Congratulations to Vincent Ruiz on having been named to the Globe-News '2008 Class 1A Golden Spread Super Team'

-cwe-January has been declared School Board Recognition Month by the governor of Texas.

-cwe-Take the time to say 'Thank You' to your board members. They have to put in a lot of time attending courses to be qualified to serve, plus the time they spend taking care of our school busi-

-cwe-'Thanks, Board Members, we at the Times appreciate you. -cwe-

I did not stay up to see the new year in, but it came anyway. -cwe-

I am sure It is no surprise that we were in OKC for the New Year. -cwe-

Cathi and Dorcie arrived as scheduled, but they and Barbara had to leave Monday evening for OKC to help take care of Seth. -cwe-

Seth is on the road to recovery from a viral infection. -cwe-

Cathi and Dorcie returned home Saturday and Barbara and I returned to Wheeler on Sunday.

Would you believe I am five days into the new year and have not had a card game.

We played cards on Monday evening. Luck was certainly with Mike, Dwight and I, as we defeated Barbara, Rhonda and Leroy all three games—otherwise known as a 'Skunk'. I said 'luck', but remember, a lot of skill was involved also.

As Reported by . Stormie Meriwether, Kindergarten Student

Miss Doodie (Phillips). She is a you that are unable to attend the very nice lady. I've not seen Miss Doodie a long time. I miss her so. I hope she can come to Texas,

Shelby and Colby came to my house. They played video games with me a long time. Now I can do the Xbox 360. I like to play Shrek. I like to drive the racecar. It is a really hot car! The boys can go very fast. I can go a little fast. Sometimes I crash to the wall. It

is so fun! I love those guys. School is on again. Mr. Mark (Gilmer) drives the big bus. He is so nice to all the kids. He says,"How ya doin,' Stormie". We get on the bus and buckle up. We go to school and eat our cereal and toast. We go to class and do our "homework"

I am so happy to see my teachers and my friends. Mrs. McIlroy got an awesome shirt!

Hailey (Spence) got a real horse! J.D. (Miles) got a "possum catcher". I don't know what is a"possum catcher", do you? That's it.

Vincent Ruiz, a member of the Wheeler Mustang football team was named to the Globe-News "2008 Class 1A Golden Spread Super Team. Vincent a 6'2", 300 lb., Senior, played offense. "Mustang backs enjoyed running behind this outstanding blocker" was the comment on Ruiz's play.

ELECTED OFFICIALS: Wheeler County officials elected to office in the November, 2008, election took the oath of office on Friday, January

Governor Rick Perry has proclaimed January 2009 as School Board Recognition Month. Districts across the state will use this opportunity to show their appreciation of the vital role elected boards of education play in their local schools and communities.

"The biggest challenge of education is also one of its greatest strengths. During a time when state and national mandates rightly place more emphasis than ever on setting the bar high for education, it remains important for each community to retain control of its own educational system," Governor Rick Perry said

"Balancing the need for local control with directives coming down from larger governmental bodies is neither an easy nor oftentimes appreciated task, but for over two centuries, school boards have risen to such challenges. Complicating matters further are issues such as the rapidly-expanding role of technology in the classroom, the challenge to keep our children both educated and physically active, and—as always—the difficulties inherent in

dealing with budgetary priorities. "The people who make up these boards are uncompensated (Continued Page 6)

A check in the amount of \$50,000 to support construction of the Wheeler Agricultural Activities Center was received from Newfield Exploration Mid-Continent, Inc.

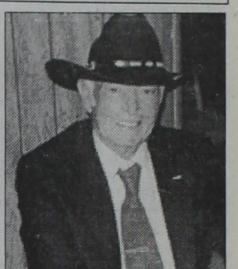

David Britt, Jr., President of the Wheeler Area Activities & Improvements Council, Inc expressed the Board's appreciation to Newfield Exploration Mid-Continent, Inc. for their contribution to the construction of the Wheeler Agricultural Activities Center.

Newfield was founded in 1989 and went public in 1993. The sole focus area until the mid-1990s was the shallow waters of the Gulf of Mexico. By year-end 2007, Newfield had total proved reserves of approximately 2.5 Tcfe and more than 90% of those reserves were located onshore in the U.S. The reserve base is about 73% natural gas and 63% is proved developed. The Mid-Continent, which includes Wheeler County, represents more than 45% of the total proved reserves at the end of 2007. At yearend 2007, Newfield owned an interest in more than 750,000 gross acres and about 2,600 gross producing wells in the Mid-Continent.

In the words of Neita Standlee Evans, "We need to build an Agriculture Activities Center for our kids and grandkids and ourselves where we can get together, share one another's friendship and USS Atlanta. He married Billye Christian fellowship." This facility will allow us to have a place where we can have 4H Banquets, Senior Citizens Suppers, Quilting and Craft Shows, Blue and Gold Banquets for the Boy Scouts, Annual Chamber of Commerce Banquets, Livestock Boosters Suppers, Family and Consumer Sciences activities, Community Gospel Music Presentations, Stage Band Performances, Family Reunions, Community Safety Pro-Services Education Programs, a Community Storm Shelter, and Wheeler's friendship and pride with our neighbors.

When you are in the area go by and look at new building. (Schedule Completion for the project is

Managing Feral Hogs **Not A One-Shot Endeavor**

More than 2 million feral hogs these two groups of people that roam Texas. Managing them will take more than just a few hunt- of them.' ers, a Texas AgriLife Extension Service specialist said.

"From 1993-2003, the damage from feral hogs that was reported Services increased an average of Cearley, AgriLife Extension wildlife management specialist in Canyon. "The price tag for that damage now is conservatively per year.'

Feral hogs are not a native to Texas, Cearley said. In fact, neither are domestic swine. Feral hogs are simply domestic hogs gone wild.

With the potential for a female to have two litters a year and each litter having sometimes as many as 13 young, it doesn't take long for them to overrun an area, he said. Under ideal conditions, the population can double in as little as four months.

Feral hogs are now found in more than 40 states. Swine were first brought to North America in the mid-1500s by the Spanish explorer Hernando De Soto, Cearley said.

"They seem to move from one water source to another," he said. "They are starting to move into areas we haven't seen them before. They are secretive, so you

are not as likely to see them until the damage gets severe.' The key to managing their numbers is to catch them when they first come into a region, Cearley

said. Hunting is a fairly effective way to lower the population, but will not be the solution. The home range for a feral hog

is 2 to 3 square miles for sows and 20 to 30 square miles for the boars, he said. Feral hogs generally move in family groups called sounders, including grandmothers, mothers and pigs. The males are generally excluded from the group and live a more solitary life.

"Perceptions differ about feral hogs," Cearley said. "Some people see them as a source of economic gain by way of paying hunters, others as a loss and liability. It is that tension between

causes problems getting control

An increasing interest in feral hog hunting leases and guided hunts might be a silver lining to the problem, but it certainly won't to AgriLife Extension's Wildlife solve the entire problem, Cearley said. They offer landowners, how-105 percent per year," said Ken ever, a way to recoup some of the money lost to the damage they do.

Also, feral hogs can be sold live to the meat trade. Texas Animal Health Commission rules and estimated to be about \$52 million regulations must be followed regarding their movement and sale,

Along with those two positives, Cearley said it could be argued that as they root up the ground, they cause weeds to grow back where grasses were, and that is a benefit to game birds. However, they are better known for their predation on young animals, whether wildlife or even sheep, goats and sometimes calves, he said. They also carry diseases such as pseudorabies and brucellosis.

The signs that feral hogs are in the area include damage to trees or utility poles, hair left on fences where hogs pass through, wallows and rooting areas where they forage for grubs and other insects, Cearley said.

The feral hogs will damage water gaps, tear up net wire, wallow out springs and damage spillways, he said. They leave behind damage in many crops, including corn, sorghum and especially to wheat and peanuts.

Wildlife impacts include predation on the young, the consumption of all the eggs of ground nesting birds they can find, and the tendency to dominate feeders and consume much of the feed targeted for other wildlife, Cearley

Welded wire hog panels on tposts are good for protecting feeders, he said.

Some other methods of control

or capture are: - Snares, which can be used for individual animals that might be sold for meat.

 Baited traps with "rooter"type entry gates, which allow multiple catches at a time.

Wow!!! The big chill is here again! No moisture...just cold winds. Even when the sun shines, it's cold out there. I don't know why I'm complaining. Spokane, WA., has 80 inches of snow to contend with. Even for them that is a lot of snow so early in the year. This is a literal breeze down here.

I need to correct part of the information that I passed on last week. Sorry I misunderstood Leola Stuart. I thought that Randy

They have a wonderful time at the lake and on the river. Their dogs have a heyday out there. Julie took her parents and Leola on the grand tour of the area and the homes that they were considering. Some gorgeous country down there. Leola had a wonderful Christmas with Randy, Julie, and her parents, Zach and Jessie. Randy and Julie live in Kyle, TX., but his Hobby Lobby store is in San Marcus. Sorry that Randy broke his big toe while they were all there, so was hobbling around. Still had to work, though. He took Saturday off so he could visit with his mother before the panhandle bunch headed back north. It was a very pleasant trip. Leola certainly appreciated Julie's parents

Travis was born while they lived in Wheeler.

More big changes in Wheeler. Sorry to hear that the Weavers have sold Hyland's Pharmacy. Just won't be the same; we will certainly miss them. Due to health problems and the family farm and ranch, there just isn't enough time in the day to get everything accomplished. They will miss their daily visits with area friends, but will still be around and be a vibrant part of the community. Good luck, Sharla and Tommy. Hope they find a medication to give you some relief, Sharla. With all the modern technology and new medications, you would think that these autoimmune diseases would be more controllable. But, the Lord holds all the exact answers.

Congratulations to Mr. and Mrs. Randy McIntyre in purchasing the drug store. Welcome to Wheeler. Jerry and Cheryl Richardson hosted an end-of-year domino party for family and friends on Wednesday afternoon. They all had a great time getting caught up with all the news and current events. They always have so much fun together and have a wonderful buffet since everyone brings their favorite foods or tries new recipes. It's always a yummy treat. Someone else's cooking always tastes better than our own.

Iva Richardson of Erick, OK., came on over to Leola Stuart's so they could get caught up on the family news. Iva just got back from spending time with her family in Odessa. She had a wonderful visit and enjoyed the time she got to **COURT** spend with them. Up until this year, it has always been hurry-up visits, so Iva could get back to work. I hursday, they went over to Briscoe to start the new year out right. Fat and Wanda Childress hosted another domino party.

We took Brianna to Fort Worth to have a late Christmas with Michael, Todd and Lori. It was a short, quick and to-the-point trip. We went down on Tuesday (30th) and came back on Wednesday. Lori got the flu, so we were ready to come home. Brianna had company coming for the New Year's Eve celebration, so we left her in

Parkview Artery Helicopter Safety

Among the many challenges of rural hospitals is the challenge of Emergency care. When there is a severe medical emergency and the Doctor orders transportation of a patient by way of helicopter, there are several steps that must be in place before landing can take

The charge nurse will notify the sheriff's department of the transport. The sheriff's department with notify the fire depart-

The task includes securing the area for a safe landing place and serving as the incoming aircraft's ground guide. Always consider the wind direction. Helicopters land into and take off into the wind.

The landing surface should be flat and firm, free of debris that would blow up into the rotor system. The landing site should be clear of people, vehicles, and all obstructions, such as trees, poles, and wires. Keep in mind that wires cannot be seen from the air. If there are obstructions, advise the helicopter crew on initial radio con-

After landing has been completed, the ground guide should secure the rear portion of the landing zone to keep bystanders from approaching the aircraft. Once the helicopter has landed, DO NOT approach the helicopter unless asked to do so. When working around helicopters, NEVER approach from the rear. ALWAYS approach and depart the aircraft TO-WARD THE FRONT so you can see the pilot and the pilot can see you.

When approaching the helicopter, remember to keep low to avoid the main rotor, because winds can cause the rotor to flex down. Always RESPECT the

Helicopter. It is also the policy of Parkview Hospital that if a vehicle is left unattended and the owner cannot be located, (and we make every effort to find the owner) it will be removed at the expense of the owner. The helicopter creates a strong wind and can cause some serious damage if a vehicle is left in the path of the landing.

phone. They had plumbing problems and needed us to come get the kids. They found lots of mold, so that may be why Erica's asthma has been so much worse. Erica and Jayden spent the night with us. The kids and I saw the New Year in together. Then, on Thursday, Jennifer came and got Erica and Jayden and met her dad, Nelson Medley, in Sayre so the kids could spend some time at the lake. Poor Kourtney had to stay with Pa-Pa Robert and Grandma Sue. She really likes her great-Uncle Ralph, too, though. She got new boots for Christmas and likes to strut her stuff. All any body has to say is go and she grabs her diaper bag and coat.

It was so good to see Sue VanPool looking well and surviving the holidays. She is expecting Amy and her family in for a visit this weekend. All three of her children and their families are in the OKC area. So nice to have them that close and all within driving distance of each other. They are all such a blessing.

Tisha McLaughlin, Zach and Aunt Andie Martinez came by for a nice holiday visit with Jackie and Fred Thrasher. They had such a good time. Andie is so good with Zach. He is such a sweet baby and loves his Aunt Andie. They just grow so fast.

That was sure a short 2 weeks for all the teachers and students. Monday brought lots of smiling faces back together.

Carol Orthman is having a good visit with Lou and Barb Orthman in Ladson, SC., although they have been having a lot of damp and very cool weather. We can't get any moisture and they want to give some of it away! They have had some freezing mornings there, too. It is going to be so quiet at the house this week. They also make stainless steel medical equipment, but their main product at the Charleston shop is the antilock brakes. Carol will stay busy with all the animals at the house.
