ABOUT YOUR HEALTH
It is a sad thing to disillusion those who cherish the myth of their "immunity" to poison ivy or oak or sumac, but the season of prevalence of these toxic plants is fast approaching.

ABOUT YOUR HEALTH (continued)
Botanical scientists say it is doubtful that anyone is absolutely immune to their poisonous substance. More and more authorities agree that susceptibility is a mere matter of degree.

ABOUT YOUR HEALTH (continued)
Texas has its fair share of the 100-plus plants and plant products known to be capable of causing sometimes severe skin irritations. Among them are the parsnip, lady-slipper, cultivated primrose (especially when in flower), lily bulbs and stalks, stinging nettle, and vanilla beans.

ABOUT YOUR HEALTH (continued)
But in one matter, poison ivy is almost invariably consistent—its leaves practically always grow in clusters of three.

AS IT LOOKS FROM HERE

WASHINGTON, D. C.—In a recent message to Congress, President Kennedy said, "We now use over 300 billion gallons of water a day. By 1980 we will need over 600 billion a day."
 The President is moving forward with great energy and initiative under pressures to bring about his legislative program. By reason of the seeming popularity of many of the programs included in the Platform, there is danger that the Congress may postpone the great issue of water conservation. By reason of it being an unglamorous issue, it is no less one of the greatest problems our Nation faces.
 There is no question but ways and means must be found to distribute the present water supply. There is no question but the day is at hand when we must be able to convert salt and brackish water to fresh water.

At the present time the Interior Department has less than \$4 million to develop water conversion plants of all kinds.
 To carry out their scheduled conversion projects, there is a need for \$15 million through 1962. It would seem that no better investment could be made.

Members of the World Court, located at The Hague in the Netherlands, are elected for a 15-year term. The newly elected Chairman of the Court is from Communist Poland.

A "New Sleep" Electric Anesthesia promises to be a major advance in surgical practice. According to a recent announcement by the Army, the patient can be put into various degrees of unconsciousness with this method. It is reported he recovers quickly without any unpleasant after effects. The technique involves sending continuous electric impulses through the brain. The development was made at the University of Mississippi Medical School under an Army contract.
 Speaking of medical matters, Dr. Robert Rubinstein, in a recent doctors' meeting in Washington,

said that a slight heart attack might be helpful to some people. He was drawing on his own experience and explained how it had changed his outlook on life for the better, and that he believed he would live longer by the lesson learned. He warned, however, don't wait, slow down now, live longer and happier.

For 15 years Oxford and Cambridge Theologians worked on a modern English translation of the New Testament. Recently completed, more than a million copies have been sold in Britain and the United States. The conclusion of Biblical students generally agree the new version is easier to read, but they find it no substitute for the poetic style of the King James version.

"When all government, domestic and foreign, in little as in great things, shall be drawn to Washington as the centre of all power, it will render powerless the checks provided of one government on another, and will become as venal and oppressive as the government from which we separated."
 This may sound like the modern day conservative, but it was written by the founder of the Democratic Party, Thomas Jefferson.

"The American Constitution is the greatest peace document ever produced by men."
 "We have little to learn from the old world in business and economics. America is pioneering in new fields of accomplishment and in the achievement of comfort, security and culture. The blight of Socialism has nothing to add, only discouragement, oppressive taxation and scarcity."

"The American people are willing to fight Communist attack on free men overseas, but have not awakened to the need to defend leaders and institutions in our own homeland from obviously Communist inspired attacks. Our most dangerous enemies are not marching under foreign flags, but infiltrating here in our affairs."
 "If children are thoroughly grounded in the ideals and accom-

plishments of America and in the thrilling history of how our people struggled to build this freedom, few will ever listen to Communist deceit."
 There words were spoken by a United States Senator more than 40 years ago.
 The dangers of Socialism and Communism to our Nation are not new, nor have they been unknown until recently.
