Says Stubborn Depositors "Make It Impossible to Put Over."

The Starnes plan for opening the First National bank is a dead issue, according to an unofficial communication received from Judge Starnes by J. F. Kious. Mr. Kious had written him asking for information regarding the plan.

E. B. Cushing, who is in charge of the affairs of the bank under the receivership, said today that the matter of liquidating the accounts had gone regularly forward, though nothing had been done to interfere with the plan as outlined by Judge Star-He declared that as quickly as he had received official information from Starnes that the plan had been abandoned he would place the situation before the federal comptroller of the currency and see if he wanted to make a public statement.

fresh, live tires. Being made now. Being shipped now."

TN all of modern merchandising the biggest conundrum is the fabric tire situation.

Around 70% of all car owners use fabric tires.

Their instinct for quality is as strong and insistent as any one else's.

Why, then, are they offered such hodge-podge stocks of "discount tires,""odd lots,""seconds," "retreads" and other so-called bargains of uncertain origin?

* * *

Sooner or later the public always seeks out quality. As a matter of self-protection-iffor/ no other reason. The out-and-out opinion in favor of U.S. Fabric Tires has spread more this year than it ever did.

People have gotten very close to the U.S. policy. Felt it. Benefited by it. And passed the word along.

It's a policy settled to one standard for all U.S. Tires. Whether fabrics or cords. Small sizes or large.

Giving to the fabric tire user fresh, live tires. Being made now. Being shipped now.

All the original U.S. vitality and service comes through when you buy a U. S. Fabric Tire.

"Usco," "Chain," "Nobby." Three different treads.

Built by the same brains, the same policy, the same quality ideals that have made U.S. Royal Cords the standard measure of tire worth.

The Fastest Selling Tire In America

The increasing popular demand for the Firestone Standard 30x3½ inch tire over a period of years has given us big volume. Our Plant No. 2 devoted wholly to this size tire with a capacity of 16,000 tires and 20,000 tubes per day cuts costs on every operation.

On May 2, we dropped our price to \$13.95 passing on to the car owner the full benefits of this big sales volume and this labor-saving plant. This tire has been our standard for years---four plies long staple fabric---extra gum between plies---heavy non-skid tread. The greatest value ever offered car owners. Insist on Firestone.

Our Cord Tire Values

Firestone Cord tires are made exclusively in Plant No. 1. Our process of double gum-dipping each ply of cord gives thicker insulation. The massive non-skid tread, with extra thickness where wear is most severe, gives real effectiveness in holding the car against slipping and adds many extra miles of service.

Firestone Cord tires are sold at the lowest prices in cord tire history: $30x3\frac{1}{2}$, \$24.50; 32x4, \$46.30; $34x4\frac{1}{2}$, \$54.90.
