Fire Prevention Week Begins Today in Eastland

Terry's SPARKS

(Ed. Note—Recently Terry Treadwell, Eastland High School freshman, asked our assistance in preparing a Fire Prevention Week paper for school. We in turn asked him to assist in the preparation of our annual Fire Prevention Week special page. Terry is a good student and produced some very worthwhile writing—as is evidenced in this column, and in other news stories on this page.)

Fire Prevention Day has long been observed in our towns, schools, and civic organizations. How many of you can tell when and why Fire Prevention Day is observed each year? It all started back in the year 1871 on the day of October 9.

This is the day that the fire started that nearly buried Chicago to the ground.

Fire Prevention Day is held each year on the anniversary of the beginning of this terrible fire.

Many states in our great United States now observe this day by having programs, films, skits, and other things of this sort to show the hazards of fire and some methods of avoiding it.

I entered school 10 years ago, and each year those of us in the Eastland School System have been made more aware of fire prevention and Fire Prevention Week.

When we were in Elementary School we made Fire Prevention posters, and one year we wrote a complete summary of year-round fire prevention.

From this we learned the history of the Junior Fire Marshal program and the history of fire prevention methods from Colonial America to America today.

In Jr. high school we continued to make our fire prevention posters.

Now that we are in high school emphasis is made by these writings.

We look and search for information.

Believe it or not, these themes keep us searching for places to look and so hard that fire prevention stays in our minds the year round.

As I traveled this year on vacation through Yellowstone

By TERRY TREADWELL
Once again it is Fire Prevention Week—the time to urge men, women, and children to use a little common sense to prevent fires.

Fire safety is mostly a matter of examining your premises now and then with an eye to fire hazards; of reminding families that there could be a fire that could raze their home and perhaps injure its residents.

Listed below are a few basic pointers for fire safety.

Do a thorough cleaning job on the garage and attic.

Clean the furnace and make certain it is running smoothly.

Keep cans of paint and turpentine away from it.

Check the electrical outlets and wiring. Replace worn cords, battered plugs and sockets.

Clean the kitchen stove and be sure matches are on a high shelf out of reach of children.

Clear up around the yard and remove all trash, grass cuttings and leaves that will burn.

A fire in the yard could easily spread to the house.

Annual Singing Convention Set For Oct. 13, 14

The 32nd Annual Texas and Oklahoma Singing Convention will meet in Wichita Falls on Sat. and Sun., October 13 and 14. This singing convention is one of the greatest gospel song gatherings in the country and will bring in singers and visitors from all parts of the nation.

The singers will gather in the Municipal Auditorium in Wichita Falls and some 4,000 participants are expected. The first session will begin at 2:30 p.m. on Saturday and will recess at 5 p.m. The second session, also on Saturday will begin at 7 p.m. and end at 10:30 p.m.

Sunday, Oct. 14, will begin with a business session at 9 a.m. and the singing session will begin at 10 a.m. and last until 4 p.m.

Park and other national forests, I saw acres of trees that had been ruined by fire.

There were still thousands of beautiful trees left for us, the tourists, to observe and be thankful to the many people who before us had been careful with their fires.

Are you one of the many who are careful?

If you burn the outdoor trash and leaves, have an adult present and a garden hose attached and ready if needed.

(It is unlawful to burn trash within the city limits of Eastland.)

Throw away old newspapers, magazines, clothes, rags, toys and furniture.

LIVING SAFELY WITH ELECTRICITY

Do you know you have a powerful friend at your command?

Every day he serves you in a thousand ways from morning 'til night.

A flick of the finger and he lights your home, starts the family car, cooks your food and runs your refrigerator. He is the friend that makes you master of the world around you.

His name is ELECTRICITY. If you're going to live safely with this powerful friend of yours, you should know something about him.

Electricity moves freely in metals, especially copper. It does not move through glass, paper, wood, or rubber. This is the reason why wires are covered with rubber.

If you touch an exposed wire you can get severe electrical shock or you could be killed.

Water is a good conductor of electricity. Because of this, firemen use chemicals to fight electrical fires rather than water. So you should not handle any kind of electrical fixtures with wet hands.

Some of the dangers from electricity can be avoided if houses are built safely to start with. Materials and equipment should be approved by Under-

writers Laboratories and installed by qualified electricians.

In new houses, builders usually install wall outlets which require plug-in attachments rather than those that screw into an open wall socket.

Of course, frayed cords can become dangerous. If the wire is worn off and the wires touch, the wire becomes red hot. A fire can easily start.

We must not try to use too many appliances at one time on the same circuit. It might draw too much current over the wires and they would become overheated.

If anything does go wrong with your electrical appliances, call a qualified repairman. He knows all the tricks of electricity. He will keep him under with you and repair all of your appliances.

The best time to call a fire is before it starts.

And to do our part, we are happy to sponsor all Junior Fire Marshal activities throughout the year in cooperation with the Hartford Fire Insurance Company.

CHARITY BEGINS (?) AT HOME

The threat of socialized medicine lies in the failure to care for our own medical problems.

The failure to provide for a few charity cases, especially by financially solvent and growing institution, is an invitation to further government intervention.

Medical and financial practices that tend to speed up this process should be opposed by all intelligent citizens.

Thoughts for a Sunday

REV. HASTON BREWER

To live consistently with the will of Him who made us in His image should be the highest goal of every man. Innate in man, though he may not recognize it, is the desire to be at peace with God. Man never finds complete satisfaction until he finds it in the will of God.

Particularly men who have been touched by the Spirit of God seek to find God's will for his life. This implies at least two things. First, that God has a will for man's life and secondly, that man has a will which may or may not be in conformity with the will of God.

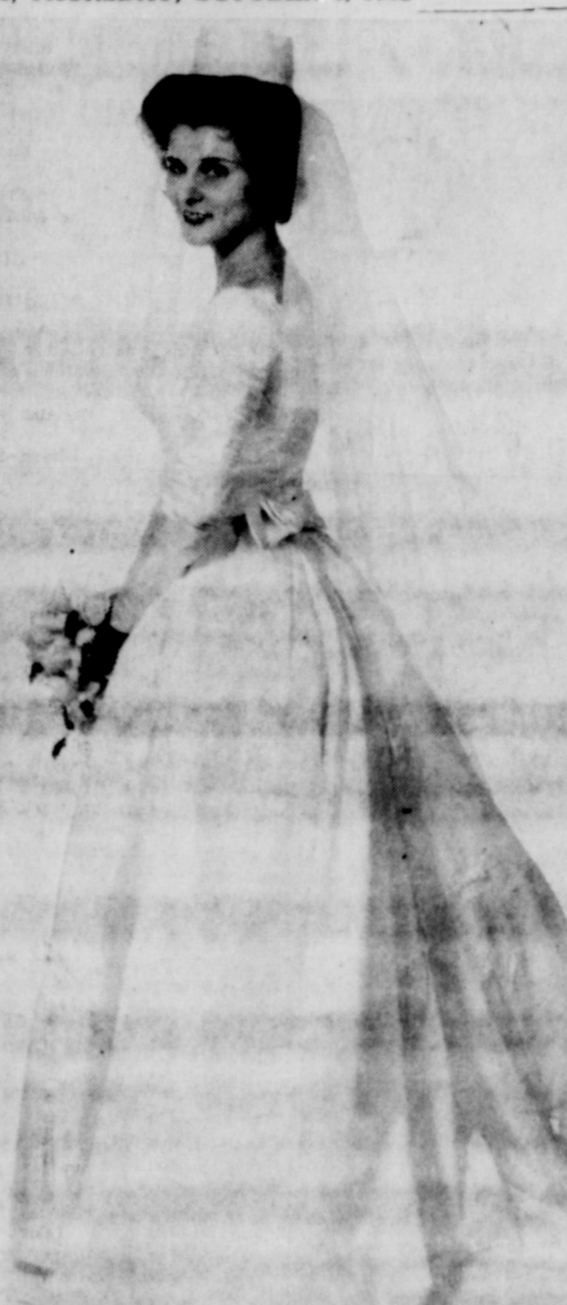

It does not take long to discover that we are creatures of will. Very early in the life of the child there comes the revelation that he is a creature of will. The parent finds this as his will is challenged by the will of the child.

The truth of the matter is that it is in this realm that man is created in the image of God. One of the axioms of our religious faith is "That if man is to be responsible, he also must be free."

Beyond all question man is a creature of will. He is a self-directing being. He has the power to conform or not to conform to the will of God.

The question arises, "If man is to choose, how can he know God's will?" There is no easy way, but there are some guiding principles.

God's will is keeping with his nature and character. God is an intelligent being. His will is the result of his infinite intelligence. God is a purposeful being. His will is in keeping with His purpose. God is a moral being. His will is always in keeping with his moral law. In order that we know his will he has given to us His Word as a guide. If we are to live consistently with the will of God we must not neglect to study the Word of God.

THE CLASSIFIEDS FACTS

66 American homes are destroyed or damaged every day by fire. One and a quarter persons — most children or elderly persons — die in a fire every hour.

From National Fire Protection Association, are the measure of our failure to prevent fire and the measurable result of our failure to prevent fire.

Most home fires are no mystery. A discarded cigarette is left to smolder in a chair, a portable oil heater is re-filled, electrical circuits are over-crowded, uncleaned rubbish becomes a hazard for fire.

Nothing mysterious about the causes of home fires. They occur when the safety of home is violated — from leaving children alone in the house, from failure to play with matches, from failure to be unprepared for fire in the home — no family planning of fire, no periodic family fire drill to make adults and children can act quickly in case of a fire.

Prevention Week is a time to recognize this fact — to correct hazards, to exercise caution and attitude now can make you and your family safe from the tragic consequences of fire.

Sales for the first eight months of 1962 were \$306,347 which represents 58.9 percent of the county's 1962 goal.

"Savings Bonds are an investment in the future. For 21 years the Treasury Department sold bonds as a doorway to opportunity. But today the future itself is threatened. With the dawn of the missile age, the world is suddenly aware that one more war could be the last. The hope of the age is for peace, for some guarantee that there will be a future to look forward to. We must have peace power, the strength to keep the peace; the knowledge to make it lasting. Savings Bonds, in building economic stability, help strengthen America's peace power," Parker concluded.
