

Senior Citizens

What a glorious week it was for the beginning of the Bicentennial of our country. It was really celebrated in all states as well as some foreign nations.

Just think of the suffering and hardships that Washington

and his men, as well as their loved ones did to establish this nation. Then in the War of 1812, when Washington was burned by the British. Also Charleston and Savannah were captured. Then our small navy has such famous leaders as John Paul Jones. Also Perry being shot through with cannon and as he was carried dying, below deck, said the immortal words "Don't Give Up The Ship." Then President

Monroe told all foreign nations to not try and take any more land in the Americas.

Then in 1836 our own Texas became a nation, after Fannin and his men were murdered at Goliad. The Alamo was put to the test, all dying valiantly, including Travis, Bowie, Bonham and the immortal Crockett. Though at San Jacinto the Texans repaid a part of their debt to Santa Anna and his Mexican army. Many men died in the Mexican War on the Road to Montezuma.

Then the awful Civil War over Slavery. So many lost their lives and fortunes. Then the short Spanish American War, where Teddy Roosevelt led his "Rough Riders" up San Juan Hill. Then so many were killed in World War I. Then the awful World War II, where millions were killed. Though America lost several hundred thousand. Then the Korean war. Many thousands killed. Then the Vietnam Catastrophy, costing some sixty thousand deaths.

So you can look back over our 200 years of war and strife and can see our country is made on so many bloody battles the world over. Remember these sacrifices were made for you and me, that we may be free to choose our leaders and help make our own laws. Love our country or leave it. It is the best in the universe today, despite the many wrongs done by some of our leaders.

Despite the awful calamity of so many being killed and injured in the wars, the amount killed and injured in the last 50 years by cars exceed it very much. The government is trying to cut these figures. Though we see drivers breaking the law every day, many times. Drunk drivers are the cause of over 50 percent of these casualties.

The Reaper has sent from this community to their final resting place L. R. Higginbottom, Mrs. Dora Wood and Robert Jarrett. Our sympathy goes out to the bereaved. Be prepared, as your name could be on the next leaf.

We played 84 some last

week, though poor Granny Kent was out of snuff a part of the time. Mae is still on the slow list. Big Foot is still a little puny, so Mama has to coach him at times. My Boss keeps he so busy in the yard and garden stuff.

Murel and Fats are on the go. I do not see how they can buy that high price gasoline. Easters are just like 16 year old lovers at times. Cat Fuzz and Double Six are busy in those gardens and mowing lawns.

Our office is quiet. The fresh air is on the job now. Doc is busy at his job. Gassy Jack is as contrary as usual. Sugar Beet Luke can still chew and laugh. Speck still gets flustered very easy. Tater Bat still on sick list. Digger is very slow. He has lost his belly laugh. Floyd is still cowboying. Uncle Sam is too busy and Marcy has stopped coaching. So I may take that job as I am at the bottom of the totem pole.

Lignite coal-fired power plants like this cost more than twice as much to build as gas-fired plants.

But we have to build them because we're running out of natural gas.

The generating unit you see here is being built right now at Martin Lake, near Henderson in East Texas. It will make electricity by burning lignite coal.

It will also cost more than two times as much as a comparable gas-fired unit.

So why are we building it? Because new supplies of natural gas, our traditional boiler fuel, are increasingly hard to get and much more costly.

The higher cost of lignite plants means electricity will have to cost you more. But lignite fuel costs less, which in the long run will slow the rising cost of electricity.

Electricity is a good value today when you consider that during the past 10 years it has gone up only about 25%, while the cost of living has gone up 68%.

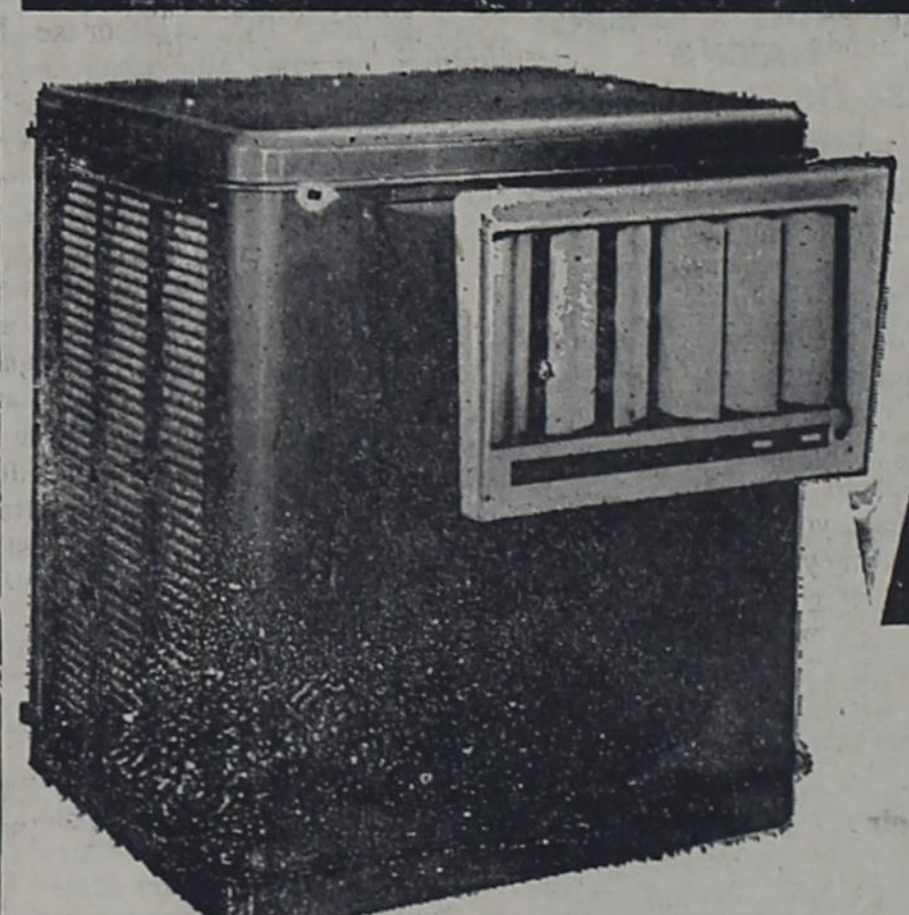

At Texas Electric we're working to make sure you'll continue having the electricity you need. And that it won't cost any more than it has.

As It Looks From Here

OMAR BURLISON, M. C.
17th District, Texas

WASHINGTON, D. C. — THE NEWS MEDIA HAVE CONCENTRATED THEIR ATTENTION on the transgressions of the C.I.A. described in the Rockefeller Commission report. The Commission identifies a number of areas where the Central Intelligence Agency obviously overreacted in certain situations, as was mentioned in this release Feb. 6, 1975. Most of these activities occurred during the late 1960's and early '70s when the radicals were demonstrating. Efforts were made to find out how these huge revolutionary assemblies were financed and if paid for with money coming from outside this country, to identify its source.

WHAT HAS NOT BEEN REPORTED, WITH VERY few exceptions, is Chapter 2 of the report which is headed "Need for Intelligence." In that chapter the report says: "The number of Communist government officials in the United States has tripled since 1960 and is still increasing. Nearly 2,000 of them are now

in this country and a significant percentage have been identified as intelligence agents."

THE REPORT GOES ON TO SAY, "In addition to sending increasing numbers of their citizens to this country openly, many of whom have been trained in espionage, communist bloc countries also place considerable emphasis on the training, provision of false identification, and dispatching of 'illegal' agents — that is, operatives of whom an alias identity has been systematically developed which enables them to live in the United States as American citizens or resident aliens without our knowledge of their true origins."

FURTHER IN CHAPTER 2 THE REPORTS POINT OUT THAT, "WHILE MAKING large scale use of human intelligence sources the communist countries also appear to have developed electronic collection of intelligence to an extraordinary degree of technology and sophistication for use in the United States and elsewhere throughout the world and we believe that these countries can monitor and record thousands of telephone conversations. Americans have a right to be un-

easy, if not seriously disturbed, at the real possibility that their personal and business activities which they discuss freely over the telephone could be recorded and analyzed by agents of a foreign power."

"THIS RAISES THE REAL SPECTER," The report points out "that selected American users of telephones are potentially subject to blackmail that can seriously affect their actions or lead in some cases to recruitment as espionage agents."

IN THESE FINDINGS OF THE ROCKEFELLER COMMISSION, the report seems fairly well balanced and not simply an indictment of the C.I.A. Those who would abolish our intelligence system including the F.B.I., like nothing better than to point out the criticism of these agencies in the report but to ignore the warnings contained in Chapter 2 of the Commission's document.

RIGHT NOW THERE RAGES IN THE U. S. HOUSE OF REPRESENTATIVES THE matter of who is to conduct hearings on the C.I.A., comparable to the one now going on in the Senate headed by Senator Church of Idaho. The radicals want a forum to at-

J. M. ELLISON

At the time of the Indian's first raid through this county in December, 1869, they stole Dr. Richardson's horses. Mr. Ellison, with six others, followed them three days thru a fearful snow storm without any success: "From that time on I was either on a cow hunt or an Indian trail. Two weeks was the longest I ever did without bread." Clothing was hard to get. Calico was fifty cents a yard. Mr. Ellison was sadly in need of a suit of clothes. He writes:

"I went out one day and killed two bucks, dressed their hides and made me a shirt. Then I was alright for the brush, only I had no shoes. I dug a trough out of a cotton wood log, tanned leather and made me some."

Mr. Ellison lived near Gorman where he first settled in 1858.

The above paragraphs were taken from the History of Eastland County by Mrs. George Langston.
