DANGER SIGNALS AGAINST STATE SPENDING

The record of extravagance of state government in Texas is being amplified by various sources, despite the evasion of the problem of needed economy by the Legislature at its special session.

A current report of the Census Bureau

shows that Texas is near the top of the list in increase of state expenditures last year. While the total outlay of 28 states rose by 17.2 percent, the rise in Texas was 28.7 percent.

Dr. George C. Hester of Southwestern University, an authority on state government, warned of the danger of wild spending in Austin in a speech this week in Dallas. He declared that state taxes in Texas had increased even faster than nondefense federal taxes since 1939. His argument was that the tax problem by no means lay in Washington alone, for state taxes have multiplied faster than in any other state except Louisiana.

Secretary of State Shepperd, in an address at the annual meeting of the Graham Chamber of Commerce Tuesday night, accurately stated that we are spending and taxing ourselves into socialism, "a half-step from communism." He inveighed against state and federal extravagance, and declared that from \$175 million to \$190 million could be saved by reorganization of state government in Texas.

The state outlay in fiscal 1949 amounted to \$443.7 million and is estimated at \$514.4 million for the current fiscal period in Texas. This high level has been reached despite the neglect of state hospitals and special schools, for which another tax increase is necessary.

The total tax take of the states in 1949 was \$3 billion and the combined tax burden—federal, state and local—in the previous year was \$54.5 billion according to the Census Bureau. Motorists alone paid more than \$2 billion in taxes last year, exclusive of the direct and hidden levies on new cars, amounting to about \$511 on a \$2,000 automobile.

The first fruits of state extravagance are being harvested at the special session, which voted to increase taxes to provide for the needs of eleemosynary institutions. Since the general fund surplus will be exhausted by next year and has been allocated to recurring costs, another tax increase will be inevitable at the regular session—if there is no retrenchment.

Three other states—New York, South Carolina and Louisiana—are awakening to the danger of state spending that forces higher taxes, and are working toward lower state budgets for next year. Texas should proceed in the same direction. Dr. Hester at Dallas declared that the people, who foot the bill, should demand that the Legislature balance the state budget.

That requirement is important for legislators serving the people as a whole. Another is moral courage to oppose pressure groups which are responsible for the state's financial predicament.

Kansas is one of the states that leads all others in production of wheat, and other farm products very high in value. It ranks very high in production of wheat and other farm products, among its large quantities of wheat, natural gas and oil, natural gas and oil.

The state of Washington is a fast growing state; it attracts population because of its natural resources, its climate; its timber production is outstanding; its production of apples and wheat especially large. In its cities of Seattle and Tacoma are important Pacific trading posts.

In addition to being noted for its bluegrass region with its fine stock, Kentucky boasts of its tobacco production, which is second largest in the nation. Corn is the state's second largest crop, its oil production is considered and its manufacturing, transportation and financial interests are large.

VETERANS LAND PROGRAM IS QUITE LARGE

Bascom Giles, Commissioner of the General Land Office and Chairman of the Veterans Land Board, Tuesday issued an "informal memorandum" to the 51st Legislature calling attention to the necessity of expanding the \$25,000,000 Veterans Land Program at the next regular session.

"Within a very short time," Commissioner Giles pointed out to the legislature, "we will have received a sufficient number of applications to fully obligate the total \$25,000,000 authorized by the constitutional amendment. But only approximately 5,000 veterans will have been taken care of when many times that number desire to participate in the program."

"While we are processing an average of ten applications a day," Giles added in his prepared statement, "we are receiving new applications at the rate of 20 per day. Of the 4,700 applications received, most were signed for only a 90-day period. It was, therefore, to be expected that many options expire unless the sellers were willing to stand with the veteran and with us."

He described the personnel of the Land Program, of which Alvis Vandygriff is secretary, as consisting of 10 appraisers, 2 attorneys and 15 clerks, stenographers and typists.

"Our incoming mail is averaging approximately 200 letters per day," he stated, "and most of these letters require personal attention."

Listing the program's progress to date, Giles said that 1,600 farms and ranches had been appraised with approximately 72 percent approved for the contract price. 500 purchases has been completed at an average price of \$5,750, an average of \$52 per acre including improvements.

"Due to the heavy back log of applications and our limited staff," Commissioner Giles pointed out, "the time necessary to process an application filed at this time is at least 200 days."

Much Valuable Time Lost To Common Colds

There is hardly anyone who hasn't caught cold at one time or another and besides making you feel miserable they steal your time and money, declares Dr. Geo. W. Cox, State Health Officer. They fool you too, because the early signs are often the same as those of more serious illnesses.

Long continued colds may pave the way for an attack of pneumonia, tuberculosis, or chronic infection of the nose, throat, ears or sinuses. Do your best to keep from catching cold. If you do catch one, take care of it promptly by going to bed, keep warm and dry, drink plenty of citrus juices and water. If the cold is severe, consult your physician.

Another enemy is pneumonia, an acute infection of the lungs. Virus pneumonia is the most common of all pneumonias today. It may occur at any age, and usually appears in local outbreaks instead of far reaching epidemics. In any case of pneumonia, good medical care and nursing play a great role in recovery.

Lobar pneumonia is caused by bacteria, not a virus, and is very contagious. A generation ago one out of every four who had this disease died. Today, thanks to the "miracle drugs" many are saved. It is most common in late winter and early spring.

The most frequent victims of broncho-pneumonia are the aged, the invalid and the baby.

Concert Association To Present The Men Of Song March 15

A vigorous singing male quartet The Men of Song, will present one of the outstanding musical events of the season at Shamrock on March 15 as a presentation of the Wheeler County Municipal Concert Association. The concert will be held at the Clark Auditorium and will begin promptly at 8:15 P. M.

The Men of Song is an accomplished quartet of four virile male voices and is generally acknowledged to be the most versatile quartet in America. Veterans of the concert stage and numerous appearances in radio, television and recordings, each of the four singers has a splendid musical background and education.

Recently the Men of Song was named one of the ten best musical attractions in the United States by the National Society of Music on its list which included such outstanding personalities as Leonard Warren, Eleanor Steber and others.

In substantial measure the great success of the Men of Song can be attributed to the remarkable concert arrangements of the music performed. The arranger of distinction for the ensemble is Charles Touchette who will appear here at the piano with the quartet. Mr. Touchette has been arranger and choral director for all major recording companies as well as for the National Broadcasting Co., Columbia Broadcasting System and the Mutual Network.

The concert will be open only to members of the Wheeler County Municipal Concert Association.

Space in the home freezer is often wasted because of the type and size of the containers used. Rectangular shaped containers are the best space savers.

We are still practicing on our play "Desperate Ambrose." We will present it March 14, in the high school gymnasium.

Since nothing happened this week, we will quit and hope that next week will be more eventful.

FRESHMAN NEWS

Our personality for this week is Molly Berry. She is 13 years of age, has brown hair and blue eyes. She is 5 feet, 4 inches tall and weighs 105 pounds. Her favorite food is fried chicken. She likes to be liked by everyone and dislikes nosy people.

The F.H.A. girls received their jackets last week, and are expecting their pins any time now.

We presented our assembly program Monday morning and we hope that everyone enjoyed it. Mrs. Frey was our sponsor.

Glen, we don't see you around in your car much any more.

Have you noticed John Dan's new glasses? He looks so dignified.

Helen has tape around her wrist lately. She does hate to wash dishes.

The freshman girls are looking forward to their basketball tournament at Darrrouzett.

Marilyn, we all like the ribbon in your hair.

Nadine, how about playing some more baseball?

Nona, why don't you start doing your own thinking, or will Waunetta let you?

Wonder who "Suspenders" is in the freshman class?

We took our six weeks tests last week so you can look in the honor roll to see how we did if you care to know.

Tender Janes

Bring delightful eating and good nutrition to your table with a basketful of tender Janes, tiny loaf-shaped sweet rolls.

Tender Janes are another of the excellent puffs and sweet rolls you can make from a beaten batter which requires no kneading. The main ingredient in the batter is enriched flour, which makes these rolls a good source of essential B-vitamins and iron.

These rectangular rolls will be as light and tender as their name if batter is beaten thoroughly. Allow time for batter to double, then stir down and drop by spoonfuls into greased pans. Tiny iron molds, two by three inches, were used to make the tender Janes pictured. If you do not have similar molds, bake batter in muffin pans. The rolls will be equally delightful.

The topping for these sweet rolls is as easy as the batter. To make icing, combine two cups sifted confectioners' sugar, two tablespoons hot milk, two teaspoons butter or margarine, and one-fourth teaspoon vanilla extract, and mix until creamy smooth. Spread on warm rolls, then sprinkle with chopped walnuts.

Tender Janes are excellent for breakfast, but try them at lunch, too, along with an omelet, stewed dried fruit, and milk.

TENDER JANES

1 package yeast, compressed or dry
 1/4 cup lukewarm water
 1 cup milk
 1/4 cup sugar
 1 teaspoon salt

1/2 cup shortening
 2 eggs
 3 1/2 cups sifted enriched flour (about 45 minutes)
 1/2 teaspoon vanilla extract (if desired)
 Confectioners' sugar icing
 Broken walnut meats

Soften yeast in lukewarm water. Scald milk and add sugar, salt and shortening. Cool to lukewarm. Add one cup flour and beat well. Add softened yeast, eggs and vanilla extract. Beat well. Add remaining flour to make a thick batter. Beat thoroughly until smooth. Cover and let rise until doubled (about one hour). When light, stir down. Spread evenly into greased rectangular iron

molds (two by three inches) or muffin pans, preferably rectangular. Let rise until doubled (about 45 minutes). Bake in moderate oven (375 degrees F.) about 25 minutes. Brush with confectioners' sugar icing and sprinkle with walnuts.

Makes about two dozen three-inch loaves, or three dozen two-inch puffs.

DRIVERS TO GET LICENSE UNDER NEW METHOD

After years of study aimed toward better serving the motorists of this state, Texas has pioneered in improving the style and the procedure of issuance of drivers licenses, according to Colonel Homer Garrison, Jr., Director of the Texas Department of Public Safety.

Under direct supervision of A. F. Temple, Chief of the Department's Drivers License Division, the new license has been adopted, after extensive study, for greater ease of processing and with a view toward making the renewal of licenses less effort on the part of the motorists. Texas, so far as is known, is the first state to adopt the technique of notifying drivers when their licenses are about to expire.

Effective this week, the License Division will begin issuing the new type operator, Commercial and Chauffeur permits to all applicants. Licenses now in effect will remain valid and will be replaced by the new form upon the renewal by present holder.

Complete handling of the new license will be effected by machines and the license itself will be mailed out in the form of a post card which is so arranged to permit separation to allow for proper fitting into billfolds or card cases.

One of the more important features of the new procedure will be a recorded renewal copy of the original license which will be mailed to operators about a month prior to the expiration date of their license advising them that it is about to expire. This is expected to be a real benefit to the thousands of Texas drivers who habitually allow their licenses to expire because of neglect in checking the expiration date. The new license will also carry the actual date of expiration rather than the

date of issuance as previously used.

Holders of the old type license which has been in use for several years will not be required to execute a form when seeking renewal. All that is necessary is to tear off the renewal stub, make any corrections as to address, etc., on same, and mail it in along with a money order in the proper amount.

Cost and validation periods of the licenses will remain the same: fifty cents for Operators License for two years; one dollar for Commercial License for one year; and three dollars for Chauffeur's License for one year.

FARM FACTS

**WORTH
KNOWING**

**25,550 CHICKS STARTED,
25,144 RAISED**

Chick mortality at the Ralston
Purina Research Farm is extremely
low, records for a calendar year
show, when 25,550 chicks were
started with 98.41 per cent, or 25,144,
raised, it was announced recently.

In one lot of 2,000 chicks moved
from the brooder house at 6 weeks
of age, the livability was 99.6%.
These were fall chicks, generally
regarded as more difficult to raise.

Purina researchers in charge of
the poultry unit say this record of
low mortality was possible only be-
cause they used good chicks, fol-
lowed good practices in manage-
ment and sanitation, and because
the feed supplied was adequate for
the needs of the chicks.

The important factor about this
record of high livability, Purina offi-
cials point out, lies in the fact that
experiments in building Chick
Starters and Broiler Chow rations
have not been handicapped by either
disease or mismanagement.

Send your questions about livestock or
poultry problems to FARM FACTS,

**Flies Cause Much
Illness And Death**

Millions of flies help to cause
the illness and death of thousands
of children and adults each year
in the United States. Hundreds of
these casualties may be in the
State of Texas this year if resi-
dents fail in their responsibility
for developing the best possible
sanitation measures in the area
where they reside. Typhoid fever,
summer complaint, and other in-
testinal diseases can be traced to
the common house fly as the car-
rier of infection.

Dr. Geo. W. Cox, State Health
Officer, speaking in this connec-
tion recently said, "Be sure that
your windows and doors are tight-
ly screened so that stray flies from
a careless neighbor will not en-
danger your family. Be sure that
flies are kept away from food,
drink, and utensils used in the
preparation of food. Make sure, if
you live in rural districts, that out-
side privy vaults are tightly cover-
ed so as not to permit the en-
trance of flies. Infections from this
source can be picked up and spread
to human beings through contact
with food, drink, and utensils.
Keep all garbage covered until
collected or buried. Eliminate all
breeding places for flies and you
will be helping your community in
its work of controlling communi-
cable diseases and preventing un-
necessary illness."

Dr. Cox said that the State
Health Department would furnish
upon request a pamphlet outlining
safe and practical methods re-
commended for use in fly control.

MARCH 4 TO 12 4-H CLUB WEEK

How many of you here in Wheeler County know what 4-H really stands for and how much good can be accomplished from a well-rounded 4-H program for your children or the children in your community? Saturday, March 4 marks the beginning of National 4-H week in the United States. To begin that week the agents have been invited to have the assembly program at Briscoe Friday afternoon. Miss Morton will give a Flannelgraph on the meaning of the four H's, and Mr. Frey will give a talk, "What is 4-H Club Work". Everyone interested is invited and urged to attend the program in the Briscoe High Auditorium at 3:00 p. m. Friday, March 3rd.

National 4-H Week extends from March 4 to 12 and the theme for the week is "Better Living for a Better World". 4-H is the largest rural youth organization in the world with almost 2,000,000 boys and girls between the ages of 10 and 21. Alaska, Hawaii, and Puerto Rico also have 4-H clubs, and many other nations have similar

organizations. The 4-H program affords opportunity for activity, on achievement through ship training and community life by helping to start a program. The value of 4-H is adequately summed up in the following paragraph: "4-H is a kind of training for rural youth learns better ways of working together and on community life. It puts the emphasis on basic educational values. It puts the emphasis on reliability, character and appreciation of the things open country. It makes homes, good citizens and rural life." Each of us encourage our 4-H clubs here to attain the above goals.

Mr. and Mrs. Jack Pampa visited friends Sunday. Mrs. Graham formerly Florence Merriman and Washington, D. C.
