By United Press

FORT WORTH, Jan. 12.—An investigation into the fire which early today destroyed the First Baptist church, pastorate of the Rev. J. Frank Norris, has been started here by District Attorney Robert Stuart.

The inquiry was ordered following the finding of several tubs, one partially filled with gasoline, in the building. Police and firemen found an empty tub on the third floor and two others, one containing a mixture of gasoline and water, on the main floor. Near these two containers, according to firemen, was a jug half filled with gasoline.

First Baptist Church, pastorate of J. Frank Norris, militant funda-mentalist, was completely destroyed by fire early today.

Norris was acquitted two years ag on a charge of murder in connection with the death of D. E. Chipps, Fort Worth lumberman who was shot to death in the min-ister's office. Norris pleaded self-

defense. The building burned rapidly. The fire started shortly after 6 a.m. and despite the efforts of eleven fire companies, the structure

was in complete ruins by 8 a. m. The fire started in the church auditorium. An hour after the flames were discovered, the roof and rear wall had tumbled in. In-

side the walls was an inferno of stone and twisted steel. Damage on the building was estimated at \$200,000.

The blaze apparently had started under the pulpit.

Damage to the office building adjoining the auditorium and divided from the Sunday school annex by a fire wall, was expected to be confined to that caused by smoke. It is in this building that the office of the church pastor, Rev. J. Frank Norris, is located. Broadcasting equipment of Radio Sta-tion KTA1' was located in the

church property.
Pastor Norris was in Austin Saturday. He was notified of the

ENGLAND, CRUISERS AND CANADA.

Probably the sharpest legislative battle of the winter will break loose at Washington shortly when the bill providing for the construction of 15 new cruisers for our navy comes up for action. Advance indications a re that each side will make a strenuous fight to carry the day, and the result at present seems to be a matter of considerable doubt.

It goes without saying that if we are to have a navy at all we must have an "adequate" one; but it is the row about what is adequate and what is not that is causing all the trouble. To some, the navy is more than adequate right now; to others, it is most woefully inadequate.

Settling the question of adequacy seems to depend largely on figuring out just whom our navy may have to be used against. And that question, in turn, can not possibly be determined without pital here. bringing up the very unpleasant one-are we, eventually, likely to De righting Great Britain?

If England is to be our foe some day, then our navy is inadequate and needs not merely 15 new cruisers but a good many more. But if England is not to be our foe, the navy seems well able, as tragedy today, the story gradually fact the whole development it now xists, to take care of itself

REMEMBER 'WAY BACK WHEN ---?

When a tire that lasted even 3,500 miles was a curiosity? (You can still buy that short-distance kind if you pay little enough.)

How times change! Now, we're exhibiting a new type tire-Goodyear's 30th anniversary masterpiece, the DOUBLE EAGLEthat can reasonably be expected to last as long as a man usually keeps his car.

And they figure the odds at 1,000 to 1 against even a puncture, let alone blow-

Only Goodyear, of course, is building such a Supertire. And it's just too good to be needed by most motorists.

But it's interesting to look at-and talk about. And that's why we say "Come in and see it." No obligation, of course. It's a pleasure to show this Super-example of Goodyear endurance and beauty.

IDENTIFICATION: On the sidewall of this tire you will find in silver silhouetta the Double Eagle: world mark of superfine quality and value, symbol of that Goodyear union of seasoned experience and routhful troopsess which have
