

HOME OWNERS QUESTION BOX

Q—Concrete spilled and hardened on slate flagstones while we were building a patio. How can the concrete be removed?

A—Mix a ten percent solution of muriatic, or hydrochloric acid with water. Wear rubber gloves and apply with a cloth. Rinse well with a garden hose. The acid is obtainable from most drug stores.

Q—We're tiling a basement floor and find there are some shallow areas here and there which must be filled to give an even surface. What can we use for this?

A—Professional tile installers often mix linoleum paste with plaster of Paris. Mix a small amount at a time into a putty-like substance and apply with a wide-bladed putty knife. Let the mixture dry thoroughly before putting the tiles down. It will provide a firm base for the tiles which will not crack or crumble under ordinary usage.

Q—We plan to install an attic fan. How can we judge the size we'll need?

A—By the number of cubic feet of air space in your home. Get an accurate estimate of this and take it to your dealer. He'll sell you a fan of the proper size.

Q—When our home was built, a two-inch layer of insulation was installed in the attic floor. Is this enough to give us the maximum benefits of insulation? If not, can we install more insulation ourselves?

A—Authorities on home comfort agree that at least four inches of mineral wool insulation should be installed in ceilings for winter comfort and heating economy, and six inches if the house is air conditioned in

summer. You can obtain pouring wool—mineral wool in bags—from building material dealers. This is simply poured between joists of the attic floor, as shown in the sketch, spread out to the depth of the joists with a garden rake, and smoothed with a piece of board.

SAFETY MAKES SENSE

ACCIDENTS
never take
a vacation

Mrs. Roxey Sanford of Reydon and Darrell Harrison and family from Amarillo were week end guests in the Ray Brown home.

Everyone is rejoicing over the fine rain we had Sunday evening. Some reported as much as 2.7 inches east of Allison.

Mr. and Mrs. Dudley McMillan and Mr. and Mrs. Claude McMillan of Wellington visited H. R. Warren and Mr. and Mrs. Archie Dillon recently.

Mrs. Ada Jones spent last week at Mobeetie with her daughter Mrs. Lois Risner and family.

Wedding vows were spoken Tuesday of last week between Kathy Chandler daughter of Mr. and Mrs. Frank Chandler and Jerry Gilmer son of Mr. and Mrs. John Gilmer of Briscoe at the home of Dr. C. C. Merritt of Wheeler. Mr. and Mrs. Jackie Chandler were the only attendants. The couple are making their home in Allison where he is employed on the road construction work south of town.

Rev. and Mrs. Howard Smelser and sons spent the week end at Gonzales for medical reasons.

Mr. and Mrs. Loyd Jones motored to Coleman Friday and brought their daughter Sharon home. She had spent two weeks in the Troy Dean Jones home at Coleman.

D. Malin and daughter Elizabeth spent the week end at Ft. Riley, Kans., with relatives.

Mrs. Bob Markham and Elizabeth Malin accompanied the Junior Girls to the North Fork encampment Monday of last week and stayed until Friday. Mr. and Mrs. Weibe and Linda went down Friday and help bring the girls home from camp.

Colorful Granules Give Roofing Coat of Rock

Millions of rock granules are embedded into the surface of asphalt shingles. The granules are both functional and decorative.

The opaque granules give the surface of the roofing a tough coat of rock which seals in the heavy oils of the asphalt and reduces the wearing effect of rain, snow, and ice.

For appearance, the granules are given color through a special ceramic process. The result is a wide range of colors available in asphalt shingles, from light pastels to deep tones and blends.

LEGION HOLDS ANNUAL STATE CONVENTION

Four thousand delegates of The American Legion and American Legion Auxiliary will assemble in Houston on July 26-27-28 for their 39th Annual State Convention. W. D. Mitchell, Post Commander announced this week.

The Headquarters for The American Legion and Auxiliary will be at the Rice Hotel The Forty & Eight, the fun organization of The American Legion, will have their

Headquarters at the Texas State Hotel.

The Convention will open with a mammoth parade in downtown Houston Friday, July 26 at 10:00 a.m., under the direction of R. Vic Landig. A joint session of the convention, composed of The American Legion, The American Legion Auxiliary, the 40 Hommes et 8 Chevaux and the Eight and Forty, affiliated organizations of The American Legion, will assemble at 1:30 p.m. at the Rice Hotel. The session will be called to order by Department Commander Joe L. Matthews. Governor Price Daniel, member of Travis American Legion Post No. 76 of Austin, will deliver the principal address that afternoon.

The social event Friday evening

will be a barbecue and dance at the Pan American Club on North Main Street.

Saturday, July 27, delegates will attend the Child Welfare Breakfast at 7:30 a.m. at the Texas State Hotel. The Convention will open at 9:30 a.m. in the Ballroom of the Rice Hotel, at which time reports will be heard.

On Sunday morning the delegates will hear the final report of the Constitution and By-Laws Committee which will be followed by the election of officers for the ensuing year and the election of delegates to the National Convention to be held in Atlantic City, N. J. Officers will be installed by outgoing Commander Joe L. Matthews.

CARD OF THANKS
We wish to express our heartfelt appreciation for the kindness, care, thought and food received at our recent sorrow. Special thanks to Dr. Glen Walker, for all who helped in any way during the illness and passing of Leon Bean.

NEWS FROM—

County Agent's Office

A lot of request have been coming in to the County Agents office on grasshopper control in gardens as well as feed and cotton crops. Gardens and Feed crops should not be sprayed after the fruit, vegetables or head has formed if it is to be harvested for consumption of either animals or humans. Therefore only two methods are left for such control and that is spraying around the fence row to keep the grasshoppers out or use poison bait. If you spray follow the directions in the 1957 Bulletin, Texas Guide for Controlling Cotton Insects. Bait may be mixed using the following: 100 pounds of bran, 300 pounds of sawdust or other filler, 16 pounds sodium fluosilicate, add water until it becomes moist but not wet enough to squeeze water from it, apply at the rate of 15 to 200 pounds of this mixture to the acre. It should be applied early in the morning for best results and repeated every three days until control is reached.

Due to recent rain over parts of the county the insect numbers could build up rapidly as cloudy damp weather usually bring a build up of cotton insects. Bollworms have been found in the county and millers are laying eggs. The white ridged egg found on the upper side of the terminal growth and tips of young squares are usually bollworm eggs. When five young bollworms are found per 100 terminals checked or 5 percent of the squares or bolls have been injured it is time to spray. Boll worms may be controlled by using endrin, endrin and DDT mixture, DDT, DDT and Toxaphene mixture at the rate of 1 to two quarts depending on the size of the cotton at the time of spraying. Fleahoppers are still damaging cotton and

should be controlled if fifteen are found per 100 terminals checked. Control may be obtained by using DDT at the rate of 1 qt. per acre of 20 percent DDT, Toxaphene and DDT mixture at the rate of 1 qt. per acre and Toxaphene at the rate of 1 pt. per acre if the toxaphene is 60 percent. Grass hoppers are causing limited damage in parts of the county and may be controlled by using Dieldrin at the rate of 2/3 to 1 and 1/3 pts. per acre of 15 percent dieldrin. Aldrin, 20 percent, 1 to two pts. per acre, Heptachlor, same as aldrin, and Toxaphene at the rate of 1 to 2 pts. per acre if the toxaphene is 60 percent. One should always check the percent of the insecticide he is using in order to be sure you apply the desired amount, as too much could damage the cotton and be a waste of money and too little could result in a build up of insects instead of giving the desired results. Bulletins may be picked up at the county agents office listing the recommended amounts of insecticides and which insecticides to use in controlling the cotton insects, ask for the Texas Guide for Controlling Cotton Insects.

ALLISON NEWS

Mrs. Lester Levitt
Mr. and Mrs. Lee Kiker and Richard and Rev. McBrayer were dinner guests in the Leonard Powledge home Sunday.
Joe and Clyde Dukes and families, Raymond Jones and family of Pampa, James Hall and family and Mrs. J. R. Hall visited in the Rayburn Hall home Sunday.
John Dan Bowman and family of Perryton visited Glen Elmore and family over the week end.
Leonard Powledge and family accompanied Sam Powledge to Lubbock Friday of last week and spent a few days with Artemus Garrett and family.
Roy Langford and family of Burger and Mrs. Dewey Smith of Stinett visited Monday and Tuesday in the Lester Levitt home.

Growing Family May Find Older House Big Bargain

House-hunters on the alert for a bargain should be aware of the value an older home offers, especially to the growing family planning to buy on a budget.

Here are a few of the advantages of buying an older house:
1. Space. It's often not hard to find a structurally sound old home at a reasonable price that offers four or five bedrooms, a large dining room, a basement, and an unfinished attic.
2. Equipment. More often than not, an older house will have a furnished kitchen, window shades or blinds, curtain and drapery hardware, storm windows and screens, and such things as shelves and built-in storage, all paid for by previous owners.
3. Advancements in home-improvement techniques. Even without extensive remodeling, most older homes in good structural condition can be made comfortable and convenient. Good examples of materials and techniques are packaged bathrooms that can be installed in one day, mineral wool insulation which is blown into walls and ceilings of existing houses, and asphalt shingles which can be applied directly over old roofing material, adding new color to an old house and giving it durable protection from weather at the same time.
4. Insulating through the blowing-in process is popular with owners of older homes because it not only increases the value of the house, but stops chilling drafts and lowers fuel bills in winter. Summer comfort is increased because the mineral wool keeps heat out.
5. Established lawn and garden. Most of the work of getting grass, shrubs, flowers, and trees to grow has been done by previous owners of an older house. The new owners need only maintain the grounds.

Professional installer blows mineral wool insulation into a wall of an old house. Air pressure forces insulation through the flexible hose and packs it firmly in the wall, assuring a tight insulation seal. Bricks or pieces of siding that are removed are neatly replaced when the job is finished.

Do-it-yourself materials and techniques. The buyer of an old house can make many of his own improvements gradually at home handyman and women. Examples are floor tiles, wood and plastic wall paneling designed for easy installation, kitchen cabinets of ponderosa pine that can be used as furniture or built-in throughout the house, roll-on paint, and batts and blankets of mineral wool for accessible areas such as unfinished attics and crawl spaces.

The only modern Short Stroke SIX!

Another reason why Ford Trucks Cost Less

Under the broad hood of that boldly modern '57 Ford there's something you won't find in any other pickup. It's a six-cylinder engine with modern Short Stroke design.

Because of Short Stroke design, Ford engines—both Six and V-8—have less internal friction. This means less wear, less repair. Coupled with new 8.3 to 1 compression ratio—it also means more miles from every gallon of gas.

Ford trucks cost less in every way! First cost is low; many models are priced below every other make. Ford resale value is traditionally high. And independent insurance experts have certified for the 12th straight year that Ford trucks last longer. Act now—save now and for years to come!

See us today **FORD TRUCKS COST LESS**
... LESS TO OWN ... LESS TO RUN ... LAST LONGER, TOO!

Mr. and Mrs. Elmer Rex Immel were united in marriage in a double wedding ceremony in the First Methodist Church, Wheeler, at 3:00 o'clock on July 4. Mrs. Immel is the daughter of Mr. and Mrs. Roe Green and Mr. Immel is the son of Mr. and Mrs. Elmer Immel of Kellerville. The couple are at home at 803 South Main in Wheeler. Mr. Immel is with the Mert's Oil Co. at McLean, and Mrs. Immel is working at the ASC office in Wheeler.

About Your Health

By Texas State Health Dept.

With daytime temperatures consistently in the upper 90's and above, and with prospects of going even higher, it appears that what is needed is a complete overhaul of acceptable summer clothing for men.

Women have the right idea when it comes to summer clothing. Lightweight, sleeveless, open-necked dresses permit free circulation of air and encourage heat loss. A man, though, with a tie around his neck and belt around his middle

— all topped off with a coat — is at a disadvantage in trying to throw off body heat.

Elevations of body temperature will develop inevitably in a man so dressed because such clothing prevents loss of body heat through conduction, radiation, and evaporation of sweat. And this is physiologically true: The body thermostat is so constructed that a fall in temperature is much harder to produce than is a rise.

Heat stroke, sometimes fatal, is due to exhaustion or inadequacy of the heat dissipating mechanism of the body. It occurs as a result of exposure to a hot, humid atmosphere such as is common over most of Texas during summer months. Sunstroke is a form of heat stroke, complicated by an absorption of radiant energy from the sun which causes a temperature rise in local body areas, such as the brain, higher than the temperature of the rest of the body.

How do you avoid heat stroke? By doing what you can to keep heat loss and heat production in balance.

The wearing of loose, airy clothing is known by physiologists to be among the best means of maintaining that balance. Open throat sport shirts and light trousers are of course more practical than heavy suits.

Excessive clothing causes excessive perspiration, and excessive perspiration means a loss of body fluids and salts. Unless the loss is compensated for by drinking additional quantities of water and consuming extra amounts of salt, painful stomach cramps can result.

During periods of high humidity, body perspiration doesn't evaporate. It clings and you feel constantly damp. Skin rash often develops at these times and the rash is liable to infection.

Since body temperature represents the balance struck between heat production and heat loss, a disturbance in the value of either will be followed by a temperature change. The most sensible ways of avoiding the effects of a rise are these:

Eat lightly, avoid exertion, drink plenty of water and eat extra salt, and stay close to the fan. Above all, keep your clothing loose and airy.

Bro. Borden returned Sunday night from his meeting in Oakwood, Okla., Bro. George Weems filled in for Bro. Borden both Sunday morning and evening.

LEGAL NOTICE

THE STATE OF TEXAS

TO: Leroy Sherwood, if living, but if dead, his heirs and legal representatives if any, and Sam W. Sherwood, if living, but if dead, his heirs and legal representatives, if any, and all persons claiming any title or interest in the land hereinafter described under deed heretofore given to J. A. Sherwood, deceased, as grantee Defendants, Greeting:

You are hereby commanded to appear by filing a written answer to the Plaintiff's Petition at or before ten o'clock A.M. of the first Monday after the expiration of forty-two days from the date of the issuance of this citation, same being Monday the 19th day of August 1957, at or before ten o'clock A.M. before the Honorable District Court of Wheeler County, Texas, at the Court House of said County in Wheeler, Texas.

Said Plaintiff's Petition was filed in said court, on the 5th day of July A. D. 1957, in this cause, numbered 4702 on the docket of said court, and styled, Jas. R. Reneau, Et Al Plaintiff's, vs. Leroy Sherwood, Et Al Defendants.

The names of the parties to the cause are as follows: Jas. R. Reneau, J. D. Akin, O. C. Eving, but if dead, his heirs and legal representatives, if any, and Sam W. Sherwood, if living, but if dead, his heirs and legal representatives, if any, and all persons claiming any title or interest in the land hereinafter described under deed

HAPPY VACATION!—HERE'S WHAT YOU DO

This vacation map is based on business surveys which indicate that during the year, 85,000,000 persons will go on vacation with 70,000,000 traveling by car. The most popular vacation area appears to be the North Atlantic States from New Jersey upward. Other popular areas are around Lake Michigan, out on the Pacific Coast and along the South Atlantic Coast. However, there are many popular vacation states outside these areas. About \$20 billion is spent annually having fun and relaxing.

heretofore given to J. A. Sherwood, deceased, as grantee, are Defendants.

A brief statement of the nature of this suit is as follows, to wit: Suit in Trespass to Try Title wherein plaintiffs allege they are the owners in fee simple of All of the East 1/2 of the Northwest 1/4 and the Southwest 1/4 of the Northwest 1/4 of Section 23, Block 13, H & G N Ry. Co. Surveys, Wheeler County, Texas, containing 120 acres, and that on the 15th day of June, 1957 the defendants who are those persons first named in this writ and to whom it is directed unlawfully entered upon and dispossessed these plaintiffs of such premises and withhold from them the possession thereof. Plaintiffs also claim title under deeds conveying the above described land, which deeds have been at all times duly recorded in the Deed Records of Wheeler County, Texas and have had peaceable and adverse possession under such deeds for more than twenty-five years prior to the filing of this action. Plaintiffs pray that defendants be cited to appear, and that plaintiffs have judgement for title and possession of the above described land as is more fully shown by Plaintiff's Petition on file in this suit.

If this citation is not served within ninety days after the date of its issuance, it shall be returned unserved.

The officer executing this process shall promptly execute the same according to law, and make due return as the law directs.

Issued and given under my hand and the Seal of said Court, at office in Wheeler, Texas, this 5th day of July A. D. 1957.

(SEAL) - ATTEST:
RENA SIVAGE, Clerk,
District Court, Wheeler County,
Texas. 31-4c

Wheeler County Soil Conservation District News

Accidents can happen on the farm as quickly as they do on the highway. The Wheeler County Soil Conservation Board of Supervisors urge each farm family to be accident conscious this National Farm Safety Week, July 21 to July 27, as well as every other day of the year.

Accidents can occur to a child as well as an adult, one that is minor or one that is fatal. The greatest number of farm accidents are caused by farm machinery and farm animals. Usually, injuries from farm machinery can be prevented by following the manufacturer's instructions in the operating and repairing of the equipment. Many accidents can be related that have or could happen to anyone. Tractors have run over or turned over on the operator or persons nearby. Clothing has been caught in the drive shaft operating off the power take-off, when the protective cover is not in place. Hands, arms, and legs have been caught in hay balers, silage cutters and other power tools when repair was attempted without shutting

AIR CONDITIONING—TEMPERATURES MADE TO ORDER—AT NEW LOW COST. GET A DEMONSTRATION!

DON'T BUY ANY CAR BEFORE YOU DRIVE A CHEVY... ITS BEST SHOWROOM IS THE ROAD

Chevrolet's got a corner on these fine things!

Chevy's the only leading low-priced car with any of these advantages... the only car at any price with all of 'em!

SHORTEST STROKE V8. Its advanced design is the key to Chevy's alive, alert performance.

CONGRESSMAN WALTER ROGERS

You have all heard the story of the little boy who was left to watch the sheep and was told to call out if a wolf appeared. He called out several times when there was no wolf, to the dismay of the men who came to help. When a wolf finally appeared his cries for help went unheeded, and as the story goes, the wolf ate all the sheep, and some people say the little boy.

We have a modern version of this which would go something like this. Once upon a time there was a little boy named Val Peterson, who had a friend called the President. The President had many things to do. Included among these was the responsibility of developing a warning system to protect the American people against a Russian bear. He thought the best way to do this would be to keep a sharp lookout, and whenever the bear attacked, he could warn the people so that they could scurry into safe places and protect themselves from the bear. So, he bought a large whistle with a long string on it. He then sat his little friend, Val Peterson, by this whistle and told him that it was his duty to pull the string which would blow the whistle and warn the people that the Russian bear was coming. Little boy Peterson was so fascinated with his job and so anxious to pull the string and blow the whistle that he devised a plan to blow the whistle even though there wasn't any Russian bear coming so that the people would scurry to places of safety. By this means he reasoned that a test could be run on whether or not there were enough places of safety for the people to scurry to and whether or not were enough roads for the people to do the scurrying on. He advertised this plan widely, and on the appointed day pulled the string, and lo and behold the whistle blew. However, much to his dismay, the people didn't scurry. For some reason the people didn't understand that they were supposed to run and hide because the little boy had blown the whistle. However, the little boy was so enchanted by the sound of the whistle that he continued to pull the string each day, and it wasn't long before the people had become so accustomed to hearing the whistle it did not even cause comment.

In fact, the recent "Operation Alert", a mock air raid on the city of Washington and other major cities of the nation, designed to produce casualties of 54 million people, was executed. This operation even included the little boy's friend, Mr. President. He was provided with two helicopters which sprinted him and the secret service men from the White House to a secret destination. As you can imagine, this was a major exercise of such proportions as to draw the attention of many millions of people, especially those who were supposed to be killed. The only catch was that the people had heard the whistle so many times they paid no attention to it and did not know anything about "Operation Alert" until they read about it in the newspapers after they were dead or maimed. This has caused a great deal of concern among those who conceived the plan, but it is rumored that a solution may have been found. It has been suggested that, since the little boy has blown the whistle so many times and the people have become so used to hearing it, the only effective warning, should the Russians approach, would be for the little boy NOT to blow the whistle.

The little boy was promoted recently to be Ambassador to Denmark. The moral seems to be — if you want to be an Ambassador, you don't have to toot your own whistle — you can toot the government's.

I apologize if this seems somewhat facetious, because I fully realize the great need for a proper warning system in the event this country is invaded. However, I think it is foolish to continue programs which cost the taxpayers lots of money and which are not

producing the results that should be produced. I feel the plan or program should be weighed against the possible danger involved. I have never felt there was a great danger of this country being attacked by Russian planes dropping bombs or any other kind of bombs. There is no doubt that Russia could get some planes through to drop bombs on our major cities if she sent enough planes in the first place. However, this is not a one-way street. Russia realizes this country has the potential to retaliate on a ratio of at least 10 to 1 should anyone in Russia become foolish enough to attack this country. In the first place, the congested areas of Russia are so much more congested than in the United States that an equivalent bomb dropped on equivalent localities in both countries would do much more damage in Russia, in so far as taking human lives — the reason being that Russia has no residential districts. The people live in living quarters set aside in huge apartment type buildings. These living quarters are so small in many instances that the manner in which people are crowded in these buildings resembles stacked cordwood. The Russians have no private conveyances to speak of and would have no way in the world to depart from these congested areas should a war break out. For these and many other reasons, I do not believe that we are on the verge of war with Russia, and I do not think we should continue to spend tremendous sums on programs that could be considerably better, much more efficiently handled, and at a much cheaper price. If we continue to maintain our defenses as we have in the past and do not relax our vigilance, our country will be here for a long, long time.

Riggs says that county agents have copies of the program and other information on the short course. Queries on details for the short course should be directed to Riggs or his department. The short course chairman extends a special invitation to all beef producers and is strong in his belief that information of great value to the state's cattle industry will be released during the two and a half days meeting.

THE WHEELER TIMES classifieds offer more for less money, to both buyer and seller, than any about.

Mrs. Claudine Wainwright of Oklahoma City is spending the week end with her parents, Mr. and Mrs. Clyde Johnson.

Remodeling Magic

Modest Vacation Cottage Now Year-Around Home

Remodeling changed this simple summer cottage, left, into the handsome year-around home above. New windows of ponderosa pine and re-roofing in a green blend of asphalt shingles helped give the house its modern exterior. All-season comfort is provided by thick mineral wool insulation.

Finding a modest summer cottage that can be purchased for a song and remodeled is a sound and economical way for a family to obtain a year-round home in the country.

A case in point is the home of the Charles Camp family near Morgantown, W. Va. The Camps modernized a tiny cottage built in 1937 for summer use, and today have a modern home that gives them comfortable living throughout the year.

Mr. and Mrs. Camp began their project by consulting Arthur B. Campen, modernization editor of Practical Builder, light-construction industry magazine. Campen drew up plans for remodeling to change the cottage into an up-to-date home.

The remodeling included the addition of a new wing and the extension of a section of the living room wall to form a bay, with a gable-end roof section over it. Almost exactly in the middle of the long, low house, the gable end imparts a more balanced appearance.

Asphalt shingles in a green blend were specified for the entire roof, both the original and the added sections. A new, colorful roof goes a long way to unify the old and the new in a remodeled house. Campen believes, and asphalt shingles offer a wide range of color choices. Campen chose white for the clapboard siding, with the green of the roof repeated in the window shutters.

The new wing contains the master bedroom, a wood-paneled den, a bathroom and stairs leading to the cellar. Double-hung windows of ponderosa pine were installed in the new wing, the living room bay and the kitchen, to match the wood windows in the rest of the house.

For year-round comfort, full-thickness batts of mineral wool insulation were installed in the new sections. The insulation keeps much of Virginia's summer heat out of the house and enables a new forced-air furnace to do a more efficient and economical heating job in winter.

In modernizing the kitchen, wood cabinets and a plastic laminate counter top were added, providing more storage and work space. A new vinyl floor, a dishwasher, and a garbage disposal unit were installed.

BEEF CATTLE SHORT COURSE

Texas beef cattle producers who are interested in the latest research findings on problems which are today having a tremendous impact on the industry can't afford to miss the August 12-14 Beef Cattle Short Course at Texas A&M College.

Major emphasis on the upcoming program will be placed on reproductive performance, fertility of beef bulls and estimating carcass characteristics of live cattle. Those attending the short course, on the first morning's program, actually will grade a group of eight steers. Such items as weight, grade, dressing percentage, percent of rib, loin and round and area of rib eye will be estimated by each participant. The steers will be processed on Tuesday and on Wednesday morning a final evaluation of the carcass will be made and winning participants will be recognized.

**C'mon in -
The water's fine!**

You're on vacation taking it easy on the beach or floating in the cool water. At the same time extra money is piling up for you back home. Isn't that a grand feeling? It's yours if you're one of more than 40 million Americans who own United States Savings Bonds.

Savings Bonds never take a day off. They earn money for you no matter where you are or what you're doing. And now they're better than ever! Every Series E Savings Bond purchased since February 1, 1957, pays 3-3/4% interest when held to maturity. It pays higher interest, too, in the earlier years, and matures in only 8 years and 11 months.

Now, more than ever, it's smart to save with guaranteed-safe U. S. Savings Bonds. Buy them regularly where you bank or through the Payroll Savings Plan where you work.

PART OF EVERY AMERICAN'S SAVINGS BELONGS IN U. S. SAVINGS BONDS

MOBEE'TIE NEWS

MRS. O. G. BECK, Correspondent

Junior G. A.'s and their supervisors attending the Baptist Encampment, near Wellington, Monday through Thursday last week, were: Phillis Grimes, Berenda Rogers, Sandra Vanlandingham, Rev. and Mrs. Gene Grace and Mrs. C. W. Burch.

Children of Mr. and Mrs. A. A. Burch will honor them in their home in New Mobeetie, Saturday evening, August 3, from 5:30 to 8:30, celebrating their Golden Wedding Anniversary. Friends and neighbors are invited.

Dick Wright underwent major surgery at a Pampa hospital this week.

Bill Eberling is in a Pampa hospital for treatment and observation.

Mrs. John K. Ribble moved her house into town where she plans to make her home. The house is located north of the A. H. Burke home in New Mobeetie.

Mr. and Mrs. H. E. Matthews of Amarillo and Mr. and Mrs. J. H. Scribner are vacationing in Penna. and other points of interest.

Mrs. J. M. Barton and Barbara returned home from a visit in Michigan and other places.

Mr. and Mrs. Murrey Markham of Amarillo, visited Mr. and Mrs. C. R. Murrell, recently.

Mr. and Mrs. Tom A. Beck of Amarillo visited Sunday with his parents Mr. and Mrs. M. S. Beck and family. Mr. and Mrs. O. G. Beck and Glynnda.

Sunday guests of Rev. Bruce Matthews were his parents, Mr. and Mrs. Matthews and Mr. and Mrs. Hill and Jovee, Missionary to Cuba. The Matthews and Hills live in Canyon.

Mr. and Mrs. Balus Hunsucker and family visited Friday last week with his aunt, Mrs. Dora Roberts.

Mr. and Mrs. S. H. Hooker shopped in Pampa, Saturday.

Mr. and Mrs. Jim Hathaway and Dwight visited his mother and brother, Mrs. Clara Hathaway and Mr. and Mrs. Tom Hathaway and

children. Mr. and Mrs. A. A. Burch, Leo Flaherty and Mr. and Mrs. C. W. Burch were Sunday dinner guests of Mr. and Mrs. L. E. Kieth in Pampa.

Mr. and Mrs. Clyde Kelley and family and Mr. and Mrs. Ernest Gordon visited Mr. Kelley's sister, Mrs. Della Cooch, who is a patient in the Wellington Hospital, Sunday.

Mr. and Mrs. Ed Goodnight and family of California, visited several days this week with his parents, Mr. and Mrs. I. T. Godnight, and other relatives and friends in Mobeetie and Pampa.

Mrs. Arletta Witt and son Aaron visited her mother, Mrs. Arlie Jeffus, Saturday. Mrs. Jeffus returned home with her daughter and grandson to visit this week.

Mr. and Mrs. A. B. Lancaster are visiting this week in Arkansas, with their daughter and family, Rev. and Mrs. Elvin Zell.

Teachers Plan —

(Continued from page one)

ing children's book, "The Little Squeezey Bug," was one of the conference's speakers last summer. A graduate of Kansas State Teachers College, he taught dramatics and journalism in Kansas schools. He has done graduate work at Cornell University and is working toward his doctorate now at Northwest University.

A graduate of Iowa State Teachers College and the University of Iowa, where she began research in phonics, Dr. Cordts has worked with pupils of all learning levels. Her college teaching has been at Iowa State Teachers College, New York University and Rutgers. Dr. Cordts has also served as critic teacher and supervisor of reading in schools in New York, Pennsylvania and New Jersey. She is the author of a number of textbooks and magazine articles on the teaching of reading.

Dr. Gunn has taught in public schools, the Teachers College of Connecticut and Boston University. She has been a visiting professor at the University of Iowa,

Rutgers and the University of Oregon.

During World War II, Dr. Gunn served with the Treasury Department on the Book and Author War Bond Committee. She was an educational consultant on a mission to Korea, and last year she toured the Middle and Far East for the Department of State. Dr. Gunn is co-author of a language series and a reading series used in elementary schools. She has also contributed to a number of educational journals.

'Look-Alikes' Out In Builder's Plan For Subdivision

A California builder of more than 30,000 homes has come up with an entirely new approach to the problem of giving individuality of appearance to each house in a giant subdivision.

The firm, Bollenbacher & Kelton, of Los Angeles, avoids indiscriminate use of sharp colors and widely-varying roof pitches, concentrating instead on quiet restraint in developments that fit the terrain.

"We study the terrain and work with it," says Ray J. Swaner, manager of the firm. "In San Diego, we are building 3,000 houses in a bare valley surrounded by stark hills. So we have chosen an earth-brown for our asphalt shingle color, and a moderately steep pitch for the main roof lines."

For variety and interest, Swaner says, 16 different exteriors are used for 10 basic floor plans. Some 80 percent of the roof styles have the same high pitch. They include gable styles, hip roofs, and louvered Scotch-hipped roofs. The variety of roof shapes gives each house its individualized look.

The total effect of the Bollenbacher & Kelton development is rich restraint and a quality of unobtrusive substantiality. The high-pitched roofs have an advantage of an air-washed attic, which helps keep the houses cooler in hot San Diego summers. Another important contribution to living comfort is made by the thick layer of mineral wool insulation laid in blankets between the attic floor joists.

Approached from the hills around the sub-division, the houses, with their subdued earth tones of asphalt shingles, seem to fit naturally into the rugged countryside, and harmonize softly with the green of lawns and landscaping.

Locals

Mrs. Carroll Lackey and Randy journeyed to Ft. Hood Saturday to spend some time with her husband.

Mrs. C. S. Selpy of Amarillo spent Sunday night with Mrs. Alta Barber.

Mrs. Billy J. Darnell, Karen and Little Bill visited friends and relatives in Wheeler over the week end. Karen remained in Wheeler for an extended visit.

Mr. and Mrs. Harold Loyd Lee and children and Miss Nancy Lee returned home Sunday from vacationing in Cowles, N. M.

Mr. and Mrs. Bobby Wyrick of Norman, Okla., attended the funeral of her grandfather in Hedley.

Mrs. Clyde Johnson, Mrs. S. M. McCracken and Mrs. Claudine Wainwright spent Saturday in Canadian.

Mr. and Mrs. Harry Wofford attended the Ex-Student reunion in Shamrock Friday and Saturday.

Mr. and Mrs. Thurman Rives and boys attended the Ex-Student Reunion in Shamrock Friday and Saturday.

Mr. and Mrs. R. J. Holt, Jr., attended the Ex-Student Reunion in Shamrock Friday and Saturday.

Mrs. Ebb Farmer spent the week end home from Canyon where she has been attending summer school.

Janice Jace spent the week end

home with her parents, Mr. and Mrs. Marl Jace.

LaJune Alexander visited in the Charles Potter home in Pampa the first of the week.

Mr. and Mrs. Glen Robertson of White Deer spent the first of the week with Mr. and Mrs. Amos May.

Mr. and Mrs. Charles Harris of Pampa spent Friday night with the Amos Mays.

Mr. and Mrs. T. E. Haddox, Jr., of Lubbock visited their parents, Mr. and Mrs. Lyndon Sims and Mr. and Mrs. T. E. Haddox, Sr. Tommy, who has been staying with the Sims, returned home with them.

Mr. and Mrs. Frances Pride took Shari Lee, Tillie Green, Peggy Pride and Sondra Jones to cheerleading school in Norman, Okla., Sunday. The girls plan to return the latter part of the week.

Mr. and Mrs. J. C. Howell and children of Levelland visited in Wheeler Friday and Saturday. They attended the Ex-Students reunion in Shamrock.

Mr. and Mrs. Buck Jones and children of Amarillo visited their parents, Mr. and Mrs. Buster Black and Mr. and Mrs. Owen Jones over the week end.

CARD OF THANKS

I wish to thank everyone for the kind deeds, words of sympathy and the flowers in the passing of my beloved mother.

I shall never forget you.
