Editorial

PUBLIC CAN'T BE BLAMED THIS TIME

Once again the old phrases are heard everywhere—on the streets, in taverns, in

letters to newspapers: "We aren't ready for war; the people are asleep; they are still isolationist."

It is a false assumption. This time, the dear old public can't be blamed—if we aren't ready.

Before World War I, and before Pearl Harbor, it was true. We were spending only half a billion dollars a year. But since 1945 we have spent 10 to 12 billions a year on defense.

We have spent 30 billions on foreign aid. Altogether we have spent nearly 100 billions to combat Communism since it became evident late in 1945 that the Russians were not a freedom-loving, peaceable people, as F. D. Roosevelt "had a hunch" they were.

You can blame the public this time. The Truman administration has received nearly every dime it asked for—from highways in the Belgian Congo to submarine detectors in the Pacific.

The public, instead of being blamed, should ask: "If we aren't ready, where on God's earth has the money gone?"

We weren't ready before Pearl Harbor because more money was spent on raking leaves than on battleships. It was a case of mistaken judgment, being asleep, playing politics and a country still in a depression and not able to stand too heavy a load of taxation.

Since 1945 the country has shelled out, denied preparedness planners very little and gone along. Even the Republicans.

It is no time to cry over spilt milk. It is time for unity. But it is unfair to shift the blame for unpreparedness, if we are unprepared, upon a democratic people who have shed their isolationism—and shed their cash—for what we were told we needed. The blame is somewhere else. It is not unpatriotic to charge that the blame is somewhere else.

—From Fort Worth Star-Telegram

HORMONE AGE

The Wall Street Journal reports amazing results of hormones: wool growing on sheep 137 per cent faster, hogs made lazier thereby to produce more flesh, chickens laying faster, turkeys growing bigger, roosters turned into capons, cows yielding 25 per cent more butterfat.

But here's one with a portentous effect. The research director of one feed firm says: "Before we get through we may learn how to use hormones to convert bulls into milk cows, then when the cows get to old to be good milkers we may be able to turn them into beef steers with another hormone."

In the interest of fairness, there ought to be a way of getting the bulls and/or cows permission first before hormonal conversion.

H. E. LONG, Pastor

A thorough soaking at intervals of a week or ten days is far better than a daily shallow watering for flowers, trees, shrubs and vegetable garden during hot dry weather.

The results of a recent feeding test by the Texas Agricultural Experiment Station indicate that at current prices it is an economical practice to substitute four pounds of citrus or corn molasses for an equal amount of ground milo in a beef calf fattening ration.

300,000 Veterans Still To Receive Dividend Checks

If you have not received your National Service Life dividend, then perhaps you are one of 300,000 cases still remaining to be processed, according to an announcement made this week by Harris B. Zeigler, Wheeler County Veteran's Service Officer.

These 300,000 cases are difficult cases in which extensive study is involved. The VA has already mailed out cards informing this group of veterans that their cases are being processed and payment will be forthcoming at a later date.

The VA office handling the payment of these National Service Life dividends reports there are approx-

imately 10,000 veterans whose dividend checks are not current because fact their application and payment cards were not returned for insufficient information. Robert W. Sisson, manager of the VA Regional Office, has declared that veterans should Special Insurance Program, Washington 25, D. C., correct address so that their cases can be processed and checks mailed. The VA is making additional in an effort to develop addresses.

Periodic checks should be made of flower garden and if necessary, a heavy infestation of sometimes called "green" plants to weaken them. Control measures should be applied as early as possible.

SOCIETY

Ripley-Risner Vows Exchanged Recently

Announcement has been made of the recent marriage of Miss Betty Ripley, daughter of Mr. and Mrs. M. B. Ripley of Midland, and Henry Risner, son of Mr. and Mrs. Jim Risner of Wheeler.

The single-ring ceremony was performed by the pastor of the First Baptist Church of Midland, in the church auditorium.

Given in marriage by her brother, Roy Ripley, the bride was attired in a street-length dress of blue satin and white accessories. Attending her sister as maid-of-honor, Miss Jo Ann Ripley wore a street-length dress of green crepe with tan accessories.

Also attending the wedding ceremony were the bride's parents.

Mrs. Risner has been attending the Wheeler schools and will be a member of this year's graduating class.

The groom graduated from the Wheeler high school in 1945 and attended Wayland College at Plainview for one semester.

Following a short wedding trip, the couple will make their home in Wheeler.

Mrs. Hefley Hostess To Good Neighbors

The Good Neighbors Club met Tuesday, July 11, in the home of the club president, Mrs. Opal Hefley.

The business meeting was conducted by the president with Helen Mixon leading the songs and Essie Finsterwald the club prayer. Roll was answered with, "A Kitchen White Elephant I Own."

Mrs. Jay Hastings gave a very interesting demonstration on small kitchen equipment, its use and suitable storage for such items. Delicious refreshments were

home of Mrs. Bentley for a demonstration on, "Small Kitchen Equipment and Storage", by Mrs. Jay Hastings.

Refreshments were served by Mrs. Shelby Pettit, Mrs. W. L. Williams and Mrs. Frank Walker, guests, and to the following members: Mesdames H. H. Lynn, Bill Owen, Tom Bradstreet, Homer Moss, Roy Bailey, Percy Frazier, Bill Rushing and the hostess, Mrs. Bentley and her mother, Mrs. Hargrove.

A Child May Dare So Drive With Care!

From where I sit... by Joe Marsh

There it Was— Right in The Middle!

Easy Roberts mowed his lawn early last Saturday. Then he sat on the porch, and watched Handy Peterson cutting his grass.

The Roberts' property and the Peterson's border each other— with no hedge or fence between them. So, when Easy notices Handy had left about a four-foot strip unmowed along the boundary, he walks over and asks why.

"That's your land," says Handy. "Mine ends here. See, it lines up with that oak tree across the road!" Easy didn't think so, so they went up and down looking for

the surveyor's marker. Where did they find it? Right in the middle of their "no man's land!"

Well, they both grin and take turns finishing the job and then retreat to Easy's for a friendly glass of beer together. From where I sit, a little searching around for the truth of the matter often shows that the other fellow is as much right as you are—at which point the whole thing doesn't seem as important anyway.

Joe Marsh

Copyright, 1950, United States Brewers Foundation

TO THE VOTERS OF WHEELER COUNTY

I am asking my friends, if they see fit, to again support me in my race for sheriff of this county. My opponent is a good man and I have no criticisms to offer against him in any way. I am making this race strictly on my own merits. I have never been one to seek the limelight and have gone about my duties as your sheriff in a calm way and in the best way I have known to do. During my term as sheriff there have of course been many misdemeanor cases. I desire to call your attention to liquor cases during my term as sheriff. As to this there have been 153 cases filed. Of these cases 18 cases have been dismissed by the court for various reasons, five have been acquitted by a jury and one juvenile case was paroled. There have been 129 convictions. Forty of these cases were given jail terms and remainder of cases fines were assessed. The total fines assessed in these cases were \$9,398.85, and costs in these cases paid by the defendants amounted to \$2,760.22. These facts speak for themselves and may be verified from the court records; also have four liquor cases pending. It has always been my desire and effort to prevent crime if at all possible but the above figures will show that I have not been neglecting my duties in any respect. The total of other misdemeanor will far exceed the above, this statement being to liquor cases only. If re-elected it will be my effort to continue the prosecution of all laws.

Crime in the county is now at a very low ebb. There is seldom a felony and misdemeanors are fast becoming less frequent.

If I have satisfied you and you think I have made a good sheriff, I will certainly appreciate your vote. If you are not satisfied it is your privilege and duty to vote against me and if you do I will hold no hard feeling against you.

JESS SWINK

Candidate for Re-Election as Sheriff of Wheeler County

PEACHES NOW PRESERVED BY SHARP FREEZING

Freezing is one of the newer methods being used for preserving peaches and when properly done is very satisfactory. According to Louise Mason, extension foods and nutrition specialist of Texas A. & M. College, several factors are involved in the selection and preparation of the fruit and in the freezing process that must be given careful attention if the results are to be satisfactory.

She says the best varieties for freezing are Elberta, Hailey, J. H. Hale, Hale Haven and Frank. The peaches to be frozen should have reached the choice eating stage. This means firm, evenly ripened fruit of good quality.

After the peaches have been selected, they should be carefully washed and peeled. They should be treated to prevent discoloration and she says there are several products available for doing this job.

Ascorbic acid, vitamin C, is one of them. It is available in powdered and tablet form and she says that one and a quarter of the 100 milligram tablets should be used for each pint of fruit or one-half teaspoon of the powdered ascorbic acid for each quart of syrup. The ascorbic acid should be dissolved in the syrup before it is poured over the fruit, she adds.

Citric acid is also recommended for preventing discoloration. She says to dissolve one-fourth of a teaspoon of citric acid in one quart of cool water and to leave the fruit in the solution only 15 or 20 minutes, then remove, place in containers and cover with a sugar

SUMMER CARE OF POT PLANTS IS IMPORTANT

There is a right and wrong way to water ornamental plants, especially during the hot, dry summer months. How well the job is done can determine the condition and health of the plants at summer's end, says Sadie Hatfield, extension specialist in homestead improvement of Texas A. & M. College.

A thorough soaking at intervals of a week or ten days is far better than a daily shallow watering, she says. Many plants are actually killed when only the top of the ground is wet. Water may run off yet penetrate only an inch or so deep in the tight soils. Miss Hatfield says it is a good idea to use a shovel or spading fork and see for yourself whether or not the water is going into the soil or just wetting the top.

To do a thorough job, Miss Hatfield says the water should be allowed to run very slowly over a long period of time. In areas of porous soils, the water should be applied at a faster rate because it penetrates rapidly and less will be required to do the job. This is not the case on tight soils. She recommends the spade tests as the best method for determining the speed at which water should be applied to any type soil, and adds that when water is applied too fast, the run-off can carry away plant food.

A mulch made from the leaves that were saved last fall will help conserve the moisture after it is applied. The leaves will gradually work into the soil and in turn will increase its water-holding capacity. She says that mulching paper is sometimes used to protect the top soil against excessive moisture losses by evaporation. Other materials which may be used for mulching include cotton-

seed hulls, decayed straw or decayed finely ground hay, refuse from the trench silo and feed mills. Miss Hatfield says these mulches should be used on the plants that need air about their root system.

Moisture, she says should penetrate to a depth of 15 to 18 inches and plants should not be watered until they begin to show signs of needing moisture. Withholding moisture will cause the roots of the plants to penetrate deeply into the soil, and on the other hand shallow watering brings the soil to the surface where they are injured by heat and drought in summer and cold in the winter, she says.

Keep the garden productive year-round basis. The soil in the garden may be kept from being frozen and by this means the family can enjoy fresh vegetables throughout the year-round.

COLEMAN'S GOLDEN ANNIVERSARY OFFER

15% OFF

FLOOR FURNACE

A SPECIAL BARGAIN OFFER to let you say goodbye to ashes, dirt, soot, fire-tending and a poorly-heated home. By acting now you can save 15% and have a fully automatic furnace-heated home throughout next winter.

NEW COLEMAN SHALLOFLOW Floor Furnaces are easy and inexpensive to install, comfortable and healthful to live with. They fit in the floor, need no pit or excavation, no air ducts. They draw cold air off the floor, warm it, circulate it over a 3 to 5 room house and give you warm floors.

Come in and let us explain Coleman's Bio-Arch Burner and other features for a better-heated home all through winter!

LEGAL NOTICE

THE STATE OF TEXAS COUNTY OF WHEELER SHERIFF'S SALE

WHEREAS, on the 10 day of June, 1950, in Cause No. 4101, in the District Court of Wheeler County, Texas, wherein The State of Texas in behalf of itself and the county of Wheeler was Plaintiff, Esker Harvey; Mattie Lee Campbell Harvey; Cuba Harvey; Murphy Douglas Harvey; Emery Clark Harvey; Delvin Dale Harvey; Erret Strassmore Harvey and their unknown heirs and legal representatives, and all of the unknown heirs and legal representatives of J. B. A. Harvey and Mary Lou Harvey, Deceased, and their spouses, Defendants, for taxes, penalty, interest, and cost against the herinafter described property; WHEREAS, on the 1 day of July, 1950, by virtue of said judgment and the mandates thereof the Clerk of the above mentioned District Court of said county did cause to be issued an Order of Sale commanding me as Sheriff of said county to seize, levy upon, and sell in the manner and form as required by law the herinafter described property;

WHEREAS, by virtue of said judgment and said Order of Sale and the mandates thereof I did on the 1 day of July, 1950, seize and levy upon as the property of the above defendant the following described property, situated in Wheeler County, Texas, to-wit:

(Said description showing the number of acres, original survey, locality in county, and name by which said property is most generally known.)

100 feet by 140 feet out of the N¹/₂ of Out Lot 27, of the town of Shamrock, Wheeler County, Texas and further described as follows:

Beginning at a point in the North line of said Out Lot 27, 100 feet East of the Northwest corner of said Out Lot 27; Thence East 100 feet with said North line; Thence South 140 feet; Thence West 100 feet; Thence North 140 feet to

place of beginning most generally known as "the J. B. A. Harvey vacant lots"

And I will on the first Tuesday in the month of August, 1950, the same being the 1st day of said month, proceed to sell all the right, title, and interest of the Defendants in and to said property at the Court House door of Wheeler, between the hours of 2:00 p. m. and 4:00 p. m. to the highest bidder for cash, provided, however, that none of said property shall be sold to the owner of said property directly or indirectly or to anyone having an interest therein or to any party other than a taxing unit which is a party to this suit for less than the amount of the adjudged value of said property or the aggregate amount of judgments against said property in said suit, whichever is lower, subject also to the right of the Defendants to redeem same in the time and manner provided by law and subject also to the right of the Defendants to have said property divided and sold in less divisions than the whole.

DATED at Wheeler, Texas, this 1 day of July, 1950.

JESS SWINK, Sheriff
By Charlie Mixon, Deputy
Wheeler County, Texas

\$28,395 Worth of Bonds Bought in Wheeler County

The standing of Wheeler County in the Independence Savings Bonds Drive is quite favorable compared to that of other counties in this area, according to a report issued by the U. S. Savings Bond Division of the Treasury Department at Dallas.

The report, dated June 23, indicated that residents of this county have beaten the residents of Childress, Gray, Hall, Hemphill and percentages of their quotas of Ochiltree Counties in the matter of Series E Savings Bonds purchased to date. Residents of the county had

at that date, bought \$28,395.00 worth of bonds, amounting to 59.16 of their quota of \$48,000 and were surpassed by residents of only two neighboring counties, Collingsworth, with 74.39 per cent of its quota and Donley, with an amazing excess of 26.46 per cent.

The record of the counties of the area, as shown below, was taken from the Treasury Department report.

COUNTY	QUOTA	SALES
Donley	\$18,000	\$22,762.50
Collingsworth	23,000	17,110.00
Wheeler	48,000	28,395.00
Childress	45,000	21,825.00
Gray	98,000	37,886.25
Hemphill	23,000	6,161.25
Hall	54,000	7,688.75
Ochiltree	77,000	10,012.50

NAVY READY FOR VOLUNTEERS

Since Naval Reservists, both Organized and Volunteers, are desired for active duty, Rear Admiral W. K. Phillips, UN, Commandant of the Eighth Naval District, today announced that the machinery has been set up throughout Texas, Oklahoma, Louisiana, Arkansas and New Mexico for processing applications of those who volunteer.

"The Navy needs additional male officers and enlisted men," the Admiral said. "Primarily it needs them for afloat and overseas duty."

The Navy requires a minimum of six months active duty from those who volunteer. Twelve months of active duty will be guaranteed to those who desire it.

Male officers should submit their requests for active duty directly to the Bureau of Personnel (Section Pers. B11), Navy Department, Washington 25, D. C. The Bureau of Personnel will issue all orders to officers. Aviation officers should include flight time and types of plane flown during the past year in their applications.

Enlisted men are to volunteer at their nearest naval recruiting station. There are 51 naval recruiting stations in these five states, 45 of these are sub-stations.

Those who volunteer at recruiting sub-stations will be transported to Main Recruiting Stations for final determination of eligibility for active duty. All those finally accepted will be given active duty orders immediately and sent on to receiving stations for further assignment.

All enlisted applicants must be physically qualified for unlimited active duty and have at least one year remaining in their current naval reserve enlistment.

Applications are not desired at this time from Chief Petty Officers, except in the ratings of sonarman, radarman, fire-controlmen, fire-control technicians, air controlmen, mineman, communications technicians, yeomen and photographer's mates.

No volunteers are desired at this time for enlisted personnel in the recruit and apprentice grades. Enlisted organized naval reservists, who intend to volunteer for active duty should contact their local naval reserve Inspector-Instructors prior to reporting to recruiting station.

The Navy's need for officers applies to those ranks of Lieutenant Commander and below in the cases of unrestricted line, both aviation and non-aviation, and also Supply, Dental and Civil Engineer Corps. Officers of the rank of Commander and below are needed in Medical, Electronics, Intelligence and Communications branches.

any other farm in which he has an interest.

Eligibility for Federal price support on 1950 crop Upland cotton also depends on producer compliance with the acreage allotment-marketing quota program. Mr. B. F. Vance explains. As announced by PMA on June 27, the price support rate on 1950 crop cotton will be 90 percent of the parity price on August 1, 1950. Any person interested in cotton produced on a farm in 1950 on which the acreage planted to cotton is knowingly in excess of the farm cotton acreage allotment will not be eligible for price support on any cotton produced on the farm, he points out. Neither will such person be eligible for price support on cotton produced on any other farm in which he has

Safety Tips for Safe Living

IN OBSERVANCE OF NATIONAL FARM SAFETY WEEK, July 23-29, a half-million 4-H Club boys and girls point out timely do's and don'ts for safe living. Safety is their No. 1 Crop. It is a 52-week-a-year farm and home safety program directed by the Cooperative Extension Service. General Motors honors the 4-H's annually with county, state and national awards valued at \$10,000.

FARM FACTS WORTH KNOWING

1. Is vaccination for Bang's disease sufficient, or is there more to control it?
The evidence is that vaccination alone is not sufficient. Other means are necessary, such as sanitation, segregation or elimination of diseased animals.

2. Is sanitation important to pork production?
Sanitation is essential for the efficient production of pork. Sanitation begins before farrowing time. The farrowing pen should be cleaned out thoroughly and disinfected before the sow is put in it. The sow should be brushed clean and her udder washed with soap and water before she is put in the clean pen. The sow and litter should be hauled to a clean pasture and the pigs kept on it until they weigh about 100 pounds.

3. Should calves be fed vitamin pills?
Vitamin work during the past 4½ years with several hundred calves at the Research Farm of the Ralston Purina Company has not been encouraging. The best assurance to produce good calves is to feed the mothers well and follow this by good, wholesome nutrition and sanitary management, rather than to expect vitamin concentrates, etc., to overcome mistakes that have been made before the calf was dropped.

George Washington did not belong to a political party.
Ether is produced by distillation of alcohol with sulphuric acid.
The first oil pipe line was of wood construction, five miles long, and had a capacity of 800 barrels daily.
Inhabitants of New Zealand have the longest life expectancy.
