Wheeler County Is Free Of Screwworm Cases But Care Must Be Taken

By Charles D. Jackson
County Agri. Agent
Thus far Wheeler County has not had a confirmed case of screwworms reported. It is very important that an increase in the screwworm population be prevented if early eradication of this livestock pest is to be realized, the officials of the Southwest Screwworm Eradication Program emphasize.

Only two of those cases were reported in the area of South Texas where screwworms can survive during the winter. This area must be kept free if eradication is to be achieved, officials said.

Several other factors are considered favorable for early eradication: First, the capability for producing sexually sterile screwworm flies is at an all-time high; more than 135 million sterile flies per week can be released to mate with native flies and prevent reproduction. Next, inspection stations, to prevent the transportation of infested livestock into the eradication area, now are operating along the western edge of the area. A barrier to prevent reinfestation from Mexico is in operation along the U.S.-Mexico border, and finally, livestock inspectors are ready to deal with any emergency.

A Point of Interest To Farmers from the Agent

By Charles D. Jackson
County Agri. Agent
The residue from a crop of Milo or corn is valuable in the maintenance of soil productivity and should be considered as an asset instead of liability.

Perhaps of greater importance is the effect of the residue on the physical structure of the soil as reflected in better water intake and retention, and better tilth.

Another factor to consider is that decomposition slows down as soil temperatures drop, and it proceeds fastest when soil temperatures are ideal for plant growth. If there is a heavy residue on the surface, it is likely to be a problem in next years cropping operation. Nitrogen applied ahead of land cultivation can speed up residue breakdown. On the heavier soils it may be practical to apply all the nitrogen needed for next year provided the nitrogen is not left exposed on the surface.

HUNTER TO SPEAK

Larry Hunter will preach Sunday at 10:45 A.M. and 7:30 p.m. at the Church of the Nazarene.

A BRICK DRIVE

That's what we need, Bricks, Lots of bricks. The Wheeler County 4-H Council of 1963 voted to erect a flag pole on the Courthouse lawn. The Carbon Black plant at Shamrock has donated the pole and a wall has designed for the base of the pole. There will be a steel cloverleaf, the 4-H symbol, and a plaque of the 1963 council engraved on it.

In order to finish the project, there is a need for bricks. The council recently voted to make a campaign for bricks, used or new. It will take between 800 and 1,000 bricks to build the structure behind the pole.

If you have used or new bricks which you would give to the project, either bring them to the county agent's office in the courthouse, or contact Terry McCasland & arrangements can be made to pick them up. The color of the brick does not matter; it may be whitewashed or blackened with soot—maybe you have torn out an old chimney and just have the bricks piled around.

A brick here and a brick there will soon make enough. So look around and give a brick to the 4-H Flag Pole Project.

P P & K CONTEST AT NICHOLSON FIELD SATURDAY

Wheeler area grade school boys from eight through 11 can put their football skills against thousands of other boys throughout the nation in the third annual Punt, Pass and Kick Competition which will culminate with a trip to Washington D.C., for a White House tour, then to Dearborn, Mich., and then an appearance at the National Football League Championship game for the top eight winners.

Sponsored nationally by the Ford Motor Company and the National Football League, the Punt, Pass & Kick Program—or PPKK will culminate, with a trip to pool-Burton.

Wheeler Area youths will be tested for their ability to punt, pass and kick (using a kicking tee) footballs on the same day as thousands of other boys all over the country, with warm-up jackets football helmets and autographed footballs to be given as first, second and third prizes for each age group, or four top Wheeler winners in all.

Scores throughout the state then will be compared to determine the four of Texas winners and these scores compared to determine the most skillful eight, nine, ten and eleven-year-old fledgling football stars in each of the areas covered by the telecasts of the 14 National Football League teams.

Area winners and their fathers and mothers will receive all expense-paid trips to a National Football League game in their area, and will compete during half-time to determine the four top Eastern Division winners and four top Western Division winners. These eight boys, accompanied by their parents, will visit Washington D.C., where they will tour the White House. They will then travel to Dearborn, Michigan, and tour Greenfield Village. The entire group then will go to the site of the NFL Championship game, for half-time competition, no charge for entering and no special equipment needed. Registration will be open from September 3 through Oct. 11," he said with Vanpool-Burton as the registration headquarters.

"In 1962, the second year of the PPKK Program, 431,921 boys entered the competition," he said. "and President Kennedy said 'Programs of this type will enable our youth to build the energy and strength that is their American heritage'."

Mr. Burton said entrants will be judged on the distance and accuracy of their punting, passing and kicking (using a kicking tee), with points awarded for each foot of distance the ball travels on the fly and subtracted for each foot the ball lands to the right or left of a center line. The Wheeler competition will be held at Nicholson Field on Saturday, October 12.

SOUTHWESTERN PUBLIC SERVICE INTRODUCES NEW BILLING METHOD

Electric service bills for Wheeler Area customers will come in envelopes beginning next week; it has been announced by Mr. Watson Burgess, manager of the Southwestern Public Service Company.

The change from the postcard bill, which has been in use for a number of years, is the result of the installation of new electronic billing equipment, Mr. Burgess said.

Mr. Burgess pointed out that there is a feature in the new billing system which might encourage customers who have checking accounts to use the bank draft method of payment. He said that the objection to this method on part of some customers in the past has been that they didn't know how much their bank account had been charged.

Under the new billing system, the customer using the bank draft method of payment will receive a copy of his statement at the same time that the billing for Wheeler Area customers is made. The statement will be clearly marked that it should not be paid because a bank draft will be drawn, but it will inform the customer of his monthly charges for electric service.

AGENT'S REPORT

By CHARLES JACKSON
County Agricultural Agent

Wheeler County farmers and ranchers are reminded that self-employment farmers and ranchers must pay Social Security Tax if their operations return a net profit of \$400 or more annually. The tax rate is 5.4 percent of the actual net profit up to a maximum of \$259 for a net farm profit of \$4,800. When farmers were first made subject to this program in 1955, a maximum of \$4,200.00 the annual basis for tax payment.

There are three types of benefits that the self-employed operator drives for himself and his family from this annual tax payment. First, he is entitled to retirement benefits when he reaches the age of 62 and will receive monthly payment, subject to his level of current earnings. He is then entitled to disability benefits when he has paid for the required period of coverage, but only if he is unable to continue work.

The third phase of the program is similar to life insurance in that his survivors are entitled to limited lump-sum payment plus monthly benefit payment. These payments are based on the amount of credit accumulated by him before his death, and further upon the number of dependents who are dependent of normal support.

If you are not certain about the conditions concerning the tax then it would be advisable to see a representative of the Social Security Administration when he is in the County or contact their office in Pampa.

SOIL CONSERVATION SERVICE REPORT

Fall is here, and it is time of year for farmers in Wheeler County Soil Conservation District to start making plans to install certain conservation practices. One of the practices to start thinking about now is the installation of a terrace system on land that is in row crop. Have you looked at your land lately and noticed just how much erosion is taking place? Much of our soil is being damaged severely by water erosion. Usually the best way to take care of this problem is to construct terraces.

One of the major objections that we hear to terraces, is the fact that they create a great many point rows in it, but sometimes it is necessary in order to take care of our soil as we should. However, in some cases this problem of many point rows, naturally no one enjoys drawing a field with a lot of point rows can be eliminated by installing a set of parallel terraces. This is a new practice for this part of the country, and is expected to be popular.

To install a terrace system of this type, it is usually better to establish a waterway or two for the terraces to drain into. Terraces are then constructed to the same specifications as usual, with the exception that they are located on the ground parallel to each other. Usually as many as three terraces can be put parallel, and sometimes more, depending on the slope change. Terraces of this type will greatly reduce the amount of point rows in a field, and will take care of the erosion problem as well.

If you have a field that is beginning to erode, and would like to install a system of parallel terraces contact the technicians of the Soil Conservation Service that assist the Wheeler County Soil Conservation District. They will be glad to help with the lay-out of this terrace system, as well as any other erosion problem that you might have.

'64 Jet-smooth Luxury CHEVROLET

Besides looks, ride and power - what's so special about it? (it's so reasonably priced).

Read of leaves the high-priced cars some explaining to do, wouldn't you say? Long and luxurious—with a fresh, jet-smooth look. Richer roomy interiors with subtle new colorings of colors and fabrics. Like the ultra-soft vinyl upholstery in the new Chevrolet Impala Super Sport Series.

A choice of seven engines, no less, with output all the way up to 425 hp.* And a choice of four smooth transmissions to go with them. And underlying it all, the opulent feel of this '64 Chevrolet's Jet-smooth ride.

Matter of fact, the most noticeable difference between this beautiful new 1964 Chevrolet and the high-priced cars is the price itself.

Let your dealer show you how much luxury that reasonable Chevrolet price now buys.

DAVEY AND HIS DOG

Our neighbor has a firm opinion about children and pets: "When a boy is old enough to assume responsibility for the care of a dog, it's time enough for him to have one."

But our Davey is growing up with his dog — his frolicking playmate today, his faithful friend and protector tomorrow.

Our neighbor has an opinion also about children and God: "When my son is able to weigh the claims of religion with a mature mind he can decide for himself whether he wants to go to Church."

What heritage would men have of Truth and Right and Freedom if each generation had not imparted its blessings to the next? It is the faith of our fathers which is ours to cherish, and to teach our children.

Let them grow up with that Christian Faith and it will have its rightful place in their lives.

NEWS & VIEWS

By J. Loyd Rice
What I write here expresses my own views, and does not in any way indicate the editorial policy of the paper. I assume full responsibility for the following:

We all know that for some time now we have been drifting into a socialistic state in our nation. We are looking to the Federal Government for more and more services and benefits. Some of these we do not desire to change, and many we could not if we wanted to. However, I had rather have freedom than security. I do not care to lose all my individual freedom and initiative. I do not care for complete security in my farm operation under complete control of Federal authorities. I have breathed the air of freedom too long. I love good advise and god help. I believe we the people have developed a fine system in our great country.

In bringing about many needed benefits we have begun a drift toward complete Federal control. The speed of that drift has been greatly increased under the present administration. Many feel that we are caught in a vicious rip tide and can do nothing to change the situation. I DO NOT BELIEVE THAT.

It is my firm conviction that the people of these United States can still stand up on our hind legs and let our servants in Washington know what we want, and that we can change those servants if they fail to give us what we want. Our constitution is still in force. WE CAN KEEP IT IN FORCE. We can defeat the purposes of the present administration just as the Wheat farmers did.

WE THE PEOPLE NEED TO DO SOMETHINGS NOW TO REGAIN CONTROL OF OUR GOVERNMENT. "DON'T GIVE UP THE SHIP"

P.S.: Anyone who read this and are interested in doing something practical now, please send me a post card and we'll get together on the matter.
