## PEANUT PROGRAM IN GREAT DANGER; MEETING CALLED

Because of the serious threat posed by GATT (General Agreement on Tariffs and Trade) and the possible loss of Section 22 a meeting of all peanut and cotton farmers has been called.

The meeting will be Friday, April 19, at 7:30 p.m. in the School Lunchroom at Gorman. Explanations of what needs to be done will be given along with some important information.

Ross Wilson, Manager of Southwestern Peanut Growers' Association, said, "In our opinion this is the most serious threat to the peanut program that we have seen - ever."

The next 60 days are crucial as Congress will decide by June 1 whether to grant the Administration's request to extend authority for fast track legislation to implement any further GATT agreement.

Benny Hagan, a director of SWPGA, said, "If we want to keep a profitable peanut program, it is mandatory that we get involved." He urges peanut producers to spread the word about the meeting.

## PEANUT SUPPORT LEVELS FOR 1991 CROP

The federal support price for 1991 crop quota peanuts is \$642.79 per ton, \$11.47 per ton more than last year, according to David Martin, County Executive Director of the Eastland County Agricultural Stabilization and Conservation Service. The support level for additional peanuts is \$149.75, the same as last year.

Martin said quota peanuts are those grown on a farm within the farm's poundage quota. Additional peanuts are those grown in excess of the farm's poundage quota, or those grown on a farm with no poundage quota.

USDA increased the support level for quota peanuts because the cost of producing the 1990 crop was greater than the cost of producing the 1989 peanut crop. Martin said the level for additional peanuts must be set at a rate estimated to ensure no government loss on these peanuts. In determining this level, USDA considers the demand for peanut oil and peanut meal, the expected prices for other vegetable oils and protein meals, and the demand for peanuts in the foreign market.

The ASCS official said 1991 crop additional peanuts owned or controlled by the Commodity Credit Corporation will be sold for export edible use at no less than \$400 per ton, the same as last year.

### ORDINANCE #311

This ordinance on establishing a records management program in the City Office was passed upon the second reading at a regular City Commission meeting held on April 4, 1991. This ordinance was required by state law. The ordinance is filed at the City Office for any citizen who would like to view its full contents.

*"My heat pump's so efficient it saves money. And it's a clean system. I like what it means for the environment."*

—Elta Chandler  
Park Board Member

Elta Chandler cools and heats her home with a heat pump because it saves money and energy. And since it's electric, it's "wonderfully clean."

A heat pump uses the energy in the air to keep her home comfortable all year. Even on cold winter days there's heat in the air. A heat pump captures that heat and uses it.

And it costs less to operate than a gas furnace. It's so efficient that for each unit of energy it uses, it creates two to three units of heat.

In the summer a heat pump becomes a high-efficiency air conditioner, capturing the heat inside the home and removing it.

For more information, call a heat pump dealer or TU Electric. It's your chance to save more than money.
