Sinking Ship's Passengers And Crew Are Saved

PAGO PAGO, Samoa, Aug. 18.—The steamship Tahiti, on which 300 persons sailed gaily northward from Wallington for San Francisco six days ago, riddled under a heavy swell in the South Pacific today, shattered and abandoned after rescue of her passengers and crew.
Aboard the Matson steamer Ventura, the 173 adult passengers and two infants who sailed on the Tahiti of the Union Steamship Company were safe after many hours in the disabled and water-pouled ship was pounded by a strong running sea.
The Ventura, speeding from the scene of the rescue toward Pago Pago, had ended another heroic mission of the coral-reef southern seas, and the master, Capt. W. E. ...

Valentino Heirs In Court Fight

NEA Los Angeles Bureau
Maria Guglielmi Strada and Alberto Guglielmi Valentino, sister and brother of the late Rudolph Valentino, shown here, have prepared for a final court battle to settle the screen idol's estate which they charge George Ullman, recently resigned as executor, mismanaged. A bank is now handling the estate and final settlement is to be made at a hearing Sept. 3, in Los Angeles.

Campaigns For Votes Shift To Eastern Texas

DALLAS, Tex., Aug. 18.—A stirred citizenry awoke this morning to hear final shots in the battle for the governorship of Texas as strategic points in the conflict changed from West Texas to eastern and southern cities where James E. Ferguson and Ross Sterling will center their final attacks.
New ammunition for the political warfare was promised voters by Ross Sterling, as well as Ferguson, who has acted as trigger man for his wife, Mrs. Miriam A. Ferguson, throughout the present battle. Sterling forces were expected to make much political capital out of what they say may result in an economic boycott for the state should a Ferguson administration be installed. Texans were in suspense today awaiting new moves expected from Ferguson, sage of many political lulls that preceded the storm of final campaign days was broken only by Gov. Dan Moody, who has gone to the stump once more to direct his militant oratory against "Fergusonism."
"I have spoken to over 9,000 people during the last week. I find everywhere an aroused citizenship, and I have seen in the countenances of the people a determination that will never let the Ferguson name be used. The people see in 1925-26 return, and the indignation of the people is aroused against Fergusonism," Moody said here Sunday as he paused to confer with Sterling leaders.
Using Texans to make each day of the final weeks count, Moody will speak at a series of meetings. The cause of law enforcement was set back ten years by Mrs. Ferguson's first term. The type of support that the Ferguson are receiving constitutes a direct challenge to law-abiding people of Texas and makes it imperative that friends of good government go to the polls in solid phalanx and combat that force which stands for the break-down of law enforcement.
Clicks were to gather around the Ferguson standard tonight at Fort Arthur where he has promised voters "plenty to think about." The following night he will appear at Nacogdoches, Wednesday at Terrell, Thursday at Fort Worth and Friday at Marlin.
Sterling's message of "good government" was to be repeated to Gainesville citizens this afternoon and at Paris tonight. The remainder of this schedule was Terrell and Ennis Tuesday; Marlin and Cameron Wednesday; Georgetown and San Marcos Thursday, and Galveston Friday.
Governor Dan Moody will launch an aerial attack against Fergusonism Tuesday night in a radio address with Dallas, renewing the dress from an aerial speech from Houston Thursday. Nacogdoches and Lufkin were to hear the governor today, Brownwood and San Angelo Wednesday, and Austin Friday.

Hoover and Aids To Discuss Needs Of Com. Aviation

By PAUL R. MALLON
United Press Staff Correspondent
ORANGE, Va., Aug. 18.—The needs and accomplishments of commercial aviation in America were the subject of a conference called by President Hoover at this mountain camp Sunday.
The President's distinguished Secretary, Col. Charles A. Lindbergh, and the four leading aviation officials of the government here to discuss with the chief executive the progress being made by the commercial flying lines now in operation.
As a pioneer aviation passenger, Mr. Hoover has displayed keen interest in aviation development. He sometimes used a plane during the war while director of Belgian relief, flying across the English channel 17 times in war days when planes were not as safe as now. As secretary of Commerce in 1921 he inaugurated the airway lighting system.
Mr. Hoover's present purpose is to bring himself up to date on the way the system is working out and his guests were chosen with that end in view. The United Press has been informed. It is possible some government aid programs may be developed from the conference.
Lindbergh is flying adviser of the Transcontinental Air Transport, the first cross country airline service, which has been operating more than a year between Los Angeles and New York.
Assistant Secretary of War F. Trubee Davison and assistant Secretary of Navy for Aeronautics, Davis S. Ingalls, flew to the Rapidan Camp late Saturday landing in a small field near Madison, Va. Others at the camp for the conference are assistant Postmaster General Warren Glover and assistant Secretary of Commerce Clarence M. Young. All have charge of aviation in their respective departments, Glover being in charge of government air mail contracts.
WASHINGTON, Aug. 18.—The Interstate Commerce Commission today denied the Abilene & Southwestern railway, a Texas and Pacific subsidiary, permission to construct an extension from Ballinger to San Angelo, Texas, 39 miles. Construction of the extension was opposed by the Santa Fe system on the ground it would parallel its line and that the communities which the proposed line would serve did not warrant the construction.

Weather And Crops

CHICAGO, Aug. 18.—The three-billion drought of 1930 has been effectively broken in all but a few small, widely scattered areas, the weather bureau announced today after completing a national rainfall survey.
States of the corn belt, all have been soaked by heavy rains within the last four days, it was said. The value of the dry period, when it was estimated these rains would revive crops sufficiently to reduce materially the amount of damage done during the dry period.
The value of a .66 inch rain around Peoria, Ill., Sunday, added to 22 inch which had fallen since Thursday was estimated at approximately a quarter million dollars.
For the last four days, the bureau reported representative rains as follows: Springfield, Mo., 2.23; Terre Haute, Ind., 1.24; Keokuk, Ia., 1.40; Valentine, Neb., 1.58; Springfield, Ill., 1.15; Kansas City, 1.60; and Omaha, 1.34.
Where the rains were general or the Midwest, they did not affect the stage of the Mississippi river, which was one and sixteenths feet above low water mark at Quincy Sunday. Both the Mississippi and Illinois rivers were lower than they had been for a number of years.
KANSAS CITY, Mo., Aug. 18.—In the presence of his bride, three days and federal officers who had come to question him, James Kelly, 40, shot and killed himself in his room at a hotel here today. Kelly was wanted in Wichita on a bad check charge, a secret service agent. As the agent questioned him Kelly pulled a revolver from his pocket and shot himself through the head.

Ships Flying In Formation With Seven Others

SAN ANTONIO, Tex., Aug. 15.—Donald Dewitt Campbell and Robert Lee Scott, Kelly Field Cadets, were killed instantly at noon today near Van Ormy when their planes collided at 1,500 feet and crashed to earth.
The ships were flying in formation with other planes when the accident occurred.
Campbell, 23, is the son of Dr. George B. Campbell. His home in Anadarko, Okla. He was a graduate of the University of Oklahoma.
Scott, 23, lived in Florence, Alabama and was a graduate of the University of Illinois. He is the son of Hugh Scott, Bethany, Illinois.
Officials investigating the crash indicated that the mishap occurred when two planes locked wings during a flight in formation.
WICHITA FALLS, August 18.—Going into a tail spin at 1,000 feet aloft, a plane carrying B. L. Walker, aviation instructor, and Leo Voss, a student, crashed at the Municipal airport here today. Walker received injuries which may prove fatal while Voss was only slightly hurt.
The accident occurred while Voss was receiving a lesson in flying.

One Killed, Another Injured Plane Crash

DALLAS, Tex., Aug. 18.—R. B. Kuteman, pilot of the plane which crashed Sunday afternoon at Grand Saline during an air circus, died at Baylor Hospital this morning from internal injuries.
GRAND SALINE, Tex., Aug. 18.—Polk Dickerson, 19, and pilot R. B. Kuteman were in a critical condition today from injuries received when their plane crashed this morning at 300 feet, killing Jewell Phillips, 21, third member of the flying party.
The open cockpit ship nose-dived during an air circus. The three men were unconscious when removed from the wreckage of the plane and Kuteman, whose chest was crushed, was rushed to a Dallas hospital. Phillips died shortly after the dive in a hospital here.
Today an inspector from the Department of Commerce was questioning eye-witnesses to determine the cause of the mishap.
Two other planes took off from Love field at Dallas Sunday with Kuteman's plane to put on the flying circus here.

Sheep And Goat Men Want Lower Freight Rates

SAN ANGELO, Tex., Aug. 18.—The Sheep and Goat Raisers Association of Texas today petitioned five railroads of the state to cut by 50 per cent freight charges on Texas sheep and lambs to interstate and intrastate points. The association wants the rates effective from August 25 to November 1.
Telegrams to the railroads set fourth drought conditions in West Texas and stated prices of lambs are half of what they were last year.
T. A. Ashkeblad, Osama, president of the association, and A. H. Priest, manager of livestock traffic sent the wires.
Railway officials are holding a drought rate meeting in Chicago today.

Another Chapter in Johnson Tragedy

In the little cemetery at Rockville, Md., this new chapter in the tragic story of Walter Johnson's life was enacted—the burial of the former great pitcher's wife and mother of his five children. In the center, behind his son, Eddie, stands Walter, shaken with sorrow. With her hand on Eddie's shoulder is Walter's mother and to the left of the picture are Walter's two brothers, Earl, left and Chester, from Coffeyville, Kan. Edwin G. Roberts, mayor of Reno, Nev., and father of the late Mrs. Johnson, is at the right.

Operators Honor Memory Of Slick

OKLAHOMA CITY, Aug. 18.—The swish of oil field pumps and the chugging of drills were silenced in the Oklahoma field today in honor of the "King of Wildcaters," Thomas B. Slick.
Operators agreed to stop all operations while funeral services were conducted in Clarion, Pa., for Slick, who died last Saturday in a Baltimore hospital after a stroke of paralysis which followed an operation.
Services were to be conducted in his boyhood home of Clarion at 3 p. m.
Tomorrow conferences probably will be held here to determine operation of Slick's vast holdings here and in Kansas, New Mexico, Texas and other states.
It was rumored that Prairie Oil and Gas Company will take over the remaining interest in the Slick properties included in the \$45,000,000 deal a year ago.

Today With The Endurance Fliers

BROWNSVILLE, Tex., Aug. 18.—At the closing today of the entry list for the Brownsville National air derby beginning Tuesday morning, several names had been signed which were prominent in last year's air derby rolls.
Jack Livingston, last year's class B winner of the race from Los Angeles to New York, and Earl Roland, class A winner in 1928 were among the names signed for the take-off at 9:01 a. m. Tuesday. Dick Allen and Russell Putnam, managers, were conferring on final details of the race, which will carry the flyers through Corpus Christi, Houston and San Antonio to the first day.
On the second day the airman will make a swift dash from Waco to Fort Worth. Four days are to be devoted to the event.

Continue Probe Of Gang Killings

CHICAGO, Aug. 18.—The trail of the Zuta dollar, leading into high places and low, was followed today by investigators seeking to establish more definitely existence of an amazing alliance between Chicago's underworld and her officialdom.
As investigators continued probing over the records of Jack Zuta, slain gangster leader, and delving through sealed vaults in an effort to unearth more details of underworld finances, a new grand jury was being formed and empowered to follow the trail to its end.
Zuta, alive, was a menace to gangland. Powerful and known as a "talker," he possessed knowledge that all gangland—and investigators saw, many officials—feared he might disclose. That he kept detailed records of the financial boxes which Zuta rented to state's attorney John A. Swanson, Roche is a member of the special board of strategy investigating both the murder of Zuta and that of Alfred "Jake" Lingle, Tribune reporter.
"Within a few days," said Roche, "we hope to discover the hiding places of two large trunks, said to be crammed with records of the Moran-Aiello-Zuta gang."
Some of the officials whose names appeared among the Zuta records, most of them on canceled checks and notes, were Chairman Charles V. Barrett of the Board of Review, former sheriff Charles E. Graydon, former state senator George Van Lent, Police sergeant Richard J. Williams, municipal judge Joseph W. Schulman, former superior judge Emanuel Eller, and Homer K. Galpin, former chairman of the Cook County Republican committee.

Weather And Crops

CHICAGO, Aug. 18.—The three-billion drought of 1930 has been effectively broken in all but a few small, widely scattered areas, the weather bureau announced today after completing a national rainfall survey.
States of the corn belt, all have been soaked by heavy rains within the last four days, it was said. The value of the dry period, when it was estimated these rains would revive crops sufficiently to reduce materially the amount of damage done during the dry period.
The value of a .66 inch rain around Peoria, Ill., Sunday, added to 22 inch which had fallen since Thursday was estimated at approximately a quarter million dollars.
For the last four days, the bureau reported representative rains as follows: Springfield, Mo., 2.23; Terre Haute, Ind., 1.24; Keokuk, Ia., 1.40; Valentine, Neb., 1.58; Springfield, Ill., 1.15; Kansas City, 1.60; and Omaha, 1.34.
Where the rains were general or the Midwest, they did not affect the stage of the Mississippi river, which was one and sixteenths feet above low water mark at Quincy Sunday. Both the Mississippi and Illinois rivers were lower than they had been for a number of years.

Most Beautiful Girl Has Her Own Idea Of Men

EL PASO, Tex., Aug. 18.—Dorothy Dell Goff, who holds the title, "the most beautiful girl in the world," doesn't care whether the man she marries is handsome.

News Briefs

(Continued from page 1)

Northern capitalists are understood to be financing the program with the view to making the island a winter resort.

DALLAS, Tex., Aug. 18.—Twenty-nine reserve air officers are expected here today for the opening of Hensley Field.

PORT ARTHUR, Tex., Aug. 18.—Richard Vogel joined his bride Sunday. The 36 year old mining engineer, whose bride was killed Tuesday in an auto wreck, just one week after their wedding, died here yesterday.

The couple, who were married at the bride's home in Somerville, Aug. 5, were on their honeymoon trip when their car overturned on the beach highway, 30 miles from here. Mrs. Vogel, died instantly.

NATIONAL

KANSAS CITY, Aug. 18.—Three persons were drowned in the Kaw river near Bonner Springs, Kansas, one of them while attempting a rescue, during a picnic swimming party Sunday.

KANSAS CITY, Aug. 18.—Crowded week-end traffic, conditions and rain storms which blinded drivers cost three lives near here Sunday in motor car accidents.

BIRMINGHAM, Ala., Aug. 18.—The body of Seymour Ransom, 62, associate editor of the Birmingham News, who died Saturday night, was sent today to Newbern, N. C., for burial.

Man Writes Notes To Wife, Drinks Carbohic Acid

DALLAS, Tex., Aug. 18.—After making careful plans in the form of a note to his wife and another to authorities advising them of the names and addresses of his survivors, Fielding W. Starr, 56, gulped two ounces of carbohic acid at Buckner's Park Sunday and died two hours later.

Starr was found by police when they answered a call from the Park that a drunk man had passed out there. Starr was conscious when the officers arrived and handed them the bottle which contained the acid and the notes he had just written.

The notes written by Starr were turned over to his son, F. W. Starr, Jr.

The one "to authorities" gave the following list of survivors: two daughters, Mrs. E. A. Boach of Tyler and Miss Albert Ann Starr of Waco; his father, A. F. Starr of Los Angeles; a sister, Mrs. Frederick Herbst of Los Angeles; his wife, and the son, Fielding W. Starr, Jr.

The note to Starr's wife follows: "God is good. God is love. God will forgive. I hope you, my good father, my children, your mother and all my relatives and friends will forgive me for all the mis-

Plenty Of Employment Guaranteed For This Party

takes I have made and all the sins I have committed. I have no malice in my heart toward anyone.

"Whiskey is the cause of it all. How I do hope every man, woman, boy and girl will profit by the miserable failure I have made of this life and never touch the stuff. You know better than anyone what it has caused me to do. How happy and prosperous we would have been had it not been for whisky, which has destroyed my mind and body. May God in his goodness have mercy on my soul."

Starr was a salesman, having lived in Dallas the last six years. He was born in Sulphur Springs in 1874.

Louisiana Has Bitter Campaign In Senator's Race

By MORRIS DE HAVEN TRACY, United Press Staff Correspondent NEW ORLEANS, Aug. 18.—Governor Huey P. Long of Louisiana has stacked up all his chips in one pile and laid them on the table in his campaign to win the democratic nomination for the United States senate.

If he wins he will be in a position to dictate to Louisiana politicians. If he loses there are plenty of people waiting for a chance to make short work of the remainder of his political career.

Long has numerous enemies. They have rallied around the standard of Senator Joseph Ransdell, now serving his third term in senate from Louisiana.

Long started his career as a yard and hardware salesman. He is not yet 40 years of age, and restraint is something he does not know. Ransdell talks of Mississippi river control and such substantial topics and seems to leave to other orators the task of grappling with the real issue of the campaign, which is Long and nothing else.

The anti-Long orators are speakers for newspapers, and addressing meetings throughout the state. Their language is bitter. They call Long such things as: "An unqualified, disqualified, discredited, inexperienced, erratic, boastful young braggart."

"In this campaign the main issue before the people," said Attorney General Saint in a pro-Ransdell speech over the radio Saturday night, "is to prevent one of the candidates from degrading the state at Washington with further clovenhohn and poultry in a nation-wide field."

"Until then we had looked down on such states as Mississippi, Oklahoma, Alabama, and South Carolina, with their Hellfire, 'Aldrich Bill' Murveys, Cole Bleases and Governor Bibbos."

other southern states, contains one large metropolis, New Orleans. Its interests and ideals are far different from those of the remainder of the state, just as New York City is not typical of New York state. So the line is sharply drawn here between town and country. Long has had his strength in the country. His opponents came from the towns.

This year, close observers maintain, Long may have less strength in the country parishes, but, because of the two years of close organization and because of factional strife and, like, he may gain some strength in New Orleans. He maintains he will "split New Orleans with Ransdell and win nine out of every ten outlying parishes."

His opponents say he can't do better than poll a quarter of the New Orleans vote and that Ransdell will bite heavily into his rural strength, inside.

Girl Drowns In Swollen Stream

PLAINVIEW, Tex., Aug. 18.—Caught in a wall of water which came rushing down a small creek bed following a hard rain near Quitaque Sunday, Miss Alvie Roach, 17, was drowned and John Adams and his daughter, Stella, escaped death when they were rescued from the swollen waters.

The water swept Adams and his daughter upon high ground where they lay unconscious until help arrived. The body of Miss Roach became entangled in some barbed wire and she was dead when rescuers arrived on the scene.

High water caused by the heavy rain endangered several farm homes in the neighborhood.

lico officers said she was held for "investigation." Crime paid none of the Kimes family. It paid Nellie Kimes Dunn, least of all. "I'm not ashamed of the name of Kimes. But my name is not Kimes," she said. "I was married a year ago and changed my name to Dunn. The name of Kimes has caused me a lot of trouble. The laws don't want me to go straight. They want me to put me in jail. They think it's fun. "I'm a girl 21 years old now. I've got a long time to live. I wonder if, when I'm an old woman, will they still be locking me up because my name is Kimes." In May, 1929, she was placed in the Seminole county jail and charged with murder in the death of George Epperly, a farmer. The jury acquitted her and she moved on. She was just a "kid" at Fort Cobb, Ok., when her brother Matt went to the penitentiary for a series of bank robberies. He was sentenced to life imprisonment.

Automobilists Say They Saw Lion Near Eastland

Considerable excitement prevailed about this vicinity late last night when a number of people insisted they had seen a huge Mexican lion on the highway a few miles west of town. When the matter was reported in town it was believed that what had been seen was a big Collie dog, which has been closely sheared except the tip of its tail and its head and upper part of the neck, making it resemble a lion somewhat, and the matter was treated as a joke. One fellow, who said he has often seen the collie, said he saw the lion and drove around him on the highway and knew it was not the Collie. "I was right at him. I have seen Mexican lions and I know it was a Mexican lion," he said. Some have advanced the opinion that it was a Mexican lion that had escaped from a circus or zoo somewhere in this section.

Under the new law, liquor laden ships can clear Canadian ports only for countries where there is no prohibition law, so ships running from Canada to the United States now must dodge both the Canadian and U. S. officers.

News From The State Capital

A verdict of accidental drowning was returned today by justice of the peace Frank Tannehill in the death of Miss Jessie Stevens, 18, who lost her life Sunday while swimming in the Colorado river.

AUSTIN, Tex., Aug. 18.—A pro ration order for the Darat Creek oil field in Guadalupe county was issued today by the oil and gas division of the State Railroad Commission. The order limits the field production to 44,000 barrels a day. This is 28.78 per cent of the field's potential production. J. S. Abernoble and the Harrison Oil Company are allowed to produce 1750 barrels a day in their wells. This is 35.4 per cent of their potential. The greater percentage is allowed because of water, it was announced. The 44,000 limit put on the field is slightly more than was allowed in a previous pro ration order which was enjoined. The new order is effective at once and is for an indefinite period.

Youth Shot From Ambush Near Milsap

SWEETWATER, Tex., August 18.—A story of how he was shot and wounded by an unidentified youth while "beating" his way to Arizona was related by C. H. Smith, Birmingham, Ala., when county officers removed him from a west bound freight early today. Smith and a companion were on their way to Arizona to pick cotton, officers were informed. At Milsap, on the Texas and Pacific railroad, an unidentified youth beside the track fired his rifle at Smith, the bullet striking him in the head. After receiving treatment for his wound, Smith and his companion were taken to the county jail for questioning. Members of the train crew said it was the fourth such occurrence near Milsap.

Steamer Load Of Beer Is Seized

DETROIT, Mich., Aug. 18.—The coastal steamer Vegas, loaded with 30,000 cases of beer, was tied up at a Canadian dock across from Detroit today, marking, officials said, the failure of the first major effort by rum runners to beat the new Canadian liquor export law. Capture of the Vegas and its cargo is estimated to be worth at least \$100,000, bore out rumors current here for many months that a "rum row," such as formerly existed off the Atlantic seaboard, would be established on the Great Lakes after enactment of the Canadian export law. Under the new law, liquor laden ships can clear Canadian ports only for countries where there is no prohibition law, so ships running from Canada to the United States now must dodge both the Canadian and U. S. officers.

Find Girl's Dead Body MEMPHIS, Tenn., Aug. 18.—On the theory that the body of a girl found in a culvert here was that of a former government "under cover" agent killed by bootleggers, detectives questioned known members of liquor rings today. The body, discovered by a negro squirrel hunter Saturday, was tentatively identified as that of Miss Clara Patterson, cashier of the Peabody Hotel, who has been missing since June 16. It had been wedged into the culvert, and its condition was such cause of death could not be determined. Miss Patterson hurriedly left the Peabody Hotel the night of June 16 saying she was forced to leave the city. Her mother, Mrs. Mattie Patterson of Little Rock, said her daughter once told her she "had been working for the

EASTLAND'S \$100,000 SPENT IN EASTLAND During Prosperity Sept. 7 to 1934

Advertisement for Atlas Cement featuring an illustration of a modern house and the text "Now is a good time to fix up your home" and "The same home as shown above after modernization"

Everyone likes a good-looking home. Making homes modern is often simple and inexpensive. A little change made here and there frequently is the only difference between an old house and an up-to-date home.

A coat of paint—repairs to the roof—a new concrete driveway—board in the attic to provide a play room for the children—a vermin-proof and waterproof basement—a new sun parlor or sleeping porch—a concrete sidewalk—just two or three small improvements like these often are all that are needed to make a home up-to-date.

Now is a good time to make one or more of these improvements. The excellent "before and after" photographs of remodeled houses are shown in the booklet "Remodeling with Stucco." Just fill in the coupon if you would like to have a copy.

Universal Atlas Cement is made in Waco by the workers of Texas materials. Along with other economical qualities, produces your building material dealer can quickly furnish you either Atlas portland cement (gray) or non-staining Atlas White portland cement. Ask for Atlas cement.

BEGIN HERE TODAY

Dan Rorimer, temperamental young man of Hollywood, can't get along with the studio manager at Continental Pictures and tears up his contract as scenario writer and asks to be fired. But he isn't. Dan has become keenly interested in Anne Winter, a young girl from Tulsa, Okla., who is working as an extra. She has had stage experience, and she knows enough to want a screen test at Grand United studios.

Rorimer lives with Paul Collier, who writes a daily movie column for a string of newspapers. Anne lives with Mona Morrison and Eva Harley, two extra girls. Eva is rather bitter. She doesn't get enough work to make a living and Dan suspects that they may be some sort of tragedy in her life.

Garry Sloan, famous Hollywood director, has shown some interest in Anne Winter, although hardly worth the bother. She doesn't get any high hopes. Dan does not care much for Sloan; he is an admirer, however, of Martin Collins, formerly of Continental, now with Amalgamated. Collins invites him to a house-warming at his home, and he brings Anne with him.

NOW GO ON WITH THE STORY CHAPTER XVII

Rorimer recognized among the faces he saw in the patio a few that he had beheld more than once on the screen. There was an executive from Amalgamated, too, and a director, and lesser folk. He presently found himself beside a dazzling blond young lady who, Collins informed him, was playing a lead in the picture he was at present directing.

Farrell was her name, and Maris Farrell wanted to know immediately if Rorimer was "in pictures." "I heard Mr. Collins say you were at Continental."

Dan smilingly informed her that he didn't act in them. "I'm trying to write them, that's all."

Miss Farrell, looking at him critically, frowned and read eye-lashes, said she saw no reason why he shouldn't do a little of both, and he laughed.

"What a friend you turned out to be! I think I'll stay right here all evening."

"That would be just fine," Maris Farrell assured him with a flash of brilliant teeth. "May I have a cigar? Someone is going to sing, and I'll have to do something if I can't talk."

There was a Mexican with broad, bright, and big eyes, and a tight-fitting green trousers with bottoms like bells, and he sang for them for a while and played an accordion.

The Japanese butler moved unobtrusively among the guests, bearing a tray with drinks and Rorimer found before very long that he came around quite often.

And Miss Farrell wanted to know in a slightly husky whisper if Dan didn't think it would be much more sensible if the glasses were about twice as tall, so that the butler could save himself a lot of trips.

It would be an admirable idea, Rorimer thought, and she asked him if he had ever been invited to tea at the home of a certain black-haired star whom she named, and when Dan said no, she told him that if he ever went there he would see the "most precious" highball glasses in Hollywood.

"Each one holds a pint, or very nearly, and is about a foot high," she added that she would get a set just like them, only she imagined they were frightfully expensive. "They came from Europe."

"I'm sorry I missed them," Dan said. "I don't get around very much, though. I leave the social honors to the man who lives with me."

"And who is he? Do I know him?"

Rorimer said he wouldn't be surprised if she did. "I think Paul Collier knows nearly everyone in Hollywood."

"Paul Collier! Do you live with Paul Collier? Why, of course I know him! He has had tea and luncheon with me lots of times. You must get Paul to bring you over some time," she added.

Someone came over to speak to Maris Farrell just then and Rorimer was left alone for a minute or two with his thoughts, and he had opportunity to observe Anne Winter and to remark that the man with her was being very attentive. Frank Maury, Collins had said his name was, and Dan remembered that Paul Collier had found occasion to mention him once or twice of late in his column. Collier had said that Maury, who was a freelance actor, was riding on a sudden wave of feminine popularity, and two of the larger studios were trying to get him to sign a contract.

She told Collins she would love to explore the house with him.

those who felt ambitious enough for it.

Maris got up at once and took Rorimer's arm, but on the way inside she said, "There's a phonograph there. If we get bored upstairs we can come down and dance in the patio." Anne Winter and Maury were still in the patio when they left.

Anne said, "We seem to be the only ones left out here. Don't you think we'd better go in?" "I'm perfectly satisfied out here," Maury told her, leaning unnecessarily close to her, "but if you say so."

And Anne rose, and he had to follow.

She was glad when someone cut in on them after a while and took her away. It was Collins, and Anne found his friendly, amusing chatter a relief from Maury's impressiveness. She didn't like the way Maury held her when he danced, had stiffened her body against his too-tight embrace.

Collins inquired whether she was keeping busy, and she told him about the forthcoming production at Grand United and the part she hoped to merit. She was deprecating about it, but she could not conceal from the director her eagerness.

"It's nothing very impressive, really," but it's rather wonderful. "A leading man of five," he told her, "and a seven-year-old vamp with hair almost as black as yours. She's not quite as pretty, though," he added, and he drew away for a

comforting and set her to tingling with hope. "There's Maris Farrell, for instance; she just about stole a picture away from a star once with a few lines."

Maris Farrell, he added, was a "comer." "She'll be a star some day she keeps on the way she's going. . . . You met her, didn't you? She's the girl that had hold of Dan Rorimer for a while. For quite a while," he said, and laughed.

His eyes roved the room, and he said, "I don't see them now. Maybe Maris has kidnapped him. Don't trust her too far, Miss Winter. I warn you, she's dangerous."

Anne threw back her head and looked up at him and laughed. "I think she's beautiful," she said. "I can't blame Dan if he falls under her spell. Where is she from?"

"Maris? She's a comparative newcomer to the screen. She was glorified by Ziegfeld."

Maris, he continued, was the kind that would "get along." "She's a very ambitious girl, and she has the knack of being lovely and agreeable to everyone she meets."

He added, jokingly, that he wondered if that wasn't one way of cultivating a lovely and agreeable personality for the screen. "Nothing like working at it all the time, you know."

Their dance ended, and Collins wanted to know if she would like to look around the house and grounds.

"Helen" — that was his wife — "and I are like a couple of kids with a new toy, and we love to show off."

Frank Maury was coming toward them, walking a little unsteadily, and Anne hastily agreed. She shuddered a little to think of being cornered by Maury and having to listen to his glib flattery, especially since it had been seasoned by his frequent trips to the punch bowl.

So she told Collins she would love to explore the house with him, and he said that if she would promise to be very quiet about it, he would even let her tiptoe into the children's bedrooms.

"I'll promise," Anne said gaily, and she took his arm. "I won't make a sound. And she asked him to tell her about his children."

"A leading man of five," he told her, "and a seven-year-old vamp with hair almost as black as yours. She's not quite as pretty, though," he added, and he drew away for a

second and looked at her in smiling appraisal; "but I have hopes."

He took her, then, to the bedrooms where the children lay sleeping, but first, he had to win the consent of the smiling little Japanese maid who watched nearby.

"Tsuka, do you suppose you could open the door for just a tiny little peek?" He held a finger to his lips, and Tsuka considered a while and then nodded.

Collins said, "Tsuka's very strict with her about that. Are you, Tsuka?" It's quite against her rules. Well, we'll just be a second."

And after Anne had seen the children and admired them, he strolled with her through the upstairs, and then he told her she must see the swimming pool.

Only a few guests were dancing as they passed the ballroom. Collins said he supposed that his wife was conducting another tour some place. "Maybe they're over in the dressing rooms by the pool, pick-

ing out their bathing suits. You knew we were going swimming later on, didn't you?"

"Why, no," Anne said. Collins said, "Oh, yes; it wouldn't be a real housewarming if they didn't try out the pool. And some of the frowning brows," he added, his smile crinkled the corners of his eyes and stretching his little mustache, "will want a little cooling before the party's over. They always do."

(To Be Continued)

Christian Science Churches "Soul" was the subject of the lesson-sermon in all Churches of Christ, Scientist, Sunday, August 17.

The golden text was from Psalms 63:5. "My soul shall be satisfied as with marrow and fatness; and my mouth shall praise thee with joyful lips."

Included in the citations comprising the lesson-sermon was the following passage from the Bible: "And great multitudes came unto him, having with them those that were lame, blind, dumb, maimed, and many others, and cast them down at Jesus' feet, and he healed them." (Matthew 15:30).

The service also embraced the following citation from "Science and Health with Key to the Scriptures," by Mary Baker Eddy: "Knowing that Soul and its attributes were forever manifested through man, the Master healed the sick, gave sight to the blind, hearing to the deaf, feet to the lame, thus bringing to light the scientific action of the divine Mind on human minds and bodies and giving a better understanding of Soul and salvation" (page 210).

CHICAGO, Aug. 16.—An act providing uniform regulations throughout the nation for sale and possession of firearms has been adopted by the national conference of commissioners on uniform state laws, it was announced today.

Four states, Delaware, New York, Georgia and Porto Rico, voted against the act and Texas was announced as "not voting." The other 28 states represented at the conference were in favor of the legislation.

Among the provisions of the act are: "No person ever convicted of a crime involving the use of a pistol in his possession . . ."

TEHERAN, Persia, Aug. 18.—Revolution has broken out in Shiraz, Persia, it was reported here today. Several officers and 120 government troops were reported killed.

Piles Go Quick

Piles are caused by bad circulation of the blood in the lower bowel and a weakening of the parts. Only an internal medicine can remove the cause. That's why external remedies and cutting fail. Dr. Leonhardt's HEM-ROID, succeeds, because it relieves this congestion and strengthens the affected parts. Dr. Leonhardt's prescription has such a wonderful record for quick, safe and lasting relief even in chronic and stubborn case, that Beaty Drug Co. says try HEM-ROID at my expense. Your Pile suffering must end or money back.

Girl Scout Home-Making Activities Stimulated by Aid of Mrs. Hoover

THE FIRST LITTLE HOUSE: Sixty-nine similar houses now thrive from coast-to-coast. (Above) Mrs. Herbert Hoover, formerly president of the Girl Scouts, now honorary president.

Little House in Capitol Originated Idea For Seventy Others

By Adele Entz

SEVENTY Girl Scout "Little Houses" in which Girl Scouts are trained in home-making activities, are now in operation in the United States. Starting with the National Girl Scout Little House in Washington, which has been one of the chief interests of Mrs. Herbert Hoover, now Honorary President of the Girl Scouts, the idea of building or buying such communal centers for local Girl Scout activities has spread from Coast to Coast.

Characterized by Mrs. Hoover as "the halfway house between the playhouse of childhood and the home every girl hopes to achieve some day," the Little House has made interesting history in the Girl Scout movement.

Joy and Sorrow

HE makes spectacular catches sometimes, and whenever Hack makes 'em, somehow they seem to be better catches than Tris Speaker ever could make. Those chunky piano legs of his fairly spin under him as he races to the outer wall for a long fly. He leaps, and oh, boy, what a catch! Then again, sometimes he just stands there in center walking for a nice easy fly, and when the ball gets close to him, he waves his arms over his head in bewilderment and the stuff's off. He has lost it in the sun. But just the same, he's our favorite ball player.

My Ball Player LEWIS ROBERT WILSON is up to his old tricks again. Time after time we have remonstrated with Lewis, and he has promised to do better. But just as he seems about to prove he has mended his ways, there he goes again, kerplow! We weep with pain, his face is set in a brutal determination in his eye, and we go along right with him again.

Lewis Robert Wilson is our favorite ball player. He plays center field for the Chicago Cubs and his real name is Hack. His form has all the graceful lines of a brick kiln. He fights with umpires. He argues with fans in the stands, sometimes with his fists, for Lewis has a temper. He socks homers far over the wall and swats ball players on the nose. In pinches, sometimes he lets the third strike waltz easily across the dish. In other pinches sometimes he loses fly balls in the sun, and usually when Lewis loses 'em, they cost the Cubs ball games. But he is our favorite ball player.

McGraw Shipped Him HE's battling Babe Ruth this year for time-honored honors and he isn't so many behind the Bambino. Old Hack was basking in sunshine and glory the other day, with the Cubs ahead in the ninth, when another one of those terrible things happened, the same thing that happens in the world series last year. Hack lost one in the sun and it went for a home run. The Cardinals won a battle from the Cubs.

My Ball Player

so he sent him away. The Cubs rescued him from Toledo. Hack fights and works every minute. His bat has brought the Cubs victory time after time, but so have his inglorious failures brought them defeat. You never know just what Hack is going to do, and that is another one of the reasons why he's our favorite ball player. He's always in earnest; always trying, but he's just human after all.

Some of the lads in the press box say he gets his name by his resemblance to an old-fashioned hack. Others say they call him that because he has the physical proportions of Hackenschmidt, the old wrestler. Either reason is authentic, but for all that he remains our favorite ball player. Hack can make the greatest catches in the world. He can hit the ball as far as Ruth and as often. And he can make the greatest mistakes you ever saw. One day he gets the raspberry and it seems everybody in the stands is against him. The very next day he belts a homer over the fence and they're all his friends.

No matter what he does he remains my ball player. I think he's wonderful.

He's a castoff, you might say — one of those McGraw castoffs. He was with the Giants three years, but in 1928 John Gedder didn't want Hack any longer,

IN THE REALM of SPORT

Major League

A beautiful pitching performance by Dazzy Vance featured Sunday's game of the National League. Vance yielded but eight hits and struck out nine men as the Brooklyn Robins trimmed the Pittsburgh Pirates, 5 to 0.

The Chicago Cubs maintained their two and one-half game leadership of the league by defeating the Phillies, 5 to 1. The Cubs scored the winning runs in the eighth on a walk, hit batter, another walk, force-out, and a single by Lester Bell.

The New York Giants and the St. Louis Cardinals slugged the ball all afternoon to divide a doubleheader. The Giants took the first game 12 to 4 and lost the second 14 to 4. Burrell Grimes held the Giants hitless for six innings in the second game.

Boston's Braves took a tight hold on sixth place by defeating the Cincinnati Reds in both ends of the twin bill, 4 to 3 and 9 to 8. The second game went 13 innings and 37 players, including 11 pitchers, saw service.

In the American League the New York Yankees split a doubleheader with the White Sox. The Yankees won the first game 8 to 7 in 10 innings. The second, which the Sox took, 6 to 1, was halted after five innings by darkness. Babe Ruth hit his 44th home run in the first game.

Cleveland took a doubleheader from Boston, 9 to 3, and 2 to 0. The second game was called at the end of the seventh inning on account of the Boston Sunday baseball law. Detroit overwhelmed Washington 15 to 1 in the second game of their series.

Philadelphia and St. Louis were not scheduled.

Yesterday's Hero

Charlie Ruffing, a pinch hitter, whose single with the bases loaded in the 10th inning, gave the New York Yankees an 8 to 7 win over the Chicago White Sox in the first game of a doubleheader.

Major League Leaders

The following statistics are compiled by the United Press and include games played Aug. 17:

Leading Hitters

PORT ARTHUR, Tex., Aug. 18.—Elton R. Greer, 15, was fatally injured Sunday when the tire on the automobile he was driving blew out, overturning the machine and hurling Greer to the pavement. His skull was fractured. Greer was the son of H. F. Greer of Pear Ridge near here.

PLACE UPON A TIME

Mrs. George W. Norris was principal of a school at McCook, Neb., when she married Senator Norris, who was then a district judge. Mrs. Norris is known as one of the best-read of Washington wives.

FASHIONS

Scarfs Are Mentioned Again In Reports From Deauville

By FRANCES PAGET Copyright, 1930, by Style Sources NEW YORK, Aug. 18.—The following report from Deauville contains much pertinent fashion news.

The weather here has been too warm for many top coats, but when they are seen they evince the same practical simplicity as the cardigan costumes. The classic double-breasted top coat with half belt at back is a favorite, especially in white or bright navy flannel or soft tweedlike woolen, worn over white and often shorter than the costume under it. A few raglan coats are worn in beige or gray wools.

Usually, there is a silk scarf worn within the collar of the coat, simply crossed or knotted once directly at front. Plain colored scarfs of heavy silk are smart worn this way; other types include dotted patterns and banded ones. The rectangular shape is worn by the more fashionable women in preference to the square or triangle.

The costumes described above, completed by shallow cloche, berets, or sailors, and white antelope shoes strapped in brown or black in familiar styles, comprise more than 50 per cent of what is worn by the smarter element at Deauville and give an impression that for resort wear fashionable women are accepting the new silhouettes by inches rather than wholesale and are refusing any elaboration that will impair practicability. This difference of opinion is sufficient to make last spring's clothes appear demode but it is not encouraging for those who wish to see a world refurnished with frills and furberlows at all hours of the day.

When more formal types of clothes are seen here during the daytime, they very definitely give importance to small patterned printed crepes and to bolero one-piece dresses of the Patou type. Sipping an aperitif at the Bar au Soleil at noontime, out of 20 dresses near one's table, five to seven are printed crepes.

Not all of the bolero dresses are in prints; some are in plain flat crepe; and not all are the Patou

type with lingerie collar and cuffs; some have a faint suggestion of bolero at the back. Most of the dresses have narrow belts and if there is not a bolero, or more rarely, a capelet cut, the bodice at least is bloused to soften the line. This type of dress, suitable for town as well as resort wear usually has some part of the skirt cut circular, often quite low.

NEW YORK, Aug. 18.—There is a distinctly tailored mood creeping into the season's fashions, which is an amusing element and a refreshing one considering the prolonged emphasis on things feminine. One expression of it is the seeming delight which some designers are taking in the buttoned closing, sometimes allowing this idea to control the design of the costume, whether it be a coat dress, a jacket or blouse or a blouse or skirt.

Several of the most advanced designers are employing buttons for their practical uses in fastening the blouse or skirt, rather than in the way of decoration. This tendency has brought back the double-breasted feature, a line which is in harmony with the wrapover treatment and the surplice theme, since it gives a distinctly overlapping blouse effect.

The fancy for making blouses in the guise of jackets is one of the style diversions which develops the double-breasted motif. A simple straight sports coat, something on the lines of the old time Norfolk but without its pleats, is posed over a skirt of equally simple line, but usually in contrasting fabric, so that the double-breasted treatment with its contrasting and fairly large buttons is really the feature of the costume.

That this tailored theme has further reach, however, is indicated in its occasional appearance in evening frocks, where the lace bodice of a dinner gown has the crossed cut fastenings with four rhinestone buttons, and adds reverse to give it a more tailored lift. It is again seen in the bolero treatment of evening bodices, even so light a thing as white chiffon having a double-buttoned brief jacket as a bodice feature.

Society

MRS. KEITH HONORED

The teachers of the Junior Department of the Methodist Sunday School with Mrs. A. F. Taylor as hostess honored Mrs. Will Keith Thursday afternoon who is leaving soon for Coffeetown, Kansas, to make her home. The meeting was held at the home of Mrs. Taylor. The meeting opened with the song "Beautiful Words of Life." An interesting devotional was led by Mrs. W. F. Davenport. Mrs. Lola Mitchell closed the devotional with a prayer. Mrs. Hague presided over the hand painted registering book which was presented Mrs. Keith. Several interesting contests were held. Mrs. Hague presented the honoree with a silver thimble and Chinese design teapot as gifts from the teachers and officers of the Junior Department.

Delicious refreshments of peach ice cream and cake were served to the following: Mmes. W. F. Davenport, H. Hague, I. J. Kilbough, E. H. Jones, Lola Mitchell, Mrs. K. G. Galt, C. Brown and her mother I. L. Harper of Fort Worth, Harvey Reese and a visitor Mrs. W. Z. Outward, honoree Mrs. Will Keith and hostess Mrs. A. F. Taylor.

2—MALE HELP WANTED

WASHINGTON LETTER

WASHINGTON.—The long drought throughout important sections of the agricultural United States has afforded President Hoover an opportunity to demonstrate again his ability to handle a large distress emergency as he did in Belgium, Russia and the Mississippi Valley after the flood.

Taking personal charge of the drought situation, President Hoover telegraphed every county agent in the United States for a full report of conditions in his locality. He asked particularly about the immediate facilities for relief from personal hardship and for providing feed at once where needed.

At the same time the Federal Farm Board announced it would extend easy credits of one or two years to cooperatives for use in drought-stricken areas. The board has \$19,000,000 which can be loaned in this way. It is expected that huge quantities of surplus wheat will be used for feed in areas where corn has been destroyed. Probably used in this way—almost half of the visible surplus, some farm board expert said.

Wheat farmers had most of their wheat in before the drought started, so that in addition to suffering no serious losses, they may find that the wheat surplus, which has been the big depressing factor in the market, may disappear before next summer, giving them hope of better prices next year.

A Good Time to Be on Guard!

Personal

Noble Wright of Fort Worth visited friends here Sunday.

Mrs. J. T. Hock of Lorainne and Mrs. E. D. Hazer of Sweetwater visited Mrs. John S. Hart during the week-end.

Mr. and Mrs. Frank Bida and family left today for Galveston where they will spend two weeks. Mr. and Mrs. C. F. Fohl and daughters, Wanda and Wilda returned today from Colorado City where they spent the week-end. Miss Margaret McCormick of Breckenridge is visiting friends here.

Jackson, O'Brine Endurance Record Holders Again

By LELAND L. CHESLEY United Press Staff Correspondent ST. LOUIS, Aug. 18.—Dale Jackson and Forrest O'Brine were the world's champion refueling endurance fliers today, but both were chagrined that \$200,000 hadn't materialized from their effort.

By making a safe landing in the monoplane "The Greater St. Louis" at 6:39:30 a. m. CST yesterday after a flight of 647 hours the fliers were assured of the record laurels. They had surpassed by more than 93 hours the time of the Hunter Brothers flight.

Both blamed a crack in the motor crankcase for their descent. Oil splashed out over the cabin windows and motor and soaked in to the magneto short circuiting it, Jackson said.

William Pickens, their promotion manager, said the fliers would have crashed the plane down yesterday "anyway, even if the motor hadn't cracked because of their feeling over the size of financial rewards. Jackson and O'Brine denied however that the question of money entered into the matter.

The flight brought contracts, either signed or offered, totalling \$39,000 for advertising, movie talks, and state fair appearances.

The orange and yellow monoplane which had been in the air 27 days, started faltering several hours before the landing, the fliers said. Finally at 6:15 a. m. they were forced to message that a landing was imminent.

Before the field management, police protection or members of the ground crew could assemble, the little plane swung low over the far end of the field.

O'Brine who was piloting it, shut the motor off and the wheels of the craft touched the ground for the first time this month.

O'Brine taxied the ship to the flight headquarters hangar.

A crowd of 800, many of whom had spent the night at the field, for just such a surprise landing,

THIS SMART ensemble consists of a beige lapin three-quarter coat and beige and brown printed silk dress. The scarf, drawn through slits in the coat and accented by dark brown squares, is interesting.

Personal

The two embraced their wives. Neither appeared tired from the long flight, and their deafness wore off in a few minutes. After speaking for a talking newsreel they were driven to a downtown hotel where a suite of rooms had been reserved for them.

"We had a nice time," O'Brine said in commenting on the flight. "Our greatest kick was when we passed the Hunter boys mark. It sure seems funny to be walking on the ground again."

Doctors examined them and said they had not lost weight and appeared in splendid physical trim.

The official time of the flight was announced as 647 hours, 28 minutes and 30 seconds. It was estimated the plane had flown 42,000 miles, and the propeller revolved 52,000,000 times. More than 6,500 gallons of gasoline were consumed, and 147 refueling contacts made by the plane "Patsy Ann."

WANT ADS BRING RESULTS

SAN QUENTIN, Prison, Cal., August 18.—One San Quentin prisoner was poisoned and two are believed to be dying as the result of a wood alcohol drinking party staged in the prison print shop Sunday night, it was learned today. The dead man is Charles Brown, 30, San Francisco, editor of the Bulletin, the prison's monthly magazine.

The other two, Joseph Mackin, 29, Los Angeles, and George Casell, 28, also of Los Angeles, are blind and prison physicians have slight hope of saving their lives.

WASHINGTON, Aug. 18.—Captain Ira E. Eaker, army air pilot who piloted the Question Mark on its pioneer refueling endurance flight, was forced to jump from a plane he was testing today at Bolling Field, and received slight injuries.

Lightnin' Bill Jones

REMEMBER the line in the lovable play, Lightnin', when Bill Jones received his pension-check from the Government? "See all them names on there—Secretary of the Treasury, Secretary of War, and so on? This check ain't any good unless I sign it!" said Bill with an air of importance.

And he was right. Without his little endorsement, the check was a mere scrap of paper.

The little things of life, as you have often heard, are tremendously important. The small advertisements in this paper have messages for you that are just as important as the messages in the larger advertisements. Read the small advertisements as well as the larger ones.

Not only the so-called "want" ads, but the little "display" ads. Read them. Let them guide you to real merchandise values, real savings. Don't overlook them because they are small. Without the tiny detonator, or fuse the big guns that shoot a distance of miles become merely tons of useless steel.

BE SURE TO READ THE SMALL ADS AS WELL AS THE LARGER ONES. THEY HAVE SOMETHING IMPORTANT TO TELL YOU OF WHICH THEIR SIZE IS NO INDICATION
