You know, some people figure they can get by pretty good with second best. Well sir, that's the kind of thinking that'll make a good peanut farmer snicker to himself. If he was to take that attitude, he'd be out of business before long.

Folks who grow peanuts for a living will be real quick to tell you that the quality of their peanuts depends a whole lot on the quality of the seed. And right there's the reason why Star Brand Certified Seed Peanuts are so popular in this part of the country. The people at Gorman Peanuts take the very best care of their seed.

They grow it on choice irrigated land. It's combined at a slow, steady speed so it won't be damaged. Then it's field dried.

And they have electronic equipment that culls out all the damaged and ballhead kernels. Then to assure you of the finest quality, all splits are removed before and after treating. The last step, and one of the most important, is that they don't treat their seed until the dealer calls in your order.

Of course, there's a lot of other important steps involved in getting the excellent quality seed that bears the Star Brand label. Tell you what, why don't you drop by your dealer who handles Star Brand Seed and get him to tell you some more about it.
