last week's column: Dear Editor:

I am acepting your invitation for all of us to express by 8:30 a. m. Saturday. our views. The first thing I would like to say is that this letter has no intent to stir up controversay or hurt or insult anyone.

I have talked to several parents, teachers, students and just plain citizens and believe I have my facts straight, in situation at school recently.

that teachers are the ones that make the dress code and the school, the teachers, like expected to carry out these rules. And before I go any further I would like to bring to the attention of all parents ities and financial report will a handbook, and his book states very plain what the rules and regulations of the school are. So, if you read the handbook, these rules and regulations should not be new and un-heard-of to you. Therefore, fore, there is no reason for you to be notified in advance that your child is not complying with the rules of the school

The sun is the most powerful source of energy known, if only it can be harnessed. Someday, we hope, widespread solar-generated electricity

# Sunshine is free. So why aren't we using it to make your electricity?

Sure, sunshine is free. But right now the equipment needed to generate electricity with it is very expensive. It will be years before solar power can provide large amounts of electricity at reasonable prices.

To hasten that day, Texas Electric participates in and supports a national solar energy development program.

Meanwhile, we have to make your electricity with fuels available now. That's why we're building lignite coal and nuclear power plants.

While this means electricity will! have to cost more, it also means we'll be able to make sure you continue Electric having the electric- Service ity you need.
