of Mobeetie and Mrs. Jewel Holt of Borger Two sons: Jim McCasland of Atlanta, Texas and Lindsey of Wheeler; 20 grand-

children 34 great grandchildren; 9 great, great grandchildren and 5 neices. She was preceded in

death by Mr. McCasland and three grandsons. Services were held Dec.

26 in the First Methodist Church at Wheeler with Rev. ting. Rev. Dale Cain assisted.

Burial was in the Wheeler Cemetery un der the direction of Wright-Denson Funeral home.

Serving as pall bearers were her grandsons.

**Risner Hostess** To WMU Circle

The Mildred Crabtree WMU Circle of the First Baptist church met in the home of Mrs. Adrian Risner Tuesday December 21 at 7:30 p.m.

The meeting opened with Mrs. John Manning reading the prayer calendar and leading the group in prayer. Mrs. Gene Waters, chairman, held a short business meeting in which plans were made to visit shut-ins and take gifts during the next few days. Harold Perdue, pastor officia- Gifts for the Circles "adopted boy in Texas Baptist Childrens home at Round Rock were displayed.

The Christmas program was presented by Mrs. Roy Ford who gave an inspiring Christmas Story.

Refreshments of cherry cake, fruit salad and star shaped pimento chese sandwiches were served to two guests: Mrs. Jack Chambers and Mrs. Gary Waters and members: Mmes. Bill Brooks, Faye Patterson, Emma Connell, Florence Dodd, Roy Bailey, Hammy Herd, Gene Waters, Roy Ford, John Manning, Miss Jerrie Moore and Mrs. Adrian Risner, hostess.

Spending Christmas day with Mr. and Mrs. Gene Waters and sons were her mother Mrs. Irene Miller and a brother Donny, two other httners, Mr. and Mrs. Windeli Miller and children and Mr. and Mrs. Ed Miller and child-

## **About Knits**

Information

By Vivian Warminski Knits have become an inportant part of every girl's wardrobe -- since they are both smart and comfortable. But remember even though knits are very much in the news, they do require special know ledge and care on the part of the buyer.

A single knit--such as Jersey-has just one set of wrap yars and one set of filling yarns, so it is lighter in weight than a double thickness to the fabric. Many new knits are pre-lined. When choosing your pattern, select a simple one with as few seams as possible. Do not choose patterns requiring cutting on the bias, such as circular skirts.

In preparing your knitted fabric for sewing, first establish your guideline--or grain line--by hand basting along one straight lengthwise rib. Fold double knits parallel with the basted rib and then lay out your pattern, using pins placed closely together. On all knit fabrics, you should stay-stitch the edges you do not want to become distorted, such as necklines, and shoulder seams. Use a fine sewing machine needle, synethic or cotton thread and sew from 12 to 16 stitches per inch. Snigle knits require a medium tension; a loose tension-a size 11 or 14 needle and a straight or small zig-zag stitch--for double knits is recommended.

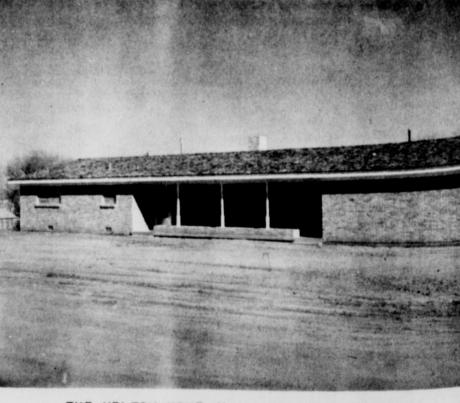

It's best to sew seam tape or ribbon into the shoulder seams and waistline of all knits. Stitch double knits around the botton and then catch-stitch the raw edge invisibly to the garment.

Check the water level before charging and add clean distilled wzter if the level is low. Replace caps and leave them on while charging. Avoid sparks near a charging battery. Gases given off by a charging battery are ighly explosive and an exploding battery can scatter

dangerous sulphuric acid, which can blind and burn. To clean the battery, sprinkle a tablespoonful of baking soda on top of the battery. Add a little water, and stir this around with a stick. Finally, flush the surface clean with a dash of water. Covering the terminals with

Income Averaging Helpful when Income Erratic: An Extension Service farm

management specialist says the income averaging provision of the Internal Revenue Cose can benefit farmers and ranchers who have unusually high taxable income this

Specialist John Seibert, of Lubbock, says income averaging can be helpful to such people as dryland farmers who have had a succession of drouth years and than have gotten moisture for bumper crops. Others who might benefit from the provision include cotton producers who have sold both their

'64 and '65 calves this fall. The current averaging provision was put in the code in '64. Averageable income must be more than \$3,000 before it can be applied Seiin four words, "Second verse, same stanza." bert said.

Under the provision, the income of the four preceding years is averaged and then multiplied by 133 1/3 percent. The product is then subtracted from this year's taxable income and the remainder is called the Averageable income, provided it exceeds \$3,000 he said.

This Averageable income is taxed under a moderately complex formula, according to the specialist, but the tax liability will be less than

## Tired of Cooking?

By Vivian Warminski

Are you tired of fixing meals? Why not try whole oven meals that saves time and energy, says Vivian Warminski, County Home Demonstration agent.

Combinations such as meat or fish, vegetable, desserts and breads can be prepared in the oven at the same time for unique flavor and saving of fuel. Another way to save time and energy in clean-up work is to bake these foods in bake and serve dish-

es. To plan your meal, first select a vegetable, dessert or bread that can be cooked at the same temperature and for the same length of time as the meat being prepared.

Or, if the meal takes longer to cook than the other foods, start it first and put the bread and vegetables in

ians, adjustable baby bed and

Jim Risner

He said that more than 50 percent of the price the consumer pays for agricultural commodities goes for value added after the product leaves the farm or ranch. Products produced on Texas farms and ranches are worth about \$2.4 billion. Af-

ter moving through marketing channels, Timm says the consumer pays about \$6.3

A battery charger can be a handy piece of equipment ers for cattle. Phone BL6-3840 around the farm. When a battery gets low from prolonged use of a starter or accidental discharge, it can be easily recharged ring in the vehicle with a battery charger. This saves the job of removing the battery and hauling it to a service station. Batteries can be maintained at a peak charge, too, instead of waiting for them to catch you unaware.

There are three common types of battery chargers. These are the trickle charger used only for keeping a battery in a state of full charge while in standby storage as in filling stations.

The fast or quick charger is capable of restoring a high state of charge in a sound battery in 20 to 30 minutes. These are quite expensive, usually \$75 to \$100, chiefly for service station use. The battery charger of five

to six ampere output at 12 volts and ten to 12 ampere at six volts cost from \$10 Frank Walker, Phone 3622 2tp to \$20. It will charge a sound but discharged battery to a full charge in ten to 12 hours of operation. The final charge is higher than is obtainable with a fast charger. Remember to consider dual

voltage six to 12 volts chargers since both battery voltages are now common.

The charger leads marked nected to the corresponding battery leads. Battery terminals are marked, but in case the marks have been mutilated remember that the larger of the terminals is positive.
