Ruby Martin and Harold Cottle Exchange Vows

Ruby Nell Martin and Harold Douglas Cottle, Jr. exchanged wedding vows Friday December 28, 1973 in the First Baptist Church in Desdemona. Rev. Floyd Hutson of Stephenville, uncle of the bride, officiated.

The bride is the daughter of Mrs. Doris Martin of Gorman and George Martin of Weatherford.

Parents of the bridegroom are Mr. and Mrs. Harold D. Cottle, Sr. of Gorman.

Nuptial music was presented by Sharon Outlaw.

J. M. WESTMORELAND

OBSERVES 87TH BIRTHDAY

The 87th birthday of Mr. J. M. Westmoreland was celebrated by his family with a party and buffet dinner at the home of his daughter, Mrs. Ramona Stacy, on December 31st, 1973.

The serving table was covered with linen and lace and centered with an arrangement of fresh yellow, bronze and white mums with a white tapered candle in the center, and a white satin streamer saying "Happy 87th Birthday."

After food and refreshments were served, gifts were opened by the honoree and pictures taken of him and those who attended the happy event: Mr. and Mrs. R. D. Dutton of Amarillo, Mr. and Mrs. B. H. Greer, Breckenridge, Mr. and Mrs. C. D. Thompson Ramona Stacy, Lana, Vic and Don Stacy, all of Gorman. One daughter, Margie Cate, was unable to attend.

Mr. Westmoreland was born in Hope, Arkansas Dec. 31, 1886 to Jim and Margie Westmoreland and came to Texas as a very young child and later settled in the community of Grandview, near Gorman. He was born one of seven children and is the only surviving member of his immediate family.

He married Annie Andrus Nov. 23, 1896 in Eastland and to this union were born six daughters, Irene Dutton, Velma Standridge, Ileta Greer, Allene Thompson, Margie Cate, and Ramona Stacy, and took one grandson, Bobby Standridge, to raise at the death of his mother in 1940. To add to this happy family were nine more grandchildren and ten great-grandchildren.

He was a farmer many years and still owns his farm near Gorman.

During the Desdemona oil boom, he hauled with a span of mules. He hauled the first load of stone for the foundation for Blackwell Hospital in 1919.

In the 87 years Mr. Westmoreland has been around he has seen many changes take place from the "horse and buggy" to the "airline jet." He has seen many good times

Presented in marriage by her brother, H. L. Martin of Mineral Wells, the bride wore a gown of polyester crepe softly gathered at the bodice. The low neckline and bodice was overlaid with lace. Her veil and chapel train were of matching lace.

Mary Martin of Fort Worth was matron of honor and Patsy Martin of Gorman was bridesmaid. Both are sisters of the bride.

Flower girls were Michelle Sue Lusk of Garland, cousin of the groom, and Cheryl Renee Martin of Mineral Wells, niece of the bride. Carolyn Jean Holder of Desdemona, niece of the bride, was train bearer.

Candlelighters and ushers were Ray Neal Little of Gorman and Eddie Martin of Gorman, brother of the bride.

Larry Wayne Cottle of Gorman served as best man for his brother.

Bridal attendants wore lime green gowns fashioned with high gathered waistlines and short puffed sleeves and lime green large soft brimmed hats.

The bride is a senior at Gorman High School and will continue the school year at Slaton High School.

The bridegroom is a 1971 graduate of Gorman High and attended Cisco Junior College. He is a junior student at Texas Tech and is employed by G&H Casting Corporation in Slaton.

and many bad ones. He has seen depression and inflation and has "heard" of the "Water Gate Scandal!"

He is well known for his good sense of humor and has a joke to pull on anyone who happens to drop in.

Some time after retiring Mr. and Mrs. Westmoreland moved into town in 1961. And he still resides in the rent house belonging to Mr. C. J. Thompson.

This couple celebrated 65 happy years together Nov. 23, 1971 and since her death Feb. 12th, 1972, he has chosen to live alone, cook his meals, keep house and mow his spacious lawn. He says he keeps in shape walking at least two miles a day when the weather permits.

Anyone who ever knew Mr. Millard and Miss Annie, as everyone called them in the Grandview community, loved them and appreciated their great hospitality. It was often said by friends, "they were one of the most devoted and deeply in love couples anyone ever knew."

They had love and they taught love. To have known Mr. and Mrs. Westmoreland is love and we are very fortunate.

Floyd Roberts Car Destroyed by Fire

The Gorman Fire Dept. answered a fire call to the Mildred Livingston farm six miles south of Gorman at 7:30 p. m. Sunday to extinguish an auto fire.

The firemen received two calls on the fire, as the first call was cancelled as the family thought the fire was under control. By the time the fire ruck arrived, the second call, the fire was too far gone to extinguish and the 1954 Nova was a total loss.

The fire department has answered 14 calls in the past two weeks. Most have been grass fires, many out of the city limits. The motor went out on the rural truck when answering a grass fire in Jobe's Lane Tuesday evening. This leaves the department with only one fire truck, and makes it more urgent that a new truck be purchased and that people be more careful and take extra precautions in preventing fires of any type.

FIRE DEPT. SEEKS FUNDS FOR NEW FIRE TRUCK

The Gorman Volunteer Fire Department is in the process of buying a new rural fire fighting truck, which is badly needed.

In the past the department has purchased old trucks and it would stay in the repair shop half of the time, or at least after every fire, which has proven to be quite expensive. What the department has in mind is buying a new truck and at the present time they have \$2300 in the equipment fund and the new truck will cost approximately \$10,000 (4 wheel drive with new equipment). It will take time to raise this kind of money, however, it can be done by everyone pitching in and helping.

Those who wish to make a contribution to this fund may do so by contacting any member of the Fire Department, or leave it at the First National Bank, Foster Ffolow or Gorman Pharmacy.

Lisa Warren led Gorman with 19 points, Deliah Eaves scored 8 and Donna Lewis 5. High for Rising Star was Hounsel with 10 points.

In the boys game the Gorman boys and Rising Star boys had a very good game with Gorman edging the Rising Star boys by a 28-24 margin.

Wouldn't this old world be better if folks we meet would say "I know something good about you" and treat you just that way.

Seems like the old year went away with a cold blast. Mr. and Mrs. Frank Park of Eastland visited Mrs. Myrtle Reid Tuesday evening.

Larry and Jerry Majors had the pleasure of celebrating New Years Day by having Larry's mother, Mrs. Irene Majors, and her mother, Mrs. Baxter of Cleburne, his brothers, Johnnie and wife and daughter of Palo Pinto, and Charles and Beverly and two daughters of Utah. Charlie is stationed at Hill Air Force Base, his wife is the daughter of Mr. and Mrs. Glen Maltby.

Neta Gee entertained with a New Year's Eve 42 party in her home Monday evening. Those who managed to stay up until 12:05 were Mr. and Mrs. Kenneth Paul, Mr. and Mrs. Zollie Koonce, Myrtle Reid, Benton Echols, Annie Rainey, Mr. Dale Gilmore, and hostess, Neta Gee. A delicious supper was enjoyed by all.

Mr. and Mrs. Elwood Ragland and children of Eastland attended church services on Sunday evening at First Baptist Church with Mr. and Mrs. C. E. Ragland.

Mr. and Mrs. Bill Greenhaw were in Lubbock Friday to attend the funeral of Mr. Mabry, the father of Mrs. Ford Greenhaw of Lorenzo.

Edith Robinson and Maude Crenshaw of Stephenville visited Garden Tate in Lawndale Home in Gorman and Inez Heeter and Hattie Tate on Saturday.

By DeMarquis Gordon

Small grains in Eastland County got off to a good start, but growth has been hampered by cold, dry weather. Insects have caused damage to some fields, especially green bugs. There is only one way to determine if green bugs should be controlled in small grains. This is to inspect your field once or twice each week depending on how active green bugs are and how the population is growing.

When small grains are three to six inches tall, as is the case in most fields, populations of 100 to 300 green bugs per linear foot of row can be tolerated before chemical controls will be needed. Plants that are growing vigorously

can support larger populations of green bugs without an economic loss than plants that are suffering from lack of fertility, moisture or from moderate to heavy levels of leaf rust infection.

By not controlling green bugs until populations reach levels that can cause economic damage, producers give beneficial populations of nabids, parasitic wasps, spiders and others an opportunity to increase their numbers and bring green bug populations do not build up until there are many green bugs or other aphids in the field. Once populations of beneficials begin

to increase, it is not uncommon to find that 25 to 50 percent of the green bugs have fallen prey to the beneficials. Therefore, chemical controls should be reserved for those cases where beneficials do not bring damaging green bug populations under control.

Larger wheat plants can tolerate heavier populations of green bugs without suffering economic losses. Information on population levels that various size plants can tolerate and on how to inspect your field is presented in MP-339 "Suggestions for Controlling Insects and Mites on Corn, Sorghums and Small

Grains." This publication is available at our office. Livestock men that have cattle grazing on coastal bermudagrass should watch these animals closely for "shakes" or "stagers." Recent cases have been reported in counties southeast of us. Symptoms of affected cattle include severe muscle tremors, incoordination, weaving or bobbing of the head, a wild eyed expression and an inability to rise when down. Salivation and stiffness or weakness of hind legs may also be evident.

Animals may die from drowning, dehydration or a direct effect of the toxic principle. The number of animals affected in a herd can vary from 10 to 100 percent. What can be done once animals are affected? We suggest handling them with care and driving them slowly off the bermudagrass onto green oats or other small grain or into a pen. The cattle should be fed all the hay they can eat plus a feed high in carbohydrates, such as a low protein grain cube. As a prevention measure moving the bermudagrass may help.

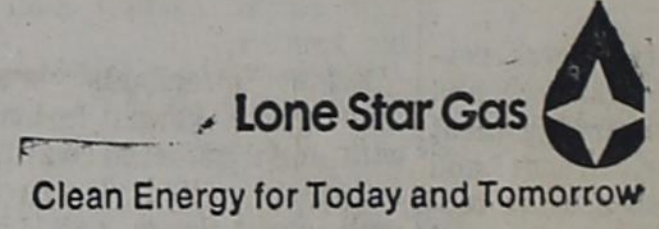

dent happened to the minister of the Church of Christ when he fell as he was working on the antenna and broke so many bones in his arms and legs and has lost his right arm. He has been in the Stephenville Hospital, but will be carried to the Veterans Hospital in Temple this Monday. Georgia, we miss your column in the paper each week. So sorry you are ill. We wish for you a speedy recovery. Well, we are back on savings time again. Seems like we are always trying to save something. Just look around you and see how many changes have taken place. Our little town is all lit up like a second Fort Worth. Mr. and Mrs. Jessie Clark were in Sweetwater this week end to attend the funeral of Mrs. Clark's brother, Charles Holley, who passed away on Friday in Eastland. We extend our sympathy to the family. Cold air still prevails over this area. Someone said a dry winter means a good fruit year. We hope this is true, but we sure are needing a rain. But the good is always mixed with the bad. Remember: January 19th, 1974 - Ye Old Time Musical!

Question:
Will you have enough natural gas for your home this winter?

Answer:
Yes!

Let's lay this question to rest once and for all. Lone Star Gas Company has enough natural gas reserves under contract to adequately supply our residential, commercial and other higher priority customers for many winters. To be sure we have enough for these consumers, we will make some extensive curtailments of service to our large volume customers during extreme cold weather this winter. In fact, our contracts with large volume customers anticipate the need to curtail up to 100% of their needs during these cold periods. This allows us to assure service to residential, commercial and other higher priority customers.

We're taking major steps to make sure you have gas for the future. New gas we're buying costs more than four times the price we paid just a few years ago. This is an astonishing amount of money! But it's the price all of us must pay for a continuing supply of natural gas energy. This winter, and in the future, natural gas from Lone Star will continue to be your best method of home heating, water heating and cooking... just as it has been for more than 40 years. But we all must remember to help conserve this precious energy fuel.

What TESCO is doing to provide the electricity you'll need.
We're spending \$700 million on new construction during the next five years.

We must have new plants that will permit us to diversify the types of fuel we use to generate electricity. Natural gas is our major fuel at Texas Electric now, with oil used on a standby basis. But both these fuels are in increasingly short supply. So Texas Electric, along with two other electric utilities, is building plants in East Texas that use lignite coal, a fuel that is not being used extensively for any purpose other than the generation of electricity. One lignite plant already is in operation, and two others are being built. But it costs about twice as much to build a lignite

plant as one that uses natural gas. A nuclear-fueled plant is scheduled to be operational near Glen Rose by 1980, and this one will cost more than three times as much as a gas-fueled plant. Financing the essential expenditure of more than \$700 million in just the next five years is what makes an increase in electric service rates necessary. We're working to supply the electricity you'll need, but it will have to cost more in the future.
