FIFTY-THIRD YEAR

10 CENTS

Literate Americans, arise! It is high time for the professional politicians and public opinion motivators to realize that we, too, have a mind and can comprehend some of the phenomena which occurs in the world around us.

Is Barry Goldwater that hard to understand? Do we need someone to interpret his every utterance? Must he be urged to "clarify" his statements days after they are made, as the columnists and commentators wrangle over meanings they insist are hidden in his rhetoric?

Well, I don't think so. I have read his best-known book, *Conscience of a Conservative*, and I have heard him on radio and seen him on TV. To me there isn't the slightest doubt about what he means.

Regardless of the vehicles he chooses to express his thoughts, I understand him to mean that he wants to restore the freedom, independence, and, yes, responsibility to the American citizen.

He means to find a way to restore freedom of choice--not state force--to man's actions. He means to loose the bonds of government intervention from the arms and legs of the businessman, the farmer, and the worker.

He means to live by a moral code... and if necessary, to die by it. He means to do what a man thinks is right, after sober reflection with the Author of all morality, and to thunder with the consequences.

He means to make America the strongest nation on the earth, to preserve both our own and other men's freedoms everywhere. He means to live by a code of honor and trust and integrity in national as well as personal life, but to be tough enough to match any bully on the face of the globe.

He means to practice no discrimination among men as regards their color or ethnic background. He means to let every man stand on his own individual worth. But he means to pass no law that makes men social equals, nor to pursue through government intervention to force men to share their property and associations equally with all other men, knowing that laws do not make men love one another.

He means to make adults responsible for the education of their own children, and for their own old age. He means to stop giving money away we haven't got, and stop buying votes with tax cuts, pay raises, increased government benefits, and pork barrel programs that have brought us to the brink of national insolvency.

Now you know why the experts cannot understand what Barry Goldwater means. Now (Continued on page 2)

Brig. Gen. John Hightower, center, was guest speaker at Rotary Tuesday noon, Prentice Mills, left, Rotary president, greets the guest's father, John Hightower Sr. The general was chief of staff of the American Military Assistance Group on Formosa last year and brought the Rotarians and up-to-date account of conditions in that part of the Far East.

FOR FOOTBALL--

Practice Continues Schedule Released

Farwell Steer football players are continuing practice this week under the watchful eyes of Coaches Toby Booth, Vernon Scott and Jerry Dee Owen. Approximately 35 young men have been showing up for practice sessions with 16 returning lettermen in the group. Practice sessions began August 17.

First game for the squad has been scheduled for Sept. 4, 8 p. m. on the local field. They will collide with Friona, an old rival in the opening game.

Schedule of 1964 games follows:

Sept. 4Friona	Here
Sept. 11Bovina	Here
Sept. 18Plains	There
Sept. 25Open	There
Oct. 2Seagraves	There
Oct. 9Frenship	There
Oct. 16Kress	Here
Oct. 23Hale Center	Here
Oct. 30Silverton	Here
Nov. 6Sudan	There
Nov. 13Springlake	There
	*Conference Games	

Non Conference games at 8 p. m. Conference games at 7:30 p. m.

Preceding the opening game members of the Quarterback Club are sponsoring a barbeque. Price of tickets if bought in advance is \$1.50-adults; 75¢ children. Tickets obtained at the door are \$2.-adults or \$1.-for children.

Lions Club Broom Sale Set For Sept. 12

Local Lions Club members announce that the annual broom sale for the group will be held on Sept. 12. A door to door canvas of the towns will be made during the day, beginning at 8 a. m.

Any person desiring to order brooms, mops or other available household items and have them delivered on that day should contact James Ussery at the Cover Shop.

A stand will be maintained in the downtown area on the day of the sale.

All funds derived from the sale of the household items will go into the sight conservation fund. Glasses will be bought for school children and other persons who are unable to secure them otherwise.

Child Hurt In Fall From Horse

According to latest reports Jill Cathey 12, daughter of Mr. and Mrs. Snooks Cathey who was injured in a fall from a horse on Saturday is doing "just fine." "Jill," said her mother, "was riding a horse belonging (Continued on page 2)

Meeting Set

All parents of band students in the Farwell school are invited and urged to attend the meeting of the Band Boosters Organization to be held at the band hall, Wednesday, Sept. 2 2:30 p. m. (Continued on page 2)

Tickets On Sale

Season tickets for the coming football season are now on sale at the high school superintendents' office in Farwell. Price of the tickets which cover all home games is \$6.25 per adult. The tickets will remain on sale until the first game scheduled for Sept. 4, with Friona.

Schools in district 3-A, of which Farwell is a member, have voted to raise the admittance fee for adults from \$1.00 to \$1.25 each per game. Fee for all school students will remain at the regular 50¢ each. Patrons wishing to park cars inside the football field will be charged 50¢ per car.

The stands at the Farwell football field will seat approximately 1,600 people.

392 Enroll At Texico

392 students have enrolled in the Texico school according to figures released from the superintendent's office on Wednesday morning. Several other students are expected to enroll by end of the present week.

The total number of students enrolling is a little less than a year ago, according to Supt. McDonald with most of the loss in the seventh, eighth and ninth grades. Most of the losses, according to the superintendent, are because of lack of adequate housing in Texico, for families with children in that age group.

The elementary grades added a total of 15 students to their ranks this year while the high school division (6th through 12) shows a loss of some 20 students.

Enrollment by classes follows: seniors-24; juniors-27; sophomores-29; freshmen-26; eighth grade-26; seventh grade-31; sixth grade-31; fifth grade-33; fourth grade-35; third grade-41; second grade-44 and first grade-45.

In other news from the school announcement was made that school lunches will remain the same for the coming year. Students may buy the lunches for \$5. for one month or may pay 30¢ per day on a weekly basis. Teachers lunches will remain at \$7. per month.

Faculty for the Farwell School is almost completed with only one vacancy remaining. Still needed is a second grade teacher. However, Supt. W. M. Roberts feels sure the vacancy will be filled by the end of the present week.

Two teachers, Mr. and Mrs. Carlton Earp were hired last week. Earp will teach history and Mrs. Earp will teach English and be Librarian. Vernon Scott will be transferred to girls' basketball coach and Jerry Dee Owen will assist with the football coaching program.

Both Mr. and Mrs. Earp are graduates of McMurry College in Abilene. She taught last year at Baird and he will be on his first teaching assignment. They are parents of a small child.

Other new teachers in the school will be: Miss Laura Wyman, high school English and Spanish, Mrs. Mary Ellison, high school English and speech, Robert (Toby) Booth, head football coach, athletic director and math, Johnny Willson, sixth

grade, Mrs. Jo Springer, fourth grade, Mrs. Beth Miller, second grade, Mrs. Averil Cochran, first grade, and Roe Davenport, chemistry, physics and science.

Returning teachers are: W. M. Roberts, supt., Amos Tatum, high school principal, James Craig, head junior high school teacher, Jack Williams, elementary principal, Robert Morton, agriculture, Mrs. Marjorie Balestri, home economics, Mrs. Peggy Woodard, commercial subjects, Tommy Mayfield, high school, junior high and elementary bands, Mrs. Lenora Tatum, junior high English, Jerry Dee Owen, biology and junior high coach, Mrs. Loree Hill, junior high math, Vernon Scott, junior high history, girls' and boys' basketball coach, Miss Maude Hicks, sixth grade and Johnny Willson, sixth grade.

Others include Mrs. Margaret Kennedy, fifth grade, Mrs. Hattie Boling, fifth grade, Mrs. Hattie Coffer, fourth grade, Mrs. Julia Hebison, third grade,

Mrs. Isla Rhea Huffaker, third grade, Mrs. Lauretta Pool, second grade, Mrs. Elsie Cain, first grade, and Mrs. Mary Whitley, first grade.

Special teachers are Mrs. Katherine Lockhart, school nurse and Mrs. Frances Clarke, counselor. Cafeteria personnel are Mrs. Viola Haynie, supervisor, Mmes. Freddie Harriman, Mildred Sharum, Wanda Walker, Mildred Erwin and Lillie Hughes.

H. R. (Mutt) Crook is foreman of the bus crew. Drivers are Jerry Owen, Bob Scott Anderson, Steven Ford, Johnny Actkinson, Gilbert Dale and Bruce Billingsley.

Custodians are Percy Tipton and Ernest Black, Mrs. Georgia Lee Rundell is again school secretary.

High school students along with seventh and eighth grade pupils are registering Thursday and Friday (today). All elementary students will register on Monday, August 31, beginning day of school.

Contest Begins Next Week

The annual football contest which is carried each year in the State Line Tribune, during the Farwell Football season, will begin next week with local businesses sponsoring the contest.

Rules for the contest are the same as those in previous years. All entries must be plainly marked, (with name) and must be postmarked no later than Friday; or entries may be left at the office of the State Line Tribune no later than 5 p. m. on Friday of each week. The contest will run for the next 11 weeks, beginning Sept. 4.

Grand prize for the contest winner will be two tickets to the Cotton Bowl game and \$50. expense money. Weekly prizes of \$5.00 (first place); \$3.00 (second place) and \$1.00 (third place) will be awarded.

Father Of Local Man Dies

Funeral services were conducted in Plainview on Wednesday for Charles Ivan Watts 78, father of A. T. Watts of

Farwell. Burial was in the Plainview Cemetery under direction of Lemon Funeral Home.

Mr. Watts, who was preceded in death by his wife on July 2 had been in ill health for some time. He passed away Monday night at his home in Plainview.

Survivors include the local son, A. T. Watts, and five other sons, 13 grandchildren and numerous great-grandchildren.

Attending services from Farwell were Mr. and Mrs. Bill Bannister, Billy Watts and Joyce Kay Watts.

Coffee Shop Handicappers--Studying a pre-season form sheet these four football enthusiasts prepare for the Tribune's big Cotton Bowl contest. Left to right, Fred Cuttis, Harold Travis, Smokey Gast and Ralph Franse.

Free Supper For Quarterback Club, Football Boys

A free supper for all members of the Farwell Quarterback Club and all members of the football squad and coaches has been announced for Tuesday, Sept. 1 7:30 p. m. at Cashey's Restaurant, by Henry Haseloff president of the group.

Any person desiring membership in the Quarterback Club may obtain his membership card at the door on the evening of the supper, announces Haseloff.

Plans have been completed for the Sept. 4, 4:30 p. m. until 7:30 p. m. barbeque which will be served at the high school cafeteria. Tickets may be bought for the barbeque from any member of the Quarterback Club for \$1.50-adults or 75¢ for children. Tickets bought at the door will be \$2.00-adults or \$1.00 for children.

The barbeque meal will be served preceding the Friona-Farwell game.

Church Homecoming September 6

A cordial invitation is extended by the Lazbuddie Baptist Church to all former pastors, members and friends of the church to attend a "Homecoming and Bond Burning" on September 6 between the hours of 10 a. m. and 8 p. m.

The noon and evening meal will be served at the church, according to Jimmy Ivy, church treasurer and spokesman for the group.

FAMILIAR SIGHTS

Rusty Rucker, son of Mr. and Mrs. Johnnie Rucker and Vicki Snodgrass, daughter of Mr. and Mrs. Roy Snodgrass register for their first day of school on Monday, Mrs. Leroy Faville, veteran first grade teacher at the school directs activities for the group. Mabel Salguero in the background wonders about the whole process.

Second grade children in the room of Mrs. C. B. Stockton, another veteran teacher at Texico, try hard to impress teacher by being especially quiet and working hard at coloring pictures while waiting their turn to register. Two girls are attracted by the bulletin board which displays the slogan "Read and Be Wise" along with several colorful reading books.

Yum, Yum -- Cooks -- Mrs. Sam Hukill, Mrs. Nora Day, Mrs. A. B. Bell and Mrs. Paul Huber were hard at work on the first day of school preparing cherry cobbler, to be served a la mode, for the students and teachers. Many students take advantage of the fine meals served in the school cafeteria daily at the minimum rate.

Entered as second class matter at Farwell, Texas, under the act of March 3rd, 1879. Published every Thursday.

SUBSCRIPTION RATES -- Farmer and adjoining counties, \$3.00 per year; elsewhere, \$4.00 per year. Payable in advance.

Okla. Lane Telephone Exchange To Up Grade Service

West Texas Rural Telephone Cooperative announced this week that their Okla. Lane Exchange is scheduled to be converted to five party service. This cut over will be Sept. 1-2 and practically all telephone numbers will be changed. A

temporary Okla. Lane directory has been published and is available to Texico-Farwell Mountain States subscribers at the Village TV & Electronics, in Texico and at the Security State Bank in Farwell.

According to Vernon Inmon, manager of the co-op, this will complete their elaborate construction program of converting all its seven exchanges to five party service.

Band Meeting--

(Continued from page 1)

to her friend, Ardell Autrey, when the animal decided to go home and her daughter was unable to control the horse." She is unsure whether the child fell or was thrown from the horse. However, the girl was knocked unconscious for a short period of time, giving her parents a terrible fright.

She was rushed to the hospital and placed under a doctor's care. After repeated examination and x-rays she was released to come home, where she is confined with bad bruises. No bones were broken and she was not seriously hurt, according to her mother.

The condition of J. R. Thornton who has been hospitalized in Amarillo for the past two weeks following surgery is described as improving, by family members. He is expected to be released from the hospital in the next few days.

Hoppers--

(Continued from page 1)

you know why they insist on a rehash of everything he says so as to make it intelligible.

The reason is so obvious it fairly shouts for attention: Nobody has talked like this in public life for decades. And nobody is listening and nobody can understand. Nobody, that is, but the people.

Several other local young people are making plans to return to college, however we were unable to contact them for details.

CINDY WATTS

Cindy Watts Is Six Years Old

Cindy Watts, daughter of Mr. and Mrs. Billy Watts entertained a group of friends on Tuesday marking the event of her sixth birthday and also celebrating her enrollment in first grade.

Party favors were straw hats and musical balloons. Birthday cake featuring a pastel pink, green and white color scheme was served with ice cream and punch.

The afternoon was spent in playing outside games and riding the bicycle Cindy received from her parents, for her birthday.

Attending the social were: Linda, Johnny and Rex Jennings, Cindy's cousin from Quitague, Debbie, Cheralene and Jeff Tharp, Gerald and Kevin Hard-

age, Deana Williams, Gay Coffman, Darrel Doshier, John Graham, Joyce Kay Watts, Gail Vandiver, Mona Hardage, Jerri Tharp, Carolyn Bannister, Terri Bannister, and her grandparents, Mr. and Mrs. Finis Jennings.

Her other grandparents Mr. and Mrs. A. T. Watts were unable to attend the party, however they sent a gift.

A Daughter For Don Lovetts

Mr. and Mrs. Don Lovett announce the arrival of a daughter on August 21 at Clovis Memorial Hospital. The little girl, who weighed 7 lb. 4 oz. on arrival has been named Kimberly Rene'. Mother and baby are doing fine.

Grandparents of the new arrival are Mr. and Mrs. Virgil Woodson, Farwell and Mr. and Mrs. Roy Lovett, Texico.

Mrs. Lovett and baby daughter have spent the week in the home of Mrs. Lovett's parents.

Mrs. E. Servatius Has Minor Surgery

Mrs. Eugene Servatius (Fay Martin) was released from Clovis Memorial Hospital on Tuesday morning. She had undergone minor surgery on Monday. However, family members report that she is in good condition and will return to the doctor for a check up later this week.

Marty Javon Jones, son of Mr. and Mrs. Don Jones celebrated his first birthday on August 19. Helping the young man to celebrate were his grandparents, Mr. and Mrs. Ernest Kube and his aunt, Bobby Kaye Kube. Other grandparents of the young man are Mr. and Mrs. Curtis Jones.

Texico Woman's Club Holds Planning Session

Officers of Texico Woman's Club held a planning session in the home of Mrs. Ed Farmer, president of the group on Monday evening.

Announcement was made that Mrs. Wesley Engram, who served as president of the Texico group last year, had been named to the state chairmanship of Home Management and Finance Division of Home Life Department of the New Mexico Federated Women's Clubs. Mrs. Elmer Teel was appointed to the chairmanship of district 3 of the Harriet Donahoo scholarship fund.

Theme for the club year as announced by Mrs. Farmer is "Better Community Service through Cooperation." She also appointed committees for the year.

Terry Niece, who was recipient of the scholarship fund grant at the close of school has announced that he will be unable to use the grant since he will not be going to college; therefore Bill Billington, first alternate, will receive the \$50. to use when he enrolls at New Mexico State University.

First meeting for the year will be on Sept. 21.

Attending the planning session were: Mmes. Ed Farmer, Harvey Hudnall, Wesley Engram, Elmer Teel, Melvin Burns, and Truman Kittrell.

Visitors In Williams Home

Visitors in the home of Mr. and Mrs. E. G. (Blackie) Williams recently have been their children, Canyon and Mr. and Mrs. Herbert Williams and Danny, Lubbock.

Also visiting in the Williams home on Sundays were Mr. and Mrs. H. E. Marables, Portales. Mr. and Mrs. Marables are parents of Mrs. Glen Williams.

Farewell Social Honors Fahsholtz Family

Mr. and Mrs. Edwin Fahsholtz and family of the Pleasant Hill Community were honorees for a farewell social at the community center on Tuesday evening when approximately 100 persons gathered to present them with gifts.

The Fahsholtzs, who are long time residents of the community are moving to Union, Oregon to make their home. Mrs. Fahsholtz, who has been a 4-H Club leader for many years was presented with a desk set, consisting of address book, letter box and an engraved Shaffer fountain pen by the club.

Residents of the community presented the family with a pole lamp and a Queen Elizabeth bedspread.

Hot dogs, cake and ice cream were served.

Sheriff Charlie Lovelace checks footprints found near the fence at Kemp Lumber Company, which was climbed on Tuesday night to gain entry to the building. A break in was also reported at Dial Variety Store in Texico on the same night.

Texico To Have Zoning Ordinance

At the Friday meeting of Texico town council zoning ordinance #156 was unanimously adopted by commission members. The ordinance will regulate the size and type of building (residence or business) which can legally be erected in any zone. It also prohibits the alteration of buildings already in the zoned area (without the approval of the zoning commission).

Any person desiring to know more about the zoning ordinance is invited to visit the town hall and examine the zoning map.

The Jones Brothers, who are in charge of the garbage and trash disposal unit, reported that a new pit is needed at the city dump ground. At the present time commission members are investigating the cost of digging a new pit. Also discussed was a pest control program for the dump ground and the town sewage disposal unit. Reports on the two projects will be heard at the next town meeting.

The report of police magistrate, Sam Lewis, in the amount of \$230 collected in fines for the previous month was approved.

W. H. Spurlin who has been hospitalized several times in recent weeks for treatment, is described as being in fair condition by family members. He was released from the hospital on Wednesday.

Two Break Ins Reported

Break ins at two local businesses were reported on Wednesday morning to the sheriff. Entry was gained at Kemp Lumber company in Farwell and at Dial Variety Store in Texico.

Joe Crume, manager of the lumber company had found nothing of value missing by noon on Wednesday. However, Mrs. Clytie Dial reported that some money was missing from her place of business.

Entry was gained at the lumber company by climbing a high wire fence, tearing away a screen from a window and raising the window. Once entry was gained two doors in the interior of the building were torn away to allow passage into the office.

broken. Entry was also gained into the old building next door to the variety store, by breaking in doors at the rear of the building.

Officers were investigating the break ins late Wednesday.

Breakfast Meeting

Parmer County farmers are invited to attend a Farmers Union meeting Wednesday morning at 7:30 in Bovina Restaurant.

Jay Naman, of Waco, state president of the organization, will be present to introduce a new fieldman for the West Texas area.

"We cordially invite all farmers in the county to attend the breakfast," says Travis Dyer of Bovina, vice president of the county organization.

DEDICATION SET --

Building Completed For Calvary Baptist

Services were held in the new Calvary Baptist Church Building on Sunday, August 23 only a few months after plans were completed for erecting the building. The church, located on 7th St. in Farwell was built at a cost of approximately \$20,000, with the pastor, Johnny Willson and members of the congregation working along side hired carpenters to complete the building in the least possible time.

The building will be dedicated in special services Sunday afternoon. Rev. T. R. Shannon, inter-state missionary at the time the local group was begun as a mission, and who later returned to serve as pastor for the congregation will preach the dedicatory sermon.

During the weekend, beginning Friday, August 28 a revival will be held at the church with the pastor doing the preaching. On Sunday dinner will be served at the church, prior to the dedication service. Sunday evening at the close of the regular evening worship service a baptismal service will be conducted.

The local group first began holding services in the old Methodist church building in Texico in December 1960 and in March 1961 they were organized into a church. At that time they had only 13 or 14 persons attending the services with some nine members in the church. The church has grown over a period of years until at the present time it has approximately 35 active members and many more enrolled in Sunday School. Last week a total of 62 persons were reported in Sunday School at the church.

Mrs. G. T. Watkins, one of the enthusiastic members of the congregation said, "We have had more members a few times but some members have moved away, yet others always come to replace them."

The new church building, of brick, houses some eight or nine classrooms with other space available for conversion to study rooms when the need arises. It also has a pastor's study and a sanctuary which will seat some 175 persons comfortably.

Pews in the building are in oak, upholstered with rose nylon

tapestry material. Appropriate size chairs and tables are in each of the Sunday School classrooms and the kitchen is fully equipped with a new stove and refrigerator.

Floor covering in the building is of tile. Pulpit area is carpeted with a rose nylon carpet. Directly in front of the pulpit stand is a communion table bearing the words "This Do In Remembrance of Me." Piano for the new building was bought by members of the Women's Missionary Association and they have also assisted in buying other furniture for the new church home.

Alan Powers served as pastor of the church for an eight month period following the resignation of Rev. T. R. Shannon, who has retired and is now living in Tulla.

Judy Koelzer, Christi Ivy Win County Bake Show

First place winner in the senior division of the Parmer County 4-H Club Better Bake Show held Wednesday at the Hub Community Center according to Cricket B. Taylor, Parmer County HD Agent, was Judy Koelzer, 16 year old daughter of Mr. and Mrs. B. N. Koelzer of Lazbuddie, Miss Koelzer was recently first place winner in the County dress revue and participated in the district revue in Amarillo, where she was given a second place rating. Second highest score in the

bake show was made by Janis Billingsley, daughter of Mr. and Mrs. Leon Billingsley of the Oklahoma Lane Club. Janis was not eligible to participate in the district competition this year due to the fact that she was winner of the \$100 (one hundred dollar) bond two years ago.

Next highest score in the senior division went to Katie Blackstone also of the Lazbuddie Club. She will be alternate for Judy, to the district bake show, to be held at the Tri-State Fair in Amarillo in September.

In the 11 and 12 year old group, Christi Ivy, Lazbuddie was high score winner followed by Ann Blackstone, sister of Katie.

Each of the girls was judged on two products, "Quick Loaf Bread," and "Bar Cookies" plus their record books.

Judy made nut bread and brownies and Katie entered peanut butter bread and brownies. In the junior division, Christi entered banana nut bread, and Ann showed nut bread, with each of the girls making brownies for her bar cookies.

Judy Koelzer, first place winner in the Parmer County Bake Show and Katie Blackstone, second place winner, seated, display their prize winning "Quick Breads" and "Brownies" along with Christi Ivy, junior division winner, while Ann Blackstone second place winner in the junior division looks on. Judy will be entered in district competition at the Tri-State Fair in Amarillo. Junior winners are not eligible to participate in district competition.

Caddo Wheat Makes Strong Showing

Twenty Texas producers of certified seed wheat like the new variety Caddo. The 20 received foundation seed of the new variety in the fall of 1963 and have just reported on their 1964 harvests to Dr. L. M. Atkins, small grain section leader of the Texas Agricultural Experiment Station.

The reports came from every section of Texas. Dr. Atkins said, and practically all reported Caddo yields were equal to or better than those of other varieties grown on their farms. Yields ranged from less than 15 bushels per acre to a high of 84.3 bushels. The high yield was produced under irrigation near Spearman in the upper Panhandle and compared with a yield of 76.1 bushels per acre for Improved Triumph on the same farm.

On a Castro County farm near Dimmitt, Caddo produced 57 bushels per acre as against 42 bushels for Kaw. The 20 growers reported an overall average of 33 bushels for Caddo against a 29 bushel average for other varieties grown on the same farms.

The growers also told Dr. Atkins they liked the agronomic characteristics of the new wheat. Seven said it produced more forage for winter grazing, the same number said it had stronger straw than the other variety grown and six said it was more hail resistant. On

one farm, Caddo was damaged only 8 per cent by hail compared with 17 per cent for Crockett.

Several of the growers told Dr. Atkins their Caddo had higher test weight per bushel and that it rusted less than other varieties -- two very important considerations when selecting a desirable variety of wheat for planting.

Caddo was developed by Dr. Atkins and Dr. Kenneth B. Porter, Texas Station agronomists in cooperation with the U. S. Department of Agriculture. The agronomists pointed out that before the seed of the new variety was released to growers, tests in Texas and over the Southern Great Plains area gave Caddo a rating of excellent on yield, test weight, quality and resistance to leaf rust. It is also widely adapted, including areas in Central Texas, they said.

Sherilyn Bailey of Jefferson, newly named rural civil defense specialist with the Agricultural Extension Service of Texas A&M University, assumed duties this week. She works with

Tommy Hollmig, who holds a similar position, and will be giving leadership to educational programs dealing with rural civil defense being conducted by state and county Extension personnel.

Salt Analysis Of Irrigation Water Advised

It's poor business to guess at the quality of your irrigation water. Rather than be in doubt as to possible harmful effects of the water on future soil productivity, Jim Valentine, area Extension soil chemist, suggests you have the water evaluated by a chemical analysis. The ideal time to collect samples is during the highest period of water use.

This need is particularly acute with new wells and in instances where wells are deeper

than average for the area. Valentine says it is known that common salt is high concentrations may exist below the red bed formation. If wells extend into this strata, there is a greater possibility of dangerous salt levels in the water.

Soils vary widely in their ability to tolerate salt without being harmed -- and some crops are more tolerant than others. Clays, where the water intake rate is already slow, can be

made even less porous by a water high in sodium. Obtaining stands can become a problem on lighter soils due to sodium accumulation that "seals" or crusts the surface.

Water samples may be submitted to the Soil Testing Laboratory at Texas A&M University. Samples must be accompanied by the completed Information Sheet D-617, available at the local county agricultural agent's office. The present fee is \$5.00 per sample.

4-H BAKE SHOW

The County 4-H Better Bake Show is over and Judy Koelzer did it again. She was 1st. place county winner in the bake show and will enter the District Contest to be held at the Tri-State Fair in September at Amarillo.

This makes three times this year that Judy has represented Parmer County 4-H Clubs and competed in Award events. She entered the District Contest in Favorite Food Show, the District Dress Revue and now the Better Bake Show. We are hoping she will be the District winner and come home with that \$100. bond that is given to the District winner.

NEW FARM HOME IN YOUR FUTURE?

Planning a new farm home can mean many happy hours for the whole family. Because a house will probably constitute one of the largest investments you will ever make, plan it carefully for your special requirements.

Farm home plans of various sizes and designs have been developed by architects, engineers, and home economists of the U. S. Department of Agriculture and the States. Working drawings of these plans are available through your county agent or from the Extension agricultural engineer at your State Agricultural College.

Small families or elderly couples will be interested in the compact, reasonably priced 2-bedroom houses described in Plans Nos. 7160, 7158, 7157, 7156, and 7149. Plan No. 7163 is for a house with a base-

ment that could be used for extra bedrooms, a farm office, or sewing or recreation space. Plan No. 7156 is designed as an expandable house -- the main part could be completed and lived in, and the bedrooms, porch, and carport could be added as time and money permit.

For established farms where the family has outgrown a smaller dwelling, Plan No. 7165 for 3-bedroom homes, and 7162 for 4-bedroom home are especially suitable.

Ask for the working drawings by number from your county Extension agents. There is usually a small charge. If they are not available in your State, USDA can direct you to another source. The plans are developed by Agricultural Engineering Research Division.

For the handicapped or older people who are planning compact smaller homes, a new plan which has been received in our office, has considered every detail to make the home convenient, to save time and energy and fit the needs of this group.

Big Displays Planned At HPRF Field Day

One of the attractions of interest to farmers is the farm equipment display at the Eighth Annual Field Day of the High Plains Research Foundation Thursday afternoon, September 10. The tour of the Foundation will end at this equipment display. Farm machinery, irrigation equipment, underground pipe, fertilizer materials and equipment will be on display.

Many firms participate in this display with the latest equipment now or soon to be available to the agricultural industry. Representatives of these companies will be available to explore the use and value of their equipment in economic farm operation.

Carl Hill, Jr., Connally Implement Company, is Chairman of the group of Board of Trustee Members who will be hosts here for the afternoon. Those who have been invited to assist in greeting and guiding visitors to the equipment they are interested in each hour in order are: Orville Nash, Guymon, Oklahoma; J. Frank Gray, Lubbock; Grady Shepard, Hale Center; Harmon White, Cotton Center;

Allan Webb, Dimmitt; Joe Foster, Lockney; Asa Willis, Texline; Elmer McGill, Olton; Willis Hawkins, Sr., Hart; E. R. Steen, Idalou; Jarvis Angeley, Earth; and Bob Francy, Happy.

Grant Hanna, Board Member and District Commander of the 18th District of the American Legion will be Chairman of the patriotic demonstration put on by Post 260, Plainview American Legion, assisted by other Legionnaires, Fred Mercer, Board Member from Silverton, will direct the activities of the Boy Scouts in assisting in messenger service and the patriotic programs.

Luther F. Mann will direct the barbershop musical organization of some 40 members in a program of favorite barbershop tunes at the conclusion of the tours just before the barbecue at 5:00 p.m.

Following the barbecue, the program will feature an address by Mr. G. W. McCullough, Vice-President of Phillips Petroleum Company, introduction of the Board of Trustees and Foundation staff and a drawing for a combine cab and a rare \$10.00 gold piece for the ladies.

Root Rot Can Be Reduced In Next Year's Crop

If you had Cotton Root Rot problems this year, you were among the many Texas farmers who lost thousands of dollars income because of the disease. However, now is the time to do something about reducing it in next year's crop, says Charles M. Heald, Jr., Extension area plant pathologist.

The specialist says that complete control of root rot on a field scale is impossible, but a number of steps can be taken to reduce the incidence of the disease. Immediately after the crop is harvested, stalks should be shredded and plowed under to a depth of 12-18 inches.

Also, since root rot lives only on tap root plant systems, infested fields can be put in a rotation program with plants having a fibrous root system. Most popular crops are those in the grass family; sorghum, for instance.

If this work is done during dry summer months, chances for success are much higher, says the specialist.

About 90 per cent of the disease organism is found in the upper 9-10 inches of the soil. Deep plowing and turning under large amounts of residue, produced by grasses, supplies organic matter which helps reduce the disease organism through bacterial action in its decaying process.

Butter grades are determined by taste, smell, touch and sight. There are some 129 federal and 26 federal-state butter graders stationed in various plants and markets around the county who must resort to these four senses while labeling butter according to official USDA quality grades AA, A, B or C.

Our savers have green thumbs

When it comes to making dollars grow, our savers are real gardeners. Dollars saved with us thrive nicely on generous earnings. Put part of your pay regularly into "seed money" and watch it bloom into an impressive reserve. Why not start your bumper crop of "growth dollars" with us this week?

Final approval of a \$1 million federal appropriation to match another million dollars of High Plains money has made the launching of a massive boll weevil control program an absolute certainty and planning activities are rapidly approaching a feverish pitch.

Beginning about August 24 more personnel from both the Texas Department of Agriculture and the Plant Pest Control Division of USDA will begin arriving in the area to clean up last minute preparations and get the program underway. Most of these people will likely remain in the area until about the middle of November. At least 20 additional men from the Texas Department of Agriculture will meet in Lubbock on September 1 to kick off an intensified drive to complete the signing of spraying permits by all farmers in the seven-county control zone. Permits to spray infested cotton are needed from approximately 3500 farmers in Garza, Dickens, Crosby, Floyd, Motley, Briscoe and Kent counties and full cooperation is being urged from all farmers in these counties. To date, probably less than 1500 of the farmers have signed permits, but blank permits have been

mailed to all others along with stamped, self addressed envelopes.

The responsibility for getting these permits signed has been accepted by the Texas Department of Agriculture, and Fred Roy of that agency says that all permits need to be signed by September 5 or 6 in order to allow for plotting the spray area by September 10, the target date set for getting spray planes in the air. In addition to those permits mailed to farmers, others are available at banks, from county agents, ASC offices and from Plains Cotton Growers' committeemen in each county.

Either PCG boll weevil committeemen, county agents, or Texas Department of Agriculture personnel will have to personally contact those farmers who have not signed a permit by September 1. "It is necessary to the success of the program that every acre of weevil infested cotton be sprayed," Roy said, "and a lot of time and money can be saved if farmers in the seven control zone counties will make the necessary effort to secure and sign spray agreements before September 1."

Beginning the week of August 24 from 18 to 25 Federal Plant Pest Control personnel from all over the United States will start arriving to help put on the program. D. H. Russell, Supervisor of the Lubbock PPC office, said these men will be distributed between five points of operation tentatively set up in

Floydada, Ralls, Crosbyton and Dickens. Two of the five points will be located in Dickens, with one operating north and one south of Dickens.

"The prospectus and invitations to bid have been mailed to aerial applicators," Russell said, "with instructions that they must be completed and in the New Orleans business office of PPC by 1:00 p.m. August 28. He said the bids would be opened that same afternoon and the successful bidder probably notified by telegraph no later than Monday or Tuesday of the following week.

With the decision to use the new technical malathion in the High Plains program, Russell said the need for only about 10 planes is being anticipated, and the entire job is being let under a single contract although there is the possibility of some subcontracting. Technical malathion is to be applied at the rate of 12 fluid ounces per acre (less than one pint), which compares with the three or four gallons per acre applied when conventional materials diluted in water are used. This advantage allows a plant to continue spraying until its fuel supply is exhausted without the necessity of reloading. Also, the new material can be flown on from 15 to 25 feet above the cotton, taking a swath of 100 feet instead of the usual 35 of 40 feet covered when diluted chemicals are used. Obviously this development will effect considerable savings in the overall cost of the program.

Final decisions on total acreage to be sprayed and the amount of chemical needed are being held up pending late developments in weevil activity, but already 500 drums of technical malathion, 55 gallon capacity, have been ordered for delivery no later than September 5. The 500 drums will carry 275,000 pounds of the material and will arrive on five 100 foot railroad cars, Russell said. Storage for up to 1600 drums of the

chemical at any one time has been secured in Lubbock. The contract with the aerial applicator will make him responsible for transporting the chemical from Lubbock to the airstrip and for draining the barrels and returning them to the storage location.

The best estimate available now, according to Russell, is that an area of about 225,000 acres of weevil infested cotton will be sprayed an average of four times for an aggregate total of 900,000 acres, requiring approximately 720,000 pounds of chemical.

Fed cattle prices in July were up about \$3 per hundred from low levels of last May.

Early Soil Testing Advised For Fall

Soil testing should be now in preparation for fall planting, reports Dr. Charles D. Welch, soil chemist with the Texas Agricultural Extension Service.

Early soil sampling is encouraged to avoid the fall rush that crowds the state's three testing laboratories. Samples now being received are mostly from pastures, small grain plots, lawns and flower beds, says Welch.

A total of 19,047 samples were received at the laboratories from January 1 through June 30 this year, compared with 13,171 samples for the same period last year. The soil testing laboratory at Texas A&M University received 9,349 of these samples compared with 7,248 last year, Welch points out.

As expected, a significant increase in tons of fertilizer applied has accompanied this increase in the number of samples tested, explains the chemist.

Established legume pastures are among the crops that will need fertilization this fall, the chemist points out. An increasing number of acres are being seeded to vetch, Crimson and White clover, and since fertility and lime needs of

Total eggs produced in Texas during July at 214 million decreased four per cent from June but were two per cent above the same period last year. The 12.4 million layers on hand during July are one per cent above last month and slightly above last year. The number of eggs per layer for July at 17.2 is five per cent below last month but two per cent above last year.

Food Prices Edge Up Slightly

The average homemaker will spend a bit more money than usual for the family's food this weekend, as some prices edge up seasonally.

Best beef buys this week and next are expected on ground beef, arm and blade pot roasts and steaks, short ribs and round steaks. Pork values include smoked hams and picnic. Fryers remain an excellent bargain in most retail meat departments, and frozen turkeys are available at economical prices.

Grade A medium and large eggs are up and tuck for the egg bargain of the week, reports Mrs. Gwen Clyatt, Extension Service consumer information specialist.

Fresh fruit and vegetable items moderate to economical in price include bananas, lemons, cantaloupes, plums, peaches, nectarines, grapes, lettuce, celery, cabbage, tomatoes, green peppers, squash, dry yellow onions, sweet corn, okra and carrots. The continuing hot weather is causing a reduction in vegetable supplies of top quality, the specialist says. Local dairies are supplying a variety of cottage cheese combinations by request. Among the more popular are garden salad, fruit salad, and pineapple. Regular cottage cheese, creamed cottage cheese and non-fat cottage cheese are other choices.

PUBLIC AUCTION

640 ACRES OF DEAF SMITH COUNTY TEXAS REAL ESTATE

September 1 at 2:00 P.M. C.S.T.

Farm located 2 miles East of Hereford on Highway 60 then 1 1/2 miles North. Legal Description: Section 25, Block K 3.
Farm has 512 acres under irrigation with 6 irrigation wells that has plenty of water, 128 acres in improved Midland and native grass pasture, has 105.5 acres wheat allotment that produces under normal conditions 60 bu, and more per acre, 17 acre cotton allotment that produces under normal conditions 2 bales or more per acre, and 318 acres grain sorghum allotment that produces under normal conditions 6000 to 7000 lbs. per acre.
This farm is in the heart of the sugar beet country. Hereford is the only town in Texas that has a sugar beet plant under construction.
Farm will also grow alfalfa, castor beans, lettuce, potatoes, carrots, onions and sugar beets. There are good market facilities for all crops grown in this area.
Improvements consists of a 4 bedroom - 4 bath home that has 3700 sq. ft. of floor space, has modern 2 bedroom tenant house, good barn, corrals and other buildings.
1/2 undivided mineral rights goes with purchase of farm on a non-participating basis by present owner.
This farm has dark loam soil.
Farm is located adjacent to north side of municipal airport.
Possession will be given of all land Jan. 1, 1965. Wheat allotment will be sown by present owner and will go with purchase of farm.
TERMS: 15% down on day of sale. 30 days time will be given purchaser to have abstract examined. Merchantable Title and Warranty Deed will be furnished. Additional 1% at close of escrow. Owner will carry 71% of purchase price for 10 years at 5 1/2% interest. Interest and principal to be paid annually. Or owner will accept cash at close of escrow.
OWNER: Mr. and Mrs. Earl Plank

Zinnias Drench Gardens With Color And Sparkle

By A. F. DeWorth
Professor of Floriculture
Texas A&M University

One of the most popular flowers for a colorful garden is the zinnia. To get your gardening program into full swing next spring, start planning now and consider this annual as a "must" for color.

Zinnias are easily grown from seed and bloom in only six to eight weeks. They continue to produce showy blooms during the entire summer.

Since zinnias can be sown outdoors with great success, they can be planted in the ground where they are to grow as soon as the soil becomes warm in the spring. A warm sunny location is best.

Seeds should be planted about one-fourth inch deep and about four inches apart. Keep the soil moist but not wet, but do not let it dry out until the seedlings emerge. Then keep the soil rather dry and thin out the seedlings, leaving them eight to 18 inches apart depending upon the type plant being grown.

As soon as the first flower bud is produced, pinch it off so that the plant will develop lateral shoots and produce a bushy plant with numerous flowers.

Since zinnias require large quantities of water, soak the soil well, watering below the foliage to keep the leaves dry and to avoid mildew.

There are many kinds and types of zinnias in a wide range of colors and varieties. While the horticultural forms are myriad, the average gardener will have a general knowledge of what is available from the following groups.

Cupid zinnias are the dwarfest and most compact type, seldom growing more than 12 inches tall.

However, Mexican zinnias grow slightly taller, reaching from 12 to 15 inches. Flowers range from double to semi-double to single and are small, usually never more than 1 1/2 inches in diameter. "Old Mexico" and "Persian Carpet" are All American winners in this class.

Liliput zinnias are compact, freely branching plants that grow 15 to 18 inches high and are very useful for bedding and low flower borders. They have small double flowers about two inches across.

Pumila types are sometimes called Cut- and Come-Again zinnias. They produced long stems on plants that grow about

two feet tall, the flowers being two and one-half to three inches in diameter. Some widely grown varieties are Peppermint Stick which has striped petals and Salmon Rose which has deep salmon pink flowers.

Another type is the Cactus-flowered zinnia which grows three to four feet high in Texas gardens. It produces shaggy flowers reaching four to five inches in diameter with the quilled tubular petals curled upward.

Tetra Giant Double zinnias produce very large flowers six to seven inches in diameter. They reach a height of about two feet and are excellent bedding plants.

The most common and widely grown zinnias are perhaps the Giant Double type. They produce

giant double flowers on plants about three feet tall. Some of the most favored varieties are Scarlet Flame, Golden Dawn, Canary Bird (yellow), Enchantress (pink) and Purity (white).

Taller types provide a good background in the garden. Those of medium height provide good color in sunny spots in flower borders while shorter kinds are effective as large-scale ground covers or for edgings.

All the various types of zinnias, small, medium or large, are excellent for use as cut-flowers and will last for at least five or six days with proper care. However, the flowers should be well opened before they are cut.

Zinnias are dependable and will produce quantities of flowers all season long.

Texas 4-H's Eligible For Scholarship Grants

Twenty-five college bound 4-H Club members in nine states including four from Texas, will find their educational fund increased by \$100 in 1964.

The Santa Fe Railway, System, donor of these grants and other 4-H educational awards, has increased their college scholarships to \$500 according to Floyd Lynch, state club leader.

The railroad has actively supported 4-H Club work for more than 40 years, and has provided scholarships since 1951. Presentation of the 1964 scholarships by Ernest S. Marsh, president of Santa Fe, will take place in Chicago this fall. These newest grants will bring to 308 the number of scholarships awarded since the program started. Total grants through 1964 \$100,000 in the program conducted by the Cooperative Extension Service.

In announcing the increased value of the scholarships, State Leader Lynch also called Texas 4-H members' attention to the 12 other educational awards annually provided by the company. He pointed out that winners will be selected by a judging committee of Extension Service workers during the summer and early fall.

Scholarships and other awards in the program are given in recognition of 4-H achievement in projects and activities, demonstrated leadership abilities and personal

growth and development. Recipients must be currently 4-H members and may be high school or college students.

Two of Texas' most recent (1963) scholarship winners in this program currently are in college. Joyce Rodgers, Rt. 3, Brownwood, has completed her freshman year at Texas Woman's University. Joe David Drabek, Rt. 2, Crowell, is enrolled at the University of Dallas. The other two 1963 scholarship winners completed high school this year. They are: Carolyn Vashbinder, San Antonio and Stanley Froehner, Rt. 1, Cost.

For additional information on qualifications, supporting evidence needed, and deadlines for submitting records of accomplishments, State Leader Lynch encourages 4-H members to contact their county extension agent.

September Plentiful Foods

Meat, Fruit, Vegetables

Three choices of meat, a selection of vegetables and a fruit are your plentiful foods selection for September, according to the Texas Extension Service.

The list, prepared by the Agricultural Marketing Service, features beef, fresh prunes, broilers, turkey and late-summer vegetables.

Although beef production in recent weeks has been somewhat below record levels set earlier this year, beef is still in big supply. And consumer prices continue attractive. Since September is "Better Breakfast Month," try serving steak for breakfast.

Another good breakfast item is fresh Italian prunes. Almost half again as many prunes will be available as were produced

last year. Oregon, one of the three big prune-producing states, is predicting a crop three times as large as in 1963. Tart fresh prunes are just the thing for sleepy back-schoolers.

Look for a wide variety of fresh vegetables during September. Tomatoes, onions, lettuce, snap beans and cabbage likely will be plentiful in most markets. There'll be a good supply of other vegetables, too.

An estimated five per cent more broiler-fryers coming to market over a year ago should put attractive consumer prices in prospect for September. Prices last September were the second lowest on record.

Turkey, too, will be abundant. Mid-summer marketings ran 18 per cent higher than a year earlier; refrigerated holdings are about the same. And ready-to-cook turkey prices encourage frequent use.

Accept an invitation to healthful, economical eating. Serve September plentiful often.

DRILLING STATISTICS FOR JUNE

During the month of June permits were closed on 357 new wells within the High Plains Underground Water District; 16 replacement wells were drilled and 12 wells were drilled that were either dry or nonproductive for some other reason. The County Committees issued 193 drilling permits.

Listed below by counties are permits issued and wells completed for June.

County	Permits Issued	New Wells Drilled	Replacement Wells Drilled	Dry Holes Drilled
Armstrong	6	6	0	0
Bailey	23	34	4	4
Castro	24	40	1	1

More Jobs For Women Is Trend

More and more women are engaging in part-time work as the number of women in the labor market increases.

One out of every three women who had paid jobs at any time last year worked on a part-time or part-year basis, says Mrs. Wanda Meyer, Extension Service home management specialist at Texas A&M University.

For many women, part-time work has one big drawback: Most part-time jobs tend to be on the routine side. However, a new study by the Alumnae Advisory Center, Inc., a non-profit educational organization that assists college women in

looking for jobs, suggests that interesting and responsible jobs can be found with some careful digging.

Mrs. Meyer suggests that a good place to start is with companies where a good part of responsible fulltime jobs are held by women.

Many retail stores, for example, hire women with merchandising experience as section supervisors on a part-time basis. If one has office skills, or just intelligence and personal stability, it might be rewarding to check with local banks, insurance companies, public utilities, and other major employers of clerical workers.

A person with good basic education and poise -- but no special job skills -- might want to investigate the wide range of sales jobs open to part-time workers. Women who like to

keep their work schedules flexible often find good opportunities in outside sales work -- for example, with "party plans" or as representatives of magazine subscription and cosmetics companies.

Most part-time jobs can help build up Social Security credits. In addition, most employers make available group life and health insurance coverage to part-time workers.

Cotton standardization activities of the U. S. Department of Agriculture have been moved from Washington, D. C. to Memphis, Tennessee. The transfer will enable the USDA to give more prompt and effective service to the cotton industry by placing the service function nearer to the people being served.

AMMO NOTES

By Bill Bennett, Agronomist

Fertilization of wheat ground is in full swing in most areas. A few are still waiting for rain.

Last week I discussed the economics of fertilizing wheat and concluded by saying that if you plan to grow wheat, it should be fertilized properly for lowest cost per bushel. This week let's look at different methods of application.

Ammonia is usually applied on 20 inch centers. This can conveniently be done either while the ground is still flat or placed in the sides of the bed after it has been bedded up. Either method is satisfactory.

Phosphorus application is somewhat more involved, broadcast phosphorus normally should be worked into the soil for best results. Since most of the land has been plowed or disked by now, there is little chance of doing this. There are now several alternatives for applying phosphorus.

One is to broadcast on top of flat ground and then list the land. This, however, throws all

of the phosphorus into the beds and leaves none of the wheat in the middles.

Another alternative is to broadcast dry fertilizer after the land is bedded. A small portion of the phosphorus will be worked into the soil with the grain drill.

A third alternative is to apply liquid 7-21-0 with the ammonia as a dual application either while the land is flat or after it has been bedded. This has the advantage of getting the job done with one trip over the field.

If dry phosphorus fertilizer for wheat cannot still be plowed under, the second and third alternatives now appear to be the best.

IRRIGATION
Giant Of Texas Plains Economy

Irrigation continues to be increasingly big business on the Texas Plains. During the past year—June 1963 through May 1964—substantial increases have been noted in many phases of the giant industry, such as more wells and more irrigated acres through a larger number of irrigation systems, along with increased attention to more efficient methods and practices to not only help conserve the precious water, but to build soil productivity.

FACTS AND FIGURES ON PUMP IRRIGATION ON TEXAS HIGH PLAINS. Table with columns for County, Farms Irrigated, Total Ac. Irrigated, Irrig. by Gravity, Ug. Pipe Miles, Ac. Irrig. Pipe, Sprinkler System, Ac. Irrig. Sprinkler, Wells Irrig. Lift, 125 Ft. Under Lift, 125 Ft. Over Lift, 700 gpm Cap. Un., 700 gpm Cap. Over.

PLANTED ACRES OF MAJOR IRRIGATED CROPS INCLUDING VEGETABLES

Table with columns for County, Pasture, Sudan, Oats, Barley, Corn, Wheat, Legumes, Other, Vegetables, Cotton, Grain Sorghum, Alfalfa. Lists planted acres for various crops across different counties.

Legumes include soybeans, vetch, field peas, and other legumes. Others include sugar beets, castorbeans, sesame, forage sorghum, grass seed, pinto beans, etc.

Nearly Two Million Children In School Lunch Program

Approximately 1,980,268 Texas school children enjoyed a variety of good-tasting, good-quality foods served in well-balanced meals under the National School Lunch Program in 1963-64.

chickens and canned sweet potatoes.

New foods are also introduced frequently. In 1964 thousands of children will get a chance to enjoy that traditional Southern dish—corn grits. And last year, "bulgur" a dried cracked wheat product, was introduced in 22 states and won quick fame among the students because of its nutty flavor in meat dishes.

The entire Federal-State program is geared to making maximum use of national, regional and locally abundant foods. Federal assistance to school lunch programs began in the early 1930's when surplus foods were first donated to schools. In 1946, the National School Lunch Act placed "school feeding" on a permanent basis. Under this program, each participating school agrees to serve a lunch meeting the "Type A" pattern which includes a protein-rich food, a generous serving of fruits and vegetables, bread and butter or fortified margarine, and one-half pint of milk.

With a variety of good quality foods as well as many new and different foods, it is hoped that the children will gain the knowledge they need for selecting nutritious, well-balanced meals for themselves all through their lives.

Four-fifths of the food used in the school lunch program is purchased by school lunch managers from their local supplies. Some of the food is purchased by the U. S. D. A. and comes from supplies of food on the market that are currently plentiful. Some of the food fulfilling the needs of the schools participating in the program are canned applesauce, canned apricots, green beans, frozen ground beef, frozen cut-up

meats, and one-half pint of milk.

A new herd production average for milk and butterfat has been announced for the registered Holstein herd owned by E. S. Bradley of Dublin. The Holstein - Friesian Assn. of America said the herd had a per-cow average of 14,451 pounds of milk and 516 pounds of butterfat based on 15 completed lactation records. Texas A&M University supervised the tests. This production compares with a production of 7,500 pounds of milk and 275 pounds of butterfat for the average U.S. dairy cow.

On The Farm In Farmer County

BY JOE VAN ZANDT County Agent

INSECT SITUATION

Our insect situation has generally been favorable this year. However, we must not let our guard down at the last. Everyone is encouraged to make frequent checks on cotton and late grain sorghum fields.

of nitrate poisoning of livestock.

First, remove cattle from the area to be fertilized. Should spillage occur in filling a rig, pick up the material to prevent spots of unusually high concentration. Remove bags from the field since cattle will sometimes be attracted by them.

In cotton we need to be on the lookout for bollworms and lygus bugs as they could do serious damage if their numbers build up in a field.

After fertilizer has been applied and irrigation accomplished keep livestock off of the area for one week.

Our late grain sorghum is still susceptible to midge infestation. In the Panhandle area, midge activity continues to be very light.

If forage is particularly succulent it is a good idea to not graze before 10 a.m. since nitrates accumulate in the plants at night and are not changed to the protein forms until sufficient light has been received.

The South Plains area has noted an increase in midge lately. However, general midge infestations are not now present, but spotted local infestations are present in some blooming sorghum.

Drought may cause nitrate accumulation under conditions where leaves wilt or roll during the day, but take up sufficient water during the night to regain turgor. Grazing of plants in drought stress should therefore proceed with caution.

NITRATE POISONING

Recently some nitrate toxicity was experienced in West Texas on Bermuda grass. This was a rare occurrence but to help prevent any trouble in our area the following information is furnished.

Nitrate accumulation in plants may occur under certain conditions on soils that have not been recently fertilized. The possibility of nitrate toxicity should not discourage farmers from using nitrogen fertilizers at economically practical rates recommended by the Extension Service.

Following the application of fertilizer materials to pasture grasses and forage sorghums several precautions should be observed to avoid possibilities

No Grass; More Livestock Feeding

Sun-scorched pastures are providing scant grazing and increasing the need for emergency livestock feeding, reports Uel D. Thompson, Extension animal husbandman, Texas A&M University. If pastures are depleted, the obvious first step is to reduce livestock numbers. Calves should be weaned and sold as early as possible, says Thompson, and replacements should also be marketed if necessary. Low producers should naturally be headed down the market trail. After reducing the herd, confine it to a trap or drylot and begin feeding, advises Thompson. Thus, stock conserve

energy through not having to travel for feed and water. Since total feed intake has to be supplied under these conditions, probably the cheapest method is to limit this intake with salt and supply energy by feeding sorghum grain, says the husbandman. Roughage is high in cost and low in energy, yet some is necessary for ruminant digestion. It may be fed by limiting the amounts daily, explains Thompson. Rice hulls may be fed as a roughage but must be ground to prevent intestinal irritations to stock. Thompson suggests the following self-feed mixture for emergency feeding: 34 per cent ground sorghum grain, 33 per cent protein supplement (41 per cent), 31 per cent salt and 2 per cent trace mineralized salt. Cattle will consume daily about five pounds of the mixture depending upon the quantity and quality of roughage. This feed mixture will be deficient of Vitamin A, Thompson points out, and therefore the synthetic form may be fed, placed in controlled drinking water or injected. It may also

be given in large quantities at one time. Adding synthetic Vitamin A to mineral mixtures or high salt feed mixtures and leaving it exposed to sunlight, air and heat is not advisable, says Thompson. Thompson suggests a visit with the local county agent for more details on emergency livestock feeding. Ask for a copy of B-218, "Emergency Feeding of Livestock." Explosion Puffed Foods Dehydrated foods, once a military necessity and now a convenience boon to housewives everywhere, may soon appear on the table with a new even better "fresh-cooked" flavor due to a new dehydration process called "explosion puffing". Explosion puffing makes it practical to dehydrate whole pieces of fruits and vegetables so that they require only 5 or 6 minutes of a housewife's time to cook. Their counterparts, those dehydrated conventionally, take 20 minutes to an hour to cook. Engineer R. K. Eskew and James Cording, Jr., developers of the process have made numerous pilot-plant samples which include apple slices for pies which can also be eaten as a snack without cooking or can be mixed with dry cereals. The "explosion puffed" foods also include blue berries that can be packaged in plastic bags with muffin or pancake mix to give better flavor. The new puffing process creates air spaces within the vegetables and fruits permitting water to be removed readily during drying and to be replaced rapidly during cooking.
