Absentees Voting Begins

Absentee voting for the special Texas Panhandle elections opened Monday at the offices of Hugh Moler, Panhandle County Clerk. Persons who are unable to be present at the polls or who wish to vote by mail may apply for an absentee ballot at the clerk’s office. The deadline is Friday, March 31.

Deadline Nears for Car Tags

With the deadline for displaying license vehicles approaching, it’s not too late for Texas only a little over a week to change plates,according to Lee Tapp, the Farwell County license clerk.

The quartet includes a number of songs, three of which have been sung by the club. One of these is the best thing to do it. It is a song that one person will sing and the other two the chorus. The last song will be a little bit of the Farwell Club.

This is the second time to be included if the story for a last-minute development.

Also, initial steps had been taken in the project.

In an effort to write an interesting headline, Crim is about to experience his second failure.

As the sun peeped over the horizon Wednesday morning, the wind was blowing gently from the northwest, toward the meeting.

The wind was blowing steadily, and it was evident that it would not stop blowing. It was not a strong wind, but the next best thing to it.

Crim said, “It’s going to be a great day, and the next best thing to it is a little bit of the Farwell Club.

That’s why the story was supposed to be written in the Tribune, but because the headline was not written, it was not a good idea.

If I had time to pursue the project, I think I would have been interested in it, but it was not a good idea.

After writing a couple of stories about the Farwell clubs, I found that there were quite a few people who were interested in the project.

And, on two successive nights this week, the group was out and about, doing something, and some of them had become interested.

So, I think the story will be of interest to the people of Farwell.

But I don’t think it will do much, and there’s no one thing I think that the story could be developed into.

There may be when the people of Farwell will become interested in the project.

And, on two successive nights next week, they will be out and about, doing something, and some of them will have become interested.

The Tribune is the official publication of the Panhandle County.

The one club would also have been represented had it not been for a last-minute development.

Bus, Auditorium Curtain
Among Board Purchases
Several important purchases of merchandise in March were approved by the school board, among which the following are the most important:

One purchase of up-to-date psychological equipment for the school's psychological laboratory, costing $1,250.

The board approved the installation of a new auditorium curtain, costing $1,500.

Several purchases were related to the maintenance of the school buildings, including $500 for the repair of the roof, $1,000 for the replacement of windows, and $2,000 for the purchase of new heating equipment.

There is a Difference
Some critics of Farwell believe that the town is not spending its money wisely, and that the general state of the town is slipping. But representatives of Steckey, the local newspaper, believe that the town is doing a good job, and that the general state of the town is improving.

They argue that the town is spending its money on improvements that will benefit the community as a whole, such as the construction of new roads and the expansion of the schools. They also argue that the town is spending its money on improvements that will benefit the individuals in the town, such as the construction of new parks and the expansion of the library.

The town is spending its money on improvements that will benefit the community as a whole, they say, because they believe that the community is better off when all of its members are better off.

The town is spending its money on improvements that will benefit the individuals in the town, they say, because they believe that the individuals are better off when they have what they need to live a good life.

They argue that the town is spending its money on improvements that will benefit the community as a whole, they say, because they believe that the community is better off when all of its members are better off.

Sir Winfred Heath was the host when members of the study club met at the home of Mrs. Helen Boyer. The menu was a savory one of pineapple juice, fried eggs, bread and butter, mints, and coffee served by Mrs. Lillie Daugherty.

Mrs. Grace Blake was the master of ceremonies invited the guests to the table and announced the program of the evening. The program began with a short prayer led by Mrs. L. W. Church, who then introduced the guest speaker for the evening, Mrs. Lillian Smith. Mrs. Smith gave a talk on "The Bishop method" of sewing, teaching the local club.

The "Bishop method" of sewing will be explained in more detail in the next issue of the column. The meeting was adjourned with a benediction by Mrs. Jim Terrell, club president, and the group dispersed for refreshments of coffee and doughnuts.

Table Setting Demonstration Featured At Texico WCT Meeting

Fifteen members and seven guests attended a meeting of the Texico Study Club Wednesday night in the Farwell Study Club meeting rooms.

The program was opened with Mrs. Florence Littleton welcoming the club members, after which a short prayer led by Mrs. Louise Martin was read. Mrs. Martin then introduced her guest speaker, Mrs. Janet Walker, who spoke on "The Bishop method" of sewing. Mrs. Walker then gave a talk on "The Bishop method" of sewing, teaching the local club.

The words "Seventh Heaven" were used to describe the setting of the table. The table was set with pink angel hair and centered pink candles and angel chimes which were at intervals up and down the tables.

The meal of pineapple juice, fried eggs, bread and butter, mints, and coffee served by Mrs. Lillie Daugherty.

A religious play was presented the evening of March 23, 1961, at the Farwell Baptist Church, with Mrs. Tony Hurta of Jal and her guests being feted.

The serving table was flanked on either side by pink angel hair and centered pink candles and angel chimes which were at intervals up and down the tables.

The meal was served by "visitors day." Mrs. Clark was an alternate for D.A.R. Page 1.)

A nominating committee was appointed to do the nominating for the officers of the Texico WCT. The committee is composed of Mesdames Edwin Fazholtz, Charles Hill, Robert C. Batch, and Mrs. Roundtree. The meeting was adjourned with a benediction by Mrs. Jim Terrell, club president, and the group dispersed for refreshments of coffee and doughnuts.

Brightening the meal of the Christian woman is a salad, picnics, hot rolls, butter, and vegetables. The vegetables were at intervals up and down the tables.

Sesame Acreage Due Increase

Sesame, a relatively new crop to most growers, has taken root in many areas of the state. sesame is a highly profitable crop, and its increasing popularity is due to several factors. Firstly, sesame is a drought-resistant crop that can thrive in dry conditions, making it a good choice for areas with limited water resources. Secondly, sesame is a good source of oil and protein, which are in high demand in the global market. Finally, sesame is a versatile crop that can be grown in a variety of soil types and climates, making it a flexible choice for farmers. The increase in sesame acreage is expected to continue as more farmers become aware of its benefits and potential for profitability.
In this age of mechanized corn production, a deterrent with desirable properties—such as dealing with nitrate contamination, producing better seed, and improving yields—is needed. The combined efforts of a group of scientists working on the problem have resulted in the production of a new type of high-protein corn that is resistant to nitrate contamination.

The new corn, known as the nitrate-resistant strain, has been developed by the Agricultural Research Service of the United States Department of Agriculture. The strain is the result of a four-year project conducted in cooperation with the University of Nebraska and the University of Missouri.

The new corn is planted in the spring and harvested in the fall. The seeds are then germinated in an incubator to ensure that the corn is free of nitrate. The new corn is then planted in the field and monitored for nitrate levels.

The new corn is being tested in a number of locations around the country to determine its effectiveness in reducing nitrate contamination. The results of the tests are expected to be available in the near future.

The new corn is expected to be available for commercial use within the next few years. The cost of the new corn is expected to be similar to the cost of the traditional corn.

In conclusion, the new nitrate-resistant corn is a significant step forward in the battle against nitrate contamination. The new corn is expected to be a boon to farmers and the environment alike.
