JUNIOR SCHOOL BAND SOON TO BE ORGANIZED

Director Campbell Will Train Youngsters For Places In The Senior School Band.

Director A. J. Campbell, who returned Saturday from the Eastland County Boy Scout summer camp at Camp Martin, in Mason county, announced that a junior school band will be organized in Eastland in the near future. "Several applicants for places in the band are now waiting for it to be organized," he said.

No charge will be made for joining or playing in the band and all who wish to join it will be welcomed, it is stated. Those joining the junior band will be rehearsed and will be promoted to the senior band as fast as they learn to play.

Director Campbell asks that all who are interested see him at once so that the organization may be effected as quickly as possible. The school band will resume its rehearsals each Monday and Thursday night in the B. Y. P. U. hall.

Eastland High Gets Additional Affiliated Credits

Principal Speer of the high school, is very proud of the additional credits Eastland Hi has received and added to the twenty-five and a half credits of last year.

Under the instruction of Miss Clarice Gardner, the commercial department made good to an extent that two and a half credits were given Eastland Hi. One credit was given in public speaking, Miss Ima Ruth Kelley, instructor.

Mr. Speer stated that it was a matter of congratulation for a school to maintain a year's credit in public speaking.

This gives Eastland Hi a total of twenty-nine affiliated credits.

Powder Factory In Germany Scene of Fatal Explosion

BERLIN, Germany, July 14.—At least four persons were killed and 25 seriously injured today in a powder factory explosion at Hasloen that wrecked the entire plant and neighboring buildings. The injured persons were recovered from the debris.

At the time of the explosion 130 people were working in the factory, and it is feared that casualties will prove heavy, as many are still missing.

To Link Hawaii

Major C. C. Moseley, winner of the first Pulitzer race and outstanding army aviator, is to direct the establishment of a large fleet of airplanes connecting the eight Hawaiian Islands, according to rumors that followed his departure from Los Angeles for Honolulu recently. Guggenheim interests are said to be financing the venture.

BITTLE PLANS SCHOOL WORK IN EASTLAND

Superintendent Asks For Co-Operation of People In Keeping High Standard of Education Here.

By ELVIE H. JACKSON
Superintendent of the Public Schools Bittle, who will take charge of the Eastland schools in active ways in September, has been busily planning, during his several weeks residence in Eastland, for the added benefits of our schools, which he hopes to see an accomplished fact before the year passes.

Mr. Bittle has been a resident of Big Spring the past five years and has left a record for sagacity and success in his chosen work that is enviable. He is an interesting, suave and cultured gentleman, of distinctly southern heritage. In fact, his father was a Virginia, and his mother a Tennessee. He has an interesting family, of wife, son and daughter. Both young people George T. Bittle and Gwendoline Bittle, were students last year of McMurray College. The boy goes to A. & M. College in September, but Miss Bittle is taking a rest, necessitated by eye strain, having overtaxed her eyes during her last year at college.

The family are located and will remain for this year in the Judge Stabfield residence. But Mr. Bittle expressed himself as being so pleased with Eastland, and has become so imbued with the home spirit manifested in Eastland, that he would like to have a home of his own here.

"There are certain things I would like to see established in the Eastland High School, and if I can get the good people to stand behind my policies, we will continue to have a good school," he said.

"I hope everyone will give me a chance to prove that I have the best interests of Eastland and her students at heart. Anyone who is interested in any phase of school work, I gladly invite to my office, to have a talk with me, face to face. In fact, whether they have children in high school or not, or in the grammar schools, I invite them, if interested, to discuss any matter they wish with me concerning the schools.

We are installing the home economics department of the high school on the Smith-Hughes plan. Government matches dollar for dollar in the upkeep of the department if the credits entitle the Smith-Hughes affiliation. The requirements are high, and a certain standard must be attained other than that possible for the non-affiliated departments.

ED PRITCHARD URGES SUPPORT OF GRISHAM

Says He Has Marked Ability To Give Splendid Service To District, State and Nation.

County Judge Ed S. Pritchard, victor in five campaigns and never defeated for public office, is supporting Judge R. N. Grisham of Eastland for Congress and firmly believes him to be admirably fitted in character and ability to render great service to the 17th district, to the State and to the United States. Judge Pritchard's statement to the citizenship of Eastland county follows:

"The citizenship of Eastland county has been kind enough to elect me to every office to which I have aspired and for these expressions of confidence I am indeed deeply grateful.

Scouts Give Coolidge Trout Rod

President Coolidge received a fine trout rod the other day from the Boy Scouts of Superior, Wis., council. Scout Donald Kunsman is shown making the presentation at the summer white house on Bruce river.

METHODISTS ANNUAL SUNDAY SCHOOL DAY

Program To Be Given In Church Tonight Will Demonstrate Work.

The Annual Sunday School Day of the Methodist Church will be observed this evening at eight o'clock, and a large audience is anticipated for this very beautiful program, which embraces the various grades of the Sunday School, and carries with it plenty of lovely music.

Exquisite chorus effects will be rendered by the combined church and Crusader choirs, assisted by the Drago Ensemble.

Mrs. Frank E. Singleton is church pianist and Mrs. Charles G. Norton accompanist for violin numbers.

Sunday School Processional; Violin Quartet; March Triumphant—Levy; Song, Softly Now The Light of Day—choir and congregation. Devotional; prayer, scripture XXIII Psalm.

Song: "Give of Your Best To The Master,"—choir and congregation.

Mr. J. A. Caton, superintendent of Sunday School, presiding; Departmental Work: Beginners and Cradle Roll—Mrs. Luther Bean and Mrs. W. B. Collier. Primary Department—Mrs. June Kimble, assistant superintendent.

Five Minute Talk—Our Sunday School Work—Rev. Frank E. Singleton. Junior Department—Mrs. A. F. Taylor, superintendent, missions and offering. Song. Violin Quartet—Neapolitan Serenade—Dallasio.

CARRANZA OF MEXICO FALLS TO HIS DEATH

Goodwill Airman Crashes In New Jersey During Severe Electrical Storm. Body To Be Sent Home.

WASHINGTON, July 14.—Arrangements are being made to send the body of Capt. Emilio Carranza, Mexican aviator, killed near Mount Holly, N. J., to Mexico aboard an American warship, it was learned today. Plans probably will be announced by the State department late this afternoon.

Carranza crashed during a severe electrical storm, his plane apparently being struck by lightning. The aviator's body was badly mangled and parts of the machine were found nearly a mile apart. Carranza took off from Roosevelt Field a little before 8 o'clock Thursday night to attempt a non-stop flight to Mexico City. Weather Bureau officials notified him of storm conditions and advised against the start at this time. He was expecting to fly the 2400 miles to Mexico City in 27 hours and a great ovation was being prepared for him in the Mexican capital. He was flying in a Ryan monoplane similar to the Spirit of St. Louis. He must have crashed a short time after leaving Roosevelt Field the body was not found until Friday afternoon.

MEXICO CITY, July 14.—Throughout Mexico there was effected today, spontaneous, voluntary mourning for Captain Emilio Carranza, Mexican hero, who was killed Thursday night at the beginning of a non-stop flight to Mexico City from New York. Public entertainments all over the country were cancelled.

WASHINGTON, July 14.—The United States government has offered to convey the body of Captain Emilio Carranza to his native country aboard the United States ship Florida, Secretary Kellogg announced today.

The Florida is in New England waters and quickly available for its funeral duty. The navy department advised that the battleship Arkansas was also available for the service, but Kellogg announced that the Florida had been offered the Mexican government.

AUSTIN, July 14.—The Texas flag over the state capitol was hung at half mast today, honoring the memory of Capt. Emilio Carranza. He was born at Eagle Pass, Texas.

BARTLESVILLE, Okla., July 14.—Mrs. Mada Herod of this city was killed instantly and two others were injured early today when their automobile in which they were riding rolled suddenly backward into a ditch near here.

The car, it was said, had stalled and when the motor was restarted shot backward over an embankment geared in reverse.

Mrs. Herod and Fred Backstrom were caught beneath the car. Backstrom suffered a broken leg. Dave Long, the third occupant also suffered serious injuries. All were of Bartlesville.

Democrats New National Chairman Urges Liquor Plan

SPRINGFIELD, Mass., July 14.—Belief that a plan should be adopted which would permit the use of intoxicating liquor in the home, "in such communities as vote therefor under a local option law," was expressed in letters received here today from John J. Raskob, new chairman of the Democratic National Committee.

It was indicated that similar letters were sent to all the delegates to the Houston convention.

BRIGANDS PUT FEAR OF DEATH INTO VICTIM

Kidnap Wealthy Realtor, Release Him Under Promise Which He Fails To Keep and Now Threaten.

KANSAS CITY, July 14.—Barney Goodman, wealthy real estate dealer here, recently was kidnaped, beaten and made to promise he would give up \$30,000 and his wife's jewels before he was released, it became known today.

Threats received yesterday over the telephone that Goodman and two body guards he hired after being kidnaped would be blown up caused friends of Goodman to seek prosecution from the county prosecutor's office.

Goodman's experience is similar to that of several wealthy gamblers and bootleggers who have been "taken for a ride" in the last few months. Several recent killings are attributed to refusal to pay debts.

Goodman, according to Wednesday night, stripped and beaten until he promised to pay \$30,000 and his wife's jewels to his abductors. He was released and was given until Thursday afternoon to pay the ransom. This he did not do. It was then that Goodman hired two body guards and since has lived in fear of death.

Goodman's experience is similar to that of several wealthy gamblers and bootleggers who have been "taken for a ride" in the last few months. Several recent killings are attributed to refusal to pay debts.

One Killed and Two Hurt In Car Crash

BARTLESVILLE, Okla., July 14.—Mrs. Mada Herod of this city was killed instantly and two others were injured early today when their automobile in which they were riding rolled suddenly backward into a ditch near here.

The car, it was said, had stalled and when the motor was restarted shot backward over an embankment geared in reverse.

Mrs. Herod and Fred Backstrom were caught beneath the car. Backstrom suffered a broken leg. Dave Long, the third occupant also suffered serious injuries. All were of Bartlesville.

Confederate Vets Remember Battle

TUPELO, Miss., July 14.—Confederate veterans of the Civil War gathered here today from all sections of the south to celebrate the sixty-fourth anniversary of the battle of Harrisburg.

Survivors of that battle today returned to the field where more than three score years ago thousands of their comrades fell. It was a thin and faltering line of gray that marched with the weight of years and a boiling sun bearing down on their stooped shoulders.

Makes Loss Good

Add to the list of those who make sacrifices to maintain their good name, Donald Muir of Anthony, Kas. Mr. Muir from his personal wealth has just completed payment of \$110,000 to creditors of the failed Home State bank of which he was an officer. Every depositor has been paid in full. He gave up the bulk of an estate founded by his father and increased by himself by many years of work and saving.

RESCUE WORK IN ARCTIC NOW IS EFFECTIVE

Nine Men Lost In Frozen Waste Are Found and Four Others Of Italian's Crew Sought.

KINGS BAY, Spitzbergen, July 14.—The frozen Arctic today began yielding up the men believed lost within her interior for weeks and months. Already nine men have been taken from the ice-infested area, while the big ice-crasher Krassin today pushed forward attempting to locate four of the men of the dirigible Italia lost on May 25.

The last two men rescued were Captain Sora and Sief Van Dongen, his dog sleigh driver.

BERLIN, Germany, July 14.—An unconfirmed report to the Telegrapher Union today said that the Russian aviator Chukhovskiy, who made a forced landing in the Arctic ice area and has been stranded there for two days, had flown back to the Russian ice-breaker Krassin.

The unconfirmed report indicated that Chukhovskiy and his four aides had succeeded in repairing the damaged airplane and had been able to take the air again. The Krassin was en route to rescue the men today.

12-Year Old Boy Wants New Clothes

DALLAS, July 14.—A twelve-year-old youth was arrested by police here last night while he was in the act of hammering the knob from a safe in the Dallas Body Works.

"I needed some money to buy some clothes," the boy told police. His case is being discussed by juvenile authorities.

Boy Scouts Home From Camp Martin

Breaking camp early Saturday morning, the Eastland Boy Scouts said bye-bye to Camp Martin, at the junction of the Llano and James rivers in Mason county, and headed homeward. Some of the Ranger boys were in a high-power car and went through Eastland about 10 o'clock. Most of the Eastland boys, a majority of the coming on trucks, arrived between one and two o'clock, and the latest of all to arrive got in about six o'clock Saturday evening.

The boys said they had a wonderful time, got plenty to eat and, except when discipline urged them, enjoyed the summer outing.

EXPOSURES OF CERTAIN ROCKS TO BE MAPPED

Important Results Expected From Individual Work Promised. Next Meeting In Fort Worth.

Results of far-reaching importance will be accomplished by the splendid cooperation of geologists in Texas for mapping in detail surface exposures of Permian-Carboniferous rocks, according to F. B. Plummer of Fort Worth, who called and presided at a meeting in Eastland Saturday. The geologists attending, about 70 in all, are members of the Society of Economic Paleontologists and Mineralogists, and this meeting was the first in the southernmost district of the Mid-Continent area, all of which is to be mapped in the projected plans.

It was a technical session, principally concerned in the ways and means for getting the different outcroppings in the Permian and Pennsylvanian areas of Texas more effectively mapped. This is in line with what has been done in Oklahoma, but promises to be more satisfactory, according to Mr. Plummer, for in Oklahoma the work was carried on largely by the government, while in Texas it is to be by individual effort on the part of those contributing to it. It is the first organized effort among the Texas geologists exclusively directed towards this end.

It is stated that if the cooperative mapping proves successful, and no doubt seems to be entertained of its success, the work doubtless will be extended into other geological provinces through out Texas.

Other subjects pertaining to stratigraphy (rock formations) well sections and paleontology were discussed by the geologists. The method adopted for arriving at a workable plan was to divide the Permian and Pennsylvanian areas into groups of counties, each group averaging about six counties, and these groups will report at a meeting to be held in Fort Worth on the day that the Texas T. C. U. football game is played there in the fall.

The several groups are known as follows: Abilene, Eastland, Cisco, Coleman, Amarillo, Wichita Falls, San Angelo, San Saba and Fort Worth.

Abilene, Mineral Wells and Austin were competitors with Fort Worth for the next meeting, a sole representative from Austin holding out to the last, but Fort Worth was the choice.

The visiting geologists and their ladies were guests of the Eastland oil men at a dinner served in the Connellee Hotel Saturday night. Joseph M. Weaver, president of the States Oil Corporation and chairman of the Eastland City Commission, presided and extended a hearty welcome to the visitors. The dining room was decorated with flowers and beautiful music was played softly while the dinner was being served. Afterwards a number of the visitors were called on for brief remarks.

Following the dinner, the geologists and their ladies and a large number of the local people were guests of the Connellee Hotel at a dance in the roof garden which continued until midnight.

Visiting geologists voiced their appreciation of the reception and entertainment given them in Eastland. They were guests of the local oil men and the Connellee Hotel.

Two Tulsa Men Are Victims Of Explosion

TULSA, Okla., July 14.—Two employees of the Mid Continent Petroleum Corporation Refinery in West Tulsa died late last night from burns received in an explosion.

The men are George Killian, 40 and T. J. Booth, 37. Cause of the explosion has not been determined.

The two were working near a still when oil heated to a temperature of 600 degrees was sprayed over them by the blast.

ALICE—James Gibson building Main Street being remodeled.

WHERE IS THE GAIN. Discussing the national situation, the Sweetwater Reporter in recent editorial asks the question, "Where is the gain of an organization to bolt the democratic party especially on the liquor issue?"

"This question is not asked in the 'pro' or 'anti' sense, but to direct attention to a common view of party government.

"It is through party government at this nation carries on its affairs. The republicans founded their party on the basis of certain principles, and the democrats have a party that believes in other principles.

"The new superintendent is also a member of the Methodist church. When asked if he belonged to any organization, he checked gently and replied 'I am not a joiner, although I do belong to the Knights of Pythias.'

"Will aiding the republicans help in solving the wet and dry question? The growth of liquor violations has been under republican control. Andrew Mellon, the real power of the republican party, has been the owner of more whisky than perhaps any other man.

"Herbert Hoover might be the driest man in America, but if he were president he couldn't put his personal views into effect unless they were approved by the republican party machine.

"Al Smith might be the wettest man in America but as president he could not gain all his personal desires without the consent of his party leaders.

"If a person belongs to a party, agrees with its general principles, thinks they would result in better government, greater happiness and prosperity, but believes some things within the party are wrong, is it not better to stay with the party, and work to correct its faults from within than to run away from it, cure nothing and aid the other fellow—especially when the other fellow's record on the 'dope spot' is known to be bad?"

ED PRITCHARD URGES SUPPORT OF GRISHAM (Continued from Page 1.) service to our district, our state and our nation.

"The war and the era of readjustment is over and a man of marked ability could accomplish much for the 17th Congressional District in the next few years.

"Judge R. N. Grisham of Eastland is not only a man of splendid character but is a lawyer of ability and a fighter for what he believes to be right. He will render loyal aid to every part of the district and to every citizen, whether rich or humble.

"The great majority of the citizens of this county know Judge Grisham and know that he is eminently qualified for the position. Those of you who do not know him owe it to yourselves to investigate before you cast your ballot.

OUT OUR WAY FUNNY CURLY—BUT I WAS JUST THINKING ABOUT MY OLDEST BROTHER. HE HAS A TERRIBLE HABIT OF WALKING IN HIS SLEEP AND I— BRING 'IM OUT HERE AN' WE'LL CURE HIM IN ONE NIGHT THE MAGIC CARPET.

"In my opinion, no better man could be selected in the district to represent us in Congress. Respectfully, (Signed) ED S. PRITCHARD."

BITTLE PLANS SCHOOL WORK IN EASTLAND (Continued from Page 1.) will teach the classes. The work of the home economics department has been inspected, and has passed the standard, which entitles Eastland's home economics department to benefit of the Smith-Hughes plan."

Mr. and Mrs. Bittle will be a distinct addition to the social and literary life of the city as well as her church life. Mrs. Bittle has been a member of leading clubs in her former places of residence, and has been a member of the Methodist church choir in Big Spring for some years.

DODGE SALES FAR AHEAD OF LAST YEAR'S Cars to Consumers Show 20 Per Cent Gain and Production Still Increasing Sales of Dodge Brothers passenger cars to consumers in domestic and foreign territories from the first of the year to the week ending June 23rd show a gain of 20.2 per cent over the corresponding period of 1927.

A gain of 67 per cent in retail was registered for the week ending June 23rd compared to the corresponding week in 1927. "The 'summer slump' often experienced in the trade appears to be out of the picture as far as our dealers are concerned," said John R. Lee, general sales manager of Dodge Brothers, in commenting on this remarkable sales record.

POLITICAL RALLY FOR CALLOWAY IN COMANCHE Special to The Telegram. COMANCHE, Texas, July 14.—The biggest political rally ever held in Comanche is the program for Tuesday evening, July 17, for Hon. Oscar Calloway, candidate for congress from the 17th district.

APPELLATE COURT ADJOURNS FOR SUMMER The Eleventh Court of Civil Appeals adjourned Saturday for the summer. The office of the court will remain open, however, and Clerk Childers will be on duty. The court will meet again September 10.

Movie Theatre In Pleasanton Burns (By United Press.) PLEASANTON, Tex., July 14.—M. Midcalf, operator, was burned severely last night when an explosion occurred in the film room of the Pleistex theater. The theater building was burned, but all spectators escaped.

BELL SYSTEM PLANT HUGE INVESTMENT Three Billion Dollars Spent For Telephone Equipment and Property.

Increasing in the last four years at a continuous rate of \$500 a minute, day and night, the plant investment of the Bell Telephone System, which serves nearly 14,000,000 telephones of its own companies, has recently reached the enormous total of \$3,000,000,000.

Not until 1917, or 41 years after the invention of the telephone, did the plant investment reach \$1,000,000,000. Bu in 1923, only six years later, it had been doubled, and in a little less than four years more it had climbed to \$3,000,000,000.

The construction program for a new outside plant in the Bell companies in 1928, is estimated at about \$170,000,000. Large amounts of new material will be required.

For the convenience of the general public, pay station equipment representing an investment in booths and fittings alone of more than \$15,000,000 has been

placed in hotels, railroad stations and public places.

Company-Owned Buildings. The total investment in station equipment, including private branch exchanges, is \$900,000,000 and the gross construction expenditures in 1928 for this part of the plant in order to care for growth and station turnover, will be almost \$100,000,000.

A large number of the 6,000 buildings in use in the system are company-owned, and these properties represent a capital investment in land and buildings of \$311,000,000. It is estimated that close to \$40,000,000 will go this year into the purchase of new land and the erection of new buildings to provide for the current and future needs of the business.

The investment in so-called general equipment amounts to more than \$54,000,000, of which some \$23,000,000 is for office furniture and fixtures. Eighteen million dollars is invested in a motor fleet of 14,000 vehicles, and \$12,000,000 in various tools and implements.

With an average net growth in telephones of about 700,000 a year, and with the efforts further to improve and extend the service in keeping with the increasingly higher standards of living and material comforts which this country enjoys, the investment in Bell System plant bids fair to continue to grow.

Baldwin Works Site To Be Sold, Worth Millions

PHILADELPHIA, Pa. — The Baldwin Locomotive Works, which moved its entire plant to Eddyston, Pa., recently, intends to sell its old site, in the center of Philadelphia. The sale will be the largest real estate transaction in the history of Philadelphia, as the 20-acre site is valued at between \$25,000,000 and \$30,000,000.

The tract will be divided into units for individual purchasers. Samuel H. Vauclain, president of the Baldwin Locomotive Works said. The present factory buildings will be razed and it is expected that modern office structures will occupy the site on which the Baldwin plants have been located since 1835.

In the event that the property is not sold in the immediate future, it will be leased with provision for recapture by the company in the event that a sale is effected later. Mr. Vauclain added.

The property is bounded on the east by Broad Street, on the north by Spring Garden Street, on the south by the Pennsylvania Avenue subway and the Philadelphia & Reading Railroad and on the west by Seventeenth Street. The area covered by the round houses in the Parkway, which is not a part of the main site, will also be offered for sale.

SUITS FILED

- Churches -

Christian Church

Last Sunday we did not have any services at all. Quite a number of the members attended the encampment at Cisco. And enjoyable day was spent.

It is vital to each one and is vital to the whole church. Invite some one to come with you. "I was glad when they said unto me, let us go unto house of the Lord."

Rev. M. Collins, Acting pastor.

Christian Science Society, Lamar and Plummer Streets Sunday services 11 a. m., Sunday School 9:45 a. m. Testimony meetings, Wednesday, 8 p. m. Reading room open Wednesdays and Saturdays, 2 to 5 p. m. All are welcome.

Presbyterian Church

Rev. L. R. Hogan, pastor of the Presbyterian church, is attending the Presbyterian church conference at Buffalo Gap, and it is announced there will be no service in the Eastland church Sunday morning or night. Sunday School will meet, as usual, at 9:45 o'clock.

Methodist Church

"How to Make the Modern Home More Than a Mere Illing Station" will be the subject of the Rev. Frank E. Singleton, pastor of the Methodist church, Sunday morning. The night program will be in celebration of Sunday School day. Special music has been arranged for both services.

Baptist Church

Pastor W. T. Turner has returned from the Leuders encampment and will preach Sunday at 11 a. m. The Sunday School meets at 9:45 a. m., Ed T. Cox, superintendent. The B. Y. P. U.'s meet at 6:30 p. m. Miss Moore, director. There will be no service at the evening hour as the pastor will begin a revival meeting at Olden Sunday night.

St. Francis Xavier

Mass at 8 a. m. This is the seventh Sunday after Pentecost. In the gospel of St. Matthew 8:15-21, we read: "At that time Jesus said to his disciples, 'Beware of false prophets, who come to you in the clothing of sheep, but inwardly they are ravening wolves. By their fruits you shall know them. Do men gather grapes of thorns, or figs of thistles? Even so every good tree bringeth forth good fruit, and the evil tree bringeth forth evil fruit. A good tree cannot bring forth evil fruit, neither can an evil tree bring forth good fruit. Every tree that bringeth not forth good fruit, shall be cut down, and shall be cast into the fire. Wherefore by their fruits, you shall know them. Not one that saith to me, Lord, Lord, shall enter into the kingdom of heaven; but he that doeth the will of my Father who is in heaven, he shall enter into the kingdom of heaven.'"

Perservice Wins Convict Freedom

By United Press. DORDOGNE, France. — Five times imprisoned in a French penal colony and four times escaping, Jacques Guy, of Verde, near here, at last has been pardoned.

His friends have started a subscription to bring him back to his farm and young French wife, whom he married during one of his periodical escapes. The ceremony is said to have taken place in the United States, where both were employed as servants in a wealthy American family.

Guy was convicted of complicity in a theft and sentenced to eight years at Saint-Laurent-du-Maroni. Whether or not with the connivance of the guards he found little difficulty in breaking from the penal institution. After his last evasion he rejoined his wife in France and became the proprietor of a small farm, where he was arrested. The ministry of justice ordered his transfer to a stouter prison but approved an appeal for his release when convinced that during his absences from the prison he had lived an honest life.

"How Do They Get That Way?"

NOBLESVILLE, Ind.—Dr. Earl Brooks, president of the local park board propounds the following questions on human behaviour: "I visited the park and observed 35 persons playing on the golf course. A heavy shower came up but the players continue their game just the same. There were 53 persons in the bathing pool when it began to rain and every one of them rushed out of the water to the shelter house. 'I have seen that happen several times and it is more than I can understand.'"

New Wonderful Cleansing Cream

Wouldn't you like a Cleansing Cream that will not stretch the skin, yet goes down into the pores and releases all grime and dirt? This new marvelous Cream contains Cocoa Butter and is highly beneficial to dry skins. Heals sun and wind burn. Ask for MELLO-GLO Cocoa Butter Cleansing Cream.—Texas & Corner Drug Store.

EXPLORERS ON HUNT FOR THE ICEBERG PATH

More Than \$125,000 Posted For Races To Los Angeles, Calif.

By LYLE C. WILSON
United Press Staff Correspondent
WASHINGTON.—Lieut. Commander E. H. Smith of the United States Coast Guard has sailed from Boston to survey the foggy waters between Greenland and Labrador in an effort to learn the story of the iceberg from the time it plunges into the sea from a Greenland glacier until it disappears into the warm waters of the Gulf Stream.

The cruise of Smith aboard the 225-foot motorship Marion will be a practical tribute to the memory of 1,571 persons who died April 5, 1912, when the White Star liner Titanic struck an iceberg and sank off the Grand Bank of Newfoundland. The Titanic disaster shocked the world. The vessel was on her maiden voyage to the United States when she smashed her bows against a glittering mountain of ice.

Fourteen marine nations therefor undertook to prevent a repetition by patrolling the berg drift waters southeast of Newfoundland. Costs of this patrol were shared among the nations. The actual work is performed by the United States Coast Guard. No ice has been lost due to collision with ice in the patrolled area since the Coast Guard began its vigil 14 years ago.

Tourists and business men and women from all parts of the world have enjoyed the security provided each spring by the Coast Guard, probably without realizing that two small cutters in the north were protecting them from the fate of the Titanic's passengers. The two cutters go north each March from Boston and remain on duty until the danger passes, usually in July. Daily wireless reports reach all skippers within 400 miles of the ice field. Tramp steamers and great liners alter their courses upon this counsel from the North.

To Solve Several Puzzles.
Smith and the crew of the Marion will endeavor to discover where bergs go after they have been sighted in the north and drift over the horizon on their journey southward. Other puzzles which Smith will seek to solve include:

1. Does a branch of the Gulf Stream actually dive to the bottom and finally emerge far north in Baffin Bay?
2. Is the Labrador current a continuous overflow from the Arctic Ocean?
3. Does the East Greenland current stretch all the way across Labrador?
4. Why is the west coast of Greenland so much warmer climatically than Baffin Land in the same latitude?

Two officers and 20 men comprise the Marion's crew. After leaving Sydney, Nova Scotia, neither fuel nor supplies will be available to them and to meet this difficulty the Marion has been provided with a cruising radius of one quarter the distance around the world.

To Take Many Soundings.
"In addition to the observations of temperature, salinity and current," the Coast Guard announced, "the Marion will take the depth of water every half hour during her cruise by means of an electric set of amplifiers in the hull which will catch each from an electric oscillator sending out its pulsations. The United States Hydrographic office is particularly anxious to have the Coast Guard expedition to the region of Baffin Bay secure as many soundings as possible. There are areas of 50,000 square miles over which the expedition will sail, in which there never has been a sounding made by man."

"Data on storm tracks, percentages of fog compared for both sides of Greenland and Labrador will be part of the useful information to be obtained by the Marion."

The Danish Government is sponsoring a biological and oceanographical expedition which will encompass the entire range of West Greenland waters this summer. It is led by Commander Riss-Cartensen of the Royal Danish Navy who already has sailed in the steamer Godthaab from Copenhagen. Arrangements have been made for the two expeditions to co-operate in their surveys.

The Marion will communicate with the United States on a short wave radio set and all American amateur operators have been requested to relay her messages.

Sports Matter

America's chances to win the Olympic marathon at Amsterdam are wrapped up in little Joie Ray, a blond boaster who has spent most of his life driving a taxicab in Chicago.
Once this country's premier miler, Ray has defied all athletic standards and by a siege of rigorous training developed himself into this nation's outstanding marathon runner.
Running his first competitive marathon at Boston, Ray finished third to Clarence De Mar, the veteran marathon runner. His feet swollen and bleeding, Ray had to have his shoes cut off his feet. Weary of body, but happy because of his showing Ray predicted, "I'll beat De Mar next time."
Ray did. A few weeks later the

former Chicago taxicab driver won the Long Beach marathon in 2 hours, 34 minutes 13-25 seconds, finishing fresh and exuberant. Ray threw a kiss at the Long Beach mayor as he crossed the finish line.
No End Confident
"See those feet," he said in the locker room afterwards, "No blood or blisters. Boy, they're in shape. Now watch me win the Olympic marathon."
De Mar, the veteran, finished in seventh place in the Long Beach marathon, more than a mile behind Ray. Albert (Whitey) Michelson, Stamford, Conn., who was 34th in the Boston marathon, pulled in second in the Long Beach run.
Ray, De Mar and Michelson are America's three best bets for the Olympic marathon. De Mar finished third to Alvin Stenroos of Finland, the winner of the 1924 marathon at Paris, and was the only American to place.
Ray's reputation as a runner is only exceeded by his reputation as a boaster. There is something uncanny about the way the little blonde flyer announces when and how he'll win. As a mile runner he ran the mile in competition six times under 4:20. He holds with Paavo Nurmi the indoor mile record of 4:12. Ray has carried his boasting over into the marathon hold, and brought his astounding ability to win along with it.

The marathon race was originated when a Grecian soldier ran from Marathon to Athens, carrying the tidings that the Persians had been defeated and that Athens was safe. He dropped dead after delivering the message. The distance between these two points is 26 miles, 385 yards, the length of the present marathon.
Kohlemaien Chief
S. Loues, a Greek peasant, was the second man to win the marathon, running through the dusty Grecian roads to capture the Olympic marathon of 1896.
The marathon has been run eight times in the Olympics, the United States and Finland winning it twice and Greece, France, Canada and South Africa once each. F. J. Hicks won the event at St. Louis in 1904 and John J. Hayes won it at London in 1908.
Hayes, who went abroad an unknown catapulted into fame, when he won the 1908 race after Donatondo, a little confectioner from the island of Capri, collapsed 400 yards from the finish line after hearing the procession into the great stadium at London.
Hannes Kohlemaien, winner of the 1920 marathon and holder of the Olympic record of 2 hours, 32 minutes, 35 4-5 seconds, is in training for this year's event and will again be a competitor along with Stenroos, the 1924 winner.
Ray's stiffest competition is likely to come from Kohlemaien and Stenroos, but the remarkable little runner says he'll beat both of them. And when Ray says he'll win, he most always does.

Mathematic Duel Looms

MOSCOW.—A conflict of two mathematical gladiators, with adding machines presumably as referees, looms on the horizon. Russia's marvel of figures, Nicholas Shishkin, has challenged Germany's animated multiplication machine, S. Krieger, to a duel to the death, so to speak.
The challenge was issued through the Society for Cultural Relations with Foreign Countries, headed by Mme. Olga Kamenova, and was featured by the press. No decision has been reached by the journalistic fraternity, however, whether the sports department or the bookkeeping department of the newspapers will keep the tally.
Russia's foremost scientists have declared that Shishkin's capacity for doing mathematical operations "in his head"—from ordinary additions to the most complicated logi-arithmetic problems—is one of the world's wonders. Krieger has received the same commendation from German scientists.

I HEAR YOU CALLING.

CORPUS CHRISTI.—Building permits issued here on recent day totaled \$16,500.

Hooks and Slides
Couldn't Say Otherwise
It may be for the reason that he is more or less interested in the heavyweight champion, but Bill Gibson, who is Gene Tunney's manager of record, insists that the current school of heavyweight fighters compares favorably with the older generation of which so much is said by the old timers.
"Tunney is just as great a champion as any of his predecessors," Gibson said. "Tunney has whipped more better fighters than any of the other champions and he is farther ahead of his contenders than any of the old timers."
"All of the old time fighters could be hit too easily. Fitz was a great fighter and a great champion, but I would lay dough that he could not take the punches of Dempsey like he took those of the best fighters in his day."
"The fighters today are tougher and hit harder. I think that Knute Hansen could have beaten a lot of those old timers and Hansen isn't way up on the list today. Risko and Heeneey are tougher than any of those old birds and I doubt that Jeffries or Corbett or Fitz could have knocked either one of them out."
Two Years For John
Since Risko beat big Godfrey there has been a lot of talk that he should be in the ring this year with Tunney instead of Heeneey, but Gibson argues that when the match was made Heeneey was the outstanding fighter of all the contenders and he still is the best man available.
"Heeneey beat Risko in Detroit," Gibson said. "Risko and Danny Dunn will admit that Heeneey won that fight. So that surely would give Heeneey the edge. Also there are a lot of smart fans who think that Godfrey beat Risko in their recent fight and that the negro should have gotten nothing worse than a draw."
"I always have thought that Risko is a tough fighter with a great heart. When Tunney had a match offered him in Cleveland a couple of years ago I wanted him to take Sully Montgomery, but he insisted upon taking Risko. Everyone knows that Tunney had a sore hand before he went into that fight, but someone had told him that all Risko could do was take it and he took the match. nd you know what a fight Risko gave him."
Very Brave Fellow
Tunney admits also that Risko is a good fighter, but the champion says he will not be ready for two years.
"Risko is a very brave fellow," Tunney said. "But he has not developed fully yet. I would prefer to have him in the ring instead of Heeneey because I regard Heeneey as the toughest man in the class. I didn't pick Heeneey, I told Rick-

Building Cost Shows A Gain For The Month

WASHINGTON.—Restoration of the cottage bought by George Washington for his mother and where she spent her last years in Fredericksburg, Va., is being planned as a part of the commemoration of Washington's bi-centennial anniversary.

Mary Washington was at first reluctant to leave the farm on the Rappahannock where she had been living when her famous son planned to establish her in a town home but she was soon reconciled to the change and came to like being near church and neighbors. The greatest pleasure that it brought her was proximity to her only daughter, Betty, who had married Col. Fielding Lewis and lived on the beautiful estate, Kenmore. Indeed, the property bought by Washington for his mother had been a part of the Kenmore estate. He purchased it in 1772 and his mother made her home in it from 1775 to 1780, when she passed on.

As it was when Washington bought it, the house with its out-side kitchen, servants' quarters, and garden, occupied a square, and Mrs. Washington could walk through the box-bordered paths of her garden to her daughter's house. A part of this box remains. The house consisted of the "chamber" dining room and hall below, with a half-story above. Washington added the "great room," with its half-story above for the comfort of his mother.

The house has had various owners in later years. No one thought much of its importance until 1890, when an agent came from Chicago

Virginians Plan To Restore Cottage of Washington's Mother

WASHINGTON.—The cost of construction increased slightly during June, according to statistics just compiled by the Associated General Contractors of America. The rise, which is the first to be recorded since September, 1927, interrupts the movement toward lower levels which has prevailed during recent months.

Despite the increase, the cost average remains below the position it occupied one year ago. It is slightly above the mark recorded for June, 1926.

The average of construction costs for the first six months of the current year was appreciably lower than the corresponding figure for the first half of 1927.

A marked feature of the trend of costs this year is found in the comparatively small amount of fluctuation. Only two changes have been noted since last November, one being a decline in March and the other being the increase shown last month. At no time since the early part of 1925 has this degree of stability been witnessed.

The June increase is attributed to a rise in the average of costs of basic construction materials. This movement followed a series of decreases which combined to form a definite downward trend that began last September.

The average of wages paid in the major construction centers of the country showed a decline during June, this being the first change since January of this year and the second since February, 1927. The decline was not sufficient, however, to counter-balance the increase in the cost of materials.

THE WORLD HAS A NEW AND FINER MOTOR CAR

Salon Body Design

The new Salon Body design for the new "400" series was developed after extended personal study by Mr. Nash himself of the latest creations by European body artists of international fame.
Original ideas in body artistry were co-ordinated with the most modern developments revealed in foreign and American Salons.
And the Salon Nash design is the perfected result—a new body type of the most modern beauty.
It could fittingly adorn a chassis priced at many thousands of dollars. Nash invested a fortune in dies and machinery to create it.
But you may avail yourself of it on a line of cars notably moderate in price.
In body design, as in other important features, Nash has again outstripped all competition.
The World has a new and finer motor car—with a radically new and finer type of body.

\$735 and up War Tax Off

Essex mirrors public choice

The enormous spread of Essex success is due to an accumulation of values never approached under \$1000, which is perfectly obvious to the ordinary buyer as well as the expert.

At \$735 and up you not only get the brilliant performance and reliability of the famous Essex chassis; you also get a satisfaction, in appearance, richness and comfort, never even considered within hundreds of dollars of the price.

As you lounge in the roomy, high-backed form-fitting seats, every evidence of quality and comfort surrounds you.

You have before you every control in their most natural and handy place. And all about you, the panelling, the weather-stripped doors, the silenced body construction, the floor matting and the hardware in graceful silvery patterns speak quietly and certainly of quality.

The Essex Super-Six high compression motor is patented and exclusive, and is so far as we know the most powerful of its size in the world.

Learn That Fertilization Makes It Unnecessary To Fertilize Soil Where Seed Is Planted

Calif.—A method of fertilization of seed on a large scale before sowing, has been discovered by a University of California scientist.

The method is designated by the name of "pre-sowing fertilization" and is one of the most important discoveries in the history of the soil.

Experts point out that the method makes it possible to grow crops in soil without the use of fertilizers.

The method is being used in California and other states. It is a simple process and can be applied to all crops.

The method is being used in California and other states. It is a simple process and can be applied to all crops.

SURVEY SHOWS SMALL AMOUNT OF CRIME NEWS

Students In Journalism Measure 100 Newspapers With Surprising Result.

BY GEORGE GODFREY
In Publishers' Auxiliary
CRATER LAKE LODGE, Ore.
Convincing evidence that the American newspaper of today is not as sensational as most people think, is disclosed in a survey just completed by the senior class in editing at the University of Oregon school of journalism.

The survey conducted under the direction of Dean Eric W. Allen of the school of journalism, attracted wide attention among newspapermen when it was presented here at the annual session of the Oregon State Editorial Association by Dean Allen.

Two lines of survey were conducted along two separate lines, the one to determine the popular idea of just how much sensational material appears in the columns of the newspapers, and the other to check this with actual measurements of the contents of the papers.

The students themselves were surprised to find, after actual measurements of a representative group of newspapers covering a period of 75 years, that modern papers carry on an average only 1.4 per cent of such news.

The papers measured included the Detroit News, Cleveland Press, Baltimore Sun, Cleveland Plain Dealer, Portland Oregonian, San Fran-

isco Chronicle, Portland Oregon Journal, Los Angeles Record, Los Angeles Times, New York Times, New York Evening Post, Milwaukee Journal, Denver Post, New York Herald Tribune, Chicago Tribune, St. Louis Post-Dispatch, Chicago Daily News, New York Daily News (a tabloid) Eugene Register, Portland News, New York World, Spokane Press, Seattle Times and Brooklyn Eagle.

Check Up on Greeley
The next step in the survey was to check up on Horace Greeley, to whom critics of the modern newspapers often point as an exponent of crime-free journalism.

To be fair to Greeley, however, the student investigators considered the fact that his papers carried about 25 per cent advertising while the average in the modern newspapers measured was a little under 60 per cent.

Newspaper Man Reveals New Facts About Epic Poem of the Revolution

BROCKTON, Mass.—Elroy Sherman Thompson's sprightly and entertaining article in the quarterly issue of Americans, magazine of the American Historical Society, interests this district.

The author was John Trumbull, L.L.D., whose ancestor came from England in 1645, for a time a law student in the office of John Adams, second President of the United States, Congress was in session at Philadelphia when Trumbull wrote the first of Cornwallis had placed victory's wreath on the brow of Washington.

Then Yankees, skilled in martial rule,
First put the British troops to school,
Instructed them in warlike trade
And now manoeuvres of parade.
Made them give up, like saints complete,
The aim of flesh and trust the feet.
And works, like Christians undismembering,
Salvation out, by fear and trembling;

DELEON TRADES DAY CROWD HEARS SHANKS

DeLEON, Texas, July 11.—Addressing a trades day crowd here Tuesday afternoon, Homer Shanks of Clyde, candidate for Congress in the 17th district told his audience that his program if elected, will be to prevent market manipulation, provide for handling surplus crops and to bring factories to West Texas.

Shanks was liberally applauded while he was presenting his address, which often took a humorous trend.

Shanks declared that because of his occupation as a banker and business man and also as the operator of farming property now and in the past, he believed himself to be in closer contact with the farming people than any other man in the race.

Following his address, Mr. Shanks left for Moran, Albany, Winters, Ballinger and other points where he will speak during the week.

After commenting in severe terms upon the calamities resulting from the reign of the wicked, the writer says, "he remarked: 'We need not pass the limits of our own nation for sad instances of this. Whether or how far it has been exemplified in any of the American colonies, whose governments in general are nearly copies of the happy British original, by the operation of ministerial unconstitutional measures, or the public conduct of some among ourselves, is not for me to determine. It is, however, certain that the people mourn.'

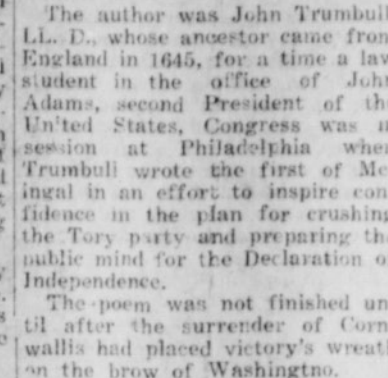

That house, which loth a rule to break,
Served heaven but one day in the week,
Open the rest for all supplies
Of news and politics and lies.

Rev. Gad Hitchcock of Hanson, who figures in the narrative, was a member of the convention which framed the Constitution of Massachusetts in 1765 and preached the election sermon in the presence of General Gage in 1774, taking for his text: "When the righteous are in authority the people rejoice; but when the wicked beareth rule, the people mourn."

The poem was not finished until after the surrender of Cornwallis had placed victory's wreath on the brow of Washington.

Published anonymously, it was at first thought to have been composed by an Englishman. It dealt with situations in Plymouth colony and told the truth about the Revolutionary war.

"WHO WOULD PAY SUCH A PRICE FOR A TIRE!!"

A natural question until you have inspected this distinguished new type of tire at our store. Then you'll understand why the GOODYEAR DOUBLE EAGLE is, for many of those who are buying it, more than a mere indulgence in the finest thing of its kind. It's the talk of the town. Come in, just to see it and to know all about it.

We are showing a tire such as the world has never seen—the new GOODYEAR DOUBLE EAGLE.

Built without limit as to cost—Goodyear's 30th Anniversary achievement. Admittedly a better, costlier tire than most people need.

It should last as long as the average owner uses his car. Virtually puncture-proof and free from risk of blowout, no tire has ever, we believe, withstood such abusive tests of speed and endurance.

Perhaps you've noticed it adding further distinction to swift, smart cars. True, their owners can afford the finest things money can buy.

But the real reason for purchase is actual, unusual need. Their cars are driven harder, faster, over more destructive roads and cover more ground yearly than most cars.

Even oversize, extra-ply or heavy duty tires proved none too good for them. They needed still greater strength, endurance. A new type—a super-tire. The GOODYEAR DOUBLE EAGLE will lower their costs per mile. Come and see it.

Important Features of the "Goodyear Double Eagle"—the Tire of Tires

- 1 The finest, strongest, hand-somest tire that money can buy.
- 2 The deep-cut, tractive All-Weather Tread is practically double-thick.
- 3 The toughest and longest-wearing rubber compound in this tread Goodyear has yet developed.
- 4 The body of the tire is built of extra-heavy SUPERTWIST cord fabric, to a new oversize dimension both in cross-section and overall diameter.
- 5 More plies of cord fabric; more rubber between the plies.
- 6 Lined with an extra layer of rubber to protect the cords from moisture.
- 7 Special low temperature cure.
- 8 The finest materials, the finest construction, regardless of cost.

Advocates Importance of the Sheep and Goat Industry in West Texas

CISCO, July 12.—Texas as a state, and the United States as a nation, are not as proud of the sheep and goat industry as they should be, according to R. Q. Lee, former president of the West Texas Chamber of Commerce, who is now engaged in the campaign for congressional from the Seventeenth Congressional district. Lee himself, has a large flock of goats and has produced much mohair upon his Stephens county ranch. He has made quite a study of the wool and mohair industry of the nation and it was during his administration as president of the West Texas regional chamber of commerce that he secured recognition of the importance of the sheep and goat industry, by requiring that they be added to the lithographed letter head on other literature of the organization which hitherto had not recognized the sheep and goat man.

Texas produces more than half of the entire national production of mohair and this production is almost entirely in West Texas. In addition the state produces a large percentage of the wool produced in America. This industry brings millions of dollars into Texas annually and has made profitable a large area of the state which was at one time pictured in the geographies used in the public schools as a "barren desert unsuited for any practical purpose." Dozens of the best towns and cities of Texas depend to a large extent upon the wool and mohair. Comparatively few people of the state and nation are aware of the proportions which this great industry has assumed.

The United States government has done some good work for the industry through its work in eradicating predatory animals. However, the government's appropriation for this work is notoriously small when the area which it covers is considered. Today there are a number of West Texas counties which desire Federal aid in exterminating wolves but this aid cannot be had because of the small appropriation available. This not only works a hardship on the counties needing aid themselves but it causes to be maintained on the borders of counties which have exterminated their wolves, a big territory in which wolves are raised by the thousands to invade the counties which have been cleaned. The counties affected are doing their part nobly at present and through county wolf clubs are making good progress but Lee declares that the federal government should render more aid to the end that these animals as well as bobcats and other pests could be eliminated at the earliest moment.

The government readily appropriated ten million dollars to fight the corn borer. Recently congress hastened through a bill appropriating five million dollars to control the pink worm. Lee declares that the government deserves nothing but praise for this work but he favors that the same consideration be shown the producers of wool and mohair that was accorded the producers of cotton and corn. Predatory animals are as great a menace to the raiser of sheep and goats as insects are to the producer of cotton and corn, and the value of the work to the country is as great.

Although Mr. Lee is a democrat and a believer in the democratic principle of "Tariff for Revenue," he is a firm believer in the equity of the present tariff on wool and mohair which has brought prosperity to the sheep and goat country. He believes that as long as the government extends a protective tariff to the manufacturers of wool and mohair products the same protection should be given to the raw product. He defended this measure at the head of the world's largest regional chamber of commerce.

Upon his model diversified farm which he operates at Cisco, Mr. Lee has a flock of sheep and a flock of goats. He has secured the best stock possible to secure, and is keeping a record of the revenue from these flocks and a record of the costs. He plans to publish this record at the end of the year to have the value of his industry to the farmer and to the state.

RICH PRIZES ARE OFFERED IN AIR DERBY

Coast Guard Commdo To Study Atlantic's Floating Glaciers

By GEORGE H. BEALE United Press Staff Correspondent LOS ANGELES.—More than \$125,000 in prizes, said to be the largest amount ever posted for a similar affair, will whet competition in the 1928 National Air Races and Aeronautical Exposition to be staged in Los Angeles Sept. 8 to 16.

A sextet of transcontinental air derbies will feature the meet. Heading the group is the New York to Los Angeles free-for-all non-stop race. Total prizes for this event will be \$22,500.

A second New York to Los Angeles flight will be open only to civilians. The result will be determined by elapsed time and the race will be conducted through controls. The purse will aggregate \$40,000.

Ten thousand dollars will be paid to the winner of the derby from Windsor, Canada, to Los Angeles, open to Canadians only.

A similar sum will go to the plane which finishes first in the Pan-American race, from Mexico City.

Other events include two California air races from the San Francisco bay region to Los Angeles, airline distance contests, endurance record flights, all types of speed races around pylons, parachute jumping, pursuit races and a number of special events for army, navy and national guard fliers.

On the date of the finish of the New York to Los Angeles non-stop flight, "Famous Fliers Day" will be observed. It is expected that Orville Wright and most of the trans-oceanic, round-the-world and army and navy fliers will be present.

A score of conventions will be held during the meet. These include the National Aeronautical association, the National Association of Air Mail Pilots, the Professional Pilots Association and the Society of Automotive engineers meetings.

Some 1,500 planes, attended by 5,000 pilots and technical experts will be attracted by the races, it is believed.

WEAR SHEETS

SANTA FE, N. M.—When the casual tourist visits the Taos Indian Pueblo near here and sees an Indian walking down the street attired in a sheet, he is viewing an official of the tribe, and not an Indian fresh from his bath.

The custom of Indian officials wearing sheets has been traced back to 1692 when, in that year, the Indians went on an uprising, massacred priests and Spanish colonists and captured Santa Fe. General De Vargas quelled the uprising and restored Santa Fe to Spanish rule.

But when the time came for Indian officials to be recognized at government meetings it was found the redmen lacked sufficient clothing. To solve the problem, De Vargas decreed that Indian officials wear a white sheet as a mark of dignity.

HAS OWN DRUMMERS. HAVANA, Cuba.—A small army of traveling salesmen to tour the principal countries exhibiting examples of Cuban products will be created by a law to be submitted to congress soon.

These traveling agents will be under the direct supervision of the Cuban state department and will endeavor to intensify commercial relations with other countries by means of samples and printed propaganda.

NEW CALENDAR TAKES DECIDED STEP FORWARD

Problem of 13-Month Year Being Studied In All Its Phases.

NEW YORK.—A group of nationally prominent men and women will meet in Washington on July 9 to consider a problem which has puzzled mathematicians since the Egyptians built the first obelisk and recorded time as its shadow moved across the desert sands. They want to simplify the calendar.

Julius Caesar made an error of two-thousandths of one percent and threw the world 10 days out of joint. Cleopatra, Gregory, Augustus, Sosigenes—some of the foremost names in history—have been linked with calendar study and reform. Astronomers and natural scientists have devoted their lives to calendrical calculus, but not one of them has arrived at the answer to the simple question: "How long is a month?"

For a month may be 30 days or 28. It also may be 31 days and, occasionally, 29. One can't tell just how long it is without reciting, "Thirty days hath September"—or "counting on his knuckles."

June, Sol, and July. The proposed simplified calendar would make all the months of the year uniform. Each one would contain 28 days. The extra days would be utilized to make a thirteenth month, to be known as "Sol." It would fall between June and July. With this system the calendar for every month, year after year, would be the same. It would look like this:

Table with 7 columns: S, M, T, W, T, F, S. and 7 rows of numbers 1-28.

With the system of 13 months of 28 days each, the simplified calendar proponents say, there would be no day left over in each year. This would be called "Year-Day," and would be the last day of the year, being a holiday corresponding to that of New Year's Day. Leap year would be treated in the same manner, save that as "Leap-Day" it would be inserted in the middle of the year as an extra holiday, falling on June 29.

Always Something Left Over. The entire difficulty over the calendar, which has plagued experts into higher mathematics, is that the year is not an exact number of days. It is actually 365 days, 5 hours, 48 minutes and 46 seconds. No matter how it is divided, something is left over.

Recent historical research has disclosed that Moses was probably the first person to invent a simplified calendar. He divided the year into 52 weeks of seven days each. This gave a total of 364 days. To account for the three hundred and sixty-fifth day, he inserted one extra Sunday in the middle of the year, working upon the same theory which has led the simplified calendar experts to arrange "Year-Day," which would not be included in the regular calendar rotations.

But Moses was also confronted with the odd quarter-day each year. His idea was to add a "leap week" once every 28 years, which would approximately make up the difference.

The Mosaic calendar was only one of a number of ways of recording time which were in use. The numerous ways of computing time resulted in many complications. And Cleopatra, according to some historians, was responsible for one of the first concerted efforts to make the calendar really coincide with the earth's rotation around the sun.

Cleopatra Promoted Calendar. That was in 46 B. C. when Alexandria was the center of culture. This city was the home of Sosigenes, a famous astronomer. When Cleopatra made her first trip to Rome, Sosigenes accompanied her and under the commission of Julius Caesar, worked out what has become known as the Julian Calendar.

Sosigenes based his computations on a year of exactly 365 1/4 days, so that the calendar which Caesar approved was just 11 minutes wrong. By 1582 the calendar was actually 10 days behind the sun. Through a decree of Pope Gregory XIII a new calendar was placed in effect which brought things up to date. This was the "Gregorian Calendar," which is in use today. By eliminating one leap-year every 130 years, this error is prevented from recurring.

But these improvements still left the calendar with unequal months and with the day continually falling on different dates. Moses B. Cotsworth, a British statistician, developed a simplified calendar method, which was chosen after three years of study by the League of Nations from 185 proposals submitted from 33 different nations.

First of Month Always Monday. The League of Nations proposal for the formation of a committee in the United States to consider the question was approved by F. B. Kellogg, Secretary of State. The committee, which is headed by George Eastman of Rochester, N. Y., includes high ranking officials of interested governmental departments and a section composed of men and women prominent in economic and social life. Its conclusions following a poll to determine national sentiment on the question will be submitted

to Mr. Kellogg with a view to ultimate consideration by an international conference.

In summing the advantages claimed for the simplified calendar scheme, its proponents declare that it would greatly facilitate both business accounting and home budgeting. Various adaptations of the "four-week month standard" are in use in accounting departments of several railroad concerns.

The simplified calendar, it was added, would make the first of the month always fall on Monday and end fractions of the week—making all periods for earning and spending either equal to or exact multiples of one another.

Holidays Same Day Each Year. All holidays, under the proposed arrangement, would fall on the same day and date each year. This would include Easter. Many of the holidays, it was added, could be arranged so that they came on Monday, resulting in longer week-ends and the elimination of industrial wastes resulting from operating on the single work-days separating two holidays.

The major objections to the simplified calendar, it was said, are that the figure 13 is not divisible by 2, 3, 4 or 6. With 13 months, the quarters of the year would not contain a whole number of months. There would also be 13 monthly closings, reports and statements, instead of 12, with one blank day.

Proponents of the simplified calendar however, declare that quarterly adjustments are relatively small and that the additional clerical work necessary in preparing 13 monthly statements instead of 12 would be more than offset by the elimination of other adjustments. The chief difficulty which is being encountered is the fact that the 13-month calendar would change an established custom, they add. The effort through the League of Nations is being made to have alteration as broadly international in scope as possible.—Christian Science Monitor.

G. O. P. Plans To Elect The State Ticket In Texas

DALLAS, July 1.—Republicans of Texas, already claiming that Texas will turn to the Hoover-Curtis combination in the national election, began a campaign this week to elect an entire state ticket.

That the republicans have an excellent opportunity to carry Texas, is the belief of Leonard Withington, executive secretary of the Texas republicans.

The republicans are not going to conduct their campaign in any half-hearted way, but will make a strong bid for all offices and vigorously carry on their campaign, Withington said.

Among the outstanding men, from which it is likely that a candidate for governor will be named, are Dr. George C. Butte of Austin; Henry Zweifel and T. P. Lee, Fort Worth, and Arthur Reinhardt, Dallas commissioner.

There is also a possibility, republican leaders pointed out, that Orville C. Bullington of Wichita Falls will be a candidate for the United States senate.

Butte in his race against "Ma" Ferguson received 298,087 votes. Republicans contended that some 80,000 more votes were cast for him, but were written on the democratic ballot and thrown out.

The republican party will hold its precinct conventions July 28. At that time precinct chairmen and county chairmen will be chosen. The county conventions will be held Aug. 4, when the vote for county chairmen will be canvassed. Delegates will be named to the state convention to be held in Fort Worth Aug. 14. At the Fort Worth meeting, the full state

Where Style and Comfort Get Together -- at A Saving

Tropical Worsteds SUITS \$19.50

Here's the formula for economical summer smartness — two-piece tropical worsted tailored in our special skeleton construction from porous-weave fabrics of distinguishable quality. Every suit is quarter silk lined and has a shape-retaining front. Curlee Cloth \$29.50 values.

Unmatchable Values!

Spring Underwear with Striped Sleeves

Increasingly popular among athletic young men, shirt and striped shorts, durable washable fabrics, signed for comfort, and tainly smart-looking.
