Hearing Tests Are Important
If you have a hearing problem of any kind you would do well to yourself to have an Electronic Hearing Test made to find why, and what can be done to help you before it is too late. The tests are free and will only take about 20 minutes of your time. We check your ears for packed wax, the tubes that let your ears breathe, then with the machine we check your hearing nerve, (bone reading) air conduction, (outside sounds) then measure how much sound the ear will take. We can pinpoint your problem and explain in plain English what can be done to help you, then you make your own decision. We never try to high-pressure you into buying anything. There are thousands of people today suffering from hard of hearingness, (even some that wear Hearing Aids), just because they waited too late to do something about it... don't let this happen to you.

Mr. Joe Treadway will hold his regular Hearing Aid Clinic at the City Library at City Hall in De Leon, Monday, August 16th from 10:30 AM til noon. We invite you to come in for your free test. We do repair service on most makes of Aids, and have a full service on cleaning, tubes, batteries for your Aid, and can always save you money. We are Licensed by the State of Texas to fit and Dispensing of Hearing Aids. We are always close by when you need us. We are in the Stephenville office, (Skipper Real Estate Bldg.) every Thursday, and in the Hamilton office every Friday to run special tests and assist you in every way.

WASHINGTON, D. C. — IT SOUNDS A LITTLE STRANGE and

certainly unchamber-of-commerce when a town decides it does not want more people. THIS SEEMS TO BE THE CASE in quite a few places. One Florida resort area spent a lot of money printing color brochures advertising "the good life" but now they say that is the trouble. THE "GOOD LIFE" IS EVIDENTLY slipping away in a good

many places. When a town becomes bumper-to-bumper, filled curb-to-curb with traffic, it is hardly a place for a pleasant drive. WHEN THE WONDERLAND ADVERTISED is filled with carbon monoxide, bridges over waterways often clogged two miles back, some places are a little worried about attracting people. SOME CITY LEADERS ARE TALKING about a "selective growth." How that is to be arranged is something else. An organization even in Arizona is recommending zero growth because the Colorado River just can't furnish much more water for more people.

SOUTHERN CALIFORNIA IS CONSIDERED a tragedy in a good many places because the slopes of Old Baldy can't be seen many mornings because of the smog. MORE RECENTLY, THE GOVERNOR of Delaware has signed in to law a bill passed by the legislature banning new chemical plants, oil refineries, steel and paper mills from the whole Delaware coast. This is what every city has been after to make it grow and prosper.

It seems the "bigger and better" and "the more the merrier" time has passed. That time was probably created in the days of the old West when merchants, saloon keepers and the gamblers counted the wagon trains leaving town and coming to town as a way to count their blessings.

MUCH ATTENTION IS NOW BEING given by the planners in developing towns and cities that will preserve and restore the pleasantness of living. The good living was supposed to have been furnished when blocks and blocks of close together public housing was built in the cities. Here in Washington, for instance, it has been found that most, if not all, those concentrated projects become slums faster than the slums they were supposed to have cleaned out. It is felt that people occupying great projects thrown together, do not create any community of interest, hardly anyone takes any collective pride in upkeep and soon they have as many rats as were there when older buildings were replaced.

THERE IS SOMETHING WRONG ABOUT ALL THIS. In Europe and

KOKOMO NEWS

By MRS. GLENN JORDAN

Rev. Charles Murray of Kenndale filled the pulpit at the Kokomo Baptist Church on Sunday morning, August 8 in the absence of the pastor, Rev. Joe O'Neal, who was on vacation. Woodrow Browning was the evening speaker. Sunday morning visitors were Mrs. Benny Chupp, Leslie and Pam of Houston, Lisa and Steve Gilbert of Houston, Andrea and Allan Spencer of San Antonio.

O'Neal of Gorman, Paula, Billy and Edward Eppler of Marietta, Ga., Pat Duran and Scott Marble of Gorman, Mr. and Mrs. Lum Tuggle and Mr. and Mrs. Bob Walker of Kokomo, and Kelly Buchanan of Arlington.

Mr. and Mrs. Albert Hendricks took Paula, Billy and Edward Eppler in other older countries, old houses which have been there two centuries still appear neat, clean and are well kept.

THE DEVELOPMENT OF SUBURBS with miles of houses jammed as tightly as the traffic will bear lay flat some of the prettiest hills and trees to be found any place—still this is progress.

FOR THE WELL-HEELED, THERE are whole communities being built around club houses, golf courses and swimming pools. For those a little less better off, new towns are being built where kids can walk to school and ride their bicycles with safety but the old parts of inner cities are the cores of what is left and the problems not only continue but become worse.

THERE SEEMS TO BE A LOT OF ENGINEERING in everything except people. Instead of the "bigger and better" and "the more the merrier," the problem is what is to be done with people, of which there are going to be plenty for a long time. The question is the quality of life and how to preserve that quality instead of quantity, that no one has yet come up with a very satisfying answer.

NOTE: Since the Congress is going into a Recess for the remainder of the month of August, the next three weeks of this column will be vacated and resumed in September.

Topeka, Kansas are visiting here with Mrs. Doris Bryan.

Mr. and Mrs. J. O. Seale of Dimmitt, Mr. and Mrs. Arland Watson, Mr. and Mrs. Jessie Atchison and Mrs. Electra Tatum were visitors in the R. H. Watson home Friday night.

Mr. Crawford Knox, native of Gorman and son of Mrs. Lela Alice Knox of Gorman, received his Bachelor's degree in June from Rhode Island College.

Mr. Knox, now 55, of Greenwich, Rhode Island, interrupted his college education after a year at Randolph Junior College in Cisco, Texas in 1935 because he didn't have enough money to continue.

In the time that has passed since then he has raised a family, pursued careers in the Navy and civil service and watched his oldest son graduate from the University of Rhode Island.

After dropping out of Randolph Junior College during the depression, Mr. Knox operated a dry cleaning business in Texas and worked in the oil fields before joining the Navy in 1940.

He remained in the Navy until 1960, moving to Rhode Island when he was stationed at Quonset Point in 1946, a year after marrying the former Claire North of Long Beach, N. Y.

Before he retired from the Navy as an aviation structural mechanic chief, he decided he wanted to become a teacher and began taking non-credit courses while in the Navy.

After retiring he enrolled at URI full time until 1962, not accepting credit for the courses he had taken 30 years earlier because he felt he should start over after such a long lapse.

In 1962, he again interrupted his studies to work as a Navy technical advisor in Morocco when the Navy was phasing out three military bases.

He returned to URI in 1964, then stopped again two years later to take a civil service job at the Daviessville Seebee Center as an instructor in math, blueprint reading and sometimes part-time since then. Other technical subjects.

He transferred to URI in 1967 while continuing to teach at Daviessville and pursued his studies, some times going to classes full-time and some how he found time in 1965 to take over much of the work involved in building a new house for his family in East Greenwich.

He does not have any immediate plans for switching from his job at Daviessville.

Mr. and Mrs. Knox and their daughter, Laura, were recent visitors in Gorman with relatives and to help celebrate his mother's 90th birthday.

At Texas Electric, People Power is at your service.

Can one of our customer service representatives help you?

Help is just a telephone call away when there's something you need to talk over with us. A question about your electric service. A report of trouble on the lines in your neighborhood. Or a complaint.

The person you'll talk with is one of our customer service representatives. Usually this representative can help you without having to refer you to another person in our company.

But your problem, question or need may be one that requires

special assistance. Then the customer service representative will see that you get the help you need. From a lighting or air conditioning specialist. A home economist. Or one of our troubleshooters.

We want to be sure that you're pleased with your electric service. And that you get the greatest benefit, the most value, from every dollar's worth of electricity you buy from us.

At Texas Electric, People Power is at your service.
