Texas Electric has moved. From here.

We've moved our downtown business office three blocks east from 7th & Lamar to 7th between Houston & Main Streets.

We're now in the Electric Service Building — formerly the Fort Worth National Bank Building. there's also a full service walk-in.

This move has enabled us to centralize almost all our downtown employees, departments and operations in one building, which means greater efficiency for us.

And our new location also provides added convenience for customers. For example, we now have drive-in service facilities just one block east of our new office. The

drive-in entrance is on the south side of 7th Street between Main and Commerce, and the drive-in hours are from 8:00 a.m. to 5:00 p.m. Monday through Friday.

In addition to our main office, facility at the 7th & Commerce corner of our drive-in.

And we have two 24-hour depositories for your use. One is located inside the 7th Street entrance to the Electric Service Building and the other is near the entrance to our

CHAIRMANSHIP of some of the most knowledgeable men on particular subjects under their jurisdiction. The Congress is very much like a corporation. In fact, it is the biggest corporation in the world and represents over 200,000,000 people who are affected by what it does. It should have the most experienced and dedicated individuals to be found anywhere to conduct the affairs of the Nation. It is called representaive because Mem bers come from every corner of the Nation but with wide varying interess. To arrive at legislation those interests many times must be legislatively compromised in order to GOOCH'S FROZEN achieve anything. None can

have his own way entirely. PROBABLY AT NO TIME IN OUR HISTORY has the Congress faced more challenges than at the present time. The incompatibility of inflation and recession at the same time creates unprecedented problems - coping with one can easily further complicate the other and some policies and actions recommended or already in effect, have contributed to the present situation.

NO MATTER HOW LONG ONE MAY HAVE SERVER IN CONGRESS, or how imbued with zeal the newly elected may feel, all face a most consequential year. People deserve and expect the most dedicated efforts at coping with the challenges ahead. Scrutiny and observation should and will be intense. Stakes in our performance during the months and years immediately ahead will be enormous.

Treat the Good Earth With Care and Reverence

Our very life comes from the land. The food we eat . . . the air we breathe . . . are gifts of the good green earth. So are things that replenish the spirit: the sounds and the silences . . . the vistas . . . the sence of space and the order of nature. The land is good to us. Let's preserve and protect it.
