Tips for using electricity efficiently:

Resist the temptation to set your thermostat lower than you need to.

Air conditioning engineers recommend that thermostats be set at 76 to 78 degrees for comfort and economy. Every degree below this requires units to work harder and use more electricity.

However, if you plan to be away all day, you can economize by raising the setting five degrees. Turn off the unit when you go on vacation, unless there are items that might be damaged by the heat. If so, leave the unit on, but raise the setting at least five degrees.

Here are some other things you can do to keep your costs as low as possible:

Enjoy cleaner air and lower costs by keeping the filters clean. A dirty filter causes the unit to work harder. Check them at least once a month. If it's a permanent-type filter, clean it according to the manufacturer's directions. Disposable filters should be replaced at least every 90 days, or earlier if necessary.

Also, keep out direct sunlight with awnings, blinds or draperies. Weather-strip doors and windows, and properly insulate walls and ceilings. Be sure the fireplace damper is closed. And, when possible, bathe, cook and do the laundry during cooler parts of the day to prevent heat buildup.

It's our job at Texas Electric to help you get the most value from your electric service. When you have questions about electric air conditioning, or any other use of electricity, please call us. For our free booklet, "Tips to help you use electricity more efficiently throughout your home," call or come by our office, or request one on the comment portion of your electric service bill.

QUALITY And SERVICE

Love tradition? And children, too?

Tell City Solid Hard Rock Maple with Formica-top Tables. Some people like it for dining rooms. Some buy it for living kitchens. But, wherever you put our Tell City Solid Hard Rock Maple, it's thoroughly practical for everyday use. And also a great source of pride when friends and family come. The table tops are a special kind of Formica laminated plastic with a warm, beautiful grain-pattern that's so maple-like most people can't tell it from the real thing. The Solid Hard Rock Maple is so hard it resists dents and scratches. It's the same kind of wood used to make bowling alleys. Come in and see our Tell City collection of combination everyday/guest furniture. You'll want to take some home.
