EASTLAND, TEXAS, MONDAY, JULY 14, 1930

PRICE FIVE CENTS

NO. 218

EASTLAND COUNTY—Area 925 square miles; population 34,000; fruits, dairying, natural gas, oil, cotton, peanuts, truck farming, stockraising, poultry.

WITNESS IS KILLED AS HE STEPS FROM STAND

Dallas Bandits Escape With \$1,500 In Holdup

Gas Station Employees Locked In Washrooms

One of Whom Was Snatched Briefly and Flew, Leaving No Trace as to Their Identity.

Two men, one of them masked, drove a Gulf Refining company's station here at noon today. A brief case containing approximately \$1,500, locked two men in the washroom and without leaving any clue to their identity. The bandits disappeared in a small coupe. The fillation employees, T. J. Robertson, broke the door of the washroom and escaped soon after the bandits had left.

Death Held In

Death Of Three

Three persons were killed today in a collision between a car and a bus near the intersection of 10th and Main streets.

Five Killed In

Plane Crashes

A biplane crashed today near the town of Elmhurst, killing five persons on board.

Police Trained

Noted Bandit

A group of police officers were trained today in the tactics of dealing with a notorious bandit.

John Is Hailed

As Hero At Home

John Jones was hailed today as a hero for his bravery in saving a child from a burning building.

Two-Headed Chicken

PLASANT HILL, Ore.—In this case two heads were not better than one. A chicken with two distinct heads was recently born at Seller's farm. It lived only a short time.

Gun Club Has Splendid Shoot

Mrs. James Horton, Curtis Kimbrell, H. W. Oldham, Charles Thompson and Russell Perine were winners in Sunday's Eastland Gun Club shoot. Mrs. Horton and Kimbrell tied for first place in the trap shooting, making a score of 25. H. W. Oldham and Russell Perine, each shot a score of 81, in pistol shooting. Charles Thompson made a score of 42 in rifle, leading in that department. Following are the scores:

- Trap—J. Fehl, 19; J. O'Rourke, 12; Mrs. Horton, 25; Jim Horton, 24; J. Amys, 23; Jack Gillespie, 9; C. Cook, 20; C. Kimbrell, 25; L. C. Hall, 12; J. W. Harris, 17; Roy Allen, 7; Lee Calley, 23; Tom Todd, 23; D. Steele, 23; Russell Perine, 20; W. J. Peters, 14.
- Pistol—Charles Thompson, 73; H. W. Oldham, 81; Tom Harris, 70; Alex Clark, 38; Russell Perine, 42; Dr. C. H. Carter, 40; Graham, 45; R. L. Allen, 37; Jack Gillespie, 27; Tom Harris, 37; Tom E. Todd, 39; Ben Matthews, 36; Jack O'Rourke, 39; J. O. Mathena, 36; H. W. Oldham, 45; C. Kimbrell, 43; S. W. Whitley, 37; J. D. Smith, 22; Charles Thompson, 42; H. R. Wheeler, 37; Veon Howard, 31.
- Rifle—Wilson Hart, 36; W. C. Hammon, 37; Jim Amys, 38; Bill Hart, 34; Paul McFarlane, 81; W. J. Peters, 38; J. W. Harris, 40; Alex Clark, 38; Russell Perine, 42; Dr. C. H. Carter, 40; Graham, 45; R. L. Allen, 37; Jack Gillespie, 27; Tom Harris, 37; Tom E. Todd, 39; Ben Matthews, 36; Jack O'Rourke, 39; J. O. Mathena, 36; H. W. Oldham, 45; C. Kimbrell, 43; S. W. Whitley, 37; J. D. Smith, 22; Charles Thompson, 42; H. R. Wheeler, 37; Veon Howard, 31.

Candidate's Death Remains A Mystery

The strange death of Earl R. Swanger, candidate for district attorney who was found dead in his ditched car near the Harmon Creek bridge last Tuesday, assumed a new importance today with the announcement by Gov. Dan Moody that a second state ranger was being sent to assist Ranger Homer T. Glover in clearing up the case. One theory offered in explanation of Swanger's death holds that the stab wounds found in the body were caused by nails in the timber of the bridge. Meanwhile Dr. J. R. Martin, county health officer, expressed the opinion that the wounds were caused by a knife. Friends regarding the report of a coroner's jury that Swanger met death accidentally when his car left the road, County Attorney R. T. Burns continues work on his theory of murder with robbery as a motive. The ring that Swanger was known to have worn and \$50 in currency were not found on his body.

Bobbitt To Speak In Eastland Soon

DALLAS, Tex., July 14—Attorney General Robert Lee Bobbitt will continue his campaign in West Texas, beginning Monday night with an address at Sweetwater, Abilene, San Angelo, Brownwood, Eastland and Mineral Wells. Day crowds will hear Bobbitt in some sixteen cities between Sweetwater and Mineral Wells.

Police Trained Noted Bandit

CHICAGO, July 14—Fred Burke, notorious killer and elusive bank bandit, after casually eluding posses in the woods of Northern Michigan, was being hunted in two states again today by squads of police machine gunners.

John Is Hailed As Hero At Home

ATLANTA, July 14—Robert Tyre "Bobby" Jones came home today, three hours behind his scheduled time, to receive the plaudits of thousands who turned out in holiday mood to welcome him. Jones was delayed by a burning bridge, the Southern Railway's crack "Ponce De Leon" was held for an hour and twenty minutes at Chattanooga to make the related connection.

Two-Headed Chicken

PLASANT HILL, Ore.—In this case two heads were not better than one. A chicken with two distinct heads was recently born at Seller's farm. It lived only a short time.

3 Generations In This Picture

You'd never guess there were three generations in this picture, would you? Just to prove that appearances are deceiving, Mrs. Freda Leslie posed with her little daughter—beg pardon, daughter-in-law, Mrs. Anne Leslie—and the latter's baby. Mrs. Anne Leslie, a former vaudeville performer, is only 42 inches tall. Her husband is normal size as is the baby.

Five Killed In Plane Crashes

RUPLEY, Miss., July 14—Members of a family reunion were in mourning here today for two of their number who died in an airplane crash Sunday.

Sen. Robinson Defends London Naval Treaty

WASHINGTON, July 14—Senator Robinson, Dem., Arkansas, today defended the London naval treaty in a speech on the senate floor, and urged ratification of the pact.

Police Trained Noted Bandit

PLASANT HILL, Ore.—In this case two heads were not better than one. A chicken with two distinct heads was recently born at Seller's farm. It lived only a short time.

Rangers Are Sent To Shamrock To Protect Negroes

SHAMROCK, Tex., July 14—Sheriff W. K. McElmore today said that threatened mob depredations against negroes here had subsided and law forces had the situation well in hand. Recurrent disorders since Friday when Jesse Lee, negro farm hand, was alleged to have assaulted Mrs. Henry Vaughan and beaten her to death with a gas pipe had driven most of the negroes from the city.

Four state rangers augmented law forces here today. Governor Dan Moody ordered them to Shamrock after mobsters marched on the negro quarters Sunday morning. A determined stand by the sheriff and a force of recruits broke the mob spirit and they retreated.

It anticipates no further difficulty over the fatal attack today. "The whole matter hinges on the disposal of Lee. A judge will come here from New Mexico tomorrow to arrange details for the trial, and this action should remove threats of further disorders."

Heat Sufferers Given Relief

CHICAGO, July 14—Rainstorms and cooling breezes brought relief to the midwest today after one of the worst heat waves of the century.

While the torrid wave that already had lasted a week continued Sunday in extreme southern state, temperatures in central and north central states showed decided drops and predictions today were the weather would remain about normal.

In Chicago, a drop of 36 degrees in 24 hours caused residents to complain that it was chilly and to get out their topcoats.

Sen. Robinson Defends London Naval Treaty

WASHINGTON, July 14—Senator Robinson, Dem., Arkansas, today defended the London naval treaty in a speech on the senate floor, and urged ratification of the pact.

John MacDonal To California

BALTIMORE, July 14—John MacDonal, key-witness in the Mooney-Billings case, was released here today so that he may return to California to repudiate testimony which sent the two California labor leaders to jail in connection with the 1916 San Francisco bombing. He had been held since Friday night by police.

New Rail Line Is To Be Built

SAN ANGELO, Tex., July 14—Construction work on the new Gulf and West Texas rail line, which will connect San Angelo and San Antonio, will begin during the latter part of August or early in September, J. W. Fox, general manager, has announced. Directors of the new railway will meet in about ten days to consider further construction plans, Fox stated.

Man Near Death

GALVESTON, Tex., July 14—E. H. Knappe, 26, of Houston, was near death at a hospital here today from fractured skull, received while riding a beach roller coaster. He was still unconscious and little hope was held for his recovery.

Grows Large Cucumbers

E. J. Myers, residing in the States Oil Corporation addition, brought to the Telegram office this morning a cucumber that was 15 inches long, 13 inches in diameter and weighed four and three-eighths pounds. He grew it in his garden.

"—Because He Knew Too Much"

It doesn't pay to "know too much" in Chicago—if your knowledge involves racketeers. Here you see what happened to James D. Phillips, newspaper vendor, who, police say, knew too much about the dope racket. He was shot down in front of his newsstand with three bullets in his back.

Minister Shot By A Prowler

DALLAS, Tex., July 14—Detectives assigned to investigate the fatal shooting of Charles S. Maxson, Baptist minister and salesman for the Hoover company, early Sunday morning by a house prowler, reported today they had discovered several clues which might lead to identification of the killer.

The gun used in the slaying was a .38 caliber pistol, detectives reported. This was ascertained at the hospital when the bullet was removed from Maxson's body.

Another clue was supplied by Mrs. Maxson, wife of the slain man, who was awakened by a prowler in his room and when the man was ordered to leave he replied with one shot which penetrated Maxson's abdomen. He died in a hospital about an hour later as the result of internal hemorrhage.

Maxson's body was taken to Marshall, Texas, Sunday afternoon for burial. He had held pastorate in two rural Baptist churches near Marshall and was a student at the Baptist College at Marshall, where he would have graduated next year. During the past six months Maxson had been working for the Hoover Company here.

John MacDonal To California

BALTIMORE, July 14—John MacDonal, key-witness in the Mooney-Billings case, was released here today so that he may return to California to repudiate testimony which sent the two California labor leaders to jail in connection with the 1916 San Francisco bombing. He had been held since Friday night by police.

Emmett Garner Dies At Marlin

James Emmett Garner, 55, of Eastland died Sunday afternoon at Marlin where he had been for some weeks for treatment. Funeral services will be conducted from the Baptist church here Tuesday afternoon at 6:00 o'clock, followed by interment in the Eastland cemetery.

Mr. Garner was a native of Georgia and had lived in Eastland county more than 30 years.

Surviving him are his widow, Mrs. Mary A. Garner; and the following children: Mrs. A. W. Smith, San Angelo; Mrs. Alma Gentry, Eastland; Mrs. H. L. Gentry, San Angelo; and James Garner, Eastland.

Fallbearers will be Emmett Gilbert, Carbon; B. M. White, Eastland; H. L. Kuykendall, Eastland; C. L. Garrett, Eastland; J. R. Thomas, Eastland; and G. L. Daventport, Eastland.

Woman And Two Men Are Killed

STRONG CITY, Kas., July 14—The dilemma of a woman who could not choose between a former and her present husband, had been solved today by a triple slaying.

Alfred Drummond shot and killed his wife, and then turned a bullet into his own breast that resulted in his death last night in an Emporia hospital.

Upon learning of the murder and suicide, Noble S. Sellers, the woman's first husband, shot and killed himself. His body was found in his railroad bunk car where he lived.

Mrs. Drummond divorced Sellers several years ago to marry Drummond. A week ago she left her home, saying she was going to Joplin, Mo., to visit relatives. Saturday night Drummond heard she had returned and that she was here at a dance with Sellers.

When she returned to her home Sunday afternoon to back her husband, Drummond shot her and then fatally wounded himself. When word of the tragedy reached Sellers, he excused himself, entered the bunk car and committed suicide.

Rotarians Hear Meeting Report

The Eastland Rotary club today listened to a splendid report of the recent International Rotary convention in Chicago read to them by President Homer Brelsford. The report, prepared by President Brelsford, gave in detail the work of the 25th annual convention.

Visitors at today's meeting of the club included Ben Looney, Morris Bendix, Ben Whitehouse, of Ranger; L. B. Wrightman of Cisco, and G. L. Shepard of Wichita Falls.

The fact that Rotarians might have an opportunity to assist some Boy Scout to attend the annual summer camp this season was brought before the meeting. This can only be done by loaning them money as they are not allowed to accept donations.

Is Eastland Visitor

Gus R. Moore, a member of the mechanical department of the Jacksonville, Texas, Daily Progress, with his wife are visiting Mr. and Mrs. H. O. Satterwhite here. Mrs. Moore is Mrs. Satterwhite's aunt.

G. L. Shepard, wife and daughter of Wichita Falls are visiting Mr. and Mrs. H. Brelsford Jr. Mrs. Brelsford and Mrs. Shepard are sisters.

Slaying Takes Place In Court

Motley Flint Is Shot and Killed by Frank D. Keaton, a Spectator and Real Estate Broker.

LOS ANGELES, July 14—Motley Flint, prominent banker and brother of the late United States Senator Frank Flint, was shot to death in the city hall here today.

The slaying took place in the courtroom of superior Judge Frank Collier just after the banker had testified in a pending case.

Police arrested Frank D. Keaton, real estate broker, and charged him with the murder.

Flint was stepping from the witness stand when Keaton, in the second spectators' row, stood up, pointing a gun, and shot Flint through the throat.

Flint died instantly. Officers rushed to the courtroom and took Keaton into custody. Keaton offered no explanation nor any protest when he was arrested.

Although at first he refused to reveal any motive for the shooting, Keaton later told police that he had bought some bank stock from Flint several years ago and had suddenly decided to shoot him.

He said he wasn't certain just why he had done the shooting. Flint was known as one of the most influential banking figures in southern California, he recently was tried but acquitted on charges of having accepted usurious interests from the Julian Petroleum Corporation.

Who Will Be In Run Off—Is Question Asked

By GORDEN K. SHEARER
AUSTIN, Tex., July 14—With the democratic primary election less than two weeks off, it is still impossible to forecast definitely which two candidates for governor of Texas will go into the run-off election to be held on Aug. 23.

Visitors at today's meeting of the club included Ben Looney, Morris Bendix, Ben Whitehouse, of Ranger; L. B. Wrightman of Cisco, and G. L. Shepard of Wichita Falls.

The fact that Rotarians might have an opportunity to assist some Boy Scout to attend the annual summer camp this season was brought before the meeting. This can only be done by loaning them money as they are not allowed to accept donations.

Who Will Be In—

(Continued from Page 1)

stern voiced for him represents actual votes and how much merely the negative part of the situation. If Washington's situation is accurately gauged by Judge Low, (a veteran in politics) and is representative of other counties, the Sterling boom will be deflated.

His chance of being in the runoff rests on the almost united support of those favoring a statewide road bond issue, while its opposition scatters among the numerous other candidates who are against the bonds. Tom Love has also declared for the bonds, but the chief issue raised by his campaign is the "right of conscience" and his vote will depend principally on the public verdict on his failure to support Alfred E. Smith.

Although Sterling's expense accounts have been less than several other candidates, a spirited attack is being made upon his candidacy on the ground of expense. His former ownership of Humble Oil stock and its reported acquisition by the Standard Oil Company is also being used against him.

For some unexplained reason the race that former congressman Young and Senator Clint C. Small will run seems intermingled. If Young gets the vote that national democratic committee man Jed C. Adams and the other party regularity leaders predict for him, it does not seem likely that Small will get a big vote. Young, like Earle Mayfield, is harping on alleged big campaign expenditures in behalf of Sterling.

One argument, however, that has been put forth showing Young a strong candidate has been that he had the financial backing of Hogg Brothers. Mayfield was accused by Mrs. Minnie Fisher Cunningham in his recent race for the United States Senate, of being the pet of the power interests. None of them probably has been cramped to get all the funds they legally can expend.

Small's chance of success apparently depends on how much he can counteract the very thing that first made him a serious entrant in the race—his West Texas support. This was harped upon so strongly by his supporters in the early stages when the game was to freeze out other candidates, that now he has to demonstrate that he is not a sectional candidate but one who can harmonize all Texas. Tom Love apparently has hit Small's campaign in sections that vied heavily for President Hoover. There Love reminded the voters that Small voted for the Wirtz bill which would have disqualified them as voters in this primary.

So far in the campaign, however, it has not become apparent that those Democrats who voted for President Hoover have lined up solidly for Tom Love. If he gets into the runoff, it will be rather in spite of his refusal to support Smith than because of it. The low independent vote, is generally being counted for Sterling instead of Love.

Newspaper support in the campaign is considerably scattered. Jim Ferguson claims he has always won without the support of the big dailies so is not worrying about them. Numerous Marsh-Fentress papers, after the failure of Governor Dan Moody to run for a third term, are supporting Sterling. Sterling also has the support of his own Post Dispatch and the Houston Chronicle. The Amarillo News and Globe are supporting Senator Small as are the Pampa News, Borger Herald, Lubbock Journal and Avalanche, El Paso Herald Times and many other West Texas papers.

OUT OUR WAY... SAY, IN THERE! HAAY!! DO YOU THINK I PAID 500 BUCKS FOR A ROCK GARDEN AND POOL, TO HAVE IT ALWAYS LOOKIN LIKE A BACK WOODS WASH TUB, BEHIND A CURTAIN OF SCANTIES AND FRILLY FRAILTIES? HEY, IN THERE! OH-I TOLD YOU TO GET THEM DOWN BEFORE HE CAME HOME. WELL, WHY DOES HE HAVE TO BELLOW, SO EVERYBODY FOR BLOKS AROUND KNOWS EVERYTHING WE DO. WHY MOTHERS GET GRAY. J.R. WILLIAMS 1930 BY NEA SERVICE INC.

In Fort Worth The Press, one of the powerful Scripps-Howard papers of the state, has endorsed no candidate. The Fort Worth Star-Telegram, like the Houston Press, has been assailing a state bond issue and is generally popular with Small supporters. The Dallas News is also a neutral but its editorials have not been harmful to Sterling. The San Antonio Express also seem to look favorably upon Sterling.

Markets

Closing Markets at a Glance... Stocks reach best levels of recovery in final hour; gains range up to 10 points. Bonds advance under lead of high grade issues. Curb stocks work higher; utilities in demand. Chicago stocks quiet and steady. Call money 2 cent; renewed at 1 1/2 per cent. Foreign exchange irregular; sterling steady. News Briefs

Resume of the Day's News in The State, National and Foreign Fields. STATE BRIEFS... BEAUMONT, Tex., July 14.—Joe Yount, 27, nephew of Frank Yount, Beaumont oil millionaire, was recovering at a hospital today from the effects of gas fumes which overcame him while he was standing near a well at Spindletop field, six miles south of here, yesterday. NATIONAL... LOS ANGELES, July 14.—A search among the perilous recesses of Mt. Whitney for Howard

Personal

Mr. and Mrs. K. A. Crowley of Fort Worth visited friends in Eastland, Sunday. Mr. and Mrs. R. J. Cox, Jr., Mr. and Mrs. P. B. Bittle, and Mrs. Dell Cox, spent Sunday in Fort Worth. Mr. and Mrs. W. W. Phillips left today for a trip to Missouri and the Ozark Mountains. Mr. and Mrs. Aery Bendy returned Saturday from a trip to the Ozark Mountains. Miss Josephine Martin left Sunday for Shreveport, La., where she will attend a house party. Mr. and Mrs. H. A. McCannies and family have returned from a trip to Corpus Christi. Jack Laney is visiting in Eastland. Mrs. A. F. Taylor presents her daughter, Loraine, in piano recital, Tuesday, July 15 at 8:30 p. m., Methodist church. The public is cordially invited to attend. Mrs. A. H. Alcorn of Midland is visiting friends in Eastland this week.

OIL NEWS

DALLAS, Tex., July 14.—Charges that "insidious propaganda" has been disseminated that the oil resources of the country in imminent danger of exhaustion were voiced by Tom E. Cranfill, president of the Independent Petroleum Association here today. He said the association was prepared to show that oil reserves of the United States were practically inexhaustible, and that shell beds alone will supply the country for countless years. Hope that the next congress will place a tariff on crude and refined oil was voiced. In this manner the resources of this country could be developed and expansion of foreign resources to the detriment of the domestic market asserted, he declared. AUSTIN, Tex., July 14.—For the third consecutive month production of crude petroleum in Texas showed a substantial increase during June, according to Bernard Nichols, editor of the Texas Business Review. Daily flow in June reached the highest level since last October, thereby eliminating all progress made in eight months by the curtailment program, the report said. Production increased from 867,000 barrels in May to 878,000 barrels in June.

YACHT PARTY STILL MISSING

BOSTON, Mass., July 14.—An exhausted youth, his voice reflecting the terror of his experience, told his father today at Boston fish pier of the drowning of six of his companions aboard a 55-foot pleasure yawl and his own rescue from a similar fate. Baden Garceau, son of a Boston lawyer, was saved by the crew of the mackerel boat St. Rita today as he clung to the keel of a capsized yawl. The St. Rita brought him and the body of a young woman to the fish pier. The party had advanced five miles off Scituate and turned back when, three miles from shore, a sudden squall arose and capsized the craft. All managed to climb onto the overturned craft and cling, shivering, to the keel for a time. But a cold wind bit into their fingers and one by one they slipped from their precarious position. At dawn only Garceau remained, his fingers raw, his spirit low, and his hope of rescue almost gone. Then the mackerel-catcher returned from the Georges banks, hove in sight and Garceau raised himself as high as he could, rapping off his shirt and waving it frantically as a distress signal. The St. Rita, in command of Captain Frank Favalaro, and manned by 12 fishermen, drew alongside the capsized yawl. Garceau was transferred and given first aid.

News Briefs

Resume of the Day's News in The State, National and Foreign Fields. STATE BRIEFS... BEAUMONT, Tex., July 14.—Joe Yount, 27, nephew of Frank Yount, Beaumont oil millionaire, was recovering at a hospital today from the effects of gas fumes which overcame him while he was standing near a well at Spindletop field, six miles south of here, yesterday. NATIONAL... LOS ANGELES, July 14.—A search among the perilous recesses of Mt. Whitney for Howard

but, aside from the body of the girl, found a half-mile from the wreckage, the hunt was luckless. BOSTON, July 14.—A young man was rescued and the body of a missing woman recovered from the sea today by the mackerel-catcher St. Rita which docked at Boston fish pier later. The two were said to be members of a party of seven which had left Scituate Yacht Club last yesterday aboard a 55-foot yawl. According to the St. Rita's crew all others on the craft apparently had been drowned. SCITUATE, Mass., July 14.—Seven young people who sailed from the Scituate Yacht Club Sunday in a 15-foot yawl had been missing for more than 17 hours today. Coast guard craft from the North Scituate and other south shore station searched for the missing party, as did a commercial airplane from Boston airport. Included among the missing was Charles Hall, 23, of First Ct. Scituate, owner and skipper of the yawl. The others included five boys and a girl, whose names were not immediately available. In the airplane that was flying over the waters where the seven were believed lost was John Hall, brother of Charles.

Local Golfers Defeat Thurber

Eastland golfers Sunday defeated the Thurber players 11 matches to 5 on the Thurber links. Eastland has now won five games and lost five in the Oil Belt Golf association, placing their standing at .065. In Sunday's game the scores were as follows: Sam Connor defeated E. R. Sykes, 1 up. Fred Blatt defeated M. S. Badgers, 4 and 2. Ted Ferguson defeated J. C. Marshall, 1 up. Blair Lewis lost to Chas. Watson, 5 and 4. J. M. Armstrong defeated Sam Ready, 3 and 1. James Cheatham Jr. lost to F. M. Couch, 5 and 4. Scott Key Jr. lost to Jas. Schmeber, 2 and 1. Ray Morris defeated J. W. Bebold, 3 and 2. W. L. Gupton defeated W. J. Delmas, 5 and 4. C. A. Cheatham defeated Ed Greves, 1 up. W. T. Root lost to Geo. Paulowski, 7 and 6. W. I. Clark defeated Jim Moore, 2 up.

Republicans Are Warned Not To Pick Morrow For Pres.

WASHINGTON, July 14.—The Methodist Board of Temperance Prohibition and Public Morals was on record today with a warning to the Republican Party that nomination of Dwight W. Morrow for the presidency in 1932 would be a "tragic mistake" and result in overwhelming defeat. Ambassador Morrow, after declaring for repeal of the 18th amendment, recently won a one-sided victory in the three-cornered

race for the Republican senatorial nomination in New Jersey. Referring to this, the board asserted in its weekly clip sheet: "There is more than a little reason to suspect that half of those constituting his majority were, in fact, voting for Lindy and the other half for Anne. For Mr. Morrow personally, much may be said. But if the Republican party ever advances him to national leadership it will pay the price of defeat. Mr. Morrow failed to realize that it is better to be right than to be Senator."

Merridith Wins Play Off With D. A. Harkrider

Saturday afternoon Geo. Merridith of Eastland and D. A. Harkrider of Ranter played off their low medal tie on the local course, Merridith winning by shooting par golf with a score of 36-36-72. Harkrider got off to a bad start on the first two holes and was never able to get closer to his opponent than one stroke throughout the match and finished five strokes behind. An expensive caddy bag was the prize won by Merridith.

Sponsors Fair

The directors of the Board of City Development, in a recent meeting, voted to sponsor and back the Eastland county fair, the dates for which are September 25, 26 and 27. Due to the fact that Russell B. Jones, recently appointed general chairman for the fair, is unable to serve, a committee composed of J. E. Lewis and Dr. H. B. Tanner, was named to select another general chairman. HASKELL, Tex., July 14.—When Cecil Leflar, 17, son of J. E. Leflar jumped from a tree into a river near here Sunday, he hit a rock and broke his neck. He never regained consciousness, dying in a

DANCING JUDITH

By CORALIE STANTON and HEATH HOSKEN

BEGIN HERE TODAY
Judith Grant, artist's model, loves Alan Steyne, painter, who is also loved by Chummy Morley, Judith's roommate and best friend. Chummy had loved Steyne years ago, and had suffered a loss of memory when he went away; so although Steyne loved Judith, Judith insists that it is his duty to marry Chummy, whose memory is restored when she sees him again. Steyne and Chummy, therefore, are engaged. Judith is studying dancing and rich Bruce Gideon wants to see her in a musical show, although Steyne warns her that Gideon's intentions are not honorable. Steyne and Judith meet by chance in the girls' apartment, and Chummy, unobserved, sees them in each other's arms; so Chummy, on the town in a new redingote, tells Steyne that she cannot marry him as she wants to follow her career as a painter. Judith gets a letter from one Richard Wyon, who asks her to call at his office and discuss her dancing with him. She goes, as Wyon, whom she had met in a restaurant, tells Steyne that he cannot marry him as she wants to follow her career as a painter. Judith gets a letter from one Richard Wyon, who asks her to call at his office and discuss her dancing with him. She goes, as Wyon, whom she had met in a restaurant, tells Steyne that he cannot marry him as she wants to follow her career as a painter. She goes, as Wyon, whom she had met in a restaurant, tells Steyne that he cannot marry him as she wants to follow her career as a painter.

WORLD PRODUCES MORE SILVER THAN IN DAYS OF OLD CAPTAIN KIDD

The world production of silver for the entire period from 1493 to 1927, inclusive, has been over 14,000,000,000 ounces, or about 14 times the weight of gold produced in the same period, according to a survey of the subject. This amount of silver would make a cube measuring 11 1/2 feet on an edge; or it would pave Broadway, New York, six inches deep, from the Battery to Central Park, a distance of over four miles. The rate of world silver production has increased steadily since 1493, the decade in which it began, by 8, by Charles Whitly Merrill and the staff of the common metals division of the Bureau of Mines. During the 108-year period 1493 to 1900 the production was 747,000,000 ounces, less than that of the century 1901 to 1909, 1,272,000,000 ounces were produced, or less than the production from 1910 to 1919, 1,833,000,000 ounces, or less than the figure for 1920 to 1927, 2,400,000,000 ounces. The total world production from 1493 to 1900, a period of 308 years, was 3,852,000,000 ounces, or less than the production from 1909 to 1927, a period of 19 years. Since 1888 more silver has been produced in the world than in the period 1493 to 1887; in other words, the production of 396 years has been exceeded by the production of the last 39 years. In spite of the greater relative increase in the production of gold than that of silver the price of silver has declined. This decline in the price of silver has been the result of a lessening demand rather than an abnormally increasing supply. The lessening demand has been due very largely to demonetizing of silver during the latter part of the 19th century by the principal nations of the world. Demonetization became possible through the enormous increase in gold production that followed invention of the cyanide process in 1847 and development of the gold fields of South Africa, yet a decline in the price of silver still retained the silver-gold standard. Most oriental silver as a medium of exchange almost to the exclusion of gold. Silver may thus be regarded as a second line of defense for the gold standard. The foundation of monetary systems, but the future of this production will be influenced largely by the course of gold production. It is of interest to note that, although the value of gold to silver now stands at a ratio of about 50 to 1, the ratio of production of silver to gold in the whole period since the discovery of America has been about 14 to 1. New World Riches. Columbus sailed from Spain on his great voyage of discovery, the principal silver producers of the world were Germany, Austria-Hungary, Japan, and Sweden. Discoveries of minerals in Bolivia, Peru, and Mexico followed. The expansion of the 16th century quickly forced the producers of the Old World into new friends among the people she was now associated with. Mr. Wyon was very kind, but old. He was just a business man. He believed in her because Guarvenius had believed in her. She had only seen him three times in all. Her manager, Gaston North, was a very silent individual. He was very ugly, red-haired and freckled, with a gringer mustache and horrid teeth. She thought he must go to bed with his pipe in his mouth. He was wonderful at his job, however. He knew everything about scene painting and almost everything about scenery. The conductor of the orchestra was a young Hungarian, blind in one eye. He made his men play the most heavenly music. "Not that it really any better than yours, Bastien," she added generously. "I did enjoy dancing to your fiddle that night at Mr. Steyne's." This brought Bastien back to personal matters. While he watched her animated face, all the old misery throbbed in his heart and hammered in his brain. "Judith, is everybody mad?" he asked. "Of course you know that Chummy didn't marry Steyne?" "Of course I do." "What did you make of it? Where is he now?" "He went to Paris—so Chummy told me. She is at the seacoast." "Yes, I knew that." "Darling Chummy, she's written to me and I've never answered her. What a pig I am! I must write to-night." "What do you make of it, Judith?" "Oh, Bastien, I don't know. Chummy always tells the truth—you know that. She said she found out that she liked her work better than she did Mr. Steyne." "Well, I don't believe it, Judith. There must have been something else." (To Be Continued)

Obbliging Wife SALEM, Ore.—When the judge asked Lucas G. Vogt to pay up back alimony to his first wife, wife number two assumed the obligation. She also said she would help him keep up future payments.

WASHINGTON LETTER

BY RODNEY DUTCHER
NEA Service Writer
WASHINGTON — The administration's friends and its enemies have tried to outblat each other in the argument at the close of the Hoover administration to have been a success to date or whether it proved it a failure. Obviously each side has to beat the drum frantically on such occasions because if one did not the other would get all the attention for the end of the argument. In October, 1927, the months ahead rather than the 16 months behind will determine just what the future's conception will be of the Hoover administration; they will tell themselves the president can pull himself out of the mud or whether he is to become even more badly bogged in one morass and another. It's Up to the Voters Any way, it is not for newspaper correspondents or for pro-Hoover and anti-Hoover partisans to decide whether this is a successful administration. The only thing in the nature of a verdict on the Hoover administration is the election in November and a presidential election in 1932. In two years Mr. Hoover will know whether he is going to be his party's candidate to succeed himself; he may know, one way or the other, long before that. There isn't any good whatever in bragging about the acts of Congress or complaining about its omissions until you know how those things react on the country. And when the voters decide whether they are sore or satisfied with the Republicans' most of them are likely to be utterly free from any thought about whether or not Hoover got what he wanted from Congress. The business recovers and farm prices rise appreciably everyone will be happy except Democrats. Hoover will suddenly become the man who pulled the country through its hour of trial and tribulation. If no such developments come along before Congress meets again there will be a general disposition to consider the administration a failure and it will be extremely difficult for the administration to get back on solid ground. The White House must worry not only about the voters, but about the hard-headed Republican politicians who are distinctly looking askance at Hoover. It is just possible that the cry boys so often heard in the streets, who believe in Hoover, are synonymous with the depression as to many others who ought to know better. But at any rate the powerful Republican leaders here and out in the states are Republicans long before they are Hoover men and would indubitably rather win with Hoover than lose with him. Since Taft's 1912 nomination there has been a theory that any president can renominate himself, and the big business interests behind him and if that faction opposes Hoover he is simply going to be out of luck. So far as what Congress did is concerned, only tariff and farm relief will cut any figure. Prohibition doesn't count as a party issue this year. Individual members campaigning for re-election will boast about what they did for veterans, inland waterways and federal highway legislation. "Mr. Wyon—the gentleman who owns the theater." "Oh, that crank!" cried Dumont, in evident relief. "Why do you call Mr. Wyon a crank?" she asked. "Oh, everybody knows he is! Always up to some extraordinary game!" "Thank you, Bastien!" "Judy, don't be cross! I know you're going to make a terrible hit. Nobody knows it better than I do. I say, you never come to the cafe now." "I never have time." "Come along now." "I'll come and Dumont had had his dinner, and watched her drinking Chianti diluted with mineral water and lemon juice. It was suffocatingly hot in the restaurant. When Judy began to talk, she told him everything with perfect frankness. He was still her best friend, the one person on whom she could always rely. She had made no

call myself rich, exactly; but you can trust me to carry out what I propose. "I suppose I'm rude," Judy said; "but this is a surprise. I don't know you from Adam. Why should you want to do this for me?" "I have told you, my dear young lady," he said. "The conditions will be exactly the same. When you are well launched in your career, we will adjust our business relations. I shall be amply repaid. There is plenty of room for a dancer of genius. I will engage as your manager a man of the highest reputation — Gaston North. You can trust me to advertise adequately for such art as yours, and we shall have a good orchestra. When I do a thing, I believe in doing it well." "I don't know what to say," Judy said. "Think it over, Miss Grant. Take a few days. When had poor Guarvenius planned your debut?" "In October." "Well, we could manage it by then. You could start rehearsing at once. The theater is empty, as it happens. I will get the electricians and the scene painters at work at once. But take your time to think it over, Miss Grant." "It's not time I want," she said, with a laugh that sounded a little wild, for the delirium of ambition was creeping into her blood again. "I suppose we should have a contract. I should probably have to sign something." "Not at all necessary, Miss Grant. I am not afraid that you'll cheat me. When you are well established, you will give me back the money I have spent. That's all I want." "She thinks I might fail." "Then I'll bear the loss, just as Guarvenius would have done." "You must have thought a lot of him," she said with a deep sigh. Mr. Wyon repeated what he had said before. "I have the most complete faith in his judgment. Then you accept?" "Yes, rather! And I'm greatly obliged to you, Mr. Wyon. But for this I'd have had to take whatever I could get." "It would have been a shame," he said emphatically. "I'm very glad you have consented to my proposal. You must meet Gaston North at once, and arrange with him about the music, and your costumes, and all that you need. We must have the most expert advice. Perhaps you will give the pleasure of luncheon with me tomorrow—at the theater. I have a little room there, and we can have some food sent in from a restaurant near by. I shall expect you, then—at half-past one." Judy shook hands with the little man like a person in a dream. When she had gone, Mr. Wyon stood, gazing at the door, with a look of enlightenment on his face. "The description suits what she is to the ground," he told himself. "A thorny little person! A very thorny little person indeed!" Judy spent the following 10 days in a whirl, and met more people than she had ever met in her life before. She was what she called "completely dotty"—that is to say, confused and wildly excited, keeping only a clear grip on the essentials of her work. In that respect, like all true artists, little Judy Grant was eminently, almost savagely, practical. At any rate, other people sometimes found her savage when they tried to interfere with her work. "I am interested in several things," he answered. "Diamonds, for one, and oil and coal. I don't

IN THE REALM of SPORT

WITH THE TEXAS LEAGUE

A lone tally in the ninth inning gave Wichita Falls a 1 to 0 victory over Beaumont, Sunday, enabling the Spudders to increase their lead in the Texas League race. Earl Caldwell held the Beaumont batsmen to five hits while his teammates gathered six safeties off Johnny Walkup.

Waco nosed Houston out of second place when Paul Wachtel blanked the Fort Worth Cats and Waco won the game 6 to 0. Respected Lee Meadows, former Major League hurler, bested Ralph Judd and the Dallas Steers defeated Houston by a score of 4 to 3. The Shreveport Sports returned to daylight baseball Sunday and trimmed the San Antonio Indians 3 to 2. The Sports annexed 15 hits against the invaders' 11.

Yesterday's Hero

Leroy Mahaffey, Philadelphia Athletics' recruit pitcher, who paved the way for his team to retain the American League lead, by holding the St. Louis Browns to eight scattered hits and driving in two of the A's runs with three singles.

Texas Sport Tabs

SAN ANTONIO, Tex., July 14—Heart failure from excitement over a wrestling match here was believed to be the cause of the sudden death of C. R. Lester, private at Fort Sam Houston. He lived but a short time after his arrival at a hospital.

DALLAS, Tex., July 14—Gus Sonnenberg, to whom has been ascribed the title of "wild" heavy weight wrestling champion, will grapple Stanley Stasiak here tonight. Advance ticket sales indicated a record crowd would attend.

VERNON, Tex., July 14—For the third consecutive year, the Hill Country Golf championship was held by Whitney Anderson today. E. P. Hicks, his opponent in the finals and medalist this year, conceded the match on the 24th hole with Anderson seven up.

SAN ANTONIO, Tex., July 14—In an effort to bring wrestling to the status of a sport "instead of a dog fight," a regulatory ordinance will be prepared, Mayor C. M. Chambers said in ordering that no more mat matches be held at Exposition Park or on any other city property. The decree was the result of an almost riotous finish to a wrestling match between Hutch Nichols and George Sauer.

The world champion Philadelphia Athletics were back at the head of the pack in the American League race today, holding a .005 point advantage over Washington in the percentage.

Connie Mack's club took the lead when they annexed their second straight game from the St. Louis Browns, 12-1, yesterday, collecting 17 hits off Coffman and Holschauer.

Detroit made Philadelphia's entry into first place possible by defeating Washington, 5 to 1. Vic Sorrell's single in the eighth inning drove home Mark Koenig with the deciding run.

Brooklyn enjoyed a 2½ game lead over the Chicago Cubs in the National League today, despite the fact that the Robins lost a heart-breaking game to Pittsburgh, 1-0. Jumbo Elliott held the Pirates to four hits. The Robins made nine hits off Larry French, Pirates' southpaw, but could not score.

The Chicago Cubs received a severe setback at the hands of the Boston Braves, losing a doubleheader, 2-1 and 2-0. Harry Scheid blanked the Cubs until the ninth inning of the first game.

In the second game, the Cubs were leading 4 to 3, in their half of the ninth. The Braves came to bat with only five minutes to play before 6 p. m., after which the baseball is forbidden in Boston. The game was called before the inning ended and the score reverted to the eighth inning, when the Braves were leading.

The New York Giants gained ground on the two national league pacemakers by breaking Cincinnati's 7 game winning streak with a 9-5 victory. The Giants are now 4½ games behind Brooklyn and 2 games behind Chicago.

The New York Yankees defeated the Chicago White Sox, 7-5, and Cleveland won from the Boston Red Sox, 1-2, in the other two American League games. The Cleveland-Boston game was halted after six innings by rain.

Delinquency Is Studied By U. S. Child's Bureau

Separation and Divorce Among Parents Found To Have Bearing.

By ROBERT C. ALBRIGHT
United Press Staff Correspondent
WASHINGTON, July 14—Separation and divorce among parents may have a direct relationship to delinquency among children.

The Children's Bureau has traced a definite connection between "lack of normal family life" and child delinquency cases, in an analysis of juvenile court statistics for 1928.

Bureau experts found that although 71 per cent of the boys with court records were living with both parents at the time their offense was committed, only 53 per cent of the girls had a similar home environment.

"This would seem to indicate," these authorities concluded, "that the lack of normal family life is a more significant factor in the delinquency of girls than of boys."

The difficulties which bring girls into court are usually more serious in character and more closely related to home conditions than the difficulties of boys.

The bureau found that only 5 per cent of the delinquent children of both sexes were living with their fathers when their offense was committed. About 12 per cent were living with their mothers.

Of the remainder, on an average of 68 per cent of those bringing children of both sexes were living with both of their parents; 5 per cent were living with a mother and stepfather; 2 per cent with a father and stepmother; and 5 per cent in another family home.

The report, which covered 1928 records of 62 courts in widely separated states, also traced a relation between nativity of parents and delinquencies of their children.

The largest proportion of delinquent children dealt with by the courts were native-born white boys and girls. Less than half of the girls, 45 per cent, had parents, one of both of whom were native born. About 56 per cent of the boys had parents at least one of whom was foreign born.

"Accordingly it may be said that the delinquency rate among native born boys or mixed parentage was high," declares the report.

"The ratios for colored children were found to be consistently higher than for white children, with the exception of ratios for girls in two Southern courts, at Memphis, Tenn., and Greenville County, S. C.

"It is generally accepted that the offenses with which boys and girls are charged represent different delinquency problems," bureau authorities said.

"Our data shows that 'stealing or attempted stealing' and 'acts of carelessness or mischief' were the most usual charges in boys' cases, whereas the closely related charges of 'running away,' 'ungovernable or beyond parental control,' and 'sex offense' appeared more often in girls' cases."

EASTLAND MAN IN VIGOROUS COMMENT ON ROSS STERLING

"The candidacy of Ross Sterling is founded on fallacy," declared a local newspaper editor, "and even without this proposed colossal debt, his candidacy is a menace to the welfare of Texas," declares Judge R. N. Grisham, well known attorney of Eastland.

"The lure of compensation to heavily bonded counties has been dangled before the people's eyes in an effort to win support for Sterling and his bond issue. The amount of county indebtedness that would be taken over is only \$75,000,000. Lynch Davidson is 33 per cent of the state, and the interest on the State-wide bonds would be \$180,000,000. Wouldn't that be a wonderful swap for the taxpayers to make?"

"Take our own county. We owe about \$4,000,000. If the Sterling plan is adopted, the State would not take over this \$4,000,000 debt. Only the state highways would be considered and there are many miles of pavement in this county that are not state highways. And the amount assumed by the State would be built on the pay-as-you-go plan and a specified amount set aside out of current revenue to compensate the counties? This is the plan that Earle B. Mayfield favors and it would bring relief without piling \$180,000,000 in interest on the taxpayers of Texas."

"It has been charged by Sterling that other candidates have jumped on the bandwagon by advocating compensation to the counties. Senator Mayfield made a speech in Eastland in favor of compensation before Sterling had even announced for governor.

Schools Would Lose

"All attorneys will readily recognize that under the Sterling plan, the bond issue must be authorized by a constitutional amendment and that once the amendment is adopted the entire bond issue must be used for roads and roads only. No law diverting a portion to the struggling public schools would be constitutional, and still leaves as much for the highways as three men can wise-

Tokyo Quake Saves Fortune

TOKYO, July 14.—An earthquake saved the fortune of Yajima Kiyomiya, wealthy land owner in Sahara-machi, Chiba prefecture, near Tokyo. Kiyomiya was awakened early one morning by a masked burglar, armed with a dagger, who threatened to kill him unless he gave up his fortune.

Kiyomiya had started to comply when the most severe earthquake of 1920 hit Tokyo and surrounding areas. The burglar, evidently a survivor of the great earthquake of 1923 which took a toll of more than 150,000 lives, fled leaving his mask and dagger.

When Palmer first came here only 40 clerks were employed in the dispatching office under him. Today there are 1,637 postal employees in Pittsburgh.

He has been associated with seven postmaster positions during the opening of the present federal building in September 1891 and hopes to live to see the proposed new structure.

Civil service which was introduced in the postal department during Palmer's time has proved beneficial to both the government and postal workers and has resulted in more efficient service, he believes.

Read This! It Might Help To Save A Life!

By J. C. ANDERSON, M. D., State Health Officer

This is the swimming season and nervous mothers in fancy can see "Sonny brought home lifeless from going in water beyond his depth. He couldn't swim very well anyway, and now—"

The lives of many persons who apparently have drowned could be saved if a proper method of artificial respiration were used. The prone pressure method is advocated by the American Red Cross, the United States Public Health Service, and all leading authorities. Every one should know how to use this method if he indulges in or goes where there are aquatic sports. It is useful also for promoting respiration in persons who have received heavy electric shocks or who are asphyxiated by gas.

It would be well to remember these rules.

1. Lay the patient on his abdomen, one arm extended directly over head, the other arm bent at elbow and with the face turned outward and resting on hand or forearm so that the nose and mouth are free for breathing.
2. Kneel straddling the patient's thighs with your knees placed clear of the patient's hip bones. Place the palms of the hands on the small of the back with fingers resting on the ribs, the little finger just touching the lowest rib, with the thumb and fingers in a natural position and the tips of the fingers just out of sight.
3. With arms held straight, bend forward slowly so that the weight of your body is gradually brought to bear upon the patient. The shoulder should be directly over the heel of the hand at the end of the forward swing. Do not bend your elbows. This operation should take about two seconds.
4. Now immediately swing backward so as to remove the pressure completely.
5. After two seconds, swing forward again. This repeat deliberately 12 to 15 times a minute the double movement of compression and release, a complete respiration in four or five seconds.
6. Continue artificial respiration without interruption until natural breathing is restored, if necessary four hours or longer, or until a physician declares the patient is dead.
7. As soon as this artificial respiration has been started and while it is being continued, an assistant should loosen any tight clothing about the patient's neck, chest or waist. Keep the patient warm. Do not give any liquids whatever by mouth until the patient is fully conscious.
8. To avoid strain on the heart when the patient revives, he should be kept lying down and not allowed to stand or sit up. If the doctor has not arrived by the time the patient has revived, he should be given some stimulant, such as one teaspoonful of aromatic spirits of ammonia in a small glass of water or a hot drink of coffee or tea, etc. The patient should be kept warm.
9. Resuscitation should be carried on at the nearest possible point to where the patient received his injuries. He should not be moved from this point until he is breathing normally of his own volition, and then moved only in a recumbent position. Should it be necessary, due to extreme weather conditions, etc., to move the patient before he is breathing normally, resuscitation should be carried on at the nearest possible point to where the patient received his injuries. He should not be moved from this point until he is breathing normally of his own volition, and then moved only in a recumbent position. Should it be necessary, due to extreme weather conditions, etc., to move the patient before he is breathing normally, resuscitation should be carried on at the nearest possible point to where the patient received his injuries. He should not be moved from this point until he is breathing normally of his own volition, and then moved only in a recumbent position. Should it be necessary, due to extreme weather conditions, etc., to move the patient before he is breathing normally, resuscitation should be carried on at the nearest possible point to where the patient received his injuries. He should not be moved from this point until he is breathing normally of his own volition, and then moved only in a recumbent position. Should it be necessary, due to extreme weather conditions, etc., to move the patient before he is breathing normally, resuscitation should be carried on at the nearest possible point to where the patient received his injuries. He should not be moved from this point until he is breathing normally of his own volition, and then moved only in a recumbent position. Should it be necessary, due to extreme weather conditions, etc., to move the patient before he is breathing normally, resuscitation should be carried on at the nearest possible point to where the patient received his injuries. He should not be moved from this point until he is breathing normally of his own volition, and then moved only in a recumbent position. Should it be necessary, due to extreme weather conditions, etc., to move the patient before he is breathing normally, resuscitation should be carried on at the nearest possible point to where the patient received his injuries. He should not be moved from this point until he is breathing normally of his own volition, and then moved only in a recumbent position. Should it be necessary, due to extreme weather conditions, etc., to move the patient before he is breathing normally, resuscitation should be carried on at the nearest possible point to where the patient received his injuries. He should not be moved from this point until he is breathing normally of his own volition, and then moved only in a recumbent position. Should it be necessary, due to extreme weather conditions, etc., to move the patient before he is breathing normally, resuscitation should be carried on at the nearest possible point to where the patient received his injuries. He should not be moved from this point until he is breathing normally of his own volition, and then moved only in a recumbent position. Should it be necessary, due to extreme weather conditions, etc., to move the patient before he is breathing normally, resuscitation should be carried on at the nearest possible point to where the patient received his injuries. He should not be moved from this point until he is breathing normally of his own volition, and then moved only in a recumbent position. Should it be necessary, due to extreme weather conditions, etc., to move the patient before he is breathing normally, resuscitation should be carried on at the nearest possible point to where the patient received his injuries. He should not be moved from this point until he is breathing normally of his own volition, and then moved only in a recumbent position. Should it be necessary, due to extreme weather conditions, etc., to move the patient before he is breathing normally, resuscitation should be carried on at the nearest possible point to where the patient received his injuries. He should not be moved from this point until he is breathing normally of his own volition, and then moved only in a recumbent position. Should it be necessary, due to extreme weather conditions, etc., to move the patient before he is breathing normally, resuscitation should be carried on at the nearest possible point to where the patient received his injuries. He should not be moved from this point until he is breathing normally of his own volition, and then moved only in a recumbent position. Should it be necessary, due to extreme weather conditions, etc., to move the patient before he is breathing normally, resuscitation should be carried on at the nearest possible point to where the patient received his injuries. He should not be moved from this point until he is breathing normally of his own volition, and then moved only in a recumbent position. Should it be necessary, due to extreme weather conditions, etc., to move the patient before he is breathing normally, resuscitation should be carried on at the nearest possible point to where the patient received his injuries. He should not be moved from this point until he is breathing normally of his own volition, and then moved only in a recumbent position. Should it be necessary, due to extreme weather conditions, etc., to move the patient before he is breathing normally, resuscitation should be carried on at the nearest possible point to where the patient received his injuries. He should not be moved from this point until he is breathing normally of his own volition, and then moved only in a recumbent position. Should it be necessary, due to extreme weather conditions, etc., to move the patient before he is breathing normally, resuscitation should be carried on at the nearest possible point to where the patient received his injuries. He should not be moved from this point until he is breathing normally of his own volition, and then moved only in a recumbent position. Should it be necessary, due to extreme weather conditions, etc., to move the patient before he is breathing normally, resuscitation should be carried on at the nearest possible point to where the patient received his injuries. He should not be moved from this point until he is breathing normally of his own volition, and then moved only in a recumbent position. Should it be necessary, due to extreme weather conditions, etc., to move the patient before he is breathing normally, resuscitation should be carried on at the nearest possible point to where the patient received his injuries. He should not be moved from this point until he is breathing normally of his own volition, and then moved only in a recumbent position. Should it be necessary, due to extreme weather conditions, etc., to move the patient before he is breathing normally, resuscitation should be carried on at the nearest possible point to where the patient received his injuries. He should not be moved from this point until he is breathing normally of his own volition, and then moved only in a recumbent position. Should it be necessary, due to extreme weather conditions, etc., to move the patient before he is breathing normally, resuscitation should be carried on at the nearest possible point to where the patient received his injuries. He should not be moved from this point until he is breathing normally of his own volition, and then moved only in a recumbent position. Should it be necessary, due to extreme weather conditions, etc., to move the patient before he is breathing normally, resuscitation should be carried on at the nearest possible point to where the patient received his injuries. He should not be moved from this point until he is breathing normally of his own volition, and then moved only in a recumbent position. Should it be necessary, due to extreme weather conditions, etc., to move the patient before he is breathing normally, resuscitation should be carried on at the nearest possible point to where the patient received his injuries. He should not be moved from this point until he is breathing normally of his own volition, and then moved only in a recumbent position. Should it be necessary, due to extreme weather conditions, etc., to move the patient before he is breathing normally, resuscitation should be carried on at the nearest possible point to where the patient received his injuries. He should not be moved from this point until he is breathing normally of his own volition, and then moved only in a recumbent position.
