\$250 was cleared on the annual carnival this year. The money goes to improvement on the buildings, books, and playground equipment. The Mobeetie school wishes to thank all the merchants and patrons for their splendid co-operation in helping to make the carnival a success.

Wonder why L. D. Smith has been called "Blackie?" Could it be something that happened at the show in Pampa? Ask Johnnie Reed. He might know something about it.

It seems that a certain senior girl who is a secretary has been making friends with a Wheeler boy. Could it be T. J. Patterson? Betty Ruth Brewer may not like this.

George B. has been seen with a girl quite often lately. Arletta, where were you Sunday night?

Did someone say Paul's favorite was "Goodnight"? Did they mean favorite slang expression or girl? Leroy Patton and a certain Davis girl have been attending church late-

Don't "cuss" at a sticky sole plate on your electric iron. Here's an easy cure. Heat the iron, then rub the iron over piece of paper sprinkled with salt. This removes starch or other substances. Then wax the sole plate by rubbing paraffin or beeswax over it. Finally remove the excess wax by running the iron over a clean piece of paper. Burnt starch may be removed with fine steel wool when iron is cool.

- Never iron over buttons, snaps, zippers or hooks and eyes. Such objects score the sole plate of the iron.
- 2 Use extreme care to avoid dropping your iron. You may break some vital part that is impossible to replace.
- 3 Be sure iron is cool before putting it away. And don't wrap cord around the hot iron.
- Take good care of your iron cord. Don't let it kink. Pull out plug by grasping plug, not the cord.

SOME OTHER HINTS ON IRON CARE

Roll your own. Lighting benefits can be noticeably increased by relining existing dark-on-the-inside shades with good white paper. Roll the lamp shade on white paper, and pencil mark to cut. Fit this lining inside the shade and fasten seam with Scotch tape.

# OTHER WAYS TO CONSERVE LIGHT

- Clean lamp bulbs and reflectors (unlighted) regularly with a damp cloth.
- Arrange furniture so one lamp serves two or more
- Use shades with white linings that reflect light instead of absorbing it.
  - unoccupied rooms. Have eyes examined regu-

Always turn off lights in

- 3 Keep all lights properly shaded to avoid glare.
