AAA Program Restored Here

The AAA program has been resumed.

V. B. Hardcastle, county AAA administrator, has been instructed to resume the agricultural conservation program immediately with funds previously allocated. Existing regulations and procedures will prevail.

Hardcaste calls on committeemen and other personnel to put forth every effort to restore the program to normal operations as quickly as possible. The program was shut down on May 26 as a result of Congress slashing the appropriation by 50 per cent.

Hardcastle was also advised that \$150,000,000 was authorized for the 1948 program with a limit of \$500 assistance to any individual during 1948.

The county administrator said the county has \$48,000 Frey, county agricultural agent, Dress Revue held at the Wheeler of the \$74,800 allocated for this year and calls on every pro-Wheeler hospital but it was too Hefley filled in at second base gym last week which attracted 36 ducer or land owner who plans to carry out a soil practice to late for medical aid. PROFITABLE PULLETS

—with—

FORTIFIED PULLET DEVELOPER

Your pullets between eight and twenty-four weeks of age are going through a vitally important stage in their lives insofar as future egg-laying ability is concerned. It is during this important period that rugged, vigorous and strong egg-making organs must be developed . . . if the pullet is to hold up under the strain of heavy egg production later on.

Develop Egg Organs . . . Quickly, Safely

Fortified PULLET DEVELOPER is designed to quickly and safely develop egg-making organs, and at the same time, to furnish the elements scientific feeding tests show are necessary for all 'round strength and rugged-

We will give absolutely FREE with each 100-lb. sack of Fortified Pullet Developer sold 1 genuine Anchor-Hocking (skid-Proof) crystal glass mixing bowl.

LAWRENCE HATCHERY AND FEED

PHONE 131-A

WHEELER, TEXAS

MR. DAIRYFARMER:

You, no doubt, realize that there is money to be made from selling milk. But, had you realized that you could increase your profits if you could get all the milk you produce to market in a MARKETABLE CONDI-

To be marketable, milk must be SWEET and for milk to remain sweet very long after it is taken from the cow it must be cooled to 50 degrees in a very short time in order to keep the bacteria from multiplying When the bacteria multiply this causes milk to sour and you know that when your milk sours before it reaches market that it comes back to you and you lose that much.

In recent years, WET STORAGE MILK COOLERS have been invented for use with either electric or gasoline power and by placing your milk cans in one of these coolers immediately after filling them with milk you can rest assured that your milk will be FRESH when you are ready to market it.

ONE YEAR GUARANTEE

We keep a good supply of WET STORAGE MILK COOLERS in stock at all times and can make immediate delivery, and there is an advantage in buying from us because we live right here with you and can ABSOLUTELY GUARANTEE SERVICE ON THE COOLERS WE SELL FOR ONE FULL YEAR.

Cattle With Banas Be **Branded On Left Jaw**

COLLEGE STATION-All cattle that are tested for Bang's disease and found infected must be San Saba, Texas. branded on the left jaw with the letter "B" and reported to the Texas Livestock Sanitary Commission, to conform with House Bill 525, recently made law by the State Legislature.

Dr. E. A. Grist, veterinarian of the Texas A. and M. College Extension Service, explains that it is now the duty of the veterinarians who do Bang's testing to place the brand on cows that react positively to the disease. A penalty will be fixed upon any person who refuses to allow the branding, or who sells or disposes of cattle for milk purposes when he knows them to be infected.

The branding of Bang's-infected cows will enable better control of the disease, says Doctor Grist, since control measure must be planned on the basis of individual herd problems.

In the fiscal year, September 1944 to August 1945, 133,891 head FOR SALE-32-volt 4-h.p. from the broiler, cool and cut cake of cattle were tested for Bang's Price reasonable. Phillip W. Clep- electric motor and 3 single and 1 in pan, removing slices with a disease in Texas, with 9,435 showing up infected. Many of those re acting cattle probably found their way into other herds, says Doctor with a toothpick stuck through the Grist. The requirements of the folds, or as main dish trimming. branding law will help hold down are easily curled if the bacon slices the spread of the disease.

> By George!
> "Dorothy," remarked father, frowning across the breakfast table at his comely daughter, "how many times have I warned you not to entertain more than one beau at a time in the parlor? for the table, wrap the slicing edge Last night I could distinctly hear two young men talking down here.

> > no, father," rejoined "Oh. Dorothy, "those weren't two boys -that was just George - his voice is changing."

PROFITABLE PULLETS

FORTIFIED PULLET DEVELOPER

Your pullets between eight and twenty-four weeks of age are going through a vitally important stage in their lives insofar as future egg-laying ability is concerned. It is during this important period that rugged, vigorous and strong egg-making organs must be developed . . . if the pullet is to hold up under the strain of heavy egg production later on.

Develop Egg Organs . . . Quickly, Safely

Fortified PULLET DEVELOPER is designed to quickly and safely develop egg-making organs, and at the same time, to furnish the elements scientific feeding tests show are necessary for all 'round strength and rugged-

We will give absolutely FREE with each 100-lb. sack of Fortified Pullet Developer sold 1 genuine Anchor-Hocking (skid-Proof) crystal glass mixing bowl.

LAWRENCE HATCHERY

PHONE 131-A

WHEELER, TEXAS

MR. DAIRYFARMER:

You, no doubt, realize that there is money to be made from selling milk. But, had you realized that you could increase your profits if you could get all the milk you produce to market in a MARKETABLE CONDI-TION.

To be marketable, milk must be SWEET and for milk to remain sweet very long after it is taken from the cow it must be cooled to 50 degrees in a very short time in order to keep the bacteria from multiplying When the bacteria multiply this causes milk to sour and you know that when your milk sours before it reaches market that it comes back to you and you lose that much.

In recent years, WET STORAGE MILK COOLERS have been invented for use with either electric or gasoline power and by placing your milk cans in one of these coolers immediately after filling them with milk you can rest assured that your milk will be FRESH when you are ready to market it.

ONE YEAR GUARANTEE

We keep a good supply of WET STORAGE MILK COOLERS in stock at all times and can make immediate delivery, and there is an advantage in buying from us because we live right here with you and can ABSOLUTELY GUARANTEE SERVICE ON THE COOLERS WE SELL FOR ONE FULL YEAR.

FARMERS PLEASE!

We have had many complaints about people plowing across the bar ditch and into the county roads, tearing them up and leaving them in such condition as to be hardly passable in some cases.

It is not the aim of the commissioners court to knock anyone out of any farming land but we must ask you to please refrain from plowing up the county roads which we have gone to the expense of building out of the taxpayer's money.

It has been called to our attention that some of the mail routes in the county might be discontinued should this practice not be called to a halt.

We wish to commend farmers who try to keep their fence rows cleaned out, but we do not believe that it is necessary for a farmer to pull his tractor and plows entirely out into the roadway to turn around in order to keep his fence row clean.

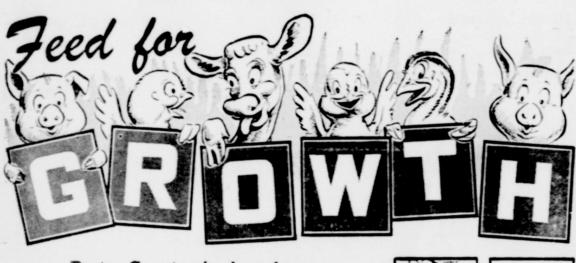

Many of your friends and neighbors have complained about some of you not having the forethought even to take your plows out of the ground when you turn around.

CARD OF THANKS

A TRIBUTE

We had a little treasure once, He was our joy and pride; We loved him, Oh perhaps too

For soon he slept and died.

All is dark within our dwelling, Lonely are our hearts today; For the one we loved so dearly, Has forever passed away.

Tis hard to break the tender cord, When love has bound our hearts; Tis hard, so hard, to speak the words:

'We must forever part"

Dearest loved one, we must lay

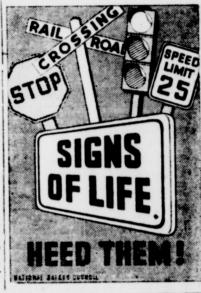

In the peaceful grave's embrace; But thy memory will be cherished Til we see thy heavenly face.

We take this means to acknowedge the many kindnesses of our dear friends and neighbors who se houghtfully assisted us in the loss of our loved one, David Wayne. For the words of comfort, floral offerings and services of the nurses, ministers and funeral directors, we are truly grateful.

A Statement To Our Customers About Resale

Built by International Harvester Company

Here at Harvester we are concerned over the fact that a growing number of our products are appearing on the resale market at greatly inflated

As manufacturers, we try to produce at the lowest possible cost. We cannot set the prices at which our products-tractors, motor trucks, farm implements, refrigeration, and industrial power equipment-are sold. We can and do suggest list prices which the great majority of our dealers adopt as their retail prices.

\$20,000,000 Price Reduction Our basic price policy was publicly stated in March, 1947, when we announced price reductions at the rate of approximately \$20,000,000 per year on our products. At that time. Fowler McCormick, Chairman of the Board, said: "ANY PRICE IS TOO HIGH IF IT CAN BE RE-

Practically all of our dealers cooperated with this policy and passed on the savings to their The objective of the price

reductions was to make it possible for customers to buy our products, which they need so badly, at lower prices. Naturally, this purpose is defeated when our products are sold by anybody at inflated prices.

IH Production at All-Time Peak Inflated prices are caused by

the difference between supply and demand. To increase supply, we now have the greatest number of employes in history on our payrolls-almost 90,000 in the United States, as against about 60,000 prewar. Large new plants are getting into production in Louisville, Evansville, and Melrose Park. A fourth will soon be in operation in Memphis. The men and women now employed are turning out the greatest quantities of IH products of all kinds that we have ever made. These are also the finest products we have ever made, and recognition of that fact is an important contributing factor to the demand for them.

Distribution to Dealers

But even record-breaking production is not sufficient to give your dealer-and other IH dealers-enough products to meet today's demand. We have tried to make the fairest possible geographical allocation of our products so that every dealer would get a fair share, and we know that dealers, in most cases, have tried earnestly to make the fairest possible distribution to their customers. But we also know that many

of our products-far too many -are being resold at inflated prices. The public criticism and resentment of these resales are of real concern to us, as we know they must be to our dealers, because such reactions endanger the good will of b the dealer and the Compan any community.

Distribution to Custom

Experience shows that m IH new products are being sold by users who decide to can continue to make out their old equipment after t have had an inflated offer their new equipment. Toel nate this, many dealers taking measures to be surely equipment purchased is their customers' own use

is not to be resold. Nearly all IH dealers, we lieve, are now using the b of PRESENT NEED as their mary guide for the sale scarce products. The custo whose need is real and u is not likely to resell.

> What Price Should You Pay?

While it may take a littlem time to get delivery, we u our customers to consider of the factors mentioned he before paying more than list price for any III produ Any IH dealer or branch furnish the suggested list pt for any III product.

We know that the of whelming majority of IH de ers are as much opposed to flated prices as we are. In public interest, we have ready asked their cooperat -and are now asking the operation of customers correcting this situation.
