKE

Jesse Barnett, who killed Deputy Sheriff Charles Carruth and wounded Special Railroad Officer Z. Bates at San Angelo four months ago as they attempted to arrest him on a lunacy warrant, has broken his hunger strike at the Tom Green county jail after 13 days of refusing to eat. The man has been adudged insane. Dr. F. K. rney told the prisoner he would continue giving him his milk through a tube to his stomach and glucose through the veins. That induced Barnett to return to normal eat-

SPIDER KILLS CENTIPEDE

Citizens of Miami, Texas, were spectators to an unusual fight not long ago between a large black spider with a red spot on its back and a centipede three inches long. The combat started on a sidewalk at 7 o'clock in the morning and lasted until 7 o'clock in the evening. The spider was victorious.

13 LUCKY FOR THIS

YOUNG COUPLE Mr. and Mrs. L. C. Cantrell of Lubbock have no fears of number 13. To them it is a lucky number. Both were born on the 13th of the month, were married on the 13th, and Thursday, September 13, a daughter was born -their first child.

Then shall the dust return to the earth as it was and the spirit shall return unto God who gave it. Eccl. 12:7.

Somebody may think that he's going to have a swimming pool here, but he is doomed to disappointment unless he orders some changes. How many things do you see that need to be corrected?

ANSWER TO LAST MONTH'S PUZZLE

- One awning stripe does not match others. "Grapes" sign on bananas.
- "Drugs" sign on a fruit store. Lettuce is not sold by the quart.
- Basket at right has no bottom.
 Sign reading "4c" is upside down.
 Word "apples" misspelled on sign.
 Word "fruits" misspelled on Tony's
- 9. Traffic sign points downward.

10. Word "mail" on post box is misspelled.

- 11. Tony has one long undershirt sleeve. 12. He wears two right shoes.
- 13. Policeman's pocket upside down.

- 14. Boy has one short trouser leg.
 15. Reflector on light is wrong side up.
 16. Word "Circus" misspelled on sign.
 17. No such date as May 32.

DEAR FRIENDS:

Busy days, cool evenings with fires crack-ling on the hearths—together with the warm and loving hearts of our cherished ones. What more do you ask of life? But youth does ask more. It wants adventure, achieve-

ment and life.

We have about completed one of the most We have about completed one of the most adventurous and trying years of our world's history. We have crossed paths we scarcely dreamed existed. We have tried plans and schemes our forefather would have never dareed to dream about. Where will it all lead? This is something no one knows. All we know is that we are going onward at an unnecessary pace. We seem as though impelled in the race by an unseen force which moves us at will and we have no control to guide us at will and we have no control to guide

us at will and we have no control to guide our course or destiny.

Marconi, the inventor, in a recent address before an audience composed of some of the most brilliant minds in the world, said that without faith life would be a terrifying experience. He said that man had mastered inventions, measured the Immensity of the universe, but had never discovered the secret of life—where it came from or where it went verse, but had never discovered the secret of life—where it came from or where it went after death. He declares faith was the saving grace of the world. So it is in every life. Faith must play the greatest role if you and

I are to succeed.

We first must have faith in God, faith in His word. Then we must have faith in ourselves, faith that we are capable to do the tasks of life. We must have faith in our fellowman. Never was it so hard to keep faith as it is today. We must keep our eye on the goal, and plod up the hill, using the stones of I are to succeed

goal, and plod up the hill, using the stones of unbelief at our feet as the stepping stones to build a stronger and better faith.

The fathers and mothers of today must give to their children a faith stronger than ever before if our Nation is to exist. With one class tearing at the throats of another, youth is bewildered and "knows not which way to turn." But back of the dark clouds there is a sun shining just as bright and lovely as in days gone by. Only the eyes with faith can clearly see the morning when it comes.

comes.

There is good and sad news in the mail bag each month. Let us see the latest news from our friends.

With love to all

With love to all. (Signed) AUNT MARY.

SUNSHINE CLUB NEWS

First, there is a letter from the mother of R. C. Shaw, Ravia, Okla. Mrs. Shaw tells us that R. C. recently came home from the hospital where he was fitted with new braces. His family is hoping that some day he will be strong like other boys. For a number of years he has been in a brace. R. C. would like to have some kind of music. It is not the practice of this page to ask for material aid for a Shut-In. Many times postage money is a sacrifice, but we are all willing to do it when we can give happiness and pleasure to those less fortunate than ourselves. Since R. C. has been so brave in his affliction, and is so young, I am asking anyone of the list of members or a reader of this page who has some kind of a musical instrument for which they have no use, to give or loan it to R. C. If you have such an instrument, write me and I will give you instructions where to send it. Address the letter to Aunt Mary, care of R. C., Route 5, Box 179-B, Fort Worth, Texas.

Harriet Emigh, Millerton, N. Y., writes such a sweet, cheerful letter, a real sunbeam, "*** With sorrow I learned of Aunt Emma's passing. I want to extend sympahy and understanding to Mildred. A few years

passing. I want to extend sympahy and understanding to Mildred. A few years ago I lost my own dear mother. She left me alone. After all, she has only gone on before, and so it is with your mother, Mildred. Please God some day we will go and find them again. *** Hello, Aunt Susan, and Lillian Vedder. I've lost your address, Lillian. Hello, Martha Gene Griswold, and greetings to Martha Borcherding. Some day I will write you."

to Martha Borcherding. Some day I will write you."

We love to hear from dear Harriet. Come again, dear friend; not so long between letters. We have a new Shut-In from Pennsylvania, Beckie Zeigler, 17 West 4th Street, Lansdale, Mrs. Zeigler will soon be 66 years old. She loves to read, but has no means of getting reading material. Send clippings in your letter to her.

There is a sweet letter from one of our most faithful Shut-Ins, one who has endeared himself to all of us. Devan James of Bronte, Tenas. Devan writes: "*** I am well and doing fine. *** I am so glad all the sores that kept me in bed are well. (Devan is crippled, so still on the Shut-In list). *** At the summer meeting here I sang five solos.

We had eight conversions and three addiwe had eight conversions and three additions to the church. I was one of them. I was baptized on a Sunday evening at five o'clock. The preacher read the sixth chapter of Romans to the fourteenth verse, and they sang, 'Shall We Gather at the River' and 'I Am Bound for the Promised Land,' My uncle carried me in the water up to my shoulders and the preacher got down on his shoulders, and the preacher got down on his knees and baptized me. He said \mathcal{X} was the first person he ever baptized that was crippled. He has been preaching 25 years. It first person he ever bapuzed that was crippled. He has been preaching 25 years. It sure did make me feel good, and I enjoyed it. Pray for me that I will always be true to my Lord. *** I still enjoy getting letters from the club. They are such nice letters the dear poople with the control I always unswer all I re-

are such nice letters the dear people write me. I always answer all I receive. I haven't gotten so many this summer. *** I hope that your mother is better. I pray every day that she and all other Shut-Ins will get well so they can enjoy life better. ***." I think Devan's letter is so very sweet. I am sure all of us will be better for having read it.

Dear Aunt Mary Squires, Iredell, Texas, is heavy of heart with burdens hand to bear. But she writes: "My heart's desire is to serve my "My heart's desire is to serve my Lord and Master, and do His holy will

while I live on earth, and to go to heaven when I die and be called a child of God." Mrs. Squires has been a member of the club for a long time, and has been faithful and true to the cause for which we all are laboring. Can't we all drop her a line or two, and tell her how much we love her and how much she has meant to the club? She needs a bit of cheer.

write to her at the above address.
Waldine Young, Jonesboro. Texas, sends her love to the club, and says she enjoys it very much.
Mrs. Lanier Smith, Dallas, Texas, sends a chance of address.

Mrs. Lanier Smith, Dallas, Texas, sends a change of address.

We are glad to welcome into the club a dear girl, Mildred Lansford of Levelland, Texas. Mildred writes that she lives on a farm, and likes it fine. She is thankful she has never been sick except for a few minor complaints. She is anxious to write to the sick. She believes in prayer.

We are very glad to have such a good Christian in the club.

There is a lovely letter from Mrs. Sallie Martin, written by her grandson, Leon Martin. Leon is one of the fine boys who will some day, we are sure, make us proud that we knew him and that we called him a friend sure, make us proud that we knew him, and that we called him a friend in his youth. I am confident he is a great comfort to his parents and grandmother. Mrs. Martin says: "I would have written sooner but I have been quite sick. However, I am better now. *** I wish I could be with you and have a long talk. *** I had 24 members write me last year, but have seen not near so many this year. there are not near so many this year. I can't answer all the letters on account of postage. But I sure do thank you for being so good and kind to us all. I hope to hear from you oftener, because that is the only enjoyment I have, having good letters and good books read to me. May God bless you in your home and your work."

This is the end of the mail bag for this month. Shorter than last month. Come on folks let us hear from you. We need the support of every mem-

Club Membership

If you are not a member, of the Sunshine Club we want you to be. Membership is free to all readers of this page. There are no dues, assessments or fees of any kind at any time. Your membership is free. You receive a pretty membership card upon application. After being in the club three years in succession you receive an Honor Certificate you will be proud to frame. When you have ceive an Honor Certificate you will be proud to frame. When you have been in the club five years you receive a Diploma of Merit, which anyone will be proud to have. This year we are going to give special titles for long membership, a gold star for each year past the five-year diploma. Join us now.

Your sole duty is to bring sunshine and happlness to unfortunates. We give no material aid of any kind.

(Continued top of column)

Shut-ins are asked to refrain from asking such help. We simply send cheerful letters, clippings, poems, stories, etc., to the Shut-ins on our list once a month. Each member is assigned the number and then clippings. Shut in member as a shut-ins on the stories of the stories o given a Shut-In member each which they are to write. It should be the greatest pleasure any well person could have to send N. C. cheer once a month to some Shut-113

PEEDING YOUR FAMILY IN WINTER

In the mail coming to my desk I notices. that the question asked the most concerns that. Until recent two's diet had been a higherend task with those vitally concerned, and but little interested. The housewife and bonicinsky should obtain the fundament has followed should read with make the fundament will and strong; reads for the daily track. The choosing and preparation of food is for one fidulately are ful of the field we give our price coming stock. We are careful of our fine chicken. We see constituted to guestion and the visit of the fill constants with items, in our cast. It we drove into a filling station and they tried be fill constants with items, in instead of gas dime, were outdoordered with day by day we give made that are far more burnful of the fillings, the fillings who have the constants when the fillings the constants when the filling of the fillings were far more burnful of the fillings, which are far more burnful of the fillings. that the question asked the muselians korosenes is storting finest make af

In far too many homes the mest, potatees in the year. The things mentioned have their phase in a diet, but should not constitute the whole of our food.

whose of our tood.

The past few years our country has been swept with one fad after another in the matter of dect. Docton, as a whole, agree that more serious Illness has been caused by the different fadish methods of both diet and dicting than anyone other thing. Women, have weeked their health for life trying to

have weeked their health for life trying 16 reduce with fadish dieting. Such fadis are foolish, expensive and dangerous to follow.

No hard and fast rule may be laid down for any special family. Where there is one menusior greatly overweight, or another persistently underweight, the advice of a good doctor should be taken as to the rendey. In the average family the housekeeper or mother can work out a satisfactory diet that will be tasty work out a satisfactory diet that will be tasty and healthful. It will take a little study each day to give a variety and keep down expenses.

The best life insurance a family can have is
the homemaker who watches the diet list.

Our appetites and the needs of the body

vary with the seasons. In the summer type crave and need a light, nourishing diet. We want salads, ice cream, lemonade, sandwiches, etc. But in the fall and winter our appetites

etc. But in the fall and winter on appetites crave more substantial foods.

For years a controversy has waged over meat eating. Today those giving an impartial study to diet advecate some meat. Like anything else, we should use common sense, in its use. Meat should be excluded from the diet. of children until they have cut their molar teeth. Then they should be given meat very teeth. Then they should be given meat very sparingly, and taught how to masticate it thoroughly before swallowing it. For the average adult, meat once a day is not unhealthy where plenty of leafy vegetables and ripe fruit are used. The combination of meat and potatoes is wrong. Only leafy vegetables should be used with meats at the same meal.

Milk should always constitute one of the Milk should always constitute one of the basic articles of our diet. It should be considered a solid food, and not a liquid, as it be-

finds, as it directs quickly and easily. A food authority has given a simple table for rations of the average person under average conditions. The quantities of food mentioned are for a days diet, and should be divided into three or two meals as desired.

but varied meals.

Watch your weight. It is the barometer of conditions in the body cells. If you tend to occurreight, out down the quantity of descerts, celeals and bread. If under-weight, buriesse the above mentioned foods, also milk. It may be well to remark that your disposi-

It may be well to remark that your disposinon has a great deal to do with your digestion of foods. A sweet disposition means a
sweet stomach. The reverse also is true.
In winter we can digest and assimulate
richer foods than in summer. Our bodies
need foods that produce energy and fuel.
Children in school need foods that will digest
mickly, and give brain energy. quickly, and give brain energy.

Our appetites are semething cultivated.

Years of wrong eating can cultivate a depraved appearite. It has been proven that often the appetite for strong drinks was formed through wrong eating. So we see how important it is to give our families healthful, nourishing foods. Condiments, such as pepper, mustard,

inegar and other seasonings, create an unrinegar and other seasonings, create an un-natural appetite. Salt is a mineral found in the body, and is natural and needed, but we use too much of it for our own good. Tea and coffee should never be given to children, and should be used only moderately

Choose your food with intelligence, and pre-pare it with care. It is no less important to

cat it with enjoyment.
In the recipe department you will find some excellent new dishes that will give a change to the winter menu, and at the same time be healthful and nourishing. Try them,

GOOD RECIPES

Here are some unusual and delightful recipes for the winter menu. If you like them, write us and let us know. It is only by expressed desire and suggestion of our readers that we are able to give you things you want on this page. Write to Mrs. Margaret Stute, Route 5, Box 179-B Fort Worth, Texas.

Griddle Cakes Often griddle cakes are unpalatable and undigestible. Here is a good recipe:
1 cup of zwieback or thoroughly dried bread

% cop flour % teaspoon salt About two cups milk

Mur the crumbs, flour and salt. Heat the milk, not to bolling, but somewhat hotter than the band can bear, about '45 degrees. Pour enough of the hot milk over the first mixture to make a rather stiff pouring bat-

ter. Separate the white from the yolk of the egg. Stir the yolk into the crumb mixture. Beat the white stiff and fold into the mixture last. Cook on a hot, slightly oiled griddle until browned on one side, and then turn.

Tasty Pastry
With the coming of cool days we crave
more sweets and desserts with our meals.
This is because such foods are rapidly changed into heat and energy. An excess of these sweets act as an intoxicant and do more harm than good.

We are giving here some recipes for des-serts that are tasty and healthful. Lemon Chiffon Pie

18 Graham crackers 1/3 cup powdered sugar 1/3 cup softened butter 1 tablespoon gelatine 1/4 cup cold water

(Continued top of column).

- PAGB 8 --

YES! You actually have Two Stars?

And each needs a different care, if you are to avoid WRINKLES, correct DRYNESS

Oil-Rich Cream for the Under Skin. Wrinkles begin in your under skin. When you are young, tiny glands in this skin pour out beauty oils. These oils keep your skin full—smooth. Soon something goes amiss. These glands fail! Your Under Skin shrinks. Your Outer Skin becomes loosened . . . wrinkles form. To stop these you must help your Under Skin. That is what Pond's Cold Cream is for. It penetrates deep carrying rich oils to the starving tissues. This cream, which goes so deep, is an amazingly thorough cleauser. It frees your pores of all dirt. Leaves your skin glowingly refreshed:

The Outer Skin Needs Greaseless Cream. This skin is entirely different. In it are active moisture cells to counteract Dryness, Exposure whips this natural moisture out, leaving your skin coarsened, chapped. A wonderful substance in Pond's Vanishing Cream restores this lost moisture. A single application smooths all roughnesses—use it as a powder base. You'll find your make-up clings for

cup granulated sugar cup lemon juice teaspoon salt

2 teaspoon salt
1 table spoon grated lemon rind.
Roll crackers fine and mix powdered sugar and butter. Press mixture in an even layer against sides and bottom of buttered pie plate. Chill thoroughly. Soak gelatine in cold water. To beaten egg volk add granulated sugar, lemon juice and salt, and cook over hot water until thickened, then stir in the gelatine and rind. Cool and fold in stiffly beaten egg whites. Pour into cracker-crust-lined plate and chill. Serve garnished with whip cream if desired. Make one 8-inch pie.

Pumpkin Pie Filling

Prepare pumpkin in the following manner, if the old-fashioned pumpkin-pie flavor is desired. Trim rind from pumpkin, cut it into cubes and stew slowly several hours in a small quantity of water till cooked down rather dry

ter till cooked down rather dry

and becomes dark in color. Then the pumpkin should be rubber through a colander. This is more trouble than using canned pumpkin, but once tried you will much

ruefer it to the canned product? After pumpkin is ready, mix the following ingredients::

14 cup molasses
12 reaspoon cinnamen.
Heat the milk to the boiling point. Mix together the other ingredients, then sur the hot milk into them and mix thoroughly.

Pour into the crost and bake till

Crust

2 cups pastry flour, sifted be-

1.3 cup salad oil. 1₃ cup cold water Mix the salt and flour in a mix

ing bowl; turn the oil in all at once, and stir with a spoon until

the oil and flour are about half mixed. Then pour in the water.

all at once, and stir until the dough is just stuck together. Much mixing makes the crust less flaky.

This pastry is softer than paste made with hard fat, but do not add more flour to it. It makes the dough tough.

Sift flour on the bread board.

Take half the paste and put it on the flour on the board; sprinkle

flour on top of the paste, pat into

a ball, then begin to roll it with the rolling pin, rolling very-lightly and always from the mid-dle to the sides of the dough, so

as to keep the piece as near round as possible. Do not try to pick

the crust up and turn it over. Con-tinue to roll without changing position until it is the size of the

pie plate. Then dredge with flour over the paste and insert a knife

blade under the crust to loosen it from the board, fold one-half over

the other half, then lay over one-half of the plate and unfold. Press it close to the plate in the

angles between the bottom and sides of the plate, trim off the edge and flute the same as any other crust. Pour in the pump-

kin mixture and bake in a moderate oven until done a golden brown. The amount of ingredients called for make two large pies with single bottom crust.

Adding a tiny pinch of salt to fresh milk will make it keep much

NEW PORT NEARS COM-PLETION

Port Isabel expects cargo

to start moving through its

new port in November. Term-

inal facilities are being rush-

ed to completion. The outer channel is being deepened by

the U.S. hopper dredge Absecon. There will be at least

20 feet of water over the bar

at Brazos-Santiago by November, according to H. S.

Crawford, port director. That will permit the entry of some

coastwide vessels. It will not

be until the early part of 1935

that general sea traffic can utilize the port. By then the channel will have been deep-ened 25 feet.

SANTA ANNA OPENS GRID SEASON WITH CROSS PLAINS

The Santa Anna Mountaineers opened the 1934 grid seaon with Cross Plains Friday, Ceptember 28th.

Banta Anna was so unfortunate as to come out of the game with the low score. The Moun-taineers seemed not to get started until the last five minutes of the game. They were handicapped by the gridiron of four or five inches of loose sand, preventing a good foothold. The field was also on a downhill

After an exchanging of punts in the first quarter, Cross Plains started the march of about fifty yards for their first marker. Club met last week and elected Enifing through the first line, they marched steadily for the John Blake, president; Elizafirst tally. Playing very hard in both Rollins, vice president; the second quarter, the But-Marilyn Baxter, secretary and faines were held scoreless.

A Wessage of Appreciation

From Your Gulf Distributor:

Wish to express thanks to each customer and friend who has helped to build a business gradually to where I now rate in the leading list with my company.

I do not feel this is possible for one individual, but I have tried to select Gulf dealers who are loyal to me and the company I represent. I am proud of each dealer and do not feel they will misrepresent our products or our service.

I appreciate the Santa Anna merchants, some of them among the oldest established firms here, and others among the newer ones, who sell and recommend Gulf products, along with other standard brands.

I am also proud of my Tractor Farmer customers, many of them have been making purchases from me since they first purchased their tractor equipment and passed on to friends their approval of our service and the quality of our product.

To the public in general, we solicit any comment or suggestion you think will improve our service, friendly criticism included.

The following Gulf dealers in our trade territory solicit your business:
