### Marked Decline In Rebies No.ed in Texas

Both wildlife and domestic animal rabies showed slight declines in May, according to Texas State Le 1th Department animal dis-

State Health Department veterinarians attribute the decl ne to a seasonal drop and the effects of local rab'es control programs now active in several Texas areas.

Forty examined heads proved positive during May compared to 88 positive heads examined in March and 48 in April. The number of heads submitted

for examination is also declining. In May 409 heads were prepared for examination—a decrease from 591 heads prepared in March.

Whole heads are sent to the State Health Department laboratory in Austin where the brains are carefully prepared for microscopic examination for presence of "Negri bodies," indicating rabies infection.

A breakdown of positive animal heads examined for May shows 10 dogs and three cats. Also there were nine foxes, 15 skunks and three bats.

Statistics show that domestic pet rabies is running only onethird as high as the five-year median while bovine rabies is just half as much as the five-year median figure.

At the same time wildlife rabies is running ahead of the usualincidence level.

The high rate of wildlife rabes makes control measures among domestic animals more important than ever, public authorities say. They warn against possible outbreak at any time or place.

An unprotected domestic animal population - especially - could mean exposure to humans during an unexpected outbreak before emergency controls could be en-

Heads submitted for examination to the State Health Department laboratory include almost every species of wildlife-rabbits, rats, squirrels, flying squirrels, mice, raccoons, gophers, and ham-

Laboratory technicians ask that heads sent for examination be packed in ice, but separated from ice in a smaller container. Whole heads should be submit-

ted instead of just brains to avoid accidental infection during removing of the brain by untrain-(A weekly feature from the

New 3% interest The Treasury explains why the new ones you buy and the ones

you own now are better than ever

Q: How does the new 33/4% interest rate benefit me? A: With Series E Bonds, the rate turns \$18.75 into \$25.00 fourteen months faster than the old rate. Your savings increase faster, because your Bonds

mature in just 7 years, 9 months. With Series H Bonds, the 10-year maturity period stays the same but more interest is paid you each six months. With both E and H Bonds the new rate works out to  $2\frac{1}{2}\%$  for the first year and a half; then a guaranteed 4% each year to maturity.

Q: When did the new rate become effective?

A: June 1, 1959.

Q: Does the new rate change the Bonds I bought before June 1, 1959?

A: All older E and H Bonds pay more now—an extra 1/2% from now on, when held to maturity. The increase takes effect in the first full interest period

Q: Will the Bonds I own automatically earn their new

A: Yes. You don't need to do a thing-just hold on to your Bonds.

Q: When my E Bonds mature, will they keep on earning interest?

A: Yes. An automatic 10-year extension privilege went into effect along with the new interest rate. This means your E Bonds will automatically keep earning interest after maturity.

Q: With the new interest rate, should I cash in my old Bonds and buy new ones?

A: No. The automatic 1/2% increase makes it unnecessary—and in almost every case it is to your advantage to retain your present Bonds.

Q: How are series H Bonds different from series E

Bonds?

A: The chief difference is this: You buy H Bonds at full face value and the interest is paid by Treasury

check every six months for the life of the Board You buy E Bonds at 75% of face value and the interest accumulates to maturity. H Bonds provide income for living expenses, while E Bonds build a nest egg for the future. That's why many retired people hold H Bonds and families saving for, say, a child's education, buy E Bonds.

Q: In what denominations can I buy series E and series H Bonds?

A: E Bonds: \$25 (cost \$18.75), \$50 (cost \$37.50), \$100 (cost \$75.00), \$200 (cost \$150.00), \$500 (cost \$375.00), \$1,000 (cost \$750.00), \$10,000 (cost \$750.00).

H Bonds: \$500, \$1,000, \$5,000 and \$10,000. They are priced at face value.

Q: How safe are U.S. Savings Bonds?

A: Savings Bonds are an absolutely riskless way to save. The United States Government guarantee the cash value of your Bonds will not drop, that it

Q: What if my Bonds should be lost, stolen or destroyed?

A: You can't lose. Every Bond purchased is recorded by the Treasury. If anything happens to your Bonds they are replaced—free.

Q: Where can I buy Bonds?

A: Buy E Bonds at any bank—it takes only a few minutes. Buy them automatically through the Payroll Savings Plan where you work. This Plan means you can have any amount you name automatically deducted every payday. The Bonds you buy installments are delivered to you automatically, too. Your bank will take your order for H Bonds.

Q: How do I help strengthen America's peace power when I buy U.S. Savings Bonds?

A: Peace costs money—money for military strength and for science. And money saved by individuals helps keep our economy sound.

YOU SAVE MORE THAN MONEY WITH
