### Army Celebrates 186th Birthday

On June 14, 1961, the United States Army will celebrate its 186th birthday. The Battles of Lexington and Concord had been concluded on that day in 1775, and the colonial militia had the Redcoats under seige at Boston. Still, there was no Army, and even the birth of the Nation was a year away. But mindful that a new nation would need a truly national Army, the revolutionary Second Continental Congress authorized 10 companies of Infantry to serve, not under state authority, but under the Congress of the yet-to-be-created Nation. Through those 186 years the Army has been explorer, builder, inventor, liberator, healer and defender. In filling these many roles, the Army has emerged not solely as a conqueror, but as the Nation's strong right arm when danger threatened or any great civil task lay ahead. In war and peace, the Army has been a leader in preserving our national ideals and in building a stronger, healthier and greater America.

### Pecan Demand Exceeds Supply

Grocery shoppers with a sharp eye and appetite for quality convenience foods soon will demand 100% more pecans than the present crop now supplies, says the National Pecan Shellers and Processors Association. Unique in an era of surpluses, the average yearly pecan crop of 150 million pounds only half meets the estimated demand of 300 million pounds per year. Said to be a conservative estimate, this forecast is based on the population boom and the steadily increasing popularity of convenience foods.

Tomorrow's homemaker, say industry spokesmen, will have sophisticated tastes, more money to spend and a better knowledge of nutrition. Processors of such items as bakery goods, frozen salads, desserts and heat-and-eat main dishes are making plans now to meet these new demands. It is anticipated that pecans will have greatly increased usage as an appetite-appeal ingredient in many of these products.

Pecan prices to the grower have held steadily high for the last five years. In many areas, pecans rank among the top money crops. The comparatively low costs of growing, cultivating and harvesting, plus the ready market, has focused attention on the need for up-grading and increasing production. Presently, research is being done by the U.S.D.A. and by extension horticulturists to help the individual grower reap the cash rewards the greater demand for pecan crop will bring. Special attention is being given to the individual requirements of growers in various areas. This new information on planting, fertilization, disease and insect control is available to growers from county agents throughout the producing area.

**Postal Fees To Be  
Increased July 1st.**

Proposed increases in money order and special delivery fees starting July 1, 1961, were announced today by Postmaster General J. Edward Day.

No changes in special delivery fees for first class mail are planned.

Special delivery fees for second, third and fourth class matter will be increased by 10c in each of the non-first class fee brackets as follows:

Up to 2 pounds - from 45c to 55c; Over 2 to 10 pounds - from 55c to 65c; and Over 10 pounds - from 70c to 80c.

The increases for this service are expected to yield about \$2.5 million in additional postal revenues, based on current special delivery volume.

Money orders up to \$5 and over \$50 will be increased by 5 cents. The new money order schedule will combine the present 15-cent and 20-cent fee brackets into one at 20 cents. It also splits the present 30-cent bracket at the \$50 level, raising to 35 cents the fee for denominations up to \$100.

These changes will affect over 100 million money order transactions. Based on this volume, new revenues would total about \$5 million.

These proposed changes can be put into effect by Postmaster General Day under his existing administrative authority. Similar action was taken recently to adjust postal rates for mail going to foreign countries.

These actions are part of the Post Office Dept's program to place the Postal Service in a more favorable fiscal position, in accordance with the Postal Policy Act of 1958.

The PM General is also requesting the Congress to take legislative action with regard to first, second and third class mail to eliminate the revenue deficiency gap of \$741 million.
