"He Profits Most Who Serves Best"

VOLUME LV.

SANTA ANNA, COLEMAN CO., TEXAS, FRIDAY, MARCH 22, 1940.

NUMBER 12.

This Week in Our Town

"Wish they'd leave the traffic light on all the time from noon until midnight," has been the comment of several auto owners the past two weeks. Sporadic operation does not breed respect for the road laws.

"You can tell the public that Santa Anna churches will join hands in an Easter sunrise service at Ranger Park 6:30 Sunday morning," said Rev. Womack Monday. The several ministers are arranging a beautiful union service and want a large congregation present to enjoy it. The event and the spirit of co-operation should make this a memorable service.

"Mr. Weaver drew the suit of clothes last week. Cost him a two-dollar bill," said Parker the Tailor Monday. The suit club creates a lot of interest among the members and some of the boys, the first half of the group, secure their suits at a real bargain.

"Your typesetter was a bit too ambitious with his figures," was the comment of Alex Clarke of the Coleman Gas Co. Tuesday, calling attention to the fact that the company's annual expenditure of some \$10,000 has taken an enormous jump, "\$10,000 is no little sum itself," he continued. Mr. Clarke also announced that his son, Wilbur Clarke, had been named manager of the company's Santa Anna office.

"That sound truck is doing a very attractive display of Robin Hood Flour," we were informed on hearing music up the street one day of last week. Kelly & Company have stocked out a carload and you should see their window display opposite the bank." We looked and found a very attractive display of Robin Hood Flour and aluminumware.

"Want to pay my subscription up to date: can't get along without The News", has been a common remark around The News office the past two or three days, in fact since we mailed out a handful of letters asking the co-operation of readers in keeping the paper up to the desired mark. We find quite a lot of people who never think of asking the Fort Worth or the Abilene of San Angelo papers to wait a year for their money, feeling peeved because we have notified them that they are in arrears. The big dailies take a subscriber's name on the list if the subscription is not paid in a reasonable length of time, but while they pay the dailies about on time, the weekly has in some cases to wait from one to five years. To give you a good paper we have to have just as good co-operation. We are glad to say our readers for the greater part co-operate gladly which we appreciate.

"You didn't put in the regular sales price of our special offer on Enameloid last week," said Miss Ruby Harper Wednesday. It was a fact. While the special price appeared on the ad, the regular did not. For the benefit of those needing enamel, a good make at a savings, we will say Miss Ruby was offering the 69c a pint Enameloid for 49c, nearly a third off regular price.

"Since we can't have a chamber of commerce in Santa Anna I am glad to co-operate in this effort to revitalize home town trading," stated Mr. Purdy on Wednesday, referring to the News' business census and trade at home page which will appear next week and thereafter once a week for 12 months. "Someone has to do something and if there were four programs of this kind underway, I'd support them all," Purdy has the right idea. Someone has to do something and Purdy can always be depended upon to co-operate for the good of all our people.

METHODIST CHURCH

Rev. H. C. Bowman, Pastor.
Does Matthew 23:23-24 refer to vile sins of commission? Which is more dangerous, sins of commission or sins of omission? Why?

Is this statement true or false? Millions of church members are losing their souls, not because of what they DO but because of what they are NOT doing.

Hot stininess toward God is covetousness; how can one KNOW assuredly whether or not he is guilty of this sin?

Why is covetousness the most dangerous of all sins, more to be feared than murder?

Hear the answers to these questions in the Sunday morning sermon on the subject, "Church Members: Who Will Miss Heaven?"

The Sunday night theme will be "The Precious Promises of Pesus." Check the promise of Jesus and list the ones you think is the most precious.

During the past 60 years the Brown county clerk's office has registered more than 5,000 livestock brands, ranging from simple one letter or one figure brands to marks which made the cow look like a small boy had been drawing pictures on the side of the animal. No record of when the first brand in the county was registered or who registered it, is obtainable because the courthouse burned some sixty years ago and the records prior to that time were destroyed. Hundreds of bands were registered on May 8, 1880, evidently the first day the new courthouse was open for business. Ten or fifteen brands have been recorded so far in 1940.

If the city of Brownwood will pay \$130 a month, it can in 15 months place street designation signs at all of the 816 intersections in that city, Mayor Windell Mayes informed the city council. MOUNTAINEER

S. A. H. S. HIT PARADE

Morton's salt is not the only thing that "when it rains it pours." In fact, the compilers of the S. A. H. S. Hit Parade were snowed under in a deluge of favorite songs. Over 83 different votes were cast. We added a mathematical branch to our personnel to take care of the influx of songs.

Billie Pieratt, this week's S. A. H. S. Hit Parade songster, who designates himself as "Your Old Ivory Pounder," was just one among the many senior swing fans! The senior class is really live-conscious, yes sir! Regular rug-cutters, that's what. Some of the freshmen girls like "putting their little foot" if one might judge by their selections. A few sophomores and a very few juniors are interested.

Quite a bit of switching has taken place this week. "Careless" finds it natural to move up to first place. "Stardust" jumps several places and lands second with a bang. "Darn That Dream" Last weeks big winner dropped back to third place. Several new songs were listed too. So, students here they are, in the order of their selection: Careless, Stardust, Darn That Dream, Indian Summer, Oh, Johnnie, In the Mood Scatterbrain, In An Old Dutch Garden, Confucius Say, To You Sweetheart—Aloha.

Come on juniors and all the rest of you! Put a list of your ten favorite songs in the little white box in the study hall, Tuesday, eighth period, is the deadline.

There will be no public presentation of this play until county meet.

Thomas Davis, head of John Tarleton College, inviting them to be the guests of the Stephenville institution at an open house on April 18. Included in the program for the seniors will be a tour of the campus, lunch in the dining hall, motion pictures, a program by the music department and a military review of the Cadet Corps.

The Third Paragraph in our advertisement last week was in error and we wish to make a correction. The Third Paragraph should have read:

We distribute in your trade territory annually in wages, lease rentals and oil and gas royalty payments the sum of ten thousand dollars."

We have under lease or held by producing wells over three thousand acres of land south-east of Santa Anna, also twelve hundred acres of land either held by the producing wells on the property or by the payment of lease rentals to the owners of the properties. This acreage is located north-east of Santa Anna.

That important announcement mentioned in our previous advertisements will be made very soon and we hope it will be of interest to the citizens of Santa Anna.

Editorial

THIS WEEK THE NEWS INTENDS to give you a census of its own by sending out questionnaires to ascertain if Santa Anna is giving and getting, a square deal, both for business man and buying public. Too plainly the situation of our town is rapidly becoming precarious. Two reasons exist, one imagines: lack of co-operation between business and public and the efforts of governmental bureaucrats to centralize the WPA, AAA, REA and all other governmental agencies in county seats in order to coordinate control over as many phases of government business as possible. With all recipients of government money herded into a few towns, political control becomes much easier than if voters were free. Efforts to centralize every recipient of government checks under bureau control in Coleman is hurting Santa Anna and every community in the county. Santa Anna is self defense. The lack of having a check and seeking remedy to such the efforts to centralize the community business centers a few years ago before Wallace decided it was better to let the government run the utility business, another utility center out of business, and a little town. The big business man pulled a piece out of the FDR Wallace book and called another piece out of the same bottle. (Good for money and greed for governmental power has done the trick and it the chance of recovery is not the bare-brained trustee kind, is not past, we can do something about it. We believe that when an audit is made of the replies in the questionnaire, that Santa Anna merchants will see clearly what will be required of them to meet the public demand, and it will be then a question of whether the public wants the town to become what they visualize as the acme of such community centers, or if trucks and filling stations shall apply their every need. People do not realize the seriousness of the situation that confronts both small town and the public.

EFFORTS IN THE PAST TO SECURE the delivery of government checks without the recipients having to travel mile and miles to such a receipt were temporarily successful. If Santa Anna business men and the long traveling and long-suffering recipients, would rise up and have a bit of hell with the bureaucrats that are so dictatorial, something of a worthwhile nature might be accomplished. Give Congress a sound raising old men with your congressman and representative, Wm. Wallace and FDR a new deal letter, and bombard the whole caboodle with round robin letters. Tell them through the newspaper that you think of such a check as a measure. Use this material and the aid of some of the smaller towns on the line in your own right. If the smaller towns will put up all out of themselves all the quicker.

COMMUNISM COMES A STEP nearer with the order of the Department of Public Safety of Oregon giving the government-sponsored utility districts, free and unobstructed access to all the records of their private company competitor at Chewelah, that State. This is but a single demonstration that the rights of individuals and private business no longer exist. Government takes your taxes, organizes competitive corporation, takes your records, your business and your property and tells you to like it or else. Your elected government doesn't represent you if now attempts to become a despotism. How would a business man like it if the mayor of his town ordered him to turn his books over to a competitor just opening up in order that the new man, who would pay no city taxes, might learn how best to put the first man out of business? Yet that is the New Deal, Brain Trusting, Bank Busting, Bureau, Commission and Board, powerful and irresponsible system we have over us now. All we lack is the Russian type secret police. But probably we will have that in a few months more.

TVA HAS ALMOST A MONOPOLY on electric power in Tennessee and seeks to monopolize it in other states. TVA has been stressing the value of hydro-electric power that would have been wasted otherwise, gobbled up millions of dollars in the guise of fertilizer plants and of flood control. And communistic government officials are now finding that TVA as a power producing agency is much overstressed while putting in steam plants to produce more juice—and now want to spend more billions of tax money to create a huge playground so tired taxpayers from all over the nation can come and fish and rest in the shade of WPA trees. Taxpayers are too tired from raising tax money to think of communist playgrounds. Government in business on a vast scale doesn't fill state and other treasuries emptied by tax-

free tax-supported government concerns—but it can add to the number on relief, WPA and in CCC camps. The government is seeking to take over all tax-paying industries, abolish tax-collecting, an support everyone on tax money. Stalin does it, so why not Uncle Sam? Is the attitude of government morons.

A NEW PRINCIPLE IS IN EFFECT in this country. Under it an employer is always wrong and agitators are always right. A labor organizer can wreck an industry and the law will protect him; his followers can destroy millions of dollars' worth of property and the law protects the destroyers. An employer who dares even express mild disapproval of such methods is hated before the NLRB and is charged with coercing defenseless labor. The commissars rule the employer has no right of free speech and must accept all destruction of property as an expression of the rights of labor. The next logical step is for the NLRB to abolish industry, destroy all the property of employers so the defenseless laborers won't have any jobs to be inflicted upon them, leaving labor absolutely free from such un-socialistic things as work. The NLRB commissars can do it—abolish industry; they've already suspended the constitution and abolished free speech.

WE HAVE IN TEXAS AND THE nation thousands of bureaus and commissions with authority the people never invested in them, holding the power to suspend laws, create new laws and enforce them without the consent of the people, and in no way responsible to the people. THE NLRB denies Ford the constitutional right of free speech; the census bureau demands of the people certain personal information the law does not require of them, and puts a penalty for the crime of refusing that the law-making bodies of the nation did not formulate. The two examples are typical. No private right exists when plenipotentiary bureaus responsible to appointees and not to the people, decide to crack down. If congress should object to the bureaus doing as they please, they have the power to abolish congress and fine, jail or execute them by passing any rules and regulations they please. Washington is fast becoming the Little Kremlin.

A GROUP OF THEORISTS, TO avoid calling them something else, have recently come into power in the REA high command. These men have discovered that there are several kinds of electricity, some good, some bad and some horrible. And the horrible electricity is the kind most used today. This is manufactured by private power companies. No self-respecting farmer should use the stuff, according to the REA bosses. The plain bad kind is the brand being turned out by municipal or publicly owned plants. The "A" grade juice is turned out by a vast chain of federally-owned generating plants. It looks like the REA has joined certain other government commission, and bureaus and officials whose greatest ambition in life is to destroy and socialize the private power industry. In the mean-

time the farmer can wait and like it—what's a little thing like advancing the agricultural electrification movement in the nation against the beautiful picture of socialistic monopoly of the whole power business? And the farmer and all the rest of us are paying through the nose.

Our work has just begun YOU think electric service is a wonderful thing—and it is. It lights our homes. It makes our streets safe at night. Turns wheels in factories. Lifts the burden of housework. Helps make the good things of life cost less. Really, there doesn't seem much left for electricity to do, does there? Yet we employees of your electric company believe that every service and comfort electricity now gives you is but a beginning of what's to come. Why, today we don't even know what electricity is. We simply know and enjoy some of the things it is capable of doing every moment of the day and night. But we also know that there are still a great many undiscovered tasks for electric service. Who will perform these miracles-to-come? The men who serve you now—the same great army of skilled technicians, capable managers and loyal employees whose tireless efforts in your behalf have already vastly improved the service your electric company gives you, already drastically reduced its cost. No, it isn't an accident that electricity has reached its greatest present development in the United States. The reason is that these thousands of men and women in the electrical industry have the American spirit of initiative—the good old-fashioned kind. Their work, and theirs alone, makes your electric service the best in the world. It's an amazing service. It gets better and better, costs less and less. Your electric company doesn't often think about the work it has done because it is too busy planning the work that lies ahead. MORE FOR YOUR MONEY In the last 10 to 15 years, the engineering improvements and operating economies of your electric company have made it possible to get the average price of household electricity just about in half. Many customers now using more household appliances, lots of light, a radio, and refrigerator pay very little more to operate all of these than they used to pay for light alone. Other Viewpoints

Texas has contributed many great statesmen since its heroic struggle for independence a century ago, but not since the days of Sam Houston has a Texan acquired the national following which John Nance Garner enjoys today.
 Astute political observers in the nation's capital agree that Vice President Garner is the Democratic Party's best bet for 1940.
 Garner's phenomenal strength in all sections of the country is being attributed to four factors:
 1. He is more experienced in governmental affairs than any other man. He is the only living man to have presided over both houses of Congress. He has been a conscientious public servant in Washington for more than 35 years.
 2. He is a lifelong liberal of the practical variety. Most of

the liberal measures enacted during the past few years were urged by Garner long before the New Deal came into power. He has opposed the New Deal only on questions of extravagant spending and its conciliatory attitude toward sit-down strikes.

3. His sturdy log cabin Americanism is the people's best safeguard against involvement in war. He is a genuine patriot, a believer in George Washington's advice against meddling in foreign disputes.

4. He is a vigorous and rugged personality that inspires confidence. Despite his 70 years his outdoor life and clean living have kept him virile and alert. Moreover, he is a plain American—a homebody, who has been happily married to a charming and gracious wife for more than 40 years.

These attributes of John Garner's appeal to the best elements in American life, leading political observers to believe that he is the strongest nominee the Party could select—Mission Times.

SHEPPARD BOOSTS GARNER CAMPAIGN
 In a nation-wide radio address Saturday, March 23, Senator Morris Sheppard, senior Senator from Texas and long-

time friend of his fellow-Texan, John Nance Garner, will present Vice President Garner's presidential qualifications to the American people.

The address will be delivered in Washington and will be broadcast over the coast-to-coast network of the National Broadcasting Company, Garner for-president headquarters in Dallas announced today. The broadcast will be heard at 7:45 p. m., Texas time.

Texans will receive the broadcast via WFAA-WBAP in Dallas

Fort Worth, WOAI in San Antonio, and KPRC in Houston.

Senator Sheppard, distinguished statesman and ardent dry leader, will discuss Mr. Garner's long record of public service and his sterling character.

It is estimated that around 1,700,000 farm families over the nation now get electricity from REA or rural commercial power lines, and that an additional 250,000 have their own light plants.
