IN MOST PLACES THE DOVE
SEASON has just closed. Soon will
come quail and duck season along
with deer season. Space does not
permit a review of what fish and permit a review of what hish and wildlife experts say about thinning a certain number of birds and ani-mals in order for their habitats to accomodate them, but one example. It is said that covey of quail should be reduced by one-third in each season and scattered to start new families. This theory may be good season and scattered to start new families. This theory may be good if there is enough cover for refuge. The trouble is that in many places there is less and less cover — yes, another "don't" — don't shoot the "house covey" — hunters know what this means.

NOW ON DEER HUNTING here are some facetious tins.

are some facetious tips:
1. FIRST YOU NEED A FAST I. FIRST YOU NEED A FAST CAR — so you can get there early on the first day of the season — get the best place and save a chance of being shot at before you get in the brush. As a side bene-fit it saves the other guy some

2. BE SURE TO SHOOT AT ANYTHING THAT MOVES. It it's not a deer, it might be your best friend.

3. WHEN YOU FINALLY GET YOUR DEER (maybe at 50 yards) be sure to pump a few more shots into the hams, backstrap and sto-

## WITH a Flameless electric dryer!

How many times have you dreaded seeing washday roll around—because of rain, blue northers, dusty winds or hundred-plus sunshine?

These are hang-ups you wouldn't have to face if you owned a flamel tric clothes dryer. You'd just move the clothes from your washer into the dryer, turn a dial and forget about the weather.

And you could dry clothes any time of the day or night.

If you were drying permanent press clothes, many would come out ready for wearing. Which could save you lots of ironing.

An electric dryer really makes sense, it costs less to buy. Only one energy source is needed. And it saves you hours of work for pennies a load.

See your appliance dealer soon about a flameless electric dryer.
